Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 0-50m from the nearest bus stop (White House Lodge) and it intersects with four PRowS (363/339/4, 363/339/3, 363/339/5 and 363/340/1) and a National Cycle Network route (Traffic Free). However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 190m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	++	<i>The site is wholly brownfield land.</i> The site is currently used as a storage yard.
--		<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for sand and gravel.	
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 169m from the nearest SAC and SSSI (River Usk/ Afon Wysg), 195m from the nearest area of ancient woodland, 232m from the nearest priority habitat (purple moor grass and rush pastures), and 388m from the nearest SINC (Waterloo Court).
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	++	<p><i>Regeneration of brownfield land that is currently significantly detracting from the historic environment.</i></p> <p>The site is 9m from the nearest World Heritage Site (Blaenavon Industrial Landscape), 224m from the nearest grade II listed building, 528m from the nearest scheduled monument (St. Faith's Churchyard Cross, Llanfoist), 715m from the nearest conservation area (Abergavenny), and 755m from the nearest grade II* listed building.</p> <p>The site is small (0.3ha); however, it is used as a storage yard which is likely currently significantly detracting from the historic environment. Therefore, development of the site has the potential to improve the setting of nearby heritage assets, particularly the World Heritage Site, which is located to the south of the site.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	-	<p><i>The site intersects with an Area of Outstanding Natural Beauty, National Park or Country Park.</i></p> <p>The southwestern extent of the site intersects with a National Park (Brecon Beacons).</p>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i>
		-	<p><i>The site intersects with surface water Flood Zone 2 or 3.</i></p> <p>Less than 50% of the site is within surface water Flood Zone 2 or 3.</p>

Residential Care

CS0269 – Land at Grove Farm

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	+	<i>The site has good access to existing employment (≤800m from an employment centre).</i> The site is 100-200m from the nearest identified industrial and business site (Westgate Business Park, Llanfoist).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	++	<i>The site has capacity to deliver a significant number of new homes (≥ 100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 210 new homes (residential care).
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	+	<i>The site is within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 700-800m from the nearest primary school (Llanfoist Fawr Primary); however, it is 2.5-3km from the nearest secondary school (King Henry VIII Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it intersects with three PRowS (363/73/1, 363/74/1 and 363/75/1).
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 50-100m from the nearest area of amenity importance and 0-50m from the nearest green space (golf course).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site falls within the Castle and Llanfoist Fawr LSOA, which is amongst the 40-50% least deprived LSOA in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 200-300m from the nearest bus stop (Beech Grove) and it intersects with three PRowS (363/73/1, 363/74/1 and 363/75/1). It is also 193m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site contains a lake and intersects with a river.
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
--		<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for sand and gravel.	

ISA topic	ISA objective	Significant effect?	Commentary
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	-	<p><i>The site intersects or is adjacent to a regionally or locally (LNRs and SINC) designated site and/ or priority habitats/ species.</i></p> <p>The southern extent of the site intersects with a SINC (Grove Farm) (44% overlap). The site also intersects with three priority habitats (lowland fens and reedbeds, purple moor grass and rush pastures, and traditional orchard). In addition, the site is 133m from the nearest area of ancient woodland, 348m from the nearest SSSI (Coed-y-Person), and 444m from the nearest SAC (River Usk/ Afon Wysg).</p>
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	--	<p><i>Development at the site has the potential for a significant negative effect on the historic environment.</i></p> <p>The site contains a grade II* listed building. In addition, the site is 5m from the nearest World Heritage Site (Blaenavon Industrial Landscape), 248m from the nearest grade II listed building, 522m from the nearest scheduled monument (St. Faith's Churchyard Cross, Llanfoist), 613m from the nearest conservation area (Abergavenny), and 990m from the nearest archaeologically sensitive area.</p> <p>The site is large (13.2ha), and as it contains a grade II* listed building and is very close to the nearest World Heritage Site, it is likely to impact their setting.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<p><i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i></p> <p>The site is 190m from the nearest National Park (Brecon Beacons) and will deliver 210 homes (residential care) on agricultural land.</p>

ISA topic	ISA objective	Significant effect?	Commentary
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	-	<i>The site intersects with fluvial Flood Zone 2 or 3.</i> Less than 50% of the site is within fluvial Flood Zone 2 or 3. Notably, fluvial flood risk is isolated to the southeastern part of the site.
		-	<i>The site intersects with surface water Flood Zone 2 or 3.</i> Less than 50% of the site is within surface water Flood Zone 2 or 3. Notably, surface water flood risk is isolated to the central northern part of the site.

Community use / Residential

CS0243 – Land north of the Village Hall

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	-	<i>The site has poor access to existing employment (>1,600m from an employment centre).</i> The site is 2-2.5km from the nearest protected employment site (Cranberry Foods, Abergavenny) and identified industrial and business site (Westgate Business Park, Llanfoist).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	+	<i>The site has capacity to deliver new homes (<100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 49 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	--	<i>The site is >1,600m from a primary school and secondary school.</i> The site is 2.5-3km from the nearest primary school (Llanfoist Fawr Primary) and 5-6km from the nearest secondary school (King Henry VIII Comprehensive).

ISA topic	ISA objective	Significant effect?	Commentary
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it is 12m from the nearest PRow.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 100-200m from the nearest area of amenity importance and 0-50m from the nearest green space (playing field).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Castle and Llanfoist Fawr LSOA, which is amongst the 40-50% least deprived LSOA in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 50-100m from the nearest bus stop (Post Office) and 12m from the nearest PRow. It is also 517m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 17m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>

ISA topic	ISA objective	Significant effect?	Commentary
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently vacant greenfield land.
		--	<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for sand and gravel.
Biodiversity and geodiversity		Protect and enhance biodiversity within and surrounding the plan area.	--
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire's cultural heritage.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i> The site is 36m from the nearest grade II listed building. The site is relatively large (3.5ha) and in close proximity to the two nearest grade II listed building, which are both located on Llanelen Bridge to the east. Therefore, it is likely to impact their setting.
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 518m from the nearest National Park (Brecon Beacons).
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	-	<i>The site intersects with fluvial Flood Zone 2 or 3.</i> Less than 50% of the site is within fluvial Flood Zone 2 or 3. However, it is recognised that this is isolated to the northeastern extent of the site.
		-	<i>The site intersects with surface water Flood Zone 2 or 3.</i> Less than 50% of the site is within surface water Flood Zone 2 or 3. However, it is recognised that this is isolated to the northeastern extent of the site.

Education

S0020 – Land west of The Chase

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	-	<i>The site has poor access to existing employment (>1,600m from an employment centre).</i> The site is 4-5km from the nearest protected employment site (Woodside Industrial Estate, Usk) and identified industrial and business site (South Woodside, Usk).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	+	<i>The site has capacity to deliver new homes (<100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 20 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	--	<i>The site is >1,600m from a primary school and secondary school.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 5-6km from the nearest primary school (Usk Church in Wales Primary) and 15-20km from the nearest secondary school (Caldicot Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i>
		+	The site is not within 800m of a health service; however, it is 136m from the nearest PRoW.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 300-400m from the nearest area of amenity importance and green space (public park or garden, play space, and allotments or community growing spaces).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Llanyby Fawr LSOA, which is amongst the 20-30% least deprived LSOA in Wales.
		+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 400-500m from the nearest bus stop (White Hart Inn and Walnut Tree Cottage) and it is 136m from the nearest PRoW. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site does not intersect with an AQMA.</i>
		-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	
	To conserve, protect and enhance the water environment, water quality and water resources.	-	

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 6m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
		--	<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for sand and gravel.
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i> The site is 49m from the nearest SINC (Whitehouse Farm Woods), 90m from the nearest area of ancient woodland, and 375m from the nearest priority habitat (traditional orchard).
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire's cultural heritage.	?	<i>Development at the site would have an uncertain effect on the historic environment.</i> The site is 260m from the nearest grade II listed building, 467m from the nearest grade II* listed building, and 533m from the nearest scheduled monument (Ffynnon Cybi (St. Cybi's Well)). The site is relatively small (1.2ha) and unlikely to impact the setting of the aforementioned heritage assets as they are relatively far from the site and primarily screened by existing development. However, uncertainty is noted as there is a grade II listed building located in the open countryside to the southeast of the site.

Page 1007

ISA topic	ISA objective	Significant effect?	Commentary
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	+	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface water flood risk area (Flood Zone 2 and 3).</i> Whilst the site is within Flood Zone 1, it is noted that the area directly to the north of the site is at risk of surface water flooding.

Llanover

Residential

RS0140 – Land south of Rhyd-y-Meirch

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	-	<i>The site has poor access to existing employment (>1,600m from an employment centre).</i> The site is 5-6km from the nearest protected employment site (Mamhilad and Cranberry Foods, Abergavenny) and identified industrial and business site (Westgate Business Park, Llanfoist).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	+	<i>The site has capacity to deliver new homes (<100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 32 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	--	<i>The site is >1,600m from a primary school and secondary school.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 3-4km from the nearest primary school (Goytre Fawr Primary) and 8-9km from the nearest secondary school (King Henry VIII Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it is adjacent to a PRow.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 0-50m from the nearest area of amenity importance and green space (playing field).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	?	<i>The site falls within one of the 30-50% most deprived LSOAs in Wales.</i> The site falls within the Llanover 2 LSOA, which is amongst the 40-50% most deprived LSOA in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 100-200m from the nearest bus stop (Post Office) and it is adjacent to a PRow. It is also 251m from the nearest National Cycle Network Route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 20m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site comprises vacant grassland.
		+	<i>The site does not intersect with a mineral safeguarding area.</i>
Biodiversity and Geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i> The site is 2m from the nearest area of ancient woodland, 79m from the nearest priority habitat (lowland fens and reedbeds), and 878m from the nearest SINC (Wern Fawr South East Corner).
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire's cultural heritage.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i> The site almost wholly intersects with a conservation area (Llanover) (98% overlap). In addition, the site is 16m from the nearest grade II listed building. The site is relatively small (1.2ha); however, as it almost wholly intersects with a conservation area and is in proximity to several grade II listed buildings, it is likely to impact the setting of these heritage assets.
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either</i>

ISA topic	ISA objective	Significant effect?	Commentary
			<i>adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i>
			The site is 250m from the nearest National Park (Brecon Beacons).
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface water flood risk area (Flood Zone 2 and 3).</i>

Employment (B1) (Including farm shop (A1))

S0139 – Land at former Petrol Station

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	++	<i>New employment land proposed at the site.</i> The site is proposed for employment use (B1 and farm shop (A1)).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	0	<i>The site will deliver new employment land.</i>
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	0	N/A
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	0	N/A
		0	N/A

ISA topic	ISA objective	Significant effect?	Commentary
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	?	<i>The site falls within one of the 30-50% most deprived LSOAs in Wales.</i>
			The site falls within the Llanover 2 LSOA, which is amongst the 40-50% most deprived LSOA in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	0	N/A
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>
			The site is 161m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i>
		The site is currently used for agriculture.	
		+	<i>The site does not intersect with a mineral safeguarding area.</i>
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	-	<i>The site intersects or is adjacent to a regionally or locally (LNRs and SINC)s designated site and/ or priority habitats/ species.</i>
			The northwestern boundary of the site is adjacent to the nearest priority habitat (parkland). In addition, the site is 167m from the nearest area of ancient woodland.

ISA topic	ISA objective	Significant effect?	Commentary
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i>
	Promote understanding of Monmouthshire's cultural heritage.		The site wholly intersects with a conservation area (Llanover). In addition, the site is 3m from the nearest grade II listed building. The site is relatively large (2.2ha), and as it wholly intersects with a conservation area and is in proximity to several grade II listed buildings, it is likely to impact the setting of these heritage assets.
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i> The site is 155m from the nearest National Park (Brecon Beacons).
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i>
		-	<i>The site intersects with surface water Flood Zone 2 or 3.</i> Less than 50% of the site intersects with surface water Flood Zone 2 or 3. However, it is recognised that this is isolated to the southeastern part of the site.

Mixed Use: Residential (C3), Employment (B1), Retail (A1), Leisure, Education and Community Use (D1, D2)

CS0213 – Land east of A465

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	++	<i>New employment land proposed at the site.</i> The site is proposed for mixed-use development, including employment (B1) and retail (A1).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	++	<i>The site has capacity to deliver a significant number of new homes (≥ 100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 500 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	-	<i>The site is not within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 1,500-1,600m from the nearest primary school (Our Lady and St Michaels RC Primary) and 2-2.5km from the nearest secondary school (King Henry VIII Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	++	<i>The site is within 800m of a health service and an active travel route.</i> The site is 400-500m from the nearest dentist (DW Dental Laboratories, Abergavenny) and it intersects with six PRowS (368/212/1, 368/213/1, 368/215/1, 368/215/4, 368/216/1 and 368/221A/1).
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 500-600m from the nearest area of amenity importance and green space (play space).

ISA topic	ISA objective	Significant effect?	Commentary
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	?	<i>The site falls within one of the 30-50% most deprived LSOAs in Wales.</i>
			The site falls within the Llanover 2 LSOA, which is amongst the 40-50% most deprived LSOA in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i>
			The site is 400-500m from the nearest bus stop (Station) and it intersects with six PRowS (368/212/1, 368/213/1, 368/215/1, 368/215/4, 368/216/1 and 368/221A/1). It is also 130m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>
			The site intersects with a river.
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i>	
		The site is currently used for agriculture.	
	+	<i>The site does not intersect with a mineral safeguarding area.</i>	

ISA topic	ISA objective	Significant effect?	Commentary
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	--	<p><i>The site intersects or is adjacent to an internationally (SAC, SPA, Ramsar) or nationally (SSSI, Ancient Woodland, NNRs) designated site.</i></p> <p>The eastern extent of the site intersects with an area of ancient woodland (0.4% overlap). In addition, the site is 7m from the nearest priority habitat (traditional orchard), 340m from the nearest SINC (River Gavenni), and 588m from the nearest SAC and SSSI (River Usk/ Afon Wysg)</p>
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	--	<p><i>Development at the site has the potential for a significant negative effect on the historic environment.</i></p> <p>The site is 148m from the nearest conservation area (Avergavenny), 159m from the nearest grade II listed building, 360m from the nearest archaeologically sensitive area, 533m from the nearest scheduled monument (Area of Conventual Buildings, St Mary's Priory), 545m from the nearest grade I listed building, and 576m from the nearest grade II* listed building.</p> <p>The site is large (24.8ha), and given its proximity to the aforementioned heritage assets, it is likely to impact their setting. Development also has the potential to disturb archaeological remains. However, it is recognised that all of these heritage assets are located to the west of the site, on the other side of the A465 and within the existing built-up area of Abergavenny.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	+	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface water flood risk area (Flood Zone 2 and 3).</i>

Mardy

Residential

CS0094 – Land at Penlanlas Farm

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	0	<i>The site has reasonable access to existing employment (800-1,600m from an employment centre).</i> The site is 1,300-1,400m from the nearest identified industrial and business site (Ross Road, Abergavenny).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	++	<i>The site has capacity to deliver a significant number of new homes (≥ 100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 100 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	++	<i>The site is within reasonable walking distance (≤800m) to a primary and a secondary school (≤1,600m).</i> The site is 100-200m from the nearest primary school (Deri View Primary) and 800-900m from the nearest secondary school (King Henry VIII Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it intersects with a PRow (370/91/5) and is adjacent to a National Cycle Network route.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 50-100m from the nearest area of amenity importance and 100-200m from the nearest green space (play space).

ISA topic	ISA objective	Significant effect?	Commentary
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	?	<i>The site falls within one of the 30-50% most deprived LSOAs in Wales.</i>
			The site falls within the Croesonen LSOA, which is amongst the 30-40% most deprived LSOA in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	++	<i>The site is within close proximity (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, and an active travel route.</i>
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>
		+	The site is 596m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>

In addition, the site is 162m from the nearest grade II listed building, 207m from the nearest archaeologically sensitive area, 225m from the nearest conservation area (Monmouth</i>

ISA topic	ISA objective	Significant effect?	Commentary
			<p>(central)), 412m from the nearest scheduled monument (Clawdd Du), 425m from the nearest grade II* listed building, and 756m from the nearest grade I listed building.</p> <p>The site is relatively small (1.1ha), and whilst it intersects with a registered historic landscape, it has the potential to improve the setting of this landscape by regenerating the former rail yard into a new residential development. However, it is recognised that this will depend on the detailed design and layout of the site.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<p><i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i></p> <p>The southeastern boundary of the site is adjacent to an AONB (Wye Valley).</p>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	-	<p>The site intersects with fluvial Flood Zone 2 or 3.</p> <p>Less than 50% of the site intersects with fluvial Flood Zone 2 or 3. However, it is recognised that fluvial flood risk is isolated to the northeastern extent of the site.</p>
		-	<p>The site intersects with surface water Flood Zone 2 or 3.</p> <p>Less than 50% of the site intersects with surface water Flood Zone 2 or 3. However, it is recognised that surface water flood risk is isolated to three small areas within the site.</p>

Portskewett

Mixed Use: Residential (C3), Employment (B1 / B2 / B8), Retail (A1), Leisure (D1, Sui Generis)

CS0251 – Land at Bradbury Farm Crick

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	++	<i>New employment land proposed at the site.</i> The site is proposed for mixed-use, including employment use (B1/ B2/ B8), retail (A1) and leisure (D1, sui generis).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	++	<i>The site has capacity to deliver a significant number of new homes (≥ 100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 960 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	-	<i>The site is not within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 900-1,000m from the nearest primary school (Archbishop Rowan Williams VA Primary) and 2-2.5km from the nearest secondary school (Caldicot Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it intersects with a PRow (376/4/1).
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 400-500m from the nearest area of amenity importance and green space (public park or garden).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site falls within the Portskewett LSOA, which is amongst the 10-20% least deprived LSOAs in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 100-200m from the nearest bus stop (Kilcrow Hill) and it intersects with a PRow (376/4/1). It is also 197m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 370m from the nearest waterbody (river).
		-	<i>The site intersects with a Groundwater Source Protection Zone (SPZ).</i> The site falls within SPZ 3.
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
--		<i>The site is within a mineral safeguarding area.</i>	

ISA topic	ISA objective	Significant effect?	Commentary
			The site is within a mineral safeguarding area for carboniferous limestone, and sand and gravel.
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	--	<p><i>The site intersects or is adjacent to an internationally (SAC, SPA, Ramsar) or nationally (SSSI, Ancient Woodland, NNRs) designated site.</i></p> <p>The central and northwestern parts of the site intersect with several areas of ancient woodland, as well as a SINC (Ballan Wood) (10% overlap). In addition, the site is 193m from the nearest SSSI (Nedern Brook Wetlands, Caldicot) and 837m from the nearest priority habitat (wood pasture).</p>
Historic Environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	--	<p><i>Development at the site has the potential for a significant negative effect on the historic environment.</i></p> <p>The site is 47m from the nearest grade II listed building, 107m from the nearest grade II* listed building, 113m from the nearest scheduled monument (Crick Medieval House), 156m from the nearest archaeologically sensitive area, 333m from the nearest conservation area (Caldicot), and 734m from the nearest grade I listed building.</p> <p>The site is very large (56ha), and therefore it will likely impact the setting of the aforementioned heritage assets, especially those closest to the site. Development also has the potential to disturb nearby archaeological remains.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 379m from the nearest County Park (Gwastadeddau Gwent/ Gwent Levels). In addition, the site will deliver 960 homes on land currently used for agriculture.
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zones 2 and 3).</i>
		-	<i>The site intersects with surface water Flood Zone 2 or 3.</i> Less than 50% of the site intersects with surface water Flood Zone 2 or 3. However, it is recognised that this is isolated to a few small areas primarily in the centre of the site.

Gypsy and Traveller site

Bradbury Farm, Crick

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	-	<i>The site has poor access to existing employment (>1,600m from an employment centre).</i> The site is 2-2.5km from the nearest industrial and business site (Pill Row, Severnbridge Industrial Estate) and 1500-1600m from the nearest protected employment site (Severn Bridge, Caldicot).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	?	N/A.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	--	<i>The site is >1,600m from a primary school and secondary school.</i> The nearest primary school is Archbishop Rowan Williams VA Primary School (2-2.5km away), and the nearest secondary school is Caldicot Comprehensive (2.5-3km away).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is 203m from the nearest public right of way, but 2-2.5km from nearest dentist, 2-2.5km to the nearest GP surgery, and >25km from the nearest hospital.
		-	<i>The site is not within 800m of a formal leisure or green space.</i> The site is between 1,500-1,600m of public park or garden.
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> This site is not classified as deprived or relatively deprived, and is in the 5 th quintile.

ISA topic	ISA objective	Significant effect?	Commentary
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 3-4km walking distance from the nearest neighbourhood centre. It is also 400-500m from the nearest bus stop and 3-4km from the nearest train station.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	0	<i>The site does not contain and is not in close proximity to a waterbody, nor does it fall within the River Wye Catchment Area.</i>
		-	<i>The site intersects with a Groundwater Source Protection Zone (SPZ).</i> The site is within Source Protection Zone 3.
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i>
--		<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for carboniferous limestone and sand and gravel	
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 1,200m from the nearest priority habitat (lowland meadows), 75m from the nearest area of ancient woodland, 2,378m from the nearest SAC, SPA and Ramsar, 301m from the nearest SSSI (Nedern Brook Wetlands, Caldicot), and 71m from the nearest SINC (Sunny Bank).
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	0	<p><i>Development at this site will have a neutral effect on the historic environment.</i></p> <p>The site is 258m from the nearest grade II listed building, 291m from the nearest grade II* listed building, 673m from the nearest conservation area (Caldicot), and 224m from the nearest scheduled monument (The Berries Mound Bailey Castle).</p> <p>Given the distance of the site from important historic environment features, it is unlikely development will impact upon the heritage value of the area.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	+	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface water flood risk area (flood zone 2 and 3).</i>

Portskewett / Shirenewton

Renewable Energy (Solar)

CS0066 – Bridge View Farm

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	0	N/A The site is proposed for renewable energy (solar).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	0	N/A
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	0	N/A
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	0	N/A
		0	N/A
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Portskewett and Shirenewton LSOAs, which are amongst the 10-20% least deprived LSOAs in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	0	N/A
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>

ISA topic	ISA objective	Significant effect?	Commentary
Biodiversity and geodiversity	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.		The site is 232m from the nearest waterbody (lake) and falls wholly within the River Wye Catchment Area.
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
		--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
		--	<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for carboniferous limestone, and sand and gravel.
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i> The site is 19m from the nearest priority habitat (traditional orchard), 108m from the nearest area of ancient woodland, 440m from the nearest SAC, SPA and SSSI (Severn Estuary), and 775m from the nearest SINC (Withey Bed).
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire's cultural heritage.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i> The site wholly intersects with an archaeologically sensitive area. In addition, the site is 143m from the nearest grade II listed building, 492m from the nearest grade II* listed building, 741m from the nearest conservation area (Mathern), and 865m from the nearest scheduled monument (Moated site south of Moynes Court).

ISA topic	ISA objective	Significant effect?	Commentary
			The site is large (16ha), and whilst the installation of solar panels is less likely to disturb archaeological remains when compared to housing development, some disturbance is still likely to take place. In addition, the site has the potential to impact the setting of the three nearest grade II listed building, which are located in a row to the west of the site.
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	+	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zones 2 and 3).</i>
		-	<i>The site intersects with surface water Flood Zone 2 or 3.</i> Less than 50% of the site intersects with surface water Flood Zone 2 or 3. However, it is recognised that this is isolated to a few small areas in the western extent of the site and is unlikely to cause significant issues due to the use of this site (renewable energy).

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	++	<i>New employment land proposed at the site.</i> The site is proposed for employment use (B2/ B8).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	--	<i>The site could deliver new homes or employment land; however, the site wholly intersects with a designated green wedge.</i> The site will deliver employment land; however, it falls wholly within a designated green wedge.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	0	N/A
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	0	N/A
		0	N/A
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Rogiet LSOA, which is amongst the 30-40% least deprived LSOAs in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	0	N/A
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	0	<i>The site does not contain and is not in close proximity to a waterbody, nor does it fall within the River Wye Catchment Area.</i>

ISA topic	ISA objective	Significant effect?	Commentary
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	++	<i>The site is wholly brownfield land.</i> The site comprises a parking area.
		--	<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for carboniferous limestone.
Biodiversity and Geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i> The site is 79m from the nearest priority habitat (open mosaic habitat on previously developed land), 387m from the nearest SINC (West of Caldicot), 388m from the nearest area of ancient woodland, and 632m from the nearest SSSI (Rectory Meadow – Rogiet).
Historic environment	Preserve and enhance Monmouthshire’s heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire’s cultural heritage.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i> The site wholly intersects with an archaeologically sensitive area. In addition, the site is 663m from the nearest grade II* listed building and 697m from the nearest grade II listed building. The site is small (0.1ha) and regeneration of the parking area has the potential to improve the historic environment in this location. Nevertheless, development is likely to disturb on-site archaeological remains.

