6. SUMMARY: As a result of completing this form, what are the main positive and negative impacts of your proposal, how have they informed/changed the development of the proposal so far and what will you be doing in future?

Positive: The Affordable Housing Programme continues to support the provision of affordable housing in Main Towns, Severnside Settlements, Rural Secondary Settlements, Main and Minor Villages. Affordable housing makes an important contribution to the sustainability of our towns and villages by providing homes that local people on low incomes can afford to live in. It also a means of providing low cost homes for first time buyers. The provision of affordable housing will generate positive impacts on the local economy, which is essential to the well-being of local communities and residents throughout Monmouthshire.

Future: Monitor the effectiveness of affordable housing policies for the delivery of affordable housing.

Negative: Potential for some negative sustainability impacts where affordable housing development is located in main and minor villages where there is limited public transport and subsequent reliance on the private car, resulting in increased car use in these areas, albeit that this is likely to be minimal given the nature of small scale affordable housing development in rural areas. Therefore, the scope for such negative impacts is limited and will be carefully considered against the need for affordable housing in rural areas.

Future: Annual performance monitoring will evaluate the delivery of affordable housing against housing need and the negative impacts of development.
