Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
A prosperous Wales Efficient use of resources, skilled, educated people, generates wealth, provides jobs	The action plan directly contributes to the Prosperous Wales vision of a low carbon society and action on climate change. There is the potential for green economy jobs to be developed.	
A resilient Wales Maintain and enhance biodiversity and ecosystems that support resilience and can adapt to change (e.g. climate change)	The action plan contributes to more sustainable management of green spaces and includes measures which will build resilience of ecosystems.	
A healthier Wales People's physical and mental wellbeing is maximized and health impacts are understood	Transport measures will improve air quality and increasing walking and cycling will improve physical and mental health.	
A Wales of cohesive communities Communities are attractive, viable, safe and well connected	Many of the actions will involve working closely with local communities to produce local community benefits. Transport measures should increase connectivity between communities, particularly for those without a car.	
A globally responsible Wales Taking account of impact on global well-being when considering local social, economic and environmental wellbeing	Reducing carbon emissions in Monmouthshire will provide a small contribution towards reducing levels of climate change, which are having global impacts including flooding, drought and sea level rise.	
A Wales of vibrant culture and thriving Welsh language Culture, heritage and Welsh language are promoted and protected. People are encouraged to do sport, art and recreation	Welsh language will be used for all Climate Emergency communications in line with the Welsh Language measure.

 Long Term Balancing short term need with long term and planning for the future	The Action Plan sets out how we aim to achieve a target of zero carbon by 2030. This is a plan for the long term, but it requires quick and immediate action now, to reduce the devastating impacts of climate change in the longer term.	
 Collaboration Working together with other partners to deliver objectives	The Climate Emergency Working Group comprises of Council officers, members and members of the community. Many of the actions in the Action Plan are being delivered through collaboration, both with community groups, regionally through Gwent and in south east Wales through the Cardiff Capital Region.	

Sustainable Development Principle	Does your proposal demonstrate you have met this principle? If yes, describe how. If not explain why.	Are there any additional actions to be taken to mitigate any negative impacts or better contribute to positive impacts?
 Involving those with an interest and seeking their views Involvement	Members of the Community Climate Champions represent the community on the Climate Emergency Working Group. Those on the group include Transition town representatives, town and community councils, a community interest company and energy agency. There has been substantial community engagement in the development of the updated action plan, via an online survey, public events and young peoples events.	
 Putting resources into preventing problems occurring or getting worse Prevention	The whole aim of reducing our carbon emissions is to prevent (or at least reduce the scale of impact) of runaway climate change.	
 Considering impact on all wellbeing goals together and on other bodies Integration	.We are in touch with other local authorities across Wales and the UK who have declared a Climate Emergency. We have had guidance from Welsh Government on how they want us to measure and report on zero carbon, so are working closely with them, as well as integrating our work with Cardiff Capital Region activity on decarbonisation. We are also in touch with Town Councils who are considering/have declared a Climate Emergency to think about how we can work together in an integrated way.

Local information about energy and climate change has come from our Wellbeing Assessment, 3rd UK Climate Change Risk Assessment etc.

Data and statistics on energy use, emissions etc has come from the Estates Team and National Statistics data.

The action plan has been informed by an officer workshop, plus comprehensive community engagement including: workshop with Community Climate Champions, community engagement at Usk Show, Monmouth Climate Futures Festival and a community drop in workshop, engagement with young people through Monmouthshire Games and Bronze Young Ambassadors conference, and via an online survey.