ISA topic	ISA objective	Significant effect?	Commentary
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	++	<i>The site is predominantly brownfield and does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i> Whilst the site is within Flood Zone 1, it is recognised that the area immediately to the south of the site is within fluvial Flood Zone 2 or 3.
		+	<i>The site does not intersect with a high surface water flood risk area (Flood Zone 2 and 3).</i>

Mixed Use: Residential (C3), Employment (B1 / B2 / B8)

CS0253 – Ifton Manor Farm (Site A)

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	++	<i>New employment land proposed at the site.</i> The site is proposed for mixed-use development, including employment use (B1/ B2/ B8).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	-	<i>The site could deliver new homes or employment land; however, the site partially intersects with a designated green wedge.</i> The site has capacity to deliver 440 new homes; however, it almost wholly intersects with a designated green wedge.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	++	<i>The site is within reasonable walking distance (≤800m) to a primary and a secondary school (≤1,600m).</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 400-500m from the nearest primary school (Dewstow Primary) and 1,200-1,300m from the nearest secondary school (Caldicot Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	++	<i>The site is within 800m of a health service and an active travel route.</i> The site is 400-500m from the nearest dentist (Teeth for Life, Caldicot), 500-600m from the nearest GP surgery (Caldicot Health Centre, Caldicot), and it intersects with a PRoW (378/10/4).
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 100-200m from the nearest area of amenity importance and 50-100m from the nearest green space (play space).
		-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Rogiet LSOA, which is amongst the 30-40% least deprived LSOAs in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	++	<i>The site is within close proximity (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, and an active travel route.</i> The site is 0-50m from the nearest bus stop (Cherry Tree Nursing Home, Ifton Quarry), 400-500m from the nearest neighbourhood centre (West End, Caldicot), and it intersects with a PRoW (378/10/4). It is also 449m from the nearest National Cycle Network route.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 984m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
		--	<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for carboniferous limestone, and sand and gravel.
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	-	<i>The site intersects or is adjacent to a regionally or locally (LNRs and SINC) designated site and/ or priority habitats/ species.</i> The eastern boundary of the site is adjacent to a SINC (West of Caldicot). In addition, the site is 118m from the nearest priority habitat (open mosaic habitat on previously developed land), 393m from the nearest area of ancient woodland, and 670m from the nearest SSSI (Rectory Meadow – Rogiet).
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire's cultural heritage.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i> The site wholly intersects an archaeologically sensitive area. In addition, the site is 410m from the nearest grade II* listed building and 435m from the nearest grade II listed building. The site is very large (19.5ha) and development is likely to disturb on-site archaeological remains.

ISA topic	ISA objective	Significant effect?	Commentary
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	+	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i>
		-	<i>The site intersects with Flood Zone 2 or 3.</i> Less than 50% of the site intersects with surface water Flood Zone 2 or 3. However, it is recognised that this is isolated to two small areas within the site.

Open Space, Green Infrastructure, Active Travel Links, Drainage associated with proposed residential and employment to the north

S0254 – Ifton Manor Farm (Site B)

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	0	<i>N/A</i> The site is proposed for open space, green infrastructure, active travel links, and drainage associated with proposed residential and employment development to the north (Site A).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	--	<i>The site could deliver new homes or employment land; however, the site wholly intersects with a designated green wedge.</i> The site falls within a designated green wedge.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	0	<i>N/A</i>

ISA topic	ISA objective	Significant effect?	Commentary
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	0	N/A
		0	N/A
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Rogiet LSOA, which is amongst the 30-40% least deprived LSOAs in Wales.
		0	N/A
Transport and movement	Increase sustainable transport use and reduce the need to travel.	0	N/A
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 666m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	0	N/A The site is not proposed for development.
		--	<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for sand and gravel.

ISA topic	ISA objective	Significant effect?	Commentary
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i> The site is 6m from the nearest SINC (West of Caldicot), 386m from the nearest priority habitat (open mosaic habitat on previously developed land), 638m from the nearest area of ancient woodland, 714m from the nearest SSSI (Gwent Levels – Magor and Undy), and 998m from the nearest SAC, SPA and Ramsar site (Severn Estuary).
Historic environment	Preserve and enhance Monmouthshire’s heritage resources, including its historic environment and archaeological assets.	?	<i>Development at the site would have an uncertain effect on the historic environment.</i> The site wholly intersects with an archaeologically sensitive area. In addition, the site is 613m from the nearest grade II listed building, 619m from the nearest grade II* listed building, and 785m from the nearest conservation area (Rogiet)
	Promote understanding of Monmouthshire’s cultural heritage.		The site is very large (15.3ha) and development has the potential to disturb on-site archaeological remains. However, it is recognised that this site is not proposed for housing development, and therefore archaeological remains are less likely to be disturbed. Nevertheless, uncertainty is noted at this stage.
Landscape	To protect and enhance the quality and character of Monmouthshire’s landscape, townscape, and seascape.	+	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (Flood Zone 2 and 3).</i>
		-	<i>The site intersects with surface water Flood Zone 2 or 3.</i> Less than 50% of the site intersects with surface water Flood Zone 2 or 3.

Shirenewton

Residential

CS0029 - Barnetts Farm

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	-	<i>The site has poor access to existing employment (>1,600m from an employment centre).</i> The site is 1,800-1,900m from the nearest protected employment site (Station Road and School Hill, both in Chepstow).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	+	<i>The site has capacity to deliver new homes (<100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 15 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	+	<i>The site is within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 1,600-1,700m from the nearest primary school (St Mary's Roman Catholic Primary); however, it is 1,400-1,500m from the nearest secondary school (Chepstow Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it is 7m from the nearest PRoW.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 200-300m from the nearest area of amenity importance and 400-500m from the nearest green space (play space).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i>

Page 1090

ISA topic	ISA objective	Significant effect?	Commentary
			The site falls within the Shirenewton LSOA, which is amongst the 10-20% least deprived LSOAs in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 700-800m from the nearest bus stop (Chepstow Community Hospital and St Lawrence Park Estate) and is 7m from the nearest PRow. It is also 47m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 623m from the nearest waterbody (river) and falls wholly within the River Wye Catchment Area.
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	++	<i>The site is wholly brownfield land.</i> The site comprises agricultural buildings.
--		<i>The site is within a mineral safeguarding area.</i>	

ISA topic	ISA objective	Significant effect?	Commentary
			The site is within a mineral safeguarding area for carboniferous limestone.
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i> The site is 226m from the nearest area of ancient woodland, 335m from the nearest SINC (Part of Bishop's Barnets Wood), and 469m from the nearest priority habitat (traditional orchard).
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire's cultural heritage.	+	<i>Regeneration of brownfield land that is currently detracting from the historic environment.</i> The site is 385m from the nearest conservation area (Mounton), 387m from the nearest grade II listed building, 556m from the nearest scheduled monument (Bishop Barnet's Wood Camp), and 637m from the nearest grade II* listed building. The site is relatively small (1.1ha) and relatively far away from the aforementioned heritage assets. By regenerating land that currently comprises agricultural buildings, the site has the potential to improve the setting of the historic environment in this location.
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	-	<i>The site intersects with an Area of Outstanding Natural Beauty, National Park or Country Park.</i> The site is brownfield; however, it wholly intersects with an AONB (Wye Valley).
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface flood risk area (flood zone 2 and 3).</i>

Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	0	<i>The site has reasonable access to existing employment (800-1,600m from an employment centre).</i> The site is 1,200-1,300m from the nearest protected employment site (Bulwark Road, Chepstow).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	--	<i>The site could deliver new homes or employment land; however, the site wholly intersects with a designated green wedge.</i> The site has capacity to deliver 300 new homes; however, it wholly intersects with a designated green wedge.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	+	<i>The site is within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 800-900m from the nearest primary school (St Mary's Roman Catholic Primary) and secondary school (Mounton House Special School).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it is 5m from the nearest PRow.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 400-500m from the nearest area of amenity importance and green space (playing field).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Shirenewton LSOA, which is amongst the 10-20% least deprived LSOAs in Wales.

ISA topic	ISA objective	Significant effect?	Commentary
Transport and movement	Increase sustainable transport use and reduce the need to travel.		<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i>
		+	The site is 0-50m from the nearest bus stop (Brynderwen Lane) and is 5m from the nearest PRow. It is also 172m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>
			The site is 488m from the nearest waterbody (river) and falls wholly within the River Wye Catchment Area.
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i>
		The site is currently used for agriculture.	
	--	<i>The site is within a mineral safeguarding area.</i>	
	--	The site is within a mineral safeguarding area for carboniferous limestone.	

ISA topic	ISA objective	Significant effect?	Commentary
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	--	<p><i>The site intersects or is adjacent to an internationally (SAC, SPA, Ramsar) or nationally (SSSI, Ancient Woodland, NNRs) designated site.</i></p> <p>The central and southern extents of the site contain areas of ancient woodland (17% overlap). In addition, the site is 1m from the nearest priority habitat (parkland) and 642m from the nearest SINC (Parc Penterry Meadow).</p>
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	--	<p><i>Development at the site has the potential for a significant negative effect on the historic environment.</i></p> <p>The southern extent of the site intersects with a conservation area (Mathern) (5% overlap). In addition, the site is 23m from the nearest grade II listed building, 616m from the nearest grade II* listed building, 906m from the nearest archaeologically sensitive area, and 916m from the nearest scheduled monument (Bishop Barnet's Wood Camp).</p> <p>The site is very large (20ha), and whilst there is some screening from trees along the southeastern boundary of the site, the site is still likely to impact the setting of the conservation area and two grade II listed buildings within it.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<p><i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i></p> <p>The site is 281m from the nearest AONB (Wye Valley) and will deliver 300 homes on agricultural land.</p>

ISA topic	ISA objective	Significant effect?	Commentary
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		-	<i>The site intersects with surface water flood zone 2 or 3.</i> Less than 50% of the site intersects with Flood Zone 2 or 3 (surface water).

CS0054 - Land west of Racecourse Roundabout

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	0	<i>The site has reasonable access to existing employment (800-1,600m from an employment centre).</i> The site is 1,400-1,500m from the nearest protected employment site (School Hill, Chepstow).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	++	<i>The site has capacity to deliver a significant number of new homes (≥ 100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 100 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	+	<i>The site is within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 900-1,000m from the nearest primary school (The Dell Primary); however, it is 500-600m from the nearest secondary school (Chepstow Comprehensive).
	Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+

ISA topic	ISA objective	Significant effect?	Commentary
			The site is not within 800m of a health service; however, it intersects with a PRow (379/3/1).
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 200-300m from the nearest area of amenity importance and 100-200m from the nearest green space (play space).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the St. Arvans LSOA, which is amongst the 20-30% least deprived LSOAs in Wales.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 100-200m from the nearest bus stop (Lions' Lodge and Owls Nest) and it intersects with a PRow (379/3/1). It is also 15m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 635m from the nearest waterbody (coast) and falls wholly within the River Wye Catchment Area.
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>

ISA topic	ISA objective	Significant effect?	Commentary
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
		--	<i>The site is within a mineral safeguarding area.</i> The site is within a mineral safeguarding area for limestone.
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	--	<i>The site intersects or is adjacent to an internationally (SAC, SPA, Ramsar) or nationally (SSSI, Ancient Woodland, NNRs) designated site.</i> The central and southern extent of the site contains a SINC (Crossway Green) (79% overlap). In addition, the western boundary of the site is adjacent to an area of ancient woodland. The site is also 214m from the nearest priority habitat (traditional orchard), 540m from the nearest SAC (Wye Valley Woodlands/ Coetiroedd Dyffryn Gwy), and 540m from the nearest SSSI (Pierce, Alcove And Piercefield Woods).
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets. Promote understanding of Monmouthshire's cultural heritage.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i> The site is 41m from the nearest grade II listed building, 178m from the nearest scheduled monument (Bishop Barnet's Wood Camp), 579m from the nearest conservation area (Chepstow), and 824m from the nearest archaeologically sensitive area. The site is relatively large (4.8ha), and whilst the nearest grade II listed buildings is separated from the site by a roundabout, the site is still likely to impact its setting. Development also has the potential to disturb nearby archaeological remains.

ISA topic	ISA objective	Significant effect?	Commentary
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	--	<i>The site is predominantly greenfield and wholly falls within an Area of Outstanding Natural Beauty, National Park or Country Park.</i> The site wholly falls within an AONB (Wye Valley).
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		-	<i>The site intersects with surface water flood zone 2 or 3. Less than 50% of the site intersects with surface water Flood Zone 2 or 3. However, it is recognised that this is isolated to a small area in the southwestern corner of the site.</i>

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	-	<i>The site has poor access to existing employment (>1,600m from an employment centre).</i> The site is 6-7km from the nearest protected employment site (Bulwark Road, Job Centre, Newhouse Farm, School Hill and Station Road, all in Chepstow, and Severn Bridge in Caldicot).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	-	<i>The site could deliver new homes or employment land; however, the site partially intersects with a designated green wedge.</i> The site has capacity to deliver 22 new homes; however, it almost wholly intersects with a designated green wedge.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	+	<i>The site is within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 200-300m from the nearest primary school (Shirenewton Primary); however, it is 5-6km from the nearest secondary school (Mounton House Special School).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it intersects with a PRow (380/28/1).
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 200-300m from the nearest area of amenity importance and 100-200m from the nearest green space (cemetery).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the Shirenewton LSOA, which is amongst the 10-20% least deprived LSOAs in Wales.

ISA topic	ISA objective	Significant effect?	Commentary
Transport and movement	Increase sustainable transport use and reduce the need to travel.		<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i>
		+	The site is 100-200m from the nearest bus stop (Tredegar Arms) and it intersects with a PRow (380/28/1). It is also 164m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 265m from the nearest waterbody (river) and falls wholly within the River Wye Catchment Area.
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
+		<i>The site does not intersect with a mineral safeguarding area.</i>	
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	-	<i>The site intersects or is adjacent to a regionally or locally (LNRs and SINCS) designated site and/ or priority habitats/ species.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The eastern boundary of the site is adjacent to a SINC (Shirenewton Meadows). In addition, the site is 9m from the nearest priority habitat (lowland meadows), 217m from the nearest area of ancient woodland, 583m from the nearest SAC (Wye Valley and Forest of Dean Bat Sites/ Safleoedd Ystlumod Dyffryn Gwy a Fforest y Ddena), and 583m from the nearest SSSI (Mwyngloddfa Mynydd-Bach).
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i>
	Promote understanding of Monmouthshire's cultural heritage.		The southwestern boundary of the site intersects with a conservation area (Shirenewton). In addition, the site is 194m from the nearest grade II listed building. The site is small (0.8ha) and the southwestern boundary is screened by trees. Nevertheless, the site is still likely to impact the setting of the conservation area to some degree.
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i> The site is 235m from the nearest AONB (Wye Valley).
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface flood risk area (flood zone 2 and 3).</i>

	--	The site is currently used for agriculture. <i>The site is within a mineral safeguarding area.</i>	
	--	The site is within a mineral safeguarding area for carboniferous limestone.	

ISA topic	ISA objective	Significant effect?	Commentary
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<p><i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i></p> <p>The site is 177m from the nearest priority habitat (parkland), 458m from the nearest area of ancient woodland, 486m from the nearest SINC (Mistletoe Cottage), 495m from the nearest SAC (Wye Valley Woodlands/ Coetiroedd Dyffryn Gwy), and 495m from the nearest SSSI (Pierce, Alcove and Piercefield Woods).</p>
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.	--	<p><i>Development at the site has the potential for a significant negative effect on the historic environment.</i></p> <p>The site is 3m from the nearest conservation area (St. Arvans), 15m from the nearest grade II listed building, 261m from the nearest scheduled monument (St Arvan's Church Cross-slab), and 907m from the nearest grade II* listed building.</p>
	Promote understanding of Monmouthshire's cultural heritage.		<p>The site is small (1.1ha) and well screened by trees. However, given its proximity to the conservation area and grade II listed building, it is likely to impact their setting.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	--	<p><i>The site is predominantly greenfield and wholly falls within an Area of Outstanding Natural Beauty, National Park or Country Park.</i></p> <p>The site wholly falls within an AONB (Wye Valley).</p>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		-	<p><i>The site intersects with surface water flood zone 2 or 3.</i></p> <p>Less than 50% of the site intersects with surface water Flood Zone 2 or 3.</p>

St Kingsmark

Mixed Use: Residential (C3)

CS0165 – Land at Mounton Road

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	++	<i>New employment land proposed at the site.</i> The site is proposed for mixed-use (including C3).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	--	<i>The site could deliver new homes or employment land; however, the site wholly intersects with a designated green wedge.</i> The site has capacity to deliver 210 new homes; however, it wholly intersects with a designated green wedge.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	++	<i>The site is within reasonable walking distance (≤800m) to a primary and a secondary school (≤1,600m).</i> The site is 700-800m from the nearest primary school (St Mary's Roman Catholic Primary) and 1,200-1,300m from the nearest secondary school (Chepstow Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	++	<i>The site is within 800m of a health service and an active travel route.</i> The site is 300-400m from the nearest dentist (Oasis Dental Care, Chepstow), GP surgery (Mount Pleasant Practice and Tower Gate Practice, both in Chepstow) and hospital (Chepstow Community Hospital, Chepstow). It is also adjacent to a National Cycle Network route and 13m from the nearest PRow.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 300-400m from the nearest area of amenity importance and 400-500m from the nearest green space (playing field).

ISA topic	ISA objective	Significant effect?	Commentary
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> <i>The site falls within the St. Kingsmark 2 LSOA, which is amongst the 10% least deprived LSOAs in Wales.</i>
		++	<i>The site is within close proximity (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, and an active travel route.</i> <i>The site is 0-50m from the nearest bus stop (Chepstow Community Hospital), 600-700m from the nearest central shopping area (Chepstow), and adjacent to a National Cycle Network route and 13m from the nearest PRow.</i>
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> <i>The site is 785m from the nearest waterbody (river) and falls wholly within the River Wye Catchment Area.</i>
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> <i>The site is currently used for agriculture.</i>
--		<i>The site is within a mineral safeguarding area.</i>	

ISA topic	ISA objective	Significant effect?	Commentary
			The site is within a mineral safeguarding area for limestone.
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	--	<p><i>The site intersects or is adjacent to an internationally (SAC, SPA, Ramsar) or nationally (SSSI, Ancient Woodland, NNRs) designated site.</i></p> <p>The northern boundary of the site is adjacent to an area of ancient woodland. In addition, the site is 219m from the nearest priority habitat (parkland), 304m from the nearest SINC (Parc Penterry Meadow), 826m from the nearest SAC (Wye Valley Woodlands/ Coetiroedd Dyffryn Gwy), and 826m from the nearest SSSI (Pierce, Alcove And Piercefield Woods).</p>
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	--	<p><i>Development at the site has the potential for a significant negative effect on the historic environment.</i></p> <p>The southern tip of the site is adjacent to a conservation area (Mathern). In addition, the site is 31m from the nearest grade II listed building, 648m from the nearest archaeologically sensitive area, 742m from the nearest scheduled monument (Bishop Barnet's Wood Camp), 754m from the nearest grade II* listed building, and 810m from the nearest grade I listed building.</p> <p>The site is very large (12.8ha), and whilst there is some screening from trees along the boundary of the site, it is still likely to impact the setting of the conservation area to the south and the nearest grade II listed building to the north.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 183m from the nearest AONB (Wye Valley) and will deliver 210 homes on agricultural land.
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface flood risk area (flood zone 2 and 3).</i>

St Kingsmark / Shirenewton

Residential

ES0098 – Bayfield

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	0	<i>The site has reasonable access to existing employment (800-1,600m from an employment centre).</i> The site is 1,400-1,500m from the nearest protected employment site (School Hill, Chepstow).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	++	<i>The site has capacity to deliver a significant number of new homes (≥ 100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 145 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	+	<i>The site is within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i>

ISA topic	ISA objective	Significant effect?	Commentary
			The site is 1,000-1,100m from the nearest primary school (The Dell Primary); however, it is 700-800m from the nearest secondary school (Chepstow Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it intersects with four PRowWs (355/4/3, 355/4/4, 355/16/1 and 373/75/1).
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 0-50m from the nearest area of amenity importance and green space (play space).
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> The site falls within the St. Kingsmark 2 and Shirenewton LSOAs, which are amongst the 10% and 10-20% least deprived LSOAs in Wales respectively.
Transport and movement	Increase sustainable transport use and reduce the need to travel.	+	<i>The site is within reasonable walking distance (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, or an active travel route.</i> The site is 100-200m from the nearest bus stop (Owls Nest and Kingsmark Lane) and it intersects with four PRowWs (355/4/3, 355/4/4, 355/16/1 and 373/75/1). It is also 236m from the nearest National Cycle Network route. However, it is not within reasonable walking distance to a neighbourhood centre or central shopping area.
		+	<i>The site does not intersect with an AQMA.</i>
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	

ISA topic	ISA objective	Significant effect?	Commentary
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>
		+	<i>The site is 661m from the nearest waterbody (coast) and falls wholly within the River Wye Catchment Area.</i>
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
		--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i>
		--	<i>The site is currently used for agriculture.</i>
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	--	<i>The site intersects with a mineral safeguarding area.</i>
		--	<i>The site intersects a mineral safeguarding area for carboniferous limestone.</i>
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.	--	<i>The site intersects or is adjacent to an internationally (SAC, SPA, Ramsar) or nationally (SSSI, Ancient Woodland, NNRs) designated site.</i>
		--	<i>The northern tip of the site intersects with a SINC (Crossways Green 2) (8% overlap). In addition, the northwestern boundary of the site is adjacent to an area of ancient woodland. The site is also 248m from the nearest priority habitat (traditional orchard) and 566m from the nearest SAC (Wye Valley Woodlands/ Coetiroedd Dyffryn Gwy) and SSSI (Pierce, Alcove And Piercefield Woods).</i>
		--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i>

ISA topic	ISA objective	Significant effect?	Commentary
	Promote understanding of Monmouthshire's cultural heritage.		<p>The site is 29m from the nearest scheduled monument (Bishop Barnet's Wood Camp), 263m from the nearest grade II listed building, 525m from the nearest conservation area (Chepstow), 714m from the nearest archaeologically sensitive area, and 953m from the nearest grade I listed building.</p> <p>The site is large (10.7ha), and due to its proximity to the scheduled monument, it is likely to disturb nearby archaeological remains. However, it is screened from the remaining heritage assets by existing development.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<p><i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i></p> <p>The northern and western boundaries of the site are adjacent to an AONB (Wye Valley) and the site will deliver 145 homes on agricultural land.</p>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface flood risk area (flood zone 2 and 3).</i>

The Elms

Residential

CS0211 – Land at Rockfield Farm

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	-	<p><i>The site has poor access to existing employment (>1,600m from an employment centre).</i></p> <p>The site is 2.5-3km from the nearest protected employment site (Cheeseman's Industrial Estate and Progress Industrial Estate, both in Rogiet, and Magor Brewery in Magor).</p>
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	+	<p><i>The site has capacity to deliver new homes (<100 dwellings) and it does not intersect with a designated green wedge.</i></p> <p>The site has capacity to deliver 19 new homes.</p>
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	-	<p><i>The site is not within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i></p> <p>The site is 1,400-1,500m from the nearest primary school (Undy Primary) and 4-5km from the nearest secondary school (Caldicot Comprehensive).</p>
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<p><i>The site is within 800m of a health service or an active travel route.</i></p> <p>The site is not within 800m of a health service; however, it is 88m from the nearest PRow.</p>
		++	<p><i>The site is within 800m of a formal leisure and green space.</i></p> <p>The site is 200-300m from the nearest area of amenity importance and 100-200m from the nearest green space (allotments or community growing spaces).</p>

	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i>
			The site is 134m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i>
		The site comprises residential curtilage and agricultural land.	
		+	<i>The site does not intersect with a mineral safeguarding area.</i>
Biodiversity and Ecodiversity	Protect and enhance biodiversity within and surrounding the plan area.	-	<i>The site intersects or is adjacent to a regionally or locally (LNRs and SINC) designated site and/ or priority habitats/ species.</i>
			The northeastern extent of the site contains a priority habitat (traditional orchard). In addition, site is 126m from the nearest SINC (Poulters Field) and 645m from the nearest area of ancient woodland.
Historic environment	Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.	--	<i>Development at the site has the potential for a significant negative effect on the historic environment.</i>
	Promote understanding of Monmouthshire's cultural heritage.		The site wholly intersects with an archaeologically sensitive area. In addition, the southwestern extent of the site intersects with a conservation area (Trellech) (28% overlap). The site is also 21m from the nearest grade II listed building, 79m from the nearest scheduled monument (Tump Terrett Castle Mound), and 116m from the nearest grade I listed building.

ISA topic	ISA objective	Significant effect?	Commentary
			The site is small (0.4ha); however, it is still likely to impact the setting of the conservation area and nearby listed buildings within the conservation area. Development also has the potential to disturb on-site and nearby archaeological remains.
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	--	<i>The site is predominantly greenfield and wholly falls within an Area of Outstanding Natural Beauty, National Park or Country Park.</i> The site wholly falls within an AONB (Wye Valley).
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		-	<i>The site intersects with surface water flood zone 2 or 3.</i> Less than 50% of the site intersects with surface water Flood Zone 2 or 3. However, it is recognised that this is isolated to the southwestern extent of the site.

Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> The site is 265m from the nearest waterbody (river).
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is wholly greenfield land and contains high quality agricultural land (Grade 1, 2 and 3a).</i> The site is currently used for agriculture.
+		<i>The site does not intersect with a mineral safeguarding area.</i>	
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	--	<i>The site intersects or is adjacent to an internationally (SAC, SPA, Ramsar) or nationally (SSSI, Ancient Woodland, NNRs) designated site.</i> The site intersects with a SINC (Cockshoot Wood, Little Castle) (88% overlap). In addition, the northeastern boundary of the site is

ISA topic	ISA objective	Significant effect?	Commentary
			adjacent to an area of ancient woodland. The site is also 277m from the nearest priority habitat (traditional orchard) and 449m from the nearest SAC and SSSI (River Usk/ Afon Wysg).
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	-	<p><i>Development at the site has the potential for a negative effect on the historic environment.</i></p> <p>The site is 220m from the nearest archaeologically sensitive area, 251m from the nearest conservation area (Usk), 294m from the nearest scheduled monument (Usk Castle (unoccupied parts)), 359m from the nearest grade I listed building, 404m from the nearest grade II listed building, and 554m from the nearest grade II* listed building.</p> <p>The site is large (5.9ha) and development has the potential to disturb nearby archaeological remains. The southwestern extent of the site also has the potential to impact the setting of the conservation area.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	+	<i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park.</i>
Climate change	Support the resilience of the Monmouthshire Area to the potential effects of climate change, including flooding from fluvial, coastal and surface water sources.	+	<i>The site does not intersect with a high fluvial flood risk area (flood zone 2 and 3).</i>
		+	<i>The site does not intersect with a high surface flood risk area (flood zone 2 and 3).</i>

Wyesham

Residential

CS0189 – Land at Tudor Road

ISA topic	ISA objective	Significant effect?	Commentary
Economy and employment	Support a strong, diverse and resilient economy, with innovative responses to changing conditions and support for a strong future workforce.	0	<i>The site has reasonable access to existing employment (800-1,600m from an employment centre).</i> The site is 900-1,000m from the nearest protected employment site (Mayhill/ Hadnock Road, Monmouth).
Population and communities	To provide a sufficient quantity of good quality market and affordable homes, and community infrastructure, in sustainable locations to meet identified needs.	+	<i>The site has capacity to deliver new homes (<100 dwellings) and it does not intersect with a designated green wedge.</i> The site has capacity to deliver 58 new homes.
	To enhance design quality to create places for people that maintain and enhance community and settlement identity	+	<i>The site is within reasonable walking distance (≤800m) to a primary or a secondary school (≤1,600m).</i> The site is 200-300m from the nearest primary school (Kymin View Primary); however, it is 1,900-2,000m from the nearest secondary school (Monmouth Comprehensive).
Health and wellbeing	To improve the health and wellbeing of residents within Monmouthshire.	+	<i>The site is within 800m of a health service or an active travel route.</i> The site is not within 800m of a health service; however, it is 46m from the nearest PRow.
		++	<i>The site is within 800m of a formal leisure and green space.</i> The site is 50-100m from the nearest area of amenity importance and green space (playing field). It is also 522m from the nearest National Trail.

ISA topic	ISA objective	Significant effect?	Commentary
Equalities, diversity and inclusion	To reduce poverty and inequality; tackle social exclusion and promote community cohesion.	-	<i>The site falls within one of the 50% least deprived LSOAs in Wales.</i> <i>The site falls within the Wyesham LSOA, which is amongst the 40-50% least deprived LSOAs in Wales.</i>
		++	<i>The site is within close proximity (≤800m) to a railway station or bus stop, neighbourhood centre or central shopping area, and an active travel route.</i> <i>The site is 100-200m from the nearest bus stop (Tudor Road) and neighbourhood centre (Wyesham, Monmouth), and 46m from the nearest PRow. It is also 672m from the nearest National Cycle Network route.</i>
Transport and movement	To increase sustainable transport use and reduce the need to travel.	+	<i>The site does not intersect with an AQMA.</i>
		-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> <i>The site is 667m from the nearest waterbody (river) and falls wholly within the River Wye Catchment Area.</i>
		+	<i>The site does not intersect with a Groundwater Source Protection Zone (SPZ).</i>
		+	<i>The site does not intersect with a Nitrate Vulnerable Zone (NVZ).</i>
		--	<i>The site is predominantly brownfield land (>50%) and contains high quality agricultural land (Grade 1, 2 and 3a).</i> <i>The site is currently used for agriculture.</i>
		+	<i>The site does not intersect with a mineral safeguarding area.</i>
Natural resources	To identify and pursue any opportunities to reduce, or at least, minimise population exposure to air pollution.	+	<i>The site does not intersect with an AQMA.</i>
	To conserve, protect and enhance the water environment, water quality and water resources.	-	<i>The site contains or is in close proximity to a waterbody, and/ or falls within the River Wye Catchment Area.</i> <i>The site is 667m from the nearest waterbody (river) and falls wholly within the River Wye Catchment Area.</i>
	To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development and protecting, where possible, higher grade agricultural land.	--	<i>The site is predominantly brownfield land (>50%) and contains high quality agricultural land (Grade 1, 2 and 3a).</i> <i>The site is currently used for agriculture.</i>
		+	<i>The site does not intersect with a mineral safeguarding area.</i>

ISA topic	ISA objective	Significant effect?	Commentary
Biodiversity and geodiversity	Protect and enhance biodiversity within and surrounding the plan area.	?	<p><i>The site does not intersect, but is within 1km of a designated site, and there is an element of uncertainty relating to the potential for significant effects.</i></p> <p>The site is 24m from the nearest SINC (Wyesham Lane), 68m from the nearest area of ancient woodland, 72m from the nearest priority habitat (traditional orchard), 355m from the nearest SAC (Wye Valley Woodlands/ Coetiroedd Dyffryn Gwy), and 355m from the nearest SSSI (Harper's Grove – Lord's Grove).</p>
Historic environment	<p>Preserve and enhance Monmouthshire's heritage resources, including its historic environment and archaeological assets.</p> <p>Promote understanding of Monmouthshire's cultural heritage.</p>	--	<p><i>Development at the site has the potential for a significant negative effect on the historic environment.</i></p> <p>The site wholly intersects with a registered historic landscape (The Lower Wye Valley). In addition, the site is 237m from the nearest grade II listed building, 590m from the nearest grade II* listed building, 786m from the nearest scheduled monument (May Hill Pillboxes), 863m from the nearest archaeologically sensitive area, and 891m from the nearest conservation area (Monmouth (central)).</p> <p>The site is relatively small (2.1ha); however, it is still likely to impact the setting of the registered historic landscape.</p>
Landscape	To protect and enhance the quality and character of Monmouthshire's landscape, townscape, and seascape.	?	<p><i>The site does not intersect with an Area of Outstanding Natural Beauty, National Park or Country Park; however, the site is either adjacent to/ within close proximity to one of these designated landscapes, and/ or the scale of development proposed (≥ 100 dwellings) on greenfield land has the potential for a negative effect. This is uncertain at this stage.</i></p> <p>The site is 16m from the nearest AONB (Wye Valley).</p>

Executive Summary

Introduction

AECOM was appointed by Monmouthshire County Council (MCC) to undertake a Habitats Regulations Assessment of its Replacement Local Development Plan (RLDP) Deposit Plan, which sets out the development in Monmouthshire between 2018 and 2033 that includes provision for approximately 6,210 net new homes and 38ha net new employment land. The objective of this assessment is to identify any aspects of the Plan that would cause an adverse effect on the integrity of internationally important wildlife sites, otherwise known as European sites (Special Areas of Conservation (SACs), Special Protection Areas (SPAs) and, as a matter of Government policy, Ramsar sites), either in isolation or in combination with other plans and projects, and to advise on appropriate policy mechanisms for delivering mitigation where such effects are identified. However, given its relatively early stage the RLDP does not yet set out the specific site allocations nor detailed policy wording.

Legislative Context

The need for an assessment of impacts on European sites is set out in the Conservation of Habitats and Species Regulations 2017 (as amended). To ascertain whether the integrity of any European sites will be affected, competent authorities must therefore undertake an HRA of the plan or project in question, including an Appropriate Assessment if necessary, before approving it.

Scope

Given an initial assessment of the relevant European sites within 15km of Monmouthshire and the impact pathways present, the HRA addresses the following European sites: Usk Bat Sites SAC, Cwm Clydach Woodlands SAC, Wye Valley Woodlands SAC, Wye Valley and Forest of Dean Bat Sites SAC, Severn Estuary SPA / Ramsar, Severn Estuary SAC, River Wye SAC, Avon Gorge Woodlands SAC, River Usk SAC, Aberbargoed Grasslands SAC, Sugar Loaf Woodlands SAC, Llangorse Lake SAC and Coed y Cerrig SAC.

Likely Significant Effects

Following initial evidence gathering, the first stage of any Habitats Regulations Assessment is a screening for Likely Significant Effects (LSEs), essentially an assessment of the risks for European sites, associated with a development plan. If LSEs cannot be excluded, and a mechanism for an adverse interaction between a plan and a receptor site is present, the next stage of HRA, known as Appropriate Assessment, needs to be undertaken. The Appropriate Assessment is a more detailed analysis of the impact pathways and European sites considered at the screening stage. One of the key elements of an Appropriate Assessment is the consideration of mitigation measures, which might protect a European site from potential harmful adverse effects¹. Furthermore, a recent ruling established that habitats or species outside a European site, which are essential for the functioning of the protected site, must be taken into account in the HRA process². For this HRA, both Task 1 (Screening for Likely Significant Effects; LSEs) and Task 2 (Appropriate Assessment) were carried out.

The HRA shows that LSEs can be excluded for the identified impact pathways in relation to most European sites. However, the following require investigation in appropriate assessment:

- Atmospheric pollution impacts on the Usk Bat Sites SAC, Cwm Clydach Woodlands SAC, Wye Valley Woodlands SAC and the Severn Estuary SAC / SPA / Ramsar
- Recreational pressure in the Severn Estuary SAC / SPA / Ramsar, Usk Bat Sites SAC, River Usk SAC, River Wye SAC, Sugar Loaf Woodlands SAC, and Wye Valley Woodlands SAC.

¹ According to a decision by the European Court of Justice, these can no longer be taken into account at the screening stage of HRA. *People Over Wind and Sweetman v Coillte Teoranta* (C-323/17)

² The 2018 *Holohan* ruling. Case C-461/17

- Functionally linked land relating to the Severn Estuary SPA / Ramsar, Usk Bat Sites SAC, and Wye Valley & Forest of Dean Bat Sites SAC
- Water quality in the River Usk SAC, River Wye SAC and Severn Estuary SAC
- Water quantity, level and flow in the River Usk SAC, River Wye SAC and Severn Estuary SAC

Appropriate Assessment

Atmospheric Pollution

All traffic growth on major roads within 200m of the relevant European sites was modelled. This included both traffic growth due to Monmouthshire Local Plan and wider traffic growth on the road network over the plan period to 2033. Oxides of nitrogen, ammonia and nitrogen deposition were modelled. Four scenarios were modelled. Three transects were modelled into Severn Estuary SAC/SPA/Ramsar site. Since the critical level for NOx or ammonia is not forecast to be breached no adverse effect on integrity will arise notwithstanding traffic growth. On the English side the nearest saltmarsh in the SAC is 20m from the road. At this point the modelled in combination nitrogen deposition effect from all traffic growth is well below 1% of the critical load and therefore adverse effects on integrity can be dismissed.

Two transects were modelled into Wye Valley Woodlands SAC. Since the critical level for NOx is not forecast to be breached no adverse effect on integrity will arise notwithstanding traffic growth. At the distances the SAC lies back from the road (100m and beyond), modelling shows that there is no impact of traffic growth (alone or in combination) on ammonia concentrations. The modelled in combination nitrogen deposition effect from all traffic growth is well below 1% of the critical load and therefore adverse effects on integrity can be dismissed. Cwm Clydach Woodlands and Usk Bat Sites SACs are considered together because they both lie adjacent to A465 Heads of the Valleys Road at Daren-felen, with Cwm Clydach Woodlands SAC lying immediately beyond the Usk Bat Sites SAC to the south of the road. Three transects were modelled. Since the critical level for NOx is not forecast to be breached no adverse effect on integrity will arise notwithstanding traffic growth.

For both ammonia and nitrogen deposition the in combination effect of Monmouthshire Replacement Local Development Plan in combination with other plans and projects does exceed 1% of the critical level and load and therefore cannot be dismissed on purely numerical grounds. However, the A465 is one of the major trunk roads in Wales and is a main east-west route in South Wales along with the M4 motorway. Moreover, large sections of the road are being converted to dual carriageway by 2025. As such, traffic-related changes in air quality on the A465 are not a local (Monmouthshire) issues but a Wales-wide issue and is the responsibility of the Welsh Government or South Wales Trunk Road Agent (SWTRA).

This is relevant because Joint Nature Conservation Committee (JNCC) guidance on the issue states (pages 20/21) that: 'The trunk road network forms the core of the national transport system. Trunk roads are central to long distance travel and connectivity across the UK and traffic patterns on trunk roads are a consequence of predicted growth across the UK generally. The effects of development on traffic flows on trunk roads are more appropriately taken into account as part of national and regional strategic plan level HRAs.' As such, this is considered to be an issue to be address at a strategic national scale rather than through the Monmouthshire Local Plan.

Recreational Pressure

Severn Estuary SPA/SAC/Ramsar

To obtain visitor data for the Severn Estuary SPA / Ramsar (and also the SAC), a survey (comprising visitor counts and interviews) was undertaken at four key access locations along the estuary. The home postcodes of interviewees provide the key most important parameter that is used to identify recreational catchments. Typically, the 75th percentile of interviewees (i.e. the distance from the SPA / Ramsar from which 75% of interviewees originate) is used to denote the core recreational catchment. This cut-off point is used to remove the influence of outliers and to demark the catchment that forms the most likely visitor pool. Pooling the postcodes from all 'local' visitors (i.e. those on a day trip from home), 75% of visitors travelled a linear distance of 6.5km to the SPA / Ramsar.

However, Stroud Council (in England) and Forest of Dean Council (also in England) have both recently increased the recreational catchment in their area for Severn Estuary from 7km to 12.6km, based on

more recent visitor survey from 2022 . It is to be expected that different parts of the Severn Estuary have different recreational catchments, and the survey data for Monmouthshire clearly indicates a smaller core catchment. However, there is also value in authorities around the Severn Estuary adopting a consistent core catchment. Therefore, it may be advisable for Monmouthshire Council to adopt 12.6km as their core catchment, and thus the zone within which financial contributions to recreational pressure mitigation on the SAC/SPA/Ramsar site would be collected. Allocations within 7km and 12.6km of the SPA/Ramsar site were assessed. A 7km catchment would capture five residential and mixed used allocations (HA3, HA2/EA1m, HA9/EA1I, HA13 and HA18). increasing the catchment to 12.6km would capture one more residential development site (HA14).

Given the high sensitivity of the SPA / Ramsar to impacts resulting from recreational pressure, adverse effects on its site integrity due to additional residential development cannot be excluded. It is anticipated that mitigation measures will be required to avoid adverse effects on the SPA / Ramsar. These could be delivered in the form of Strategic Access Management and Monitoring (SAMM) in the estuary itself, and / or through access enhancements and improvements to appropriately sited, existing or newly developed greenspaces. In England, authorities within the recreational catchment of sites that are sensitive to recreational pressure have developed SAMM strategies to avoid adverse effects on the European sites, including Severn Estuary SPA/Ramsar where such strategies exist for both Stroud and Forest of Dean districts.

It is noted that relevant Deposit Site Allocation policies, with the exception of Site HA14 include reference to the site being within 7km of the Severn Estuary European Marine Site (site HA14 is within 12.6km) and that a financial contribution may be required as part of a mitigation strategy as well the SANG requirements to reduce recreational pressures on the features of the estuary. Policy NR2 – Severn Estuary Recreational Pressure also sets out requirements for proposals that would result in visitor pressure on the Severn Estuary SAC, SPA, Ramsar site, or Functionally Linked land will not be supported unless it can be demonstrated that no adverse impact on the integrity of the European Marine Site will occur. The supporting text links this requirement to a Core Recreational Catchment Zone of 7km identified by the HRA. AECOM recommends that the mixed use sites EA1m and EA1I are also included in this solution along with residential site HA14. As such AECOM recommends that the same policy requirement is included in those policies as has already been included in other relevant allocations.

It is generally considered that adverse effects on the site integrity of the Severn Estuary SAC could be avoided within the remit of a Strategic Access Management and Monitoring Strategy. There are also several policy mechanisms through which the Severn Estuary SAC could be protected, for example by introducing the following wording into a policy addressing the protection of European sites in Monmouthshire: 'Any development proposals that would increase visitor access to sensitive habitat features in the Severn Estuary SAC, SPA and Ramsar site, especially on to saltmarsh and mudflat habitat, will not be supported unless no adverse effect on the integrity of the sites could be confirmed.'

Other European sites

Impacts on Usk Bat Sites SAC, River Usk SAC, River Wye SAC, Sugar Loaf Woodlands SAC, and Wye Valley Woodlands SAC were also investigated but it was concluded no adverse effect on integrity would arise, without the need for mitigation. For Wye Valley Woodlands SAC this assessment included undertaking a visitor survey in 2023. Using these data, the 75th percentile of all visitors that travelled to the SAC is 39.3km. In other words, three quarters of visitors live within 39.3km of the SAC boundary. This is a very large catchment and represents the importance of the SAC in drawing visitors from long distances. For example, visitors come from as far afield as Lincolnshire, Sheffield, Devon, Hampshire and Nottinghamshire, and visitors from outside Monmouthshire and Wales, make up a large proportion of the survey pool. Even excluding people on holiday to focus entirely on people 'visiting from home' still leaves a relatively large catchment of 24km.

This indicates that the Wye Valley Woodlands SAC has a regional, not to say national, draw rather than a local one. In contrast, during surveys of the Severn Estuary SPA/Ramsar/SAC, 75% of visitors lived within 6.5km of the site, indicating the much greater proportion of local residents in the visitor pool. The core recreational catchment for the Wye Valley Woodlands SAC for residents of Monmouthshire (i.e. the zone within which 75% of Monmouthshire-resident visitors are found) is 7km, but it is important to remember that Monmouthshire residents make up a minority of visitors, with 71% of visitors living in other local authorities.

Given these data it is considered that visitor pressure within the SAC is limited, is a regional or national issue, and will not be heavily affected by housing and population growth within Monmouthshire. As such, no mitigation strategy for the Local Plan is required and a conclusion of no adverse effect on integrity is reached. The foregoing assessment inherently takes account of growth in Monmouthshire in combination with growth elsewhere in the recreational catchment of the SAC.

Loss of Functionally Linked Land

The potential for loss of functionally linked land for bats associated with Usk Bat Sites SAC, Wye Valley & Forest of Dean Bat Sites SAC and birds associated with Severn Estuary SPA/Ramsar was assessed.

Usk Bat Sites SAC and Wye Valley & Forest of Dean Bat Sites SAC

No sites are allocated within the Core Sustainance Zone of Usk Bat Sites SAC. Five Local Plan allocations were identified within 3km (the Core Sustainance Zone) of Wye Valley & Forest of Dean Bat Sites SAC: HA8, EA1b, HA4, HA13 and HA18. It was recommended that the following text (or similar) is inserted into a suitable policy in the next iteration of the LP: 'To meet the requirements of the Habitats Directive regarding allocated greenfield sites within the Core Sustainance Zones (CSZs) of the Usk Bat Sites SAC and the Wye Valley and Forest of Dean Bat Sites SAC, the applicant is required to provide evidence that the development will not result in adverse effects on site integrity. To achieve this, a habitat assessment will have to be undertaken by a suitably qualified professional. Where habitats are suitable, a suite of bat surveys (e.g. bat activity surveys, roost emergence surveys) will need to be undertaken between April and September. Where a land parcel is demonstrably used by SAC bats, mitigation and avoidance measures might be required, and the planning application will likely need to be assessed through a project-level Habitats Regulations Assessment and will need to consider matters such as habitat connectivity, foraging value and minimised lighting'.

With regard to this recommendation Monmouthshire Council expressed concern as to whether the extent of the suggested wording is needed as it is too prescriptive. Instead, the Deposit Plan addresses these recommendations by providing less prescriptive form of wording in Policy NR1 – Nature Recovery and Geodiversity and its supporting text in paragraphs 11.10.2 – 11.10.8 under the heading International/National (Statutory) Sites and Protected Sites and Species with specific reference to Functionally Linked Land in paragraph 11.10.5, but without providing specific details of the need for bat surveys, survey seasons and the potential need for mitigation. Policy LC5 – Dark Skies and Lighting, offers further policy requirements in relation to external lighting and potential impacts on biodiversity and ecology. Strategic Policy S8 – Site Allocation Placemaking Principles also covers dark corridors as well as requirements in the site-specific allocation policies where relevant, for example Policy HA4 – Land at Leasbrook, Monmouth. Further specific requirements can be set out in Supplementary Planning Guidance.

Severn Estuary SPA/Ramsar

To aid consideration of functionally-linked land issues Natural England has produced unpublished guidance (there is no Natural Resources Wales equivalent). This guidance groups birds by their maximum foraging distance. According to this guidance most waterfowl and waders remain within 2km of their core roost areas (i.e. the SPA/Ramsar site) when foraging. Of those species for which Severn Estuary SPA/Ramsar is designated the exceptions are Bewick's swan and white-fronted goose which forage up to 10km from their core roost sites. The same Natural England guidance considers that residential development could have an adverse effect on these two species if it resulted in loss of functionally-linked land up to 5km from the core roost areas (the SPA/Ramsar). Therefore 5km was used as the zone to identify potential areas of functionally-linked land that might need further assessment and (if necessary) mitigation for planning applications.

The following sites were identified as being of sufficient size and proximity to the SPA and Ramsar to be utilised by SPA birds: HA3, HA2/EA1m, HA9, EA1l, EA1d/W3c, EA1f/W3d, EA1g, EA1h/W3e and EA1/W3f. These sites were all identified as greenfield sites, although without further survey the level of suitability is difficult to assess. These are generally the parameters that are used for the identification of potential functionally linked land. In addition to the size of the candidate sites and distance of the candidate sites from the Severn Estuary, the Monmouthshire Council ecologists reviewed Preliminary Environmental Appraisals where available and undertook a desk study to determine whether housing sites should be considered (during plan preparation / application preparation) for potential use by overwintering birds. This formed part of the proforma preparation for candidate sites. Of the allocation

sites listed above, many were determined to be unsuitable, with the exception of the Caldicot site HA2, due to habitats present, disturbance levels, agricultural practices. This assessment also applies to site EA1/W3f, which has been considered to have potential for overwintering birds. Other sites considered to be suitable are Gwent Europark and Quay Point.

It was recommended that the following text (or similar) was inserted into an appropriate policy of the Deposit Plan: 'To meet the requirements of the Habitats Directive, the applicant should be required to provide evidence that the development will not result in adverse effects on the integrity of the Severn Estuary SPA / Ramsar regarding its qualifying bird species. To demonstrate this, a survey will be required to determine the habitats and current site use to verify if the land parcel is indeed suitable for supporting a significant population of designated bird species. Where habitats are suitable, non-breeding bird surveys will be required to determine if the site and neighbouring land constitute a significant area of supporting habitat. Bird surveys will need to be undertaken during autumn, winter and spring. If habitat within the site or adjacent land are identified to support significant populations of designated bird species, avoidance measures and mitigation will be required, and the planning application will likely need to be assessed through a project specific Habitats Regulations Assessment to ensure that the development does not result in adverse effects on integrity.'

With regard to this recommendation, Monmouthshire Council expressed concern as to whether the extent of the suggested wording is needed as it is too prescriptive. Instead, the Deposit Plan addresses these recommendations by providing a less prescriptive form of wording in Policy NR1 – Nature Recovery and Geodiversity and its supporting text in paragraphs 11.10.2 – 11.10.8 under the heading International/National (Statutory) Sites and Protected Sites and Species. Site specific allocation policies also set out policy requirements, such as for Policy HA2 – Land to the East of Caldicot.

Water Quality

River Usk SAC and River Wye SAC

In the Preferred Strategy HRA no housing was allocated in Monmouth due to issues with nutrient neutrality. However, in response to that document the Welsh Government has advised Monmouthshire Council that new site allocations should be considered in Monmouth on the basis that sufficient certainty is provided by Dwr Cymru Welsh Water's (DCWW) planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Monmouthshire Council produced a phosphate briefing note in July 2023 which updates developers and sets out how issues with nutrients in the River Usk and Wye catchments will be addressed. Given the clear commitment from DCWW to provide phosphate mitigation at the Llanfoist and Monmouth WwTWs by 31st March 2025, the Local Planning Authority is now able to issue planning permissions within the area served by these two WwTWs, subject to a suitably worded 'Grampian condition' preventing commencement of development until 31st March 2025. This will give confidence to the development industry and unlock stalled sites while ensuring new development proposals do not have an adverse impact on water quality within the river SACs.

Monmouthshire Council has confirmed that phosphate solutions have been agreed as part of a wider approach to the issue in partnership with Natural Resources Wales and Welsh Water. Natural Resources Wales has issued a new version of detailed planning guidance that has to be met satisfied in relation to both planning applications and allocations. This guidance will be considered as part of the HRA process. The RLDP allocations have been made in consultation with Welsh Water and Natural Resources Wales, having regard to headroom limits and phosphate solutions proposed Policy NR3 – Protection of Water Sources and the Water Environment sets out requirements for development which may impact upon the water environment and associated land. Given this, it is concluded that there would not be adverse effects on the site integrity of the River Usk SAC and the River Wye SAC regarding water quality.

Severn Estuary SAC/SPA/Ramsar

No water quality adverse effects on the integrity of the Severn Estuary SAC/SPA/Ramsar were identified during the appropriate assessment.

Water Quantity, Level and Flow

River Usk SAC and River Wye SAC

It was considered that no adverse effect on integrity would arise on River Usk SAC or River Wye SAC through this impact pathway due to Monmouthshire Replacement Local Development Plan. Moreover, the RLDP (see Policies S4 and S5) already contains some broad policy wording that protects European sites, which are reliant on water supply, from adverse effects. However, due to the sensitivity of these SACs to water abstraction, it is recommended that specific reference to the sites and the relevant flow targets established by Natural Resources Wales is made in the supporting text to either of these policies. The following text could be added to ensure greater protection of the rivers' flow regimes: 'Any development proposals have to ensure that there will be no adverse effects on the site integrity of the two riverine SACs, the River Usk SAC and the River Wye SAC, regarding water quantity, level and flow. In particular, development will not be permitted if it cannot be accommodated under the Review of Consents for flow in these rivers, including the maximum permissible percentage reduction from naturalised flow levels and hands-off flow conditions.'

Monmouthshire Council have commented that this has been considered as part of the plan making process in consultation with Welsh Water in relation to allocations. Proposals coming forward via planning applications are required to satisfy detailed planning guidance published by Natural Resources Wales so a specific DM policy is not considered necessary.

Severn Estuary SAC

No water quantity, level or flow adverse effects on the integrity of the Severn Estuary SAC/SPA/Ramsar were identified during the appropriate assessment.

Conclusion

With the changes made to the Local Plan in response to recommendations, it is considered that the Monmouthshire Local Plan contains a sufficient policy framework that no adverse effect would arise on Habitats sites either alone or in combination with other plans or projects.

1. Background

1.1 Introduction

AECOM was appointed by Monmouthshire County Council (MCC) to undertake a Habitats Regulations Assessment (HRA) of its Local Plan. The objective of this assessment is to identify any aspects of the Plan that would cause an adverse effect on the integrity of Habitats sites, otherwise known as European sites (Special Areas of Conservation (SACs), Special Protection Areas (SPAs) and, as a matter of Government policy, Ramsar sites), either in isolation or in combination with other plans and projects, and to advise on appropriate policy mechanisms for delivering mitigation where such effects are identified.

This Local Plan (LP) is a replacement for the adopted LDP that covered the period between 2011 and 2021. The new LP will cover the years 2018 to 2033, building upon the previous LDP. The emerging LP is the Council's statutory land use plan, supporting the delivery of sustainable and resilient communities within Monmouthshire. The LP will determine where and how much development will take place in the County, but it will also outline which areas are to be protected from development.

An initial assessment of the designated sites within and surrounding Monmouthshire, and the associated impact pathways linking them to the Monmouthshire LP was undertaken. This indicates that several European sites require consideration, most notably the Severn Estuary SPA / Ramsar, the Severn Estuary SAC, the River Usk SAC, the River Wye SAC and two sites designated for bat species, which all lie partly within the authority. The UK is bound by the terms of the Habitats Directive (92/43/EEC). Under Article 6(3) of the Habitats Directive, an appropriate assessment is required, where a plan or project is likely to have a significant effect upon a European Site, either individually or 'in combination' with other projects.

An HRA was produced for the Preferred Strategy in 2022. This document is an updated HRA for the Deposit Plan.

1.2 Legislative Context

The need for an assessment of impacts on European sites is set out within Article 6 of the Habitats Directive and transposed into English and Welsh law by the Conservation of Habitats and Species Regulations 2017 (as amended). The ultimate aim of the Habitats Directive is to "*maintain or restore, at favourable conservation status, natural habitats and species of wild fauna and flora of Community interest*" (Article 2(2)). This aim relates to habitats and species, not the European Sites themselves, although the European Sites have a significant role in delivering favourable conservation status.

The UK left the EU on 31 January 2020 under the terms set out in the European Union (Withdrawal Agreement) Act 2020 ("the Withdrawal Act"). This established a transition period, which ended on 31 December 2020. The Withdrawal Act retains the body of existing EU-derived law within our domestic law, meaning that legislation relating to nature conservation continues to apply to and in the UK. The need for Appropriate Assessment is set out by the Conservation of Habitats and Species Regulations 2017 (as amended). The Habitats Directive applies the precautionary principle³ to assessments of European Sites. Consent should only be granted for plans and projects once the relevant competent authority has ascertained that there will either be no likelihood of significant effects, or that a mechanism is in place to ensure that no adverse effect on the integrity of the European Site(s) in question arises. Where an Appropriate Assessment has been carried out and results in a negative assessment, or if uncertainty remains over the significant effect, consent can only be granted if there are no alternative solutions and there are Imperative Reasons of Over-riding Public Interest (IROPI) for the development and compensatory measures have been secured.

³ The Precautionary Principle, which is referenced in Article 191 of the Treaty on the Functioning of the European Union, has been defined by the United Nations Educational, Scientific and Cultural Organisation (UNESCO, 2005) as: "*When human activities may lead to morally unacceptable harm [to the environment] that is scientifically plausible but uncertain, actions shall be taken to avoid or diminish that harm. The judgement of plausibility should be grounded in scientific analysis*".

To ascertain whether site integrity will be affected, an Appropriate Assessment should be undertaken of the plan or project in question. Figure 1 provides the legislative basis for an Appropriate Assessment.

<p>Habitats Directive 1992</p> <p>Article 6 (3) states that:</p> <p><i>“Any plan of project not directly connected with or necessary to the management of the site but likely to have a significant effect thereon, either individually or in combination with other plans or projects, shall be subject to appropriate assessment of its implications for the site in view of the site’s conservation objectives.”</i></p> <p>Conservation of Habitats and Species Regulations 2017 (as amended)</p> <p>The Regulations state that:</p> <p><i>“A competent authority, before deciding to ... give any consent for a plan or project which is likely to have a significant effect on a European site ... must make an appropriate assessment of the implications for the plan or project in view of that site’s conservation objectives... The competent authority may agree to the plan or project only after having ascertained that it will not adversely affect the integrity of the European site.”</i></p>
--

Figure 1. The legislative basis for Appropriate Assessment

Over the years, ‘Habitats Regulations Assessment’ (HRA) has come into wide currency to describe the overall process set out in the Habitats Regulations, from screening through to identification of IROPI. This has arisen in order to distinguish the overall process from the individual stage of ‘Appropriate Assessment’. Throughout this Report the term HRA is used for the overall process and restricts the use of Appropriate Assessment to the specific stage of that name.

1.3 Scope of the Project

There is no pre-defined guidance that dictates the physical scope of an HRA of a Plan document. Therefore, in considering the physical scope of the assessment, we were guided primarily by the identified impact pathways (called the source-pathway-receptor model) rather than by arbitrary ‘zones’. Current guidance suggests that the following European sites be included in the scope of assessment:

- All European sites within the boundary of the County of Monmouthshire; and,
- Other European sites within 15km shown to be linked to development within the County’s boundary through a known ‘pathway’ (discussed below).

Briefly defined, impact pathways are routes by which the implementation of a policy within a Local Plan document can lead to an effect upon a European designated site. An example of this would be new residential development resulting in an increased population and thus increased recreational pressure, which could then affect European sites by, for example, disturbance of wintering or breeding birds. Guidance from the English Ministry of Housing, Communities and Local Government (MHCLG) states that the HRA should be ‘*proportionate to the geographical scope of the [plan policy]*’ and that ‘*an AA need not be done in any more detail, or using more resources, than is useful for its purpose*’ (MHCLG, 2006, p.6).

While MHCLG does not have authority in Wales, this basic principle has also been reflected in court rulings. The Court of Appeal⁴ has ruled that providing the Council (competent authority) was duly satisfied that proposed mitigation could be ‘achieved in practice’ to satisfy that the proposed development would have no adverse effect, then this would suffice. This ruling has since been applied to a planning permission (rather than a Core Strategy document)⁵. In this case the High Court ruled that for ‘*a multistage process, so long as there is sufficient information at any particular stage to*

⁴No Adastral New Town Ltd (NANT) v Suffolk Coastal District Council Court of Appeal, 17th February 2015

⁵High Court case of R (Devon Wildlife Trust) v Teignbridge District Council, 28 July 2015

enable the authority to be satisfied that the proposed mitigation can be achieved in practice it is not necessary for all matters concerning mitigation to be fully resolved before a decision maker is able to conclude that a development will satisfy the requirements of Reg 61 of the Habitats Regulations’.

Given an initial assessment of the relevant European sites and the impact pathways present, and referring to the HRA work that was undertaken for the adopted LDP, this HRA will discuss the following European sites:

- Usk Bat Sites SAC
- Cwm Clydach Woodlands SAC
- Wye Valley Woodlands SAC
- Severn Estuary SAC
- River Wye SAC
- Avon Gorge Woodlands SAC
- Severn Estuary SPA / Ramsar
- River Usk SAC
- Wye Valley and Forest of Dean Bat Sites SAC
- Aberbargoed Grasslands SAC
- Sugar Loaf Woodlands SAC
- Llangorse Lake SAC; and
- Coed y Cerrig SAC

An introduction to these sites, their qualifying features (species and habitats), conservation objectives, and threats and pressures to site integrity are set out in Chapter 3 of this report.

In order to fully inform the screening process, several studies and information databases have been consulted to determine Likely Significant Effects (LSEs) that could arise from the draft LP. These include:

- Future development proposed (and, where available, HRAs) for the adjoining authorities of Powys, Torfaen, Newport, Blaenau Gwent, Herefordshire, Forest of Dean, South Gloucestershire and Bristol;
- Road traffic statistics from the Department for Transport (<https://roadtraffic.dft.gov.uk>);
- Journey-to-work data from the Population Census 2011 (<https://www.nomisweb.co.uk/census/2011/WU03UK>);
- Visitor surveys carried out in Lydney⁶ and Stroud District⁷, as they are both relevant to the Severn Estuary SPA / Ramsar;
- The HRA produced for the adopted Monmouthshire LDP;
- Core Management Plans for relevant European sites;
- The UK Air Pollution Information System (www.apis.ac.uk); and
- Multi Agency Geographic Information for the Countryside (MAGIC) and its links to SSSI citations and the JNCC website (www.magic.gov.uk).
- Habitat mapping on the Wales Environmental Information Portal⁸; and

1.4 Quality Assurance

This report was undertaken in line with AECOM's Integrated Management System (IMS). Our IMS places great emphasis on professionalism, technical excellence, quality, environmental and Health and Safety management. All staff members are committed to establishing and maintaining our certification to the international standards BS EN ISO 9001:2008 and 14001:2004 and BS OHSAS 18001:2007. In addition, our IMS requires careful selection and monitoring of the performance of all sub-consultants and contractors.

All AECOM Ecologists working on this project are members (at the appropriate level) of the Chartered Institute of Ecology and Environmental Management (CIEEM) and follow their code of professional conduct (CIEEM, 2017).

2. Methodology

2.1 Introduction

The HRA has been carried out with reference to the general EC guidance on HRA¹⁰ and the Welsh Government's guidance on HRA: Technical Advice Note 5 (Nature Conservation and Planning) 2009 and The Planning Series: 16 – Habitats Regulations Assessment. AECOM has also been mindful of the implications of European case law in 2018, notably the Holohan ruling and the People over Wind ruling, both discussed below.

Figure 2 below outlines the stages of HRA according to current EC guidance. The stages are essentially iterative, being revisited as necessary in response to more detailed information, recommendations and any relevant changes to the plan until no significant adverse effects remain.

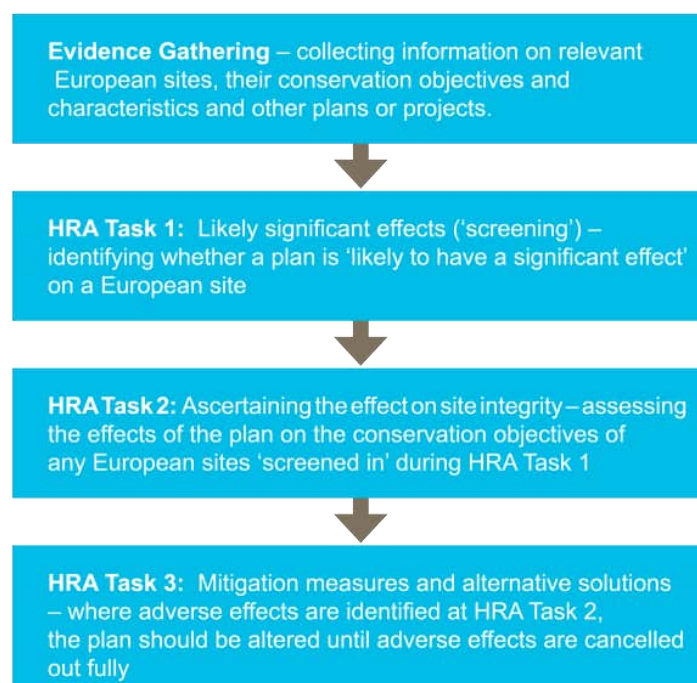

Figure 2. Four Stage Approach to Habitats Regulations Assessment. Source EC, 2001¹.

⁹ Available online at: <https://www.dtapublications.co.uk/> [Accessed on the 11/06/2021]

¹⁰ European Commission (2001): Assessment of plans and projects significantly affecting Natura 2000 Sites: Methodological Guidance on the Provisions of Article 6(3) and 6(4) of the Habitats Directive.

2.2 Description of HRA Tasks

2.2.1 HRA Task 1 – Likely Significant Effects (LSE)

Following evidence gathering, the first stage of any Habitats Regulations Assessment is a Likely Significant Effect (LSE) test - essentially a risk assessment to decide whether the full subsequent stage known as Appropriate Assessment is required. The essential question is:

“Is the project, either alone or in combination with other relevant projects and plans, likely to result in a significant effect upon European sites?”

The objective is to ‘screen out’ those plans and projects that can, without any detailed appraisal, be said to be unlikely to result in significant adverse effects upon European sites, usually because there is no mechanism for an adverse interaction with European sites. This stage is undertaken in Chapter 4 of this report and in Appendix A.

2.2.2 HRA Task 2 – Appropriate Assessment (AA)

Where it is determined that a conclusion of ‘no likely significant effect’ cannot be drawn, the analysis has proceeded to the next stage of HRA known as Appropriate Assessment. Case law has clarified that ‘appropriate assessment’ is not a technical term. In other words, there are no particular technical analyses, or level of technical analysis, that are classified by law as belonging to appropriate assessment rather than determination of likely significant effects.

By virtue of the fact that it follows Screening, there is a clear implication that the analysis will be more detailed than undertaken at the Screening stage and one of the key considerations during appropriate assessment is whether there is available mitigation that would entirely address the potential effect. In practice, the appropriate assessment would take any policies or allocations that could not be dismissed following the high-level Screening analysis and analyse the potential for an effect in more detail, with a view to concluding whether there would actually be an adverse effect on integrity (in other words, disruption of the coherent structure and function of the European site(s)).

A decision by the European Court of Justice¹¹ concluded that measures intended to avoid or reduce the harmful effects of a proposed project on a European site may no longer be taken into account by competent authorities at the Likely Significant Effects or ‘screening’ stage of HRA. That ruling has been taken into account in producing this HRA.

Also in 2018 the Holohan ruling¹² was handed down by the European Court of Justice. Among other provisions paragraph 39 of the ruling states that *‘As regards other habitat types or species, which are present on the site, but for which that site has not been listed, and with respect to habitat types and species located outside that site, ... typical habitats or species must be included in the appropriate assessment, if they are necessary to the conservation of the habitat types and species listed for the protected area’* [emphasis added]. Due account of this decision has been taken in this HRA, particularly regarding habitat outside the Usk Bat Sites SAC, Wye Valley & Forest of Dean Bat Sites SAC and Severn Estuary SPA / Ramsar but which may be important for sustaining the SAC bat populations and SPA / Ramsar bird populations.

2.2.3 HRA Task 3 – Avoidance and Mitigation

Where necessary, measures are recommended for incorporation into the Plan in order to avoid or mitigate adverse effects on European sites. There is considerable precedent concerning the level of detail that a Local Plan document needs to contain regarding mitigation for recreational impacts on European sites. The implication of this precedent is that it is not necessary for all measures that will be deployed to be fully developed prior to adoption of the Plan, but the Plan must provide an adequate policy framework within which these measures can be delivered.

¹¹ People Over Wind and Sweetman v Coillte Teoranta (C-323/17)

¹² Case C-461/17

In evaluating significance, AECOM has relied on professional judgement as well as the results of previous stakeholder consultation regarding development impacts on the European sites considered within this assessment.

When discussing 'mitigation' for a Local Development Plan document, one is concerned primarily with the policy framework to enable the delivery of such mitigation rather than the details of the mitigation measures themselves since the Local Development Plan document is a high-level policy document.

3. Designated Habitat Sites

3.1 Usk Bat Sites SAC

3.1.1 Introduction

The SAC comprises a wide variety of different habitats, including bogs and marshes (40.2%), heath and scrub (32.2%), Alpine and sub-alpine grassland (3.9%), dry grassland and steppes (3.8%) and broad-leaved deciduous woodland (3.4%).

Mynydd Llangatwg, the area making up large parts of the SAC, consists mainly of open moorland and bog, and represents one of the largest sections of exposed upland limestone crag in south Wales. The Craig y Cilau National Nature Reserve (NNR), which covers a large portion of the limestone escarpment, comprises areas of limestone grassland, scree, woodland and scrub. An extensive system of caves and sinkholes has developed beneath the Mynydd Llangatwg.

The NNR has been established primarily to protect the lesser horseshoe bat roosts in the caves, a primary reason for selection of this site as a SAC. However, the site also supports a noteworthy assemblage of plants, such as the small-leaved lime, several species of whitebeam, limestone fern, endemic hawkweeds and the alpine enchanter's-nightshade. The various micro-habitats on the cliffs and boulders harbour a typical range of fern, bryophytes and calcareous lichens. Notable lichen species include the jelly lichen *Collema cristatum*, *Leproplacetum chryssodetae* and *Aspicillium calcarean*.

Other Annex I habitats are also present, but not a primary reason for site selection. For example, these include *Tilio-Acerion* forest along the cliffs, which support rare whitebeams and are intermixed with beechwood in the Clydach Gorge. This SAC is located partly within the north-west corner of Monmouthshire near Gilwern.

3.1.2 Qualifying Features¹³

The site has been designated as a SAC for the following features:

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site:

- European dry heaths
- Degraded raised bogs still capable of natural regeneration
- Blanket bogs
- Calcareous rocky slopes with chasmophytic vegetation
- Caves not open to the public
- *Tilio-Acerion* forests of slopes, screes and ravines

Annex II species that are **a primary reason** for selection of this site

- Lesser horseshoe bat *Rhinolophus hipposideros*

¹³ <https://sac.jncc.gov.uk/site/UK0014784>

3.1.3 Conservation Objectives¹⁴

The overarching conservation objectives are outlined in the Core Management Plan for the Usk Bat Sites published by Natural Resources Wales. While this document also provides conservation vision statements for the Annex I habitats, only the conservation objectives for the primary site feature are outlined below.

The vision for this feature is for it to be in a favourable conservation status, where all of the following conditions are satisfied:

- The site will support a sustainable population of lesser horseshoe bats in the River Usk area;
- The population will be viable in the long term, acknowledging the population fluctuations of the species;
- Buildings, structures and habitats on the site will be in optimal condition to support the populations;
- Sufficient foraging habitat is available, in which factors such as disturbance, interruption to flight lines, and mortality from predation or vehicle collision, changes in habitat management that would reduce the available food source are not at levels which could cause any decline in population size or range;
- Management of the surrounding habitats is of the appropriate type and sufficiently secure to ensure there is likely to be no reduction in population size or range, nor any decline in the extent or quality of breeding, foraging or hibernating habitat;
- There will be no loss or decline in quality of linear features (such as hedgerows and tree lines) which the bats use as flight lines;
- There will be no loss of foraging habitat use by the bats or decline in its quality, such as due to over-intensive woodland management; and
- All factors affecting the achievement of the above conditions are under control.

3.1.4 Threats / Pressures to Site Integrity¹⁵

While there is no Site Improvement Plan for the SAC, the main pressures and threats to site integrity can be inferred from the site's Core Management Plan, which outlines the management techniques that are required to achieve the conservation objectives for the SAC.

The main threats and pressures to the site integrity of the SAC are the following:

- Recreational pressure
- Inappropriate management of main habitats
- Inappropriate water level (in bogs)
- Inappropriate grazing levels
- Impact of atmospheric nitrogen deposition
- Quarrying / mining in the area
- Risk of arson / wildfires

3.2 Cwm Clydach Woodlands SAC

3.2.1 Introduction

The Cwm Clydach Woodlands SAC mainly comprises broad-leaved deciduous woodland (88.9%), heath and scrub (9.4%), and some dry grassland and steppes (1.7%). Primarily, the site is

¹⁴<https://naturalresources.wales/media/674281/Usk%20Bat%20Sites%20Management%20Plan%20Feb%202008.pdf>. As published by Natural Resources Wales

¹⁵ <https://naturalresources.wales/media/674281/Usk%20Bat%20Sites%20Management%20Plan%20Feb%202008.pdf>

characterised by *Asperulo-Fagetum* beech forests that lie close to the limit of their north-western distribution in the UK and within Europe. The main part of the wood is on a steep valley side with a mature canopy of large trees and abundant deadwood. There are also transitions to more acidic beech woodland.

The SAC harbours some rare and characteristic plant species including the whitebeam *Sorbus porrigentiformis*, mountain sedge *Carex montana*, yellow bird's-nest *Monotropa hypopitys* and bird's-nest orchid *Neottia nidus-avis*. This SAC lies in the north-west corner of the County near Gilwern.

3.2.2 Qualifying Features¹⁶

The site has been designated as a SAC for the following features:

Annex I habitats that are a primary reason for selection of this site:

- *Asperulo-Fagetum* beech forests

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site:

- Atlantic acidophilous beech forests with *Ilex* and sometimes also *Taxus* in the shrublayer

3.2.3 Conservation Objectives¹⁷

The overarching conservation objectives are outlined in the Core Management Plan for the Cwm Clydach Woodland published by Natural Resources Wales. While this document also provides conservation vision statements for the non-primary Annex I habitat, only the conservation objectives for the primary site feature are outlined below.

The vision for this feature is for it to be in a favourable conservation status, where all of the following conditions are satisfied:

- At least 50% of the canopy-forming trees are beech;
- The canopy cover is at least 80% (excluding areas of crag) and composed of locally native trees;
- The woodland has trees of all age classes with a scattering of standing and fallen dead wood;
- Regeneration of trees is sufficient to maintain the woodland cover in the long term;
- The shrub layer and ground flora can be quite sparse, but where present consist of locally native plants such as yew, hawthorn, wych elm, ash, hazel, field maple and elder, bramble, dog's mercury, enchanter's-nightshade, lords-and-ladies, woodruff, male fern, sanicle, wood melick, ivy, false brome, violets, herb robert, wood avens, and tufted hair-grass;
- Scarcer plants, such as soft-leaved sedge and bird's-nest orchid are locally frequent and, more rarely, yellow bird's-nest orchid can be found; and
- All factors affecting the achievement of the above conditions are under control.

3.2.4 Threats and Pressures to Site Integrity¹⁸

While there is no Site Improvement Plan for the SAC, the main pressures and threats to site integrity can be inferred from the site's Core Management Plan, which outlines the management techniques that are required to achieve the conservation objectives for the SAC.

The main threats and pressures to the site integrity of the SAC are the following:

- Recreational disturbance (fly-tipping)
- Inappropriate habitat management
- Inappropriate grazing levels

¹⁶ <https://sac.jncc.gov.uk/site/UK0030127>

¹⁷ <https://naturalresources.wales/media/675017/cwm-clydach-sac-plan-english.pdf>. As published by Natural Resources Wales

¹⁸ <https://naturalresources.wales/media/675017/cwm-clydach-sac-plan-english.pdf>

- Invasive species

3.3 River Usk SAC

3.3.1 Introduction

The River Usk SAC originates in the west of the Bannau Brycheiniog National Park and flows south-east, joining the Severn Estuary at Newport. The overall form of the catchment is long and narrow, with steep tributaries inflowing along the way to the Severn Estuary. The underlying geology is primarily Devonian Old Red Sandstone resulting in well buffered low-acidity waters. This geology also drives the low-moderate nutrient that characterises the SAC. However, along its course the nutrient status of the SAC is significantly modified by land use within the catchment, which is mainly pastoral and occasional woodland forestry.

The ecological structure and function of the site is highly dependent on hydrological and geomorphological processes, as well as the quality and connectivity of riparian habitats. This is especially the case for mobile animals, such as migratory fish and otters that move throughout the site. For example, the maintenance of a good hydrological regime (i.e. water quality and flows) and a consequent maintenance of current velocity, water depth, dissolved oxygen levels and nutrient status are integral for fish to move around the river.

Example of the species that the SAC is designated for include the sea lamprey *Petromyzon marinus*, Atlantic salmon *Salmo salar* and bullhead *Cottus gobio*. Especially the Atlantic salmon requires unmodified river channels and an obstruction-free migratory route to its spawning gravels. The River Usk SAC is also an important site for otters, acting as a refuge for the species in the 1950s and subsequently as a source population for the re-colonisation of south-east Wales. This SAC river flows through Monmouthshire.

3.3.2 Qualifying Features¹⁹

The site has been designated as a SAC for the following features:

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site:

- Water courses of plain to montane levels with the *Ranunculion fluitantis* and *Callitricho-Batrachion* vegetation

Annex II species that are a primary reason for selection of this site:

- Sea lamprey *Petromyzon marinus*
- Brook lamprey *Lampetra planeri*
- River lamprey *Lampetra fluviatilis*
- Twaite shad *Alosa fallax*
- Atlantic salmon *Salmo salar*
- Bullhead *Cottus gobio*
- Otter *Lutra lutra*

Annex II species present as a qualifying feature, but not a primary reason for site selection:

- Allis shad *Alosa alosa*

3.3.3 Conservation Objectives²⁰

The overarching conservation objectives are outlined in the Core Management Plan for the River Usk SAC published by Natural Resources Wales. While this document provides conservation vision

¹⁹ <https://sac.jncc.gov.uk/site/UK0013007>

²⁰ https://naturalresources.wales/media/673384/River_Usk%20SAC%20core%20plan.pdf. As published by Natural Resources Wales

statements for all Annex II species, only the conservation objectives for the water course are presented here, as this is essential to maintain the species in favourable conservation status.

- The capacity of the habitats in the SAC to support each feature at near-natural population levels, as determined by predominantly unmodified ecological and hydromorphological processes and characteristics, should be maintained as far as possible, or restored where necessary;
- The ecological status of the water environment should be sufficient to maintain a stable or increasing population of each feature. This will include elements of water quantity and quality, physical habitat and community composition and structure. It is anticipated that these limits will concur with the relevant standards used by the Review of Consents process given in Annexes 1-3;
- Flow regime, water quality and physical habitat should be maintained in, or restored as far as possible to, a near-natural state, in order to support the coherence of ecosystem structure and function across the whole area of the SAC;
- All known breeding, spawning and nursery sites of species features should be maintained as suitable habitat as far as possible, except where natural processes cause them to change;
- Flows, water quality, substrate quality and quantity at fish spawning sites and nursery areas will not be depleted by abstraction, discharges, engineering or gravel extraction activities or other impacts to the extent that these sites are damaged or destroyed;
- The river planform and profile should be predominantly unmodified. Physical modifications having an adverse effect on the integrity of the SAC, including, but not limited to, revetments on active alluvial river banks using stone, concrete or waste materials, unsustainable extraction of gravel, addition or release of excessive quantities of fine sediment, will be avoided;
- River habitat SSSI features should be in favourable condition. In the case of the Usk Tributaries SSSI, the SAC habitat is not underpinned by a river habitat SSSI feature. In this case, the target is to maintain the characteristic physical features of the river channel, banks and riparian zone;
- Artificial factors impacting on the capability of each species feature to occupy the full extent of its natural range should be modified where necessary to allow passage, eg. weirs, bridge sills, acoustic barriers;
- Natural factors such as waterfalls, which may limit the natural range of a species feature or dispersal between naturally isolated populations, should not be modified;
- Flows during the normal migration periods of each migratory fish species feature will not be depleted by abstraction to the extent that passage upstream to spawning sites is hindered;
- Flow objectives for assessment points in the Usk Catchment Abstraction Management Strategy will be agreed between EA and Natural Resources Wales as necessary. It is anticipated that these limits will concur with the standards used by the Review of Consents process given in Annex 1 of this document;
- Levels of nutrients, in particular phosphate, will be agreed between EA and Natural Resources Wales for each Water Framework Directive water body in the Usk SAC, and measures taken to maintain nutrients below these levels. It is anticipated that these limits will concur with the standards used by the Review of Consents process given in Annex 2 of this document;
- Levels of water quality parameters that are known to affect the distribution and abundance of SAC features will be agreed between EA and Natural Resources Wales for each Water Framework Directive water body in the Usk SAC, and measures taken to maintain pollution below these levels. It is anticipated that these limits will concur with the 16 standards used by the Review of Consents process given in Annex 3 of this document;
- Potential sources of pollution not addressed in the Review of Consents, such as contaminated land, will be considered in assessing plans and projects; and
- Levels of suspended solids will be agreed between EA and Natural Resources Wales for each Water Framework Directive water body in the Usk SAC. Measures including, but not limited to, the control of suspended sediment generated by agriculture, forestry and engineering works, will be taken to maintain suspended solids below these levels.

3.3.4 Threats and Pressures to Site Integrity²¹

While there is no Site Improvement Plan for the SAC, the main pressures and threats to site integrity can be inferred from the site's Core Management Plan, which outlines the management techniques that are required to achieve the conservation objectives for the SAC.

The main threats and pressures to the site integrity of the SAC are the following:

- Inappropriate habitat management (e.g. barriers to migration)
- Water quality
- Water flow / level
- Noise / acoustic disturbance
- Non-marine fisheries: recreational and commercial
- Increased sedimentation / siltation

3.4 Aberbargoed Grasslands SAC

3.4.1 Introduction

The Aberbargoed Grasslands SAC comprises multiple habitats, including humid grassland (48%), broad-leaved deciduous woodland (32.6%), and heath and scrub (12.8%). The SAC covers 42.5ha and lies on a southwest facing hillside in the Rhymney Valley, 1km east of Bargoed and thus occupying an urban fringe position.

The fields in the south-western part of the site have reduced drainage and harbour a mixture of marshy grassland communities. Areas of high conservation value include abundant purple moor grass *Molinia caerulea*, meadow thistle *Cirsium dissectum*, devil's bit scabious *Succisa pratensis* and carnation sedge *Carex panicea*. Associated stands of *Molinia caerulea* – *Potentilla erecta* mire contain abundant purple moor grass with other important plant species, such as common sedge *Carex nigra* and spotted orchid *Dactylorhiza maculata*. This SAC lies approximately 12km west of Monmouthshire.

3.4.2 Qualifying Features²²

The site has been designated as a SAC for the following features:

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site:

- Molinia meadows on calcareous, peaty or clayey-silt laden soils (*Molinia caerulea*)

Annex II species that are a primary reason for selection of this site:

- Marsh fritillary butterfly *Euphydryas aurinia*

3.4.3 Conservation Objectives²³

The overarching conservation objectives are outlined in the Core Management Plan for the Aberbargoed Grasslands SAC published by Natural Resources Wales. While this document also provides conservation vision statements for the Annex I habitat, only the conservation objectives for the primary qualifying feature are presented here.

The vision for this feature is for it to be in a favourable conservation status, where all of the following conditions are satisfied:

²¹ https://naturalresources.wales/media/673384/River_Usk%20SAC%20core%20plan.pdf.

²² <https://sac.jncc.gov.uk/site/UK0030071>

²³ <https://naturalresources.wales/media/670637/Aberbargoed%20Grasslands%20Core%20SAC%20plan%20jan08.pdf>. As published by Natural Resources Wales

- The site will support a sustainable metapopulation of the marsh fritillary in the Aberbargoed area. This will require at least 50ha of suitable habitat, although not all of this will be within the SAC;
- The population will be viable in the long term, acknowledging the extreme population fluctuations of the species;
- Habitats on the site will be in optimal condition to support the metapopulation;
- At least 25ha of the total site area will be marshy grassland suitable for supporting marsh fritillary, with *Succisa pratensis* present and only a low cover of scrub;
- At least 6.25ha will be good marsh fritillary breeding habitat, dominated by purple moor-grass *Molinia caerulea*, with *S. pratensis* present throughout and a vegetation height of 10-20cm over the winter period; and
- All factors affecting the achievement of the foregoing conditions are under control.

3.4.4 Threats and Pressures to Site Integrity²⁴

While there is no Site Improvement Plan for the SAC, the main pressures and threats to site integrity can be inferred from the site's Core Management Plan, which outlines the management techniques that are required to achieve the conservation objectives for the SAC.

The main threats and pressures to the site integrity of the SAC are the following:

- Appropriate grazing levels
- Recreational pressure

3.5 Sugar Loaf Woodlands SAC

3.5.1 Introduction

The Sugar Loaf Woodlands SAC comprises 173.1ha of broad-leaved deciduous woodland (76.7%), and heath and scrub (23.3%). It is the largest area of old sessile oak woods near the south-eastern fringe of the habitat's range in the UK and Europe. Due to the relatively dry conditions in the SAC, the development of the Atlantic flora is restricted. However, the main plant components of the site are sessile oak *Quercus petraea*, bilberry *Vaccinium myrtillus*, wavy hair-grass *Deschampsia flexuosa*, and extensive fern and bryophyte cover. While the woodland is grazed, it regenerates around the fringes, where transitions to upland grassland and heathland communities occur. This SAC lies within Monmouthshire, close to Abergavenny.

3.5.2 Qualifying Features²⁵

The site has been designated as a SAC for the following features:

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site:

- *Molinia* meadows on calcareous, peaty or clayey-silt laden soils (*Molinia caerulea*)

Annex II species that are a primary reason for selection of this site:

- Marsh fritillary butterfly *Euphydryas aurinia*

3.5.3 Conservation Objectives²⁶

The overarching conservation objectives are outlined in the Core Management Plan for the Sugar Loaf Woodlands SAC published by Natural Resources Wales.

²⁴ <https://naturalresources.wales/media/670637/Aberbargoed%20Grasslands%20Core%20SAC%20plan%20jan08.pdf>.

²⁵ <https://sac.jncc.gov.uk/site/UK0030072>

²⁶ https://naturalresources.wales/media/674063/Sugar_Loaf_Woodlands_core_management_plan_Mar_2008%20_A_.pdf. As published by Natural Resources Wales

The vision for this feature is for it to be in favourable conservation status within the site, as a functioning and regenerating* oak wood, where all of the following conditions are satisfied:

- The wooded area is no less than 122 ha;
- The remainder of the site is semi-natural acid grassland, heathland, bracken and scrub, often forming a transition zone at the woodland edge;
- Saplings of birch *betula* spp, oak *Quercus petraea*, alder *Alnus glutinosa* or holly *Ilex aquifolium* dominate the tree regeneration;
- Young beech *Fagus sylvatica* and sycamore *Acer pseudoplatanus* trees are rare;
- The woodland ground flora is composed of a range of typical native plants including bilberry *Vaccinium myrtillus*, wavy-hair grass *Deschampsia flexuosa* and the mosses *Plagiothecium undulatum*, *Rhytidiadelphus loreus*, *Dicranum majus*;
- The liverwort *Bazzania trilobata* to continue to be present in its core area of Unit 1; and
- All factors affecting the achievement of these conditions will under control.

* A "functioning and regenerating oak woodland" would include all the positive attributes described in the performance indicators.

3.5.4 Threats and Pressures to Site Integrity²⁷

While there is no Site Improvement Plan for the SAC, the main pressures and threats to site integrity can be inferred from the site's Core Management Plan, which outlines the management techniques that are required to achieve the conservation objectives for the SAC.

The main threats and pressures to the site integrity of the SAC are the following:

- Inappropriate habitat management
- Invasive species

3.6 Llangorse Lake SAC

3.6.1 Introduction

The Llangorse Lake SAC comprises several habitats, including inland water bodies (56.8%), bogs and marshes (11.9%), humid grassland (8.9%), improved grassland (16%) and broad-leaved deciduous woodland (5.1%). Its main feature is a large shallow lake with a mean depth of 2-3 metres, lying in a natural depression of Devonian Old Red Sandstone. It is the largest natural lowland water in south Wales and one of the few natural eutrophic lakes in Britain.

The site's mineral-rich geology has encouraged growth of a wide range of aquatic and marginal plants, including several species that are rare in Wales. The SAC shows a gradation from open water with submerged and floating plant beds, to patches of willow scrub and wet woodland. The lake has a diverse plankton community supporting a wide variety of invertebrates, including many rare species. Its flora is dominated by pondweed, such as yellow water-lily *Potamogetonaceae* – *Nupharetum* associations. The shoreline flora is largely dominated by club-rush-common reed *Scirpo* - *Phragmitetum* associations. It is also rich in shining pondweed *Potamogeton lucens*. This SAC lies approximately 11km north-west of Monmouthshire.

3.6.2 Qualifying Features²⁸

The site has been designated as a SAC for the following features:

Annex I habitats that are a primary reason for selection of this site:

- Natural eutrophic lakes with *Magnopotamion* or *Hydrocharition* – type vegetation

²⁷ https://naturalresources.wales/media/674063/Sugar_Loaf_Woodlands_core_management_plan_Mar_2008%20A_.pdf.

²⁸ <https://sac.jncc.gov.uk/site/UK0012985>

3.6.3 Conservation Objectives²⁹

The overarching conservation objectives are outlined in the Core Management Plan for the Llangorse Lake SAC published by Natural Resources Wales.

Natural eutrophic lakes with *Magnopotamion* or *Hydrocharition* – type vegetation

- There is no loss of lake area, as defined in 2006 aerial photographs for summer levels;
- The aquatic plant community is typical of this lake type in terms of composition and structure, including species such as water-starworts, stoneworts, duckweeds, broad-leaved and fineleaved pondweeds, water lilies, amphibious bistort, water-crowfoots, rigid hornwort, spiked water-milfoil, mare's-tail and horned pondweed;
- Plants indicating very high nutrient levels and excessive silt loads are not dominant and invasive non-native water plants do not threaten to out-compete the native flora;
- The nutrient, pH and dissolved oxygen levels are typical for a lake of this type and there is no excessive growth of cyanobacteria or green algae;
- There is a natural hydrological regime;
- The natural shoreline is maintained;
- The natural and characteristic substrate is maintained;
- The natural sediment load maintained; and
- All factors affecting the achievement of these conditions are under control.

3.6.4 Threats and Pressures to Site Integrity³⁰

While there is no Site Improvement Plan for the SAC, the main pressures and threats to site integrity can be inferred from the site's Core Management Plan, which outlines the management techniques that are required to achieve the conservation objectives for the SAC.

The main threats and pressures to the site integrity of the SAC are the following:

- Water quality
- Sedimentation
- Non-native invasive species
- Loss of surrounding habitats

3.7 Coed y Cerrig SAC

3.7.1 Introduction

The Coed y Cerrig SAC is 8.99ha in size and comprises two main habitats, namely broad-leaved deciduous woodland (91.2%), and bogs and marshes (6.6%). The SAC is a good example of alluvial forest in southern Wales. It lies in the bottom of a valley and its canopy is dominated by alder *Alnus glutinosa* and ash *Fraxinus excelsior*, and a rich understorey with guelder-rose *Viburnum opulus* and bird cherry *Prunus padus*. Its ground flora includes large sedges *Carex* spp. and wet woodland species. There are gradations to ash-elm *Fraxinus-Ulmus* and oak *Quercus* spp. on the valley sides. The site includes a large area of species-rich fen meadow and some rush pasture.

Historically, the wet alder dominated woodland has been managed through a mixture of coppicing and grazing. Coppice management was traditionally undertaken to provide timber for the charcoal and clog making industries but seized before the Second World War. The dry woodland sections were managed for oak and beech timber. The SAC is located within north Monmouthshire.

²⁹ <https://naturalresources.wales/media/672671/Llangorse%20lake%20core%20management%20plan.pdf>. As published by the Natural Resources Wales (2008).

³⁰ <https://naturalresources.wales/media/672671/Llangorse%20lake%20core%20management%20plan.pdf>.

3.7.2 Qualifying Features³¹

The site has been designated as a SAC for the following features:

Annex I habitats that are a primary reason for selection of this site:

- Alluvial forests with *Alnus glutinosa* and *Fraxinus excelsior* (*Alno-Padion*, *Alnion incanae*, *Salicion albae*)

3.7.3 Conservation Objectives³²

The overarching conservation objectives are outlined in the Core Management Plan for the Coed y Cerrig SAC published by Natural Resources Wales.

Alluvial forests with *Alnus glutinosa* and *Fraxinus excelsior* (*Alno-Padion*, *Alnion incanae*, *Salicion albae*)

- Around a third of the site is covered by wet alder and willow woodland;
- This wet woodland grades into areas of permanent open swamp dominated by lesser pond-sedge or other typical wetland plants, where the hydrological conditions are suitable. Adjacent areas of marshy grassland and spring-fed mire are intimately linked to the wet woodland and swamp;
- The remainder of the site supports mainly dry semi-natural woodland;
- The wet woodland has a variable canopy structure, based on a small-scale patchwork, with alder of different ages and some standing as well as fallen dead wood. Ash does not make up more than 25% of the canopy;
- Young trees/saplings and/or vegetative re-growth of the above species are present;
- The understorey includes locally native shrubs typical of this habitat and the ground flora consists of a variety of typical wetland plants, such as lesser pond-sedge, common marsh-bedstraw, meadowsweet, yellow pimpernel, opposite-leaved golden-saxifrage, marsh-marigold, hemlock water-dropwort, water mint, lady fern and rushes;
- Plants associated with nutrient enrichment, such as stinging nettle and cleavers, are not dominant over large areas and invasive alien plants like Japanese knotweed and Indian balsam are absent;
- This wet woodland grades into areas of permanent open swamp dominated by lesser pond-sedge or other typical wetland plants, where the hydrological conditions are suitable. Adjacent areas of marshy grassland and spring-fed mire are intimately linked to the wet woodland and swamp;
- There is no significant input of nutrient-rich water from ditches and surrounding land; and
- All factors affecting the achievement of these conditions are under control.

3.7.4 Threats and Pressures to Site Integrity³³

While there is no Site Improvement Plan for the SAC, the main pressures and threats to site integrity can be inferred from the site's Core Management Plan, which outlines the management techniques that are required to achieve the conservation objectives for the SAC.

The main threats and pressures to the site integrity of the SAC are the following:

- Inadequate woodland management

³¹ <https://sac.jncc.gov.uk/site/UK0012766>

³² https://naturalresources.wales/media/671319/Coed%20y%20Cerrig%20%20SAC%20%20Management%20Plan%20_English_.pdf. As published by Natural Resources Wales

³³ https://naturalresources.wales/media/671319/Coed%20y%20Cerrig%20%20SAC%20%20Management%20Plan%20_English_.pdf.

- Inappropriate grazing levels
- Inappropriate hydrological regime
- Atmospheric pollution
- Recreational pressure

3.8 Severn Estuary SPA / Ramsar

3.8.1 Introduction

The Severn Estuary SPA / Ramsar is located between the borders of Wales and England in south-western Britain. It is a 24,700.91ha large estuary with extensive intertidal mudflats, sandflats, rocky platforms and small islands. The coastline is fringed by saltmarsh, grazing marsh, freshwater and brackish ditches. Its seabed is mainly rocky, gravelly and sub-tidal sandbanks. Due to the estuary's funnel shape, the Severn experiences the second highest tidal range in the world.

Because of this extreme tidal condition, the SPA / Ramsar is inhabited by plant and animal assemblages that tolerate the physical conditions in the tidal-swept liquid mud, sand and rock. The invertebrate community is species-poor and harbours high densities of ragworms and lugworms. These form important food sources for migrant and wintering waders. The SPA / Ramsar has particular importance as a stopover point for spring and autumn migrant waders, and overwintering swans, ducks and waders. The site also has an extensive intertidal zone, as a consequence of its tidal range. The SPA forms the southern boundary of Monmouthshire.

3.8.2 SPA Qualifying Features³⁴

This site qualifies under **Article 4.1** of the Directive (79/409/EEC) by supporting populations (counts are all at time of designation and could have changed since) of European importance of the following species listed on Annex I of the Directive:

Over winter

- Bewick's swan *Cygnus columbianus bewickii*, 280 individuals representing at least 4.0% of the wintering population in Great Britain (5 year peak mean 1991/2 - 1995/6)

This site also qualifies under **Article 4.2** of the Directive (79/409/EEC) by supporting populations of European importance of the following migratory species:

On passage

- Ringed plover *Charadrius hiaticula*, 655 individuals representing at least 1.3% of the Europe/Northern Africa - wintering population (5 year peak mean 1991/2 - 1995/6)

Over winter

- Curlew *Numenius arquata*, 3,903 individuals representing at least 1.1% of the wintering Europe - breeding population (5 year peak mean 1991/2 - 1995/6)
- Dunlin *Calidris alpina alpina*, 44,624 individuals representing at least 3.2% of the wintering Northern Siberia/Europe/Western Africa population (5 year peak mean 1991/2 - 1995/6)
- Pintail *Anas acuta*, 599 individuals representing at least 1.0% of the wintering Northwestern Europe population (5 year peak mean 1991/2 - 1995/6)
- Redshank *Tringa totanus*, 2,330 individuals representing at least 1.6% of the wintering Eastern Atlantic - wintering population (5 year peak mean 1991/2 - 1995/6)
- Shelduck *Tadorna tadorna*, 3,330 individuals representing at least 1.1% of the wintering Northwestern Europe population (5 year peak mean 1991/2 - 1995/6)

Assemblage qualification: A wetland of international importance

³⁴ <http://archive.jncc.gov.uk/default.aspx?page=2066>

The area qualifies under **Article 4.2** of the Directive (79/409/EEC) by regularly supporting at least 20,000 waterfowl.

Over winter, the area regularly supports 93,986 individual waterfowl (5 year peak mean 1991/2 - 1995/6) including: Gadwall *Anas strepera*, shelduck *Tadorna tadorna*, pintail *Anas acuta*, dunlin *Calidris alpina alpina*, curlew *Numenius arquata*, redshank *Tringa totanus*, Bewick's swan *Cygnus columbianus bewickii*, wigeon *Anas penelope*, lapwing *Vanellus vanellus*, teal *Anas crecca*, mallard *Anas platyrhynchos*, shoveler *Anas clypeata*, pochard *Aythya ferina*, tufted duck *Aythya fuligula*, grey plover *Pluvialis squatarola*, white-fronted goose *Anser albifrons albifrons*, whimbrel *Numenius phaeopus*.

3.8.3 Ramsar Qualifying Features³⁵

The Ribble & Alt Estuaries is designated as a Ramsar site under the following criteria:

Criterion 1

- Due to the immense tidal range (second-largest in world), which affects both the physical environment and biological communities
 - Habitats Directive Annex I features present include sandbanks which are slightly covered by sea water all the time, estuaries, mudflats and sandflats not covered by seawater at low tide and Atlantic salt meadows (*Glauco-Puccinellietalia maritima*)

Criterion 3

- Due to unusual estuarine communities, reduced diversity and high productivity

Criterion 4

- This site is important for the run of migratory fish between sea and river via estuary. Species include salmon *Salmo salar*, sea trout *S. trutta*, sea lamprey *Petromyzon marinus*, river lamprey *Lampetra fluviatilis*, allis shad *Alosa alosa*, twaite shad *A. fallax*, and eel *Anguilla anguilla*. It is also of particular importance for migratory birds during spring and autumn.

Criterion 5: Assemblages of international importance

Species with peak counts in winter

70,919 waterfowl (5 year peak mean 1998/99-2002/2003).

Criterion 6: Species / populations occurring at levels of international importance

Species with peak counts in winter

- Tundra swan *Cygnus columbianus bewickii*; 229 individuals representing an average of 2.8% of the GB population (5 year peak mean 1998/99-2002/03)
- Greater white-fronted goose *Anser albifrons*; 2,076 individuals representing an average of 35.8% of the GB population (5 year peak mean 1996/97-2000/01)
- Common shelduck *Tadorna tadorna*; 3,223 individuals representing an average of 1% of the NW Europe population (5 year peak mean 1998/99-2002/03)
- Gadwall *Anas strepera strepera*; 241 individuals representing an average of 1.4% of the GB population (5 year peak mean 1998/99-2002/03)
- Dunlin *Calidris alpina alpina*; 25,082 individuals representing an average of 1.8% of the W Siberia and W Europe population (5 year peak mean 1998/99-2002/03)
- Common redshank *Tringa totanus tetanus*; 2,616 individuals representing an average of 1% of the population (5 year peak mean 1998/99-2002/03)

Species / populations identified subsequent to designation for possible future consideration under criterion 6

³⁵ <https://jncc.gov.uk/jncc-assets/RIS/UK11081.pdf>

Species regularly supported during the breeding season

- Lesser black-backed gull *Larus fuscus graellsii*; 4,167 apparently occupied nests, representing an average of 2.8% of the breeding population (Seabird 2000 Census)

Species with peak counts in spring / autumn

- Ringed plover *Charadrius hiaticula*; 740 individuals representing an average of 1% of the Europe and NW Africa population (5 year peak mean 1998/99-2002/03)

Species with peak counts in winter

- Eurasian teal *Anas crecca*; 4,456 individuals representing an average of 1.1% of the NW Europe population (5 year peak mean 1998/99-2002/03)
- Northern pintail *Anas acuta*; 756 individuals representing an average of 1.2% of the NW Europe population (5 year peak mean 1998/99-2002/03)

Criterion 8

The fish of the whole estuarine and river system is one of the most diverse in Britain, with over 110 species recorded. Salmon *Salmo salar*, sea trout *S. trutta*, sea lamprey *Petromyzon marinus*, river lamprey *Lampetra fluviatilis*, allis shad *Alosa alosa*, twaite shad *A. fallax*, and eel *Anguilla anguilla* use the Severn Estuary as a key migration route to their spawning grounds in the many tributaries that flow into the estuary. The site is important as a feeding and nursery ground for many fish species particularly allis shad *Alosa alosa* and twaite shad *A. fallax* which feed on mysid shrimps in the salt wedge.

3.8.4 Conservation Objectives³⁶

With regard to the SPA and the individual species and/or assemblage of species for which the site has been classified (the 'Qualifying Features' listed below), and subject to natural change;

Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the aims of the Wild Birds Directive, by maintaining or restoring;

- The extent and distribution of the habitats of the qualifying features
- The structure and function of the habitats of the qualifying features
- The supporting processes on which the habitats of the qualifying features rely
- The population of each of the qualifying features, and,
- The distribution of the qualifying features within the site.

3.8.5 Threats and Pressures to Site Integrity³⁷

The following threats and pressures to the site integrity of the Severn Estuary SPA have been identified in Natural England's Site Improvement Plan:

- Public access / disturbance
- Physical modification
- Impacts of development
- Coastal squeeze
- Change in land management
- Changes in species distributions
- Water pollution
- Air pollution: Impact of atmospheric nitrogen deposition

³⁶ <http://publications.naturalengland.org.uk/publication/5601088380076032>

³⁷ <http://publications.naturalengland.org.uk/publication/4590676519944192>

- Marine consents and permits: Minerals and waste
- Fisheries: Recreational marine and estuarine
- Fisheries: Commercial marine and estuarine
- Invasive species
- Marine litter
- Marine pollution incidents

3.9 Severn Estuary SAC

3.9.1 Introduction

The Severn Estuary SAC was designated as a SAC in 2009, because it supports a significant number of habitats and species. It covers an area of 74,000ha and is designated partly for its estuary feature. Within this feature, subtidal sandbanks, intertidal mudflats and sandflats, Atlantic salt meadows and biogenic reefs are included. The SAC also harbours three migratory fish species, including river lamprey, sea lamprey and twaite shad. The Severn Estuary also comprises hard substrate habitats, an assemblage of 114 estuarine and marine fish species and various waterfowl species. The SAC forms the southern boundary of Monmouthshire.

3.9.2 Qualifying Features³⁸

The site is classified as a SAC for various qualifying features.

Annex I habitats that are a primary reason for selection of this site:

- Estuaries
- Mudflats and sandflats not covered by seawater at low tide
- Atlantic salt meadows (*Glauco-Puccinellietalia maritima*)

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site

- Sandbanks which are slightly covered by sea water all the time
- Reefs

Annex II species that are a primary reason for selection of this site

- Sea lamprey *Petromyzon marinus*
- River lamprey *Lampetra fluviatilis*
- Twaite shad *Alosa fallax*

3.9.3 Conservation Objectives³⁹

With regard to the SAC and the natural habitats and/or species for which the site has been designated (the 'Qualifying Features' listed below), and subject to natural change;

Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring;

- The extent and distribution of qualifying natural habitats and habitats of qualifying species
- The structure and function (including typical species) of qualifying natural habitats
- The structure and function of the habitats of qualifying species

³⁸ <https://sac.jncc.gov.uk/site/UK0013030>

³⁹ <http://publications.naturalengland.org.uk/publication/6081105098702848>

- The supporting processes on which qualifying natural habitats and the habitats of qualifying species rely
- The populations of qualifying species, and,
- The distribution of qualifying species within the site.

3.9.4 Threats and Pressures to Site Integrity⁴⁰

The following threats and pressures to the site integrity of the Severn Estuary SAC have been identified in Natural England's Site Improvement Plan:

- Public access / disturbance
- Physical modification
- Impacts of development
- Coastal squeeze
- Change in land management
- Changes in species distributions
- Water pollution
- Air pollution: Impact of atmospheric nitrogen deposition
- Marine consents and permits: Minerals and waste
- Fisheries: Recreational marine and estuarine
- Fisheries: Commercial marine and estuarine
- Invasive species
- Marine litter
- Marine pollution incidents

3.10 Wye Valley and Forest of Dean Bat Sites SAC

3.10.1 Introduction

The Wye Valley and Forest of Dean Bat Sites SAC lies within the Forest of Dean and Lower Wye National Character Area, straddling the England-Wales border. It includes 13 individual component sites (9 in England and 4 in Wales), which are all individually notified as SSSIs and that total an area of 144.82ha. The sites include both maternity roosts and hibernation sites in old buildings and mines / caves.

The wider surrounding landscape of the SAC is heavily wooded and edged by predominantly grazed farmland. This mixed landscape with trees and grazed pastures provides good conditions for both lesser horseshoe bat *Rhinolophus hipposideros* and greater horseshoe bat *Rhinolophus ferrumequinum*. The designated SAC components harbour the highest density of lesser horseshoe bats in the UK, making up about 26% of the national population. The complex of sites harbours approx. 6% of the national greater horseshoe bat population.

The qualifying bat populations are supported by numerous summer roosts and hibernation sites in the area that are not designated, but form part of the wider ecological network of the SAC. Flightlines, commuting routes and feeding grounds are also critical in maintaining the integrity of the Wye Valley and Forest of Dean Bat Sites SAC. Additionally, there is some evidence of connectivity between the populations in the SAC, the Cotswolds to the east, the Malvern Hills to the north and areas in Wales to the west. The SAC lies in various places along the eastern boundary of Monmouthshire.

⁴⁰ <http://publications.naturalengland.org.uk/publication/4590676519944192>

3.10.2 Qualifying Features⁴¹

Annex II species that are a primary reason for selection of this site

- Lesser horseshoe bat *Rhinolophus hipposideros*
- Greater horseshoe bat *Rhinolophus ferrumequinum*

3.10.3 Conservation Objectives⁴²

With regard to the SAC and the natural habitats and/or species for which the site has been designated (the 'Qualifying Features' listed below), and subject to natural change;

Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring;

- The extent and distribution of the habitats of qualifying species
- The structure and function of the habitats of qualifying species
- The supporting processes on which the habitats of qualifying species rely
- The populations of qualifying species, and
- The distribution of qualifying species within the site.

3.10.4 Threats and Pressures to Site Integrity⁴³

The following threats and pressures to the site integrity of the Wye Valley and Forest of Dean Bat Sites SAC have been identified in Natural England's Site Improvement Plan:

- Physical modification
- Public access / disturbance
- Habitat connectivity

3.11 Wye Valley Woodlands SAC

3.11.1 Introduction

The Wye Valley Woodlands SAC is a 913.32ha site that occupies the border between England and Wales. It comprises several habitats, most notably broad-leaved deciduous woodland (87%), and heath and scrub (10%). The SAC's components significantly contribute to a semi-natural woodland corridor connecting Chepstow and Monmouth. Much of the site is a gorge with a very steep topography, which dictates the available habitat types. In combination with woodlands in the Forest of Dean and Wentwood, this region is one of the most densely wooded areas in the UK. The SAC supports numerous wildlife species at the edge of their ecological range.

A total of 16 SSSI components make up the SAC, of which eight lie entirely in Wales and seven entirely in England. All SSSI components support the best examples of *Tilio-Acerion* forests, *Asperulo-Fagetum* beech forests and *Taxus baccata* woods of the British Isles. These woodlands also form important roosting and foraging habitat for the lesser horseshoe bat. A large proportion of the broadleaved woodland stands dates back to the Second World War and has developed a high forest structure due to the cessation of woodland management. The SAC lies in various places along the eastern boundary of Monmouthshire.

⁴¹ <https://sac.jncc.gov.uk/site/UK0014794>

⁴² <http://publications.naturalengland.org.uk/publication/4907653293670400>

⁴³ <http://publications.naturalengland.org.uk/publication/6102625057505280>

3.11.2 Qualifying Features⁴⁴

Annex I habitats that are a primary reason for selection of this site:

- Asperulo-Fagetum beech forests
- Tilio-Acerion forests of slopes, screes and ravines
- Taxus baccata woods of the British Isles

Annex II species present as a qualifying feature, but not a primary reason for site selection:

- Lesser horseshoe bat *Rhinolophus hipposideros*

3.11.3 Conservation Objectives⁴⁵

With regard to the SAC and the natural habitats and/or species for which the site has been designated (the 'Qualifying Features' listed below), and subject to natural change;

Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring;

- The extent and distribution of qualifying natural habitats and habitats of qualifying species
- The structure and function (including typical species) of qualifying natural habitats
- The structure and function of the habitats of qualifying species
- The supporting processes on which qualifying natural habitats and habitats of qualifying species rely
- The populations of qualifying species, and,
- The distribution of qualifying species within the site.

3.11.4 Threats and Pressures to Site Integrity⁴⁶

The following threats and pressures to the site integrity of the Wye Valley Woodlands SAC have been identified in Natural England's Site Improvement Plan:

- Deer
- Forestry and woodland management
- Invasive species
- Habitat connectivity
- Species decline
- Air pollution: Impact of atmospheric nitrogen deposition
- Disease
- Public access / disturbance

3.12 River Wye SAC

3.12.1 Introduction

The River Wye SAC is 25km in length and represents one of the longest near natural rivers in England and Wales, which drains a catchment of 4,136km². It is situated within the Forest of Dean and Lower Wye National Character Area, rising at Plynlimon in mountainous Wales before reaching the English border. The Wye flows through Hay-on-Wye, Hereford and Ross-on-Wye, then

⁴⁴ <https://sac.jncc.gov.uk/site/UK0012727>

⁴⁵ <http://publications.naturalengland.org.uk/publication/6331090281168896>

⁴⁶ <http://publications.naturalengland.org.uk/publication/4735117343850496>

past Monmouth and eventually meeting the Severn Estuary below Chepstow. The SAC shows a transition from bryophyte dominated upland areas to crowfoot dominated lower stretches. Notably, in contrast to many other river systems, the Wye has not been significantly straightened or modified by human activity. It is predominantly low-lying, meandering and only falling by 72m between Hay-on-Wye and the sea.

The SAC comprises a variety of substrate types ranging from silt to boulders, which form diverse habitats for a range of species. This substrate diversity has enabled a varied morphology with more active sections of river (with associated back channels and oxbow lakes) and gravel substrate, where pools and riffles are found. The SAC harbours a diverse submerged aquatic and riparian flora. Furthermore, the transitional zone in the lower reaches between freshwater and brackish water supports its own characteristic flora, particularly saltmarsh species. There is also a diverse invertebrate community with nationally rare river flies and dragonflies. All 6 species of unionid mussels are found here, which is unique in the UK.

A wide range of migratory and non-migratory fish is found in the Wye, including salmonids, such as Atlantic salmon, brown trout, sea trout and grayling, all of which are commercially exploited. All three species of lamprey are found as well as migratory eel. Also, allis shad and twaite shad enter the River Wye from the Severn Estuary to spawn further upstream. The riverine ecosystem is home to several other uncommon species, including otter, water vole and several bird species, such as dipper, grey wagtail and kingfisher. The SAC forms the eastern boundary of Monmouthshire.

3.12.2 Qualifying Features⁴⁷

Annex I habitats that are a primary reason for selection of this site:

- Water courses of plain to montane levels with the *Ranunculion fluitantis* and *Callitricho-Batrachion* vegetation

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site:

- Transition mires and quaking bogs

Annex II species that are a primary reason for selection of this site:

- White-clawed (or Atlantic stream) crayfish *Austropotamobius pallipes*
- Sea lamprey *Petromyzon marinus*
- Brook lamprey *Lampetra planeri*
- River lamprey *Lampetra fluviatilis*
- Twaite shad *Alosa fallax*
- Atlantic salmon *Salmo salar*
- Bullhead *Cottus gobio*
- Otter *Lutra lutra*

Annex II species present as a qualifying feature, but not a primary reason for site selection:

- Allis shad *Alosa alosa*

3.12.3 Conservation Objectives⁴⁸

With regard to the SAC and the natural habitats and/or species for which the site has been designated (the 'Qualifying Features' listed below), and subject to natural change;

Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring;

⁴⁷ <https://sac.jncc.gov.uk/site/UK0012642>

⁴⁸ <http://publications.naturalengland.org.uk/publication/6096799802589184>

- The extent and distribution of qualifying natural habitats and habitats of qualifying species
- The structure and function (including typical species) of qualifying natural habitats
- The structure and function of the habitats of qualifying species
- The supporting processes on which qualifying natural habitats and habitats of qualifying species rely
- The populations of qualifying species, and,
- The distribution of qualifying species within the site.

3.12.4 Threats and Pressures to Site Integrity⁴⁹

The following threats and pressures to the site integrity of the River Wye SAC have been identified in Natural England's Site Improvement Plan:

- Water pollution
- Physical modification
- Invasive species
- Hydrological changes
- Forestry and woodland management
- Fisheries: Freshwater
- Fisheries: Fish stocking
- Water abstraction
- Public access / disturbance
- Air pollution: Impact of atmospheric nitrogen deposition
- Inappropriate scrub control
- Undergrazing
- Transportation and service corridors

3.13 Avon Gorge Woodlands SAC

3.13.1 Introduction

The Avon Gorge Woodlands SAC is a 151.07ha site that is a nationally important example of *Tilio-Acerion* forest in south-west England. The site includes ash *Fraxinus excelsior*, wych elm *Ulmus glabra* and small-leaved lime *Tilia cordata*. This habitat type is here found on calcareous substrates associated with the limestone cliffs and screes of a large river gorge with reduced human influence. It is a sub-community of W8 *Fraxinus excelsior* – *Acer campestre* – *Mercurialis perennis* woodland.

The site's ground flora typically includes Hart's-tongue *Asplenium scolopendrium*, soft shield-fern *Polystichum setiferum*, buckler-ferns *Dryopteris* spp., ramsons *Allium ursinum*, dog's-mercury *Mercurialis perennis* and enchanter's nightshade *Circaea lutetiana*. In some of the stonier locations, small groves of yew *Taxus baccata* occur. Part of the Leigh Woods is old wood pasture, managed for several hundreds of years, which contains large number of veteran pollards. The *Tilio-Acerion* woodland contains transitions to scrub, grassland and other woodland elements, including five whitebeam species. The Avon Gorge Woodlands SAC is important for both lesser and greater horseshoe bats *Rhinolophus* spp., breeding peregrine falcon *Falco peregrinus* and raven *Corvus corax*. Rare invertebrates include the silky wave moth *Idaea dilutaria*, Chalkhill blue *Polyommatus coridon* and small blue *Cupido minimus*. Most of these species rely on SAC habitats and their future

⁴⁹ <http://publications.naturalengland.org.uk/publication/5178575871279104>

status therefore depends on the condition of the SAC. The SAC lies approximately 13km from Monmouthshire on the opposite side of the Severn Estuary in England.

3.13.2 Qualifying Features⁵⁰

Annex I habitats that are a primary reason for selection of this site:

- *Tilio-Acerion* forests of slopes, screes and ravines

Annex I habitats present as a qualifying feature, but not a primary reason for selection of this site:

- Semi-natural dry grasslands and scrubland facies on calcareous substrates (*Festuco-Brometalia*; important orchid sites)

3.13.3 Conservation Objectives⁵¹

With regard to the SAC and the natural habitats and/or species for which the site has been designated (the 'Qualifying Features' listed below), and subject to natural change;

Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring;

- The extent and distribution of qualifying natural habitats
- The structure and function (including typical species) of qualifying natural habitats, and
- The supporting processes on which qualifying natural habitats rely

3.13.4 Threats and Pressures to Site Integrity⁵²

The following threats and pressures to the site integrity of the Avon Gorge Woodlands SAC have been identified in Natural England's Site Improvement Plan:

- Invasive species
- Undergrazing
- Public access / disturbance
- Disease
- Changes in species distributions
- Air pollution: Impact of atmospheric nitrogen deposition

4. Test of Likely Significant Effects (LSE)

4.1 Introduction

This chapter provides background to the relevant impact pathways linked to the Replacement Local Development Plan (LP), highlights the European sites that are sensitive to these pathways, and identifies the policies that could (prior to the consideration of mitigation) result in Likely Significant Effects (LSE) on European sites. For a map of the European sites relevant to the Monmouthshire LP please see Appendix A. For the full LSE assessment of the strategic policies outlined within the LP please see Appendix B.

⁵⁰ <https://sac.jncc.gov.uk/site/UK0012734>

⁵¹ <http://publications.naturalengland.org.uk/publication/6740736611450880>

⁵² <http://publications.naturalengland.org.uk/publication/5021516609617920>

4.2 Impact Pathways Considered

The following impact pathways are considered relevant to the Monmouthshire LP:

- Atmospheric pollution (due to an increase in traffic generation);
- Recreational pressure (due to the local population growth);
- Loss of functionally linked land (due to the allocation of greenfield sites for development);
- Water quality (due to increases in sewage effluent and industrial pollutant input) and
- Water quantity, level and flow (due to an increased abstraction of water for dwellings and employment space).

4.3 Background to Atmospheric Pollution

Table 1: Main sources and effects of air pollutants on habitats and species⁵³

Pollutant	Source	Effects on habitats and species
Sulphur Dioxide (SO ₂)	<p>The main sources of SO₂ are electricity generation, and industrial and domestic fuel combustion. However, total SO₂ emissions in the UK have decreased substantially since the 1980's.</p> <p>Another origin of sulphur dioxide is the shipping industry and high atmospheric concentrations of SO₂ have been documented in busy ports. In future years shipping is likely to become one of the most important contributors to SO₂ emissions in the UK.</p>	<p>Wet and dry deposition of SO₂ acidifies soils and freshwater, and may alter the composition of plant and animal communities.</p> <p>The magnitude of effects depends on levels of deposition, the buffering capacity of soils and the sensitivity of impacted species.</p> <p>However, SO₂ background levels have fallen considerably since the 1970's and are now not regarded a threat to plant communities. For example, decreases in Sulphur dioxide concentrations have been linked to returning lichen species and improved tree health in London.</p>
Acid deposition	<p>Leads to acidification of soils and freshwater via atmospheric deposition of SO₂, NO_x, ammonia and hydrochloric acid. Acid deposition from rain has declined by 85% in the last 20 years, which most of this contributed by lower sulphate levels. Although future trends in S emissions and subsequent deposition to terrestrial and aquatic ecosystems will continue to decline, increased N emissions may cancel out any gains produced by reduced S levels.</p>	<p>Gaseous precursors (e.g. SO₂) can cause direct damage to sensitive vegetation, such as lichen, upon deposition.</p> <p>Can affect habitats and species through both wet (acid rain) and dry deposition. The effects of acidification include lowering of soil pH, leaf chlorosis, reduced decomposition rates, and compromised reproduction in birds / plants.</p> <p>Not all sites are equally susceptible to acidification. This varies depending on soil type, bed rock geology, weathering rate and buffering capacity. For example, sites with an underlying geology of granite, gneiss and quartz rich rocks tend to be more susceptible.</p>
Ammonia (NH ₃)	<p>Ammonia is a reactive, soluble alkaline gas that is released following decomposition and volatilisation of animal wastes. It is a naturally occurring trace gas, but ammonia concentrations are directly related to the distribution of livestock. Ammonia reacts with acid pollutants such as the products of SO₂ and NO_x emissions to produce fine ammonium (NH₄⁺) - containing aerosol. Due to its significantly longer lifetime, NH₄⁺ may be transferred much longer distances (and can therefore be a significant trans-boundary issue). While ammonia deposition may be estimated from its atmospheric concentration, the deposition rates are strongly influenced by meteorology and ecosystem type.</p>	<p>The negative effect of NH₄⁺ may occur via direct toxicity, when uptake exceeds detoxification capacity and via N accumulation. Its main adverse effect is eutrophication, leading to species assemblages that are dominated by fast-growing and tall species. For example, a shift in dominance from heath species (lichens, mosses) to grasses is often seen.</p> <p>As emissions mostly occur at ground level in the rural environment and NH₃ is rapidly deposited, some of the most acute problems of NH₃ deposition are for small relict nature reserves located in intensive agricultural landscapes.</p>
Nitrogen oxides (NO _x)	<p>Nitrogen oxides are mostly produced in combustion processes. Half of NO_x emissions in</p>	<p>Direct toxicity effects of gaseous nitrates are likely to be important in areas close to the</p>

⁵³ Information summarised from the Air Pollution Information System (<http://www.apis.ac.uk/>)

Pollutant	Source	Effects on habitats and species
	<p>the UK derive from motor vehicles, one quarter from power stations and the rest from other industrial and domestic combustion processes.</p> <p>In contrast to the steep decline in Sulphur dioxide emissions, nitrogen oxides are falling slowly due to control strategies being offset by increasing numbers of vehicles.</p>	<p>source (e.g. roadside verges). A critical level of NO_x for all vegetation types has been set to 30 ug/m³.</p> <p>Deposition of nitrogen compounds (nitrates (NO₃), nitrogen dioxide (NO₂) and nitric acid (HNO₃)) contributes to the total nitrogen deposition and may lead to both soil and freshwater acidification.</p> <p>In addition, NO_x contributes to the eutrophication of soils and water, altering the species composition of plant communities at the expense of sensitive species.</p>
Nitrogen deposition	<p>The pollutants that contribute to the total nitrogen deposition derive mainly from oxidized (e.g. NO_x) or reduced (e.g. NH₃) nitrogen emissions (described separately above). While oxidized nitrogen mainly originates from major conurbations or highways, reduced nitrogen mostly derives from farming practices.</p> <p>The N pollutants together are a large contributor to acidification (see above).</p>	<p>All plants require nitrogen compounds to grow, but too much overall N is regarded as the major driver of biodiversity change globally. Species-rich plant communities with high proportions of slow-growing perennial species and bryophytes are most at risk from N eutrophication. This is because many semi-natural plants cannot assimilate the surplus N as well as many graminoid (grass) species.</p> <p>N deposition can also increase the risk of damage from abiotic factors, e.g. drought and frost.</p>
Ozone (O ₃)	<p>A secondary pollutant generated by photochemical reactions involving NO_x, volatile organic compounds (VOCs) and sunlight. These precursors are mainly released by the combustion of fossil fuels (as discussed above).</p> <p>Increasing anthropogenic emissions of ozone precursors in the UK have led to an increased number of days when ozone levels rise above 40ppb ('episodes' or 'smog'). Reducing ozone pollution is believed to require action at international level to reduce levels of the precursors that form ozone.</p>	<p>Concentrations of O₃ above 40 ppb can be toxic to both humans and wildlife, and can affect buildings.</p> <p>High O₃ concentrations are widely documented to cause damage to vegetation, including visible leaf damage, reduction in floral biomass, reduction in crop yield (e.g. cereal grains, tomato, potato), reduction in the number of flowers, decrease in forest production and altered species composition in semi-natural plant communities.</p>

The main pollutants of concern for European sites are oxides of nitrogen (NO_x), ammonia (NH₃) and sulphur dioxide (SO₂) and are summarised in Table 1. Ammonia can have a directly toxic effect upon vegetation, particularly at close distances to the source such as near road verges⁵⁴. NO_x can also be toxic at very high concentrations (far above the annual average critical level). However, in particular, high levels of NO_x and NH₃ are likely to increase the total N deposition to soils, potentially leading to deleterious knock-on effects in resident ecosystems. Increases in nitrogen deposition from the atmosphere is widely known to enhance soil fertility and to lead to eutrophication. This often has adverse effects on the community composition and quality of semi-natural, nitrogen-limited terrestrial and aquatic habitats^{55 56}.

Sulphur dioxide emissions overwhelmingly derive from power stations and industrial processes that require the combustion of coal and oil, as well as (particularly on a local scale) shipping⁵⁷. Ammonia emissions originate from agricultural practices⁵⁸, with some chemical processes also making notable contributions. As such, it is unlikely that material increases in SO₂ or NH₃ emissions will be associated with the LP. NO_x emissions, however, are dominated by the output of vehicle exhausts (more than half of all emissions). A 'typical' housing development will contribute by far the largest portion to its overall NO_x footprint (92%) through the associated road traffic. Other sources, although relevant, are

⁵⁸ Pain, B.F.; Weerden, T.J.; Chambers, B.J.; Phillips, V.R.; Jarvis, S.C. 1998. A new inventory for ammonia emissions from U.K. agriculture. *Atmospheric Environment* 32: 309-313

of minor importance (8%) in comparison⁵⁹. Emissions of NOx could therefore be reasonably expected to increase because of a higher number of vehicles due to implementation of the LP.

According to the World Health Organisation, the critical NOx concentration (critical threshold) for the protection of vegetation is 30 µgm⁻³; the threshold for sulphur dioxide is 20 µgm⁻³. In addition, ecological studies have determined 'critical loads'⁶⁰ of atmospheric nitrogen deposition (that is, NOx combined with ammonia NH₃).

The Department of Transport's Transport Analysis Guidance outlines that, beyond 200m, the contribution of vehicle emissions from the roadside to local pollution levels is not significant (Figure 3 and ⁶¹). This is therefore the distance that has been used throughout this HRA in order to determine whether European sites are likely to be significantly affected by development outlined in the LP. Exhaust emissions from vehicles are capable of adversely affecting heathland habitats.

Figure 3: Traffic contribution to concentrations of pollutants at different distances from a road (Source: DfT⁶²)

Air quality assessments for Local Plans focus on traffic exhaust air quality impacts on SACs, SPAs and Ramsar sites. This is because the main source of impact is traffic growth from housing and employment allocations. Local Plans do not allocate land for agricultural development, nor do they allocate development that has industrial emissions permits required from Natural Resources Wales (i.e. development with stack emissions). While some sites are allocated in the Local Plan for waste, the allocations are not technology specific as that will be determined by the market. As such no air quality assessment of waste sites can be undertaken until planning applications come forward.

4.3.1 Screening for LSEs

The following European sites within 15km of Monmouthshire are susceptible to atmospheric pollution (the sites that are screened in for Appropriate Assessment following discussion in the text are marked in bold):

- **Usk Bat Sites SAC**
- **Cwm Clydach Woodlands SAC**
- **Wye Valley Woodlands SAC**
- **Severn Estuary SAC**
- **Severn Estuary SPA / Ramsar**

⁵⁹ Proportions calculated based upon data presented in Dore CJ et al. 2005. UK Emissions of Air Pollutants 1970 – 2003. UK National Atmospheric Emissions Inventory. <http://www.airquality.co.uk/archive/index.php>

⁶⁰ The critical load is the rate of deposition beyond which research indicates that adverse effects can reasonably be expected to occur

⁶¹ <http://www.dft.gov.uk/webtag/documents/expert/unit3.3.3.php#013> [Accessed on the 06/11/2019]

⁶² <http://www.dft.gov.uk/ha/standards/dmr/vol11/section3/ha20707.pdf>; accessed 13/07/2018

- **River Wye SAC**
- **Avon Gorge Woodlands SAC**
- River Usk SAC
- Wye Valley and Forest of Dean Bat Sites SAC
- Aberbargoed Grasslands SAC
- Sugar Loaf Woodlands SAC
- Llangorse Lake SAC
- Coed y Cerrig SAC

The Usk Bat Sites SAC is primarily designated for its populations of lesser horseshoe bats *Rhinolophus hipposideros*. This species' main habitat is mixed broadleaved and yew woodland. According to APIS the habitat is sensitive to nitrogen deposition with a critical load set at 10 – 20 kg N/ha/yr. There are also several Annex I habitats, such as degraded raised bogs and blanket bogs that are also highly sensitive to excessive nitrogen input, although these are much further from potentially relevant roads. For both types of bog habitats, the empirical critical load for annual nitrogen deposition has been set at 5 – 10 kg N/ha/yr. A preliminary assessment of the road infrastructure around the Usk Bat Sites SAC indicates that it lies directly adjacent to the A465, which is likely to be a main route for commuter traffic, particularly between Monmouthshire and Blaenau Gwent. Given the proximity of the SAC to such major traffic infrastructure, the site is screened in for Appropriate Assessment.

The Cwm Clydach Woodlands is designated for its beech *Fagus* woodland habitats, which are generally considered to be susceptible to atmospheric nitrogen deposition. APIS reports a site relevant critical load for beech forests of 10 – 20 kg N/ha/yr. Exceedance impacts would potentially be changes in ground vegetation and mycorrhiza, nutrient shifts and concomitant changes in the soil fauna. The SAC is situated similarly to the Usk Bat Sites SAC, directly adjacent to the A465 and therefore requires further consideration in an Appropriate Assessment.

The Wye Valley Woodlands SAC comprises several qualifying woodland habitats. Its *Asperulo-Fagetum* woodland feature has a critical nitrogen load of 10-20 kg N/ha/yr. Its yew woodland feature is also sensitive to nitrogen deposition⁶³. Exceedance of the critical load in the *Taxus baccata* woods feature would result in changes in soil processes, nutrient imbalance and an altered composition of plant and mycorrhiza communities. North of Chepstow, component parcels of the Wye Valley Woodlands SAC lie immediately adjacent to the A466. Given the sensitivity of the site's qualifying features and their proximity to the A466, this site is screened in for Appropriate Assessment.

The Severn Estuary SAC is designated for several habitats, including estuaries and Atlantic salt meadows, both of which are integral to the SPA's / Ramsar's bird assemblages and have a critical nitrogen load of 10-20 kg N/ha/yr, as identified on APIS. The critical load applies for most of the saltmarsh, but it is noted that the lower level of 10 kg N/ha/yr should be used for the more densely vegetated upper marsh and areas subjected to direct run-off from adjacent catchments. Exceedance impacts of the critical load would be an increase in late successional species, increased productivity and an increase in dominance of graminoid species. Several waterfowl species require a presence and suitable abundance of saltmarsh food plants for survival, such as saltmarsh grasses, herbs and their seeds, including *Puccinella maritima*, *Salicornia* and *Agrostis*. The M4 motorway traverses the Severn Estuary SAC. As such, an increase in the number of car journeys associated with the Monmouthshire LP has the potential to result in LSEs on the Severn Estuary SAC through atmospheric pollution. The site is therefore screened in for Appropriate Assessment.

While the qualifying features of the Severn Estuary SPA / Ramsar are not directly susceptible to atmospheric nitrogen deposition, the prey species and habitats that these waterbirds rely on might be affected by significant changes in the concentrations of pollutants. Most of the birds feed on invertebrates in the littoral sediment and this habitat has a critical nitrogen load of 20 kg N/ha/yr. The littoral sediments also comprise the saltmarsh, which is one of the SAC's features that are sensitive to atmospheric pollution. It also needs to be considered that invertebrates, the birds' primary food

⁶³ APIS provides a coniferous woodland range of 5-15 kgN/ha/yr. However, this range is derived from research into northern pine and spruce forests and the lowest part of the load range (5 kgN/ha/yr) is driven by the lichen and bryophyte interest of those forests which are quite different from lichen poor yew woodland present at this SAC. A minimum critical load of 10kgN/ha/yr is considered most appropriate for this SAC.

source, are sensitive to acidification. However, acidification of the marine environment is primarily associated with shipping and air traffic, rather than car usage. In accordance with the Severn Estuary SAC, which is screened in for its sensitivity of many of the habitats that support the SPA / Ramsar bird assemblage, the Severn Estuary SPA / Ramsar is therefore screened in for Appropriate Assessment.

The River Wye SAC is a riverine system of plain to montane levels, which supports a range of fish, such as several lamprey species, migratory salmonids and otters. As for the River Usk SAC, the survival of these species is dependent on the integrity of the river. The freshwater habitat and associated riverine faunal interest features within the river are regarded as being primarily phosphate limited (not nitrogen limited). APIS therefore provides no nitrogen critical loads for these features. The SAC is also designated for its transition mires and quaking bogs and the River Wye SAC partially runs directly alongside several busy roads, including the A466 to the north of Chepstow and the A40 in Monmouth. However, there are no transition mires and quaking bogs within 200m of these roads as the only SAC unit which supports this feature is Colwyn Brook Marshes (North & South) SSSI, a relatively remote site in Powys. Therefore traffic-related air quality on the River Wye SAC can be screened out.

The River Usk SAC is a riverine system of plain to montane levels, which supports a range of fish, such as several lamprey species, migratory salmon and otters. The survival of these species is tightly linked to the maintenance of the integrity of the river. Freshwater habitats are typically regarded as being primarily phosphate limited, with lesser regard being given to nitrogen input. The River Usk Management Catchment Plan summarises a variety of measures implemented to preserve the integrity of the SAC⁶⁴ and explicitly refers to reducing the deposition of nitrogen deriving from atmospheric pollution. However, 'Delivering the Nutrient Management Plan' on the Wye-Usk Foundation website indicates the focus on nutrient control in these catchments remains phosphate, which does not come from the atmosphere. Moreover, there are no atmospheric nitrogen critical loads available to use in assessments for riverine European sites. As such, the River Usk SAC is screened out from Appropriate Assessment regarding atmospheric pollution.

The *Tilio-Acerion* forest of slopes, screes and ravines in the Avon Gorge Woodlands SAC is identified as being sensitive to atmospheric pollution in APIS with a critical nitrogen load of 15-20 kg N/ha/yr. An increase of the nitrogen concentration beyond this limit is likely to lead to changes in ground vegetation. While the SAC lies adjacent to the A4, which is a fairly busy road, there is no obvious connection to commuter routes arising from Monmouthshire. Bristol, the most likely work destination for Monmouthshire residents in proximity to the SAC, can be more easily reached via alternative routes. As such, the Avon Gorge Woodlands SAC is screened out from Appropriate Assessment.

The qualifying features of the Wye Valley and Forest of Dean Bat Sites SAC, namely the lesser and greater horseshoe bat, are not directly sensitive to atmospheric nitrogen deposition. The species' broad habitat is broadleaved, mixed and yew woodland, which has an empirical critical nitrogen load of 10-20 kg N/ha/yr. However, exceeding the critical load primarily would lead to relatively nuanced changes in the habitat, such as changes in soil processes, nutrient levels and ground vegetation. Any atmospheric pollution impact would not be expected to result in a material effect on the viability of the bat population, the abundance of their invertebrate prey species or the availability of potential roost sites. The bats predominantly rely on trees with sufficient cracks and fissures that have a high potential as roosting or hibernation sites, and it is unlikely that atmospheric pollution would affect this potential. While the woodland at the site is sensitive to nitrogen deposition, increases in nitrogen deposition are very unlikely to materially affect either the woodland structure or its foraging value, as the impact on woodlands generally amounts to changes in botanical species distribution of the groundflora and epiphytes.

According to APIS nitrogen deposition is not believed to have a direct, major effect on tree growth in the UK. Therefore, the availability of roost resources is unlikely to be materially affected by changes in nitrogen deposition. Lesser horseshoe bats have a relatively broad diet feeding on flies (mainly midges), small moths, caddis flies, lacewings, beetles, small wasps and spiders, while greater horseshoe bats mainly eat chafers, dung beetles, noctuid moths, craneflies and caddis flies. Woodland moth abundance is mainly dependent on larval foodplant availability. In the UK the large number of woodland moth species collectively use a wide variety of larval foodplants including common and widespread species such as nettles, docks, bramble and ivy as well as most tree

⁶⁴ Page 12 of the document at <https://naturalresources.wales/media/3214/usk-management-catchment.pdf>. [Accessed on the 09/08/2024]

species such as birch, hazel and oak. Some rarer moths use specific foodplants that are themselves uncommon, but for lesser horseshoe foraging value it is the overall abundance (rather than species richness) of flying invertebrates that is the most important factor. Nitrogen deposition on woodlands particularly affects epiphytes, groundflora species richness and percentage grass cover, but the larval foodplants of lesser horseshoe prey are common and widespread species that are either unaffected by nitrogen deposition or would probably respond positively to nitrogen deposition (e.g. common grasses, brambles and nettles). It is therefore concluded that the Monmouthshire LP will not result in LSEs on the Wye Valley and Forest of Dean Bat Sites SAC regarding the impact pathway atmospheric pollution. The site is screened out from Appropriate Assessment.

The Aberbargoed Grasslands SAC are designated for their *Molinia* meadows on calcareous, peaty or clayey-silt laden soils, which identified on APIS as being sensitive to atmospheric nitrogen deposition. Here, a critical load of 15 – 25 kg N/ha/yr for these meadows is listed. However, the Core Management Plan published by Natural Resources Wales does not identify atmospheric pollution as a key management measure for the SAC. The closest significant road within 200m of the SAC is the A4049. However, the SAC is remote from locations of housing or employment growth in Monmouthshire being over 16km from the nearest development site allocation (HA12, Land west of Trem yr Ysgol, Penperlleni). The site is screened out from Appropriate Assessment.

The Sugar Loaf Woodlands SAC is designated for its old sessile oak woods, which have an empirical critical load of 10 – 15 kg N/ha/yr as outlined on APIS. Exceedance of this threshold would result in a decrease in mycorrhiza, loss of epiphytic lichens and bryophytes, and more general changes to the ground vegetation. However, the site is located further than 200m away from the nearest major roads. For example, it lies approx. 885m from the A40 and 1.1km from the A465. As such this SAC can be screened out and will not require Appropriate Assessment.

APIS highlights that the Llangorse Lake SAC is vulnerable to atmospheric nitrogen deposition, although critical loads for comparable habitats have not previously been established. While it is well known that meso- and eutrophic systems are often phosphate limited, nitrogen may be a co-limiting factor. However, despite the site's general sensitivity to atmospheric pollution, there is no major road within 200m of the SAC. The closest road that would provide a significant commuting corridor is the A40, which is located 1.9km to the south-west of Llangorse Lake SAC. This is beyond the screening distance for atmospheric pollution and the SAC is therefore screened out from Appropriate Assessment.

The Coed y Cerrig SAC is designated for its alluvial forests with *Alnus glutinosa* and *Fraxinus excelsior*, which are sensitive to some atmospheric pollutants. APIS highlights that the SAC is not sensitive to total atmospheric nitrogen deposition or nitrogen oxides. However, due to the presence of lichens and bryophytes, the site is sensitive to ammonia deposition at a critical level of 1 ug NH₃/m³. While a significant portion of ammonia is likely to derive from agricultural sources, some of it could derive from traffic sources. However, the closest major road (the A465) lies approx. 2.8km to the east of the SAC and therefore lies well beyond the screening distance for atmospheric pollution. The Coed y Cerrig SAC is therefore screened out from Appropriate Assessment.

The following policies of the Replacement Local Development Plan have been screened in for Appropriate Assessment because they allocate residential or employment growth, likely leading to increased atmospheric pollution and therefore LSEs on several European sites, sensitive to atmospheric pollutants:

- Strategic Policy S1 – Growth Strategy
- Strategic Policy S2 – Spatial Distribution of Development – Settlement Hierarchy
- Policy H1 – Residential Development in Primary and Secondary Settlements
- Policy H2 – Residential Development in Main Rural Settlements
- Policy H3 – Residential Development in Minor Rural Settlements
- Policy HA1 - Land to the East of Abergavenny
- Policy HA2 – Land to the East of Caldicot
- Policy HA3 - Land at Mounton Road, Chepstow

- Policy HA4 – Land at Leasbrook, Monmouth
- Policy HA5 – Land at Penlanlas Farm, Abergavenny
- Policy HA6 – Land at Rockfield Road, Monmouth
- Policy HA7 – Land at Drewen Farm, Monmouth
- Policy HA8 – Land at Tudor Road, Wyesham, Monmouth
- Policy HA9 – Land at former MOD Land, Caerwent
- Policy HA10 – Land South of Monmouth Road, Raglan
- Policy HA11 – Land-east of Burrium Gate, Usk
- Policy HA12 – Land west of Trem yr Ysgol, Penperlleni
- Policy HA13 – Land adjacent to Piercefield Public House, St Arvans
- Policy HA14 – Land at Churchfields, Devauden
- Policy HA15 – Land east of Little Mill
- Policy HA16 – Land North of Little Mill
- Policy HA17 – Land adjacent to Llanellen Court Farm, Llanellen
- Policy HA18 – Land West of Redd Landes, Shirenewton
- Strategic Policy S9 – Gypsy and Travellers
- Strategic Policy S10 – Employment Sites Provision
- Policy EA1 – Employment Allocations
- Policy EA2 – Protected Employment Sites
- Strategic Policy S12 – Visitor Economy
- Policy W3 – Identified Waste Management Sites

There are two minerals policies (Policy M2 – Minerals Safeguarding Areas and Policy M3 – Mineral Site Buffer Zones) but these do not allocate or promote minerals development. Rather they are safeguarding policies that prevent incompatible development from sterilising mineral resources. Proposals to exploit those resources would be assessed when applications were submitted and the safeguarding policies does not presume consent will be granted.

4.4 Background to Recreational Pressure

There is growing concern about the cumulative impacts of recreation on key nature conservation sites in the UK, as most sites must fulfill conservation objectives while also providing recreational opportunity. HRAs of Local Plans tend to focus on recreational pressure arising from a net increase in residents⁶⁵. Generally, recreational use of a European site has the potential to:

- Cause disturbance to wildlife species, particularly overwintering waterfowl and wader species
- Cause damage through direct trampling damage, erosion and habitat fragmentation;
- Cause eutrophication through recreation, such as through dog fouling; and
- Prevent appropriate management or exacerbate existing management difficulties;

⁶⁵ The RTP1 report 'Planning for an Ageing Population'(2004) which states that 'From being a marginalised group in society, the elderly are now a force to be reckoned with and increasingly seen as a market to be wooed by the leisure and tourist industries. There are more of them and generally they have more time and more money.' It also states that 'Participation in most physical activities shows a significant decline after the age of 50. The exceptions to this are walking, golf, bowls and sailing, where participation rates hold up well into the 70s'.

The sensitivity of European sites to different types of recreational pressure varies. Studies across a range of species have shown that the effects from recreation can be complex. It also should be emphasised that recreational use is not necessarily damaging. For example, in heathlands a certain level of physical disturbance (that is not continuous in nature) is considered beneficial, as this contributes to the maintenance of the overall habitat diversity and the maintenance of bare ground, the habitat feature that may harbour some of the rarest heathland species⁶⁶. However, in practice, a benign level of disturbance is not quantifiable and is likely to be confined to within narrow limits. Once the optimum recreational pressure is exceeded, negative impacts of recreation are to be expected.

Some of the most prominent examples of recreational pressure relevant to the European sites within or close to Monmouthshire, namely disturbance to sensitive species of birds, trampling damage, erosion and nutrient enrichment, are discussed below.

4.4.1 Disturbance of overwintering waterfowl and waders (September – March)

Human activity can affect birds either directly (e.g. by causing them to flee) or indirectly (e.g. by damaging their habitat or reducing their fitness in less obvious ways e.g. stress). The most obvious direct effect is that of immediate mortality such as death by shooting, but human activity can also lead to much more subtle behavioural (e.g. alterations in feeding behaviour, avoidance of certain areas and use of sub optimal areas etc.) and physiological changes (e.g. an increase in heart rate). While these are less noticeable, they might result in major population-level changes by altering the balance between immigration/birth and emigration/death⁶⁷.

Concern regarding the effects of disturbance on birds stems from the fact that they are expending energy unnecessarily and the time they spend responding to disturbance is time that is not spent feeding⁶⁸. Disturbance therefore risks increasing energetic expenditure of birds while reducing their energetic intake, which can adversely affect the 'condition' and ultimately survival of the birds. Additionally, displacement of birds from one feeding site to others can increase the pressure on the resources available within the remaining sites, as they then must sustain a greater number of birds⁶⁹. Moreover, the more time a breeding bird spends disturbed from its nest, the more its eggs are likely to cool and the more vulnerable they, or any nestlings, are to predators. Multiple research reports have provided compelling links between changes in housing and access levels and impacts on different bird species in European protected sites^{70 71}.

Evidence in the literature suggests that the magnitude of disturbance clearly differs between different types of recreational activities. For example, dog walking leads to a significantly higher reduction in bird diversity and abundance than hiking⁷². Scientific evidence also suggests that key disturbance parameters, such as areas of influence and flush distance, are significantly greater for dog walkers than hikers⁷³. A UK meta-analysis suggests that important spatial (e.g. the area of a site potentially influenced) and temporal (e.g. how often or long an activity is carried out) parameters differ between recreational activities, suggesting that activity type is a factor that should be taken into account by HRAs⁷⁴.

There is also likely to be a temporal element to disturbance, creating different disturbance patterns in summer and winter. It can be generally assumed that there are fewer recreational users in winter and that disturbance at a population level may be reduced, because birds are not breeding. However, recreational disturbance in winter may still have negative impacts, because birds face seasonal food

shortages and are likely to be susceptible to any nutritional loss. Therefore, the abandonment of suitable feeding areas due to disturbance can have serious consequences for their ability to find suitable alternative feeding sites.

Scientific evidence of disturbance to waterfowl and waders is now widely available. For example, Tuite et al⁷⁵ used a large (379 sites), long-term (10-year) dataset (September – March species counts) to correlate seasonal changes in wildfowl abundance with the presence of various recreational activities. They determined that the shoveler was one of the most sensitive species to recreational activities, such as sailing/windsurfing and rowing. Studies on recreation in the Solent have established that human leisure activities cause direct disturbance to wintering waterfowl populations^{76 77}.

A recent study on recreational disturbance on the Humber⁷⁸ assesses different types of noise disturbance on waterfowl referring to studies relating to aircraft (see Drewitt 1999⁷⁹), traffic (Reijnen, Foppen, & Veenbaas 1997)⁸⁰, dogs (Lord, Waas, & Innes 1997⁸¹; Banks & Bryant 2007⁸²) and machinery (Delaney et al. 1999; Tempel & Gutierrez 2003). These studies identified that there is still relatively little work on the effects of different types of water-based craft and the impacts from jet skis, kite surfers, windsurfers etc. (see Kirby et al. 2004⁸³ for a review). Some types of disturbance are clearly likely to invoke different responses. In very general terms, both distance from the source of disturbance and the scale of the disturbance (noise level, group size) will both influence the response (Delaney et al. 1999⁸⁴; Beale & Monaghan 2005⁸⁵). On UK estuaries and coastal sites, a review of WeBS data showed that, among the volunteer WeBS surveyors, driving of motor vehicles and shooting were the two activities most perceived to cause disturbance (Robinson & Pollitt 2002)⁸⁶.

A study in the Solent monitored bird disturbance across 20 different locations between December 2009 and February 2010⁸⁷. This involved recording all recreational activities and relating these to behavioural responses of birds in pre-defined focal areas of intertidal habitat. The study recorded a total of 2,507 potential disturbance events, generating 4,064 species-specific behaviours. Roughly 20% of recorded events resulted in disturbance of waterfowl, including behaviours such as becoming alert, walking / swimming away, short flights (< 50m) or major flights. Generally, the likelihood of disturbance decreased with increasing distance to the disturbance stimulus (i.e. the recreational activity being undertaken). Importantly, the study also illustrated that recreational activities in the intertidal zone have the highest disturbance potential (41% of recorded events resulted in disturbance), followed by water-based activities (25%) and shore-based activities (12%).

The specific distance at which a species takes flight when disturbed is known as the 'tolerance distance' (also called the 'escape distance') and greatly differs between species. The tolerance distances of the study carried out for the Bird Aware project are summarised in Table 2. It is reasonable to assume from this evidence that disturbance is unlikely to be relevant at distances of beyond 200m. The data show that the sensitivity to disturbance differs between species, but that the intra-specific variation in response to disturbance is equally important. It was also examined how disturbance to different recreational activities varies between species, but for most species the number of recorded events was not enough for comparison (except for brent goose, oystercatcher

and redshank). The results suggest that species might respond to recreational activities differently. For example, brent geese responded to dog walkers much further away than oystercatcher and redshank. It is noted that while these data have been collected in relation to the Solent, similar tolerance distances might apply to species in the Severn Estuary SPA / Ramsar.

Table 2: Tolerance distances in metres of 16 species of waterfowl to various forms of recreational disturbance, as found in recent disturbance fieldwork⁸⁸. The distances are provided both as a median and a range.

Species	Disturbance Distance (metres from stimulus)		Activity			
	Median	Range	Cycling	Dog walking	Jogging	Walking
Brent goose	51.5	5 - 178	100	95	30	50
Oystercatcher	46	10 - 200	150	45		50
Redshank	44.5	75 - 150	125	50	40	58
Curlew	75	25 - 200

Great-crested grebe	100	50 - 100				
Lapwing	75	18 - 125				
Teal	60	35 - 200				
Mallard	25	10 - 50				

4.4.2 Trampling damage, erosion and nutrient enrichment

Most terrestrial habitats, especially grassland, heathland and woodland, can be affected by trampling and other mechanical damage, which in turn causes soil compaction and erosion. Some of the following studies have investigated the negative impacts of trampling, associated with different recreational activities:

- Wilson & Seney⁸⁹ examined the degree of track erosion caused by hikers, motorcycles, horses and cyclists from 108 plots along tracks in the Gallatin National Forest, Montana. Although the results proved difficult to interpret, it was concluded that horses and hikers disturbed more sediment on wet tracks, and therefore caused more erosion, than motorcycles and bicycles.
- Cole et al⁹⁰ conducted experimental off-track trampling in 18 closed forest, dwarf scrub and meadow & grassland communities (each tramped between 0 – 500 times) over five mountain regions in the US. Vegetation cover was assessed two weeks and one year after trampling, and an inverse relationship with trampling intensity was discovered, although this relationship was weaker after one year than two weeks indicating some recovery of the vegetation. Differences in plant morphological characteristics were found to explain more variation in response between different vegetation types than soil and topographic factors. Low-growing, mat-forming grasses regained their cover best after two weeks and were considered most resistant to trampling, while

⁸⁸ Ibid.

⁹⁰ Cole, D.N. 1995a. Experimental trampling of vegetation. I. Relationship between trampling intensity and vegetation response. Journal of Applied Ecology 32: 203-214

Cole, D.N. 1995b. Experimental trampling of vegetation. II. Predictors of resistance and resilience. Journal of Applied Ecology 32: 215-224

tall forbs (non-woody vascular plants other than grasses, sedges, rushes and ferns) were considered least resistant. The cover of hemicryptophytes and geophytes (plants with buds below the soil surface) was heavily reduced after two weeks, but had recovered well after one year and as such these were considered most resilient to trampling. Chamaephytes (plants with buds above the soil surface) were least resilient to trampling. It was concluded that these would be the least tolerant of a regular cycle of disturbance.

- Cole⁹¹ conducted a follow-up study (in 4 vegetation types) in which shoe type (trainers or walking boots) and trampler weight were varied. Although immediate damage was greater with walking boots, there was no significant difference after one year. Heavier trampers caused a greater reduction in vegetation height than lighter trampers, but there was no difference in the effect on cover.
- Cole & Spildie⁹² experimentally compared the effects of off-track trampling by hiker and horse (at two intensities – 25 and 150 passes) in two woodland vegetation types (one with an erect forb understorey and one with a low shrub understorey). Horse trampling was found to cause the largest reduction in vegetation cover. The forb-dominated vegetation suffered greatest disturbance but recovered rapidly. Generally, it was shown that higher trampling intensities caused more disturbance.
- In heathland sites, trampling damage can also affect the value of a site to wildlife. For example, heavy use of sandy tracks loosens and continuously disturbs sand particles, reducing the habitat's suitability for invertebrates⁹³. Species that burrow into flat surfaces such as the centres of paths, are likely to be particularly vulnerable, as the loose sediment can no longer maintain their burrow. In some instances, nature conservation bodies and local authorities resort to hardening paths to prevent further erosion. However, this is concomitant with the loss of habitat used by wildlife, such as sand lizards and burrowing invertebrates.

Some of the European sites relevant to the Monmouthshire LP are likely to be affected by more specialized recreational activities, which are carried out less frequently than more popular activities (e.g. walking, dog walking, exercising). These niche activities might include canoeing, fishing and caving. However, due to their disproportionate impact these activities nevertheless require consideration. For example, canoeists might affect wildlife and their habitats throughout long stretches of rivers, including disturbance to gravel bars, the macrophyte community and species that live along the rivers, such as otter. Recreational fishing, not a mainstream recreational activity, is known to have contributed to the global fish stock crisis. It is estimated that recreational fishing around the world contributes approx. 12% to the global annual fish harvest⁹⁴. Furthermore, a global meta-analysis showed that fishing, both recreational and commercial, affects not only the population abundance of the target species but also leads to knock-on effects in the wider food web.⁹⁵

A major concern for nutrient-poor terrestrial habitats (e.g. heathlands, bogs and fens) is nutrient enrichment associated through dog fouling, which has been addressed in various reviews (e.g.⁹⁶). It is estimated that dogs will defecate within 10 minutes of starting a walk and therefore most nutrient enrichment arising from dog faeces will occur within 400m of a site entrance. In contrast, dogs will urinate at frequent intervals during a walk, resulting in a more spread out distribution of urine. For example, in Burnham Beeches National Nature Reserve it is estimated that 30,000 litres of urine and 60 tonnes of dog faeces are deposited annually⁹⁷. While there is little information on the chemical constituents of dog faeces, nitrogen is one of the main components⁹⁸. Nutrient levels are the major determinant of plant community composition and the effect of dog defecation in sensitive habitats (e.g.

heathland) is comparable to a high-level application of fertiliser, potentially resulting in the shift to plant communities that are more typical for improved grasslands.

4.4.3 Screening for LSEs

The following European sites within 15km of Monmouthshire are susceptible to recreational pressure (the sites that are screened in for Appropriate Assessment following discussion in the text are marked in **bold**):

- Severn Estuary SPA / Ramsar
- Severn Estuary SAC
- Usk Bat Sites SAC
- River Wye SAC
- River Usk SAC
- Avon Gorge Woodlands SAC
- Wye Valley and Forest of Dean Bat Sites SAC
- Wye Valley Woodlands SAC
- Sugar Loaf Woodlands SAC
- Cwm Clydach Woodlands SAC
- Aberbargoed Grasslands SAC
- Coed y Cerrig SAC

The qualifying waterfowl and wader assemblage in the Severn Estuary SPA / Ramsar is highly sensitive to recreational disturbance through activities on land (e.g. dog walking), in the intertidal zone and on the water (e.g. different forms of watersports). Disturbance of birds in feeding and roosting areas is likely to result in the displacement of birds and, potentially, in the decline of the SPA's / Ramsar's qualifying population. As highlighted in the site's Core Management Plan, human disturbance might result in reduced food intake and / or increased energy expenditure by the birds, with the potential for reducing the long-term viability of the population. LSEs of the Monmouthshire LP on the Severn Estuary SPA / Ramsar therefore cannot be excluded and the site is screened in for Appropriate Assessment.

The Severn Estuary SAC is designated for several habitats, which provide the basal support for qualifying species of the SPA / Ramsar. As such, the impact pathways of these European sites should not be viewed in isolation. Several habitats are especially sensitive to trampling damage and abrasion associated with recreational activities, such as the Atlantic salt meadows. Saltmarsh is highly vulnerable to terrestrial and water-based activities, such as through increased erosion rates associated with tyres of off-road vehicles and the wash resulting from boating / shipping. Similarly, sandflat and mudflat habitat is highly susceptible to both land- and water-based activities, such as boating, anchoring, bait digging and trampling. Overall, the Monmouthshire LP may result in LSEs on the Severn Estuary SAC regarding recreational pressure and the site is therefore screened in for Appropriate Assessment.

The lesser horseshoe bat population in the Usk Bat Sites SAC are likely to be highly susceptible to recreational disturbance. As identified in the Core Management Plan for the site, internal disturbance to the maternity roost and the hibernation sites is likely to be a major stressor for the bats. However, the habitat features that the bats are associated with are classified as 'Caves not open to the public'. This means that human disturbance to bats is kept to a minimum by restricting public access to their roost sites. However, while some caves (e.g. Agen Allwedd) are gated to prevent public access, this is not the case for all caves.

The Usk Bat Sites SAC also supports other habitats that are sensitive to recreational impacts, including its calcareous slopes with chasmophytic vegetation and its dry heathland elements. For example, rock climbing is an identified recreational activity causing disturbance to the plants and substrate of slopes. Heavy trampling damage might lead to erosion and bare ground, damaging the heathland habitats. While both caving and climbing are relatively rare recreational activities (in comparison to e.g. dog walking), the impact of individuals engaging in these activities might be disproportionately high. As a precautionary measure, the Usk Bat Sites SAC is therefore screened in for Appropriate Assessment.

The River Usk SAC is primarily designated for its anadromous fish species, including Atlantic salmon *Salmo salar*, twaite shad *Alosa fallax* and allis shad *Alosa alosa*. Generally, it is the adults travelling up the river to the spawning grounds, which are susceptible to the impacts of fishing. The Core Management Plan for the SAC identifies that both recreational and commercial fishing are threatening shad populations. These species are fished in large numbers and recreational fishing has been identified as one of the main reasons for their population declines. Relating to Atlantic salmon a seasonal catch restriction is already imposed by Natural Resources Wales, which require that all salmon caught before the 16th of June is released back to the water to protect fish stocks⁹⁹. However, given that exploitation of shad is currently unregulated, the River Usk SAC is screened in for Appropriate Assessment.

The River Wye SAC is designated for its water course of plain to montane reaches, its salmonid species, white-clawed crayfish and otter. Principally, all its fish species are potentially sensitive to fisheries exploitation. Natural England's Site Conservation Objectives Supplementary Advice Note highlights that any rod fishing should be undertaken sustainably without adversely affecting the ability of fish species for natural regeneration¹⁰⁰. Like the River Usk SAC, shad in the River Wye SAC are potentially fished in great numbers with uncertain effects on the SAC's population. Exploitation of shad is currently unregulated, but management controls are being considered by the review of freshwater fisheries legislation to identify sustainable levels of angling. Furthermore, Natural England's Site Improvement Plan for the English parts of the SAC also highlights recreational disturbance as a threat to the site, particularly the disturbance of otters by dog walkers and the disturbance of gravel bars and beds, which form important spawning grounds for the SAC's fish species, by canoeists¹⁰¹. Given the current evidence relating to recreational pressure in the SAC, LSEs cannot be excluded, and the site is screened in for Appropriate Assessment.

The Avon Gorge Woodlands SAC, designated for its *Tilio-Acerion* forests of slopes, screes and ravines, and semi-natural dry grasslands, is highly sensitive to recreational impacts, particularly from illegal mountain biking access to the steep sides of the gorge. Natural England's Site Improvement Plan highlights that the site suffers major pressures from public access and that there is a need for close monitoring and visitor engagement to ensure that current visitation rates are sustainable¹⁰². However, the SAC lies at a distance of approx. 9.5km from the boundary of Monmouthshire, and several kilometres further from the nearest settlement within Monmouthshire. Core Visitor Catchments (CVC's) are based on the distances that people are willing to travel to visit recreational destinations. This approach originates from the Thames Basin Heath Delivery Framework, which identified a precautionary CVC of 7km around the Thames Basin Heaths SPA. While no such visitor data is specifically available for the Avon Gorge Woodlands SAC, Monmouthshire is located beyond a precautionary 7km core visitor catchment from the SAC. In addition, the River Severn will act as a barrier and, in practice, it is unlikely that many Monmouthshire residents will use the M4 to cross the river to drive up the Avon Gorge. Therefore, it is concluded that there will be no LSEs of the Monmouthshire LP on the SAC and the site is screened out from Appropriate Assessment.

The lesser and greater horseshoe bat populations in the Wye Valley and Forest of Dean Bat Sites SAC are very vulnerable to recreational disturbance, especially during hibernation when human presence might cause the bats to wake up and burn valuable fat reserves. Natural England's Supplementary Conservation Objectives Advice Note highlights that hibernation sites, where possible, should be secured against unauthorised access using grilles. The upkeep and repair of grilles is being delivered by Natural England and Natural Resources Wales. Caving in the wider area of the SAC falls under the remit of the Royal Forest of Dean Caving Club (RFDCG), which provides background on the geology and ecology of selected caves. A permit system is operated for cavers by the Forest of Dean Cave Conservation and Access Group. Furthermore, detailed access guidelines for both caves and mines in the Forest of Dean area have been released by members of the access group. In contrast to the Usk Bat Sites SAC, which is located in the Bannau Brycheiniog National Park, the Wye Valley and Forest of Dean Bat Sites SAC is not considered to have a similarly strong recreational draw and it is therefore unlikely that the relatively small individual component sites of the SAC receive a high number of recreational visits. Given this and that access is tightly regulated by grilles and the RFDCG, it is

¹⁰² <http://publications.naturalengland.org.uk/publication/5021516609617920> [Accessed on the 09/08/2024]

concluded that there will be no LSEs of the Monmouthshire LP on the SAC regarding recreational pressure. The site is therefore screened out from Appropriate Assessment.

The Wye Valley Woodlands SAC is designated for several woodland habitats, including *Asperulo-Fagetum* beech forest, *Tilio-Acerion* forest of slopes, screes and ravines and *Taxus baccata* woods. The SAC is heavily used for walking, mountain biking and rock climbing. Areas of ancient forest within the SAC are likely to be more sensitive to negative recreational impacts including from trampling abrasion, soil compaction around root zones (results in less space available for water and air) and potential changes to ground flora due to nutrient enrichment (primarily from dog walkers). Natural Resources Wales have highlighted damage from recreational activities (particularly off-track mountain biking and climbing) to SAC features. Furthermore, the number of visitors engaging in climbing activities is increasing. Therefore, LSEs of the Monmouthshire RLDP on the Wye Valley Woodlands SAC regarding recreational pressure cannot be excluded and the site is screened in for Appropriate Assessment as a precautionary measure. It is noted that lesser horseshoe bats, Annex II qualifying species of the SAC, are highly sensitive to recreation, but access to the component sites of the SAC that act as maternity roosts or hibernacula is regulated by grills. Bats are, therefore, excluded from further assessment.

The Sugar Loaf Woodlands SAC, particularly its veteran trees within the old sessile oak woods with *Ilex* and *Blechnum* habitat component, is potentially sensitive to recreation. The SAC lies approx. 1km from development in Abergavenny, indicating that it is likely to be within walking distance for new local residents. While Natural Resources Wales' Core Management Plan¹⁰³ does not refer to low recreational pressure as a potential management requirement for the site, it is considered that the extension of Abergavenny may lead to recreational pressure effects in-combination with growth in the Bannau Brycheiniog National Park Local Development Plan (LDP). Therefore it cannot be excluded, and the site is screened in for Appropriate Assessment.

The Cwm Clydach Woodlands SAC is not considered to be particularly sensitive to recreational pressure. The ground vegetation beneath the beech woodland canopy is relatively sparse and the negative impacts of trampling are therefore likely to be limited. However, other disturbance effects have been identified, particularly fly-tipping of domestic and recreational waste along roadsides leading through the SAC. However, the barriers that have been installed, have been successful in reducing the incidence of fly-tipping. Provided that these barriers are maintained, it is considered that the Monmouthshire LP will not result in LSEs on the Cwm Clydach Woodlands SAC. The site therefore can be screened out and requires no further consideration in an Appropriate Assessment.

The Aberbargoed Grasslands SAC, designated for its *Molinia* meadows, are not considered vulnerable to recreational pressure due to their robust tussock structure. Said structure also makes such grasslands difficult to walk through such that they are not generally popular for recreation. However, in the past anti-social behaviours such as off-roading and burning have occurred on the grasslands. However, in 2005 Caerphilly Council were successful in obtaining Heritage Lottery funding to establish a conservation officer role for the site. In combination with a programme for education and establishing a newsletter for ongoing conservation activities within the site, this has improved the anti-social behaviours. Furthermore, given the distance of the Aberbargoed Grasslands SAC to Monmouthshire, it is considered that the Replacement Local Development Plan will not result in LSEs on the SAC.

The Coed y Cerrig SAC comprises alluvial forests in a valley bottom and is likely to be fairly popular for recreation. For example, the Coed-y-Cerrig National Nature Reserve is advertised as a place to visit on the Bannau Brycheiniog National Park website¹⁰⁴. The Core Management Plan for the SAC highlights that recreational access has the potential to result in significant trampling damage to the site. However, the SAC has a circular boardwalk in place. Due to the ground being so wet, most visitors stick to the boardwalks provided. Given this, the Coed y Cerrig SAC is screened out from Appropriate Assessment.

The following policies of the Replacement Local Development Plan have been screened in for Appropriate Assessment because they allocate residential dwellings or encourage tourism, likely leading to increased recreational pressure and therefore LSEs on several European sites:

4.5 Background to Loss of Functionally Linked Land

While most European sites have been geographically defined to encompass the key features that are necessary for coherence of their structure and function, and the support of their qualifying features, this is not always the case. A diverse array of qualifying species including birds, bats and amphibians are not confined to the boundary of designated sites.

For example, the highly mobile nature of both wildfowl and heathland birds implies that areas of habitat of crucial importance to the maintenance of their populations are outside the physical limits of European sites. Despite not being designated, this area is still integral to the maintenance of the structure and function of the interest feature on the designated site and, therefore, land use plans that may affect such areas should be subject to further assessment. Examples of other mobile qualifying species are great-crested newts and bats. The latter animal group is known to travel considerable distances from their roosts to feeding sites. For example, in a 2001 study, female adult Bechstein's bats regularly undertook commuting distances of up to 1km¹⁰⁵. However, it is known that bat home ranges can be between 1-1.5km, with some individuals ranging up to 2.5km distance. Both spring migrations or regular foraging trips might take these species beyond the designated site boundary.

¹⁰⁵ Kerth G., Wagner M. & Koenig B. 2001. Roosting together, foraging apart: Information transfer about food is unlikely to explain sociality in female Bechstein's bats (*Myotis bechsteinii*). Behavioral Ecology and Sociobiology 50: 283-291.

There is now an abundance of authoritative examples of HRA cases on plans affecting bird populations, where the potential importance of functionally linked land is recognised¹⁰⁶. For example, bird surveys in relation to a previous HRA established that approximately 25% of the golden plover population in the Somerset Levels and Moors SPA were affected while on functionally linked land, and this required the inclusion of mitigation measures in the relevant plan policy wording. Another important case study originates from the Mersey Estuary SPA / Ramsar, where adjacently located functionally linked land had a peak survey count of 108% of the 5 year mean peak population of golden plover. Similar to the above example, this led to considerable amendments in the planning proposal to ensure that the site integrity was not adversely affected.

Generally, the identification of an area as functionally linked land is now a relatively straightforward process. However, the importance of non-designated land parcels may not be apparent and require the analysis of existing data sources to be firmly established. In some instances, data may not be available at all, requiring further survey work.

4.5.1 Screening for LSEs

The following European sites within 15km of Monmouthshire are susceptible to the loss of functionally linked land because they are designated for mobile qualifying species (the site that is screened in for Appropriate Assessment following discussion in the text is marked in **bold**):

- **Usk Bat Sites SAC**
- **Wye Valley and Forest of Dean Bat Sites SAC**
- **Severn Estuary SPA / Ramsar**
- Aberbargoed Grasslands SAC

The lesser horseshoe bats in the Usk Bat Sites SAC are not only dependent on their roosts and foraging habitat in the SAC, but potentially also on habitat that lies outside the designated site boundary. Feeding areas and commuting routes (flightlines) outside the designation may therefore be integral to sustaining the bat population. The area of greatest bat activity surrounding a roost is defined as the Core Sustenance Zone (CSZ)¹⁰⁷, however this is not available for all sites and / or bat species. Generally, lesser horseshoe bats forage between 2 and 3km from their roost but they have been observed to range up to 4km in their nightly foraging trips¹⁰⁸. The Bat Conservation Trust identifies a weighted average CSZ of 2km for lesser horseshoe bats. It is therefore recognised that linear features (required to navigate) and permanent pasture / unimproved grassland (favoured feeding areas) and woodlands within this distance outside the SAC boundary need to be maintained. Given that the Usk Bat Sites SAC is partially located within Monmouthshire and lies close to several settlements such as Gilwern, residential and employment site allocations might lead to LSEs on this SAC through the loss of supporting habitat. The site is therefore screened in for Appropriate Assessment.

The Wye Valley and Forest of Dean Bat Sites SAC lies partly within Monmouthshire and is designated for both its lesser and greater horseshoe bat populations. Relating to its lesser horseshoe bat population a CSZ of 2km therefore applies as for the Usk Bat Sites SAC above. Radio-tracking research on greater horseshoe bats has shown that they make longer foraging trips foraging from their roost sites than lesser horseshoe bats, up to 9-10km from their roost^{109 110}. This bat species uses commuting corridors along linear landscape features and forages in permanent pasture and woodland. The Bat Conservation Trust identifies a weighted average CSZ of 3km for greater horseshoe bats. Any linear features (required for navigation) and permanent pasture / unimproved grassland (favoured feeding areas) within this distance outside of the SAC's boundary need to be maintained. The Wye Valley and Forest of Dean Bat Sites SAC is partly located within Monmouthshire and the allocation of residential and employment sites

in the Monmouthshire LP might therefore lead to LSEs on this SAC through the loss of supporting habitat. The site is therefore screened in for Appropriate Assessment.

The Severn Estuary SPA / Ramsar, designated for several species of waterfowl and its overall waterbird assemblage, supports several bird species that might regularly move beyond the designated site boundary. Above all, functionally linked land is relevant to Bewick's swans, which graze on a range of soft meadow grasses beyond the SPA's / Ramsar's site boundary, including wet meadows comprising *Agrostis stolonifera* and *Alopecurus geniculatus*. The qualifying waterfowl assemblage also includes European white-fronted geese, which commute up to 10km to their daytime foraging sites, which might include functionally linked farmland and wetland. It is considered that the functional integrity of the Severn Estuary SPA / Ramsar partly depends on land beyond its site boundary. LSEs of the Monmouthshire LP on the SPA / Ramsar cannot be excluded and the site is screened in for Appropriate Assessment.

The marsh fritillary butterfly population in the Aberbargoed Grasslands SAC is a species that is known to require relatively large areas of suitable habitat for a population to remain functional. It is generally considered that 50ha of suitable habitat will suffice to maintain a sustainable population¹¹¹. The SAC itself is 39.6ha in size and not all of it comprises the butterfly's preferred habitat of wet grassland and devil's-bit scabious, the caterpillars only foodplant. As such it is likely that the butterfly population from the Aberbargoed Grasslands SAC will also depend on using habitat patches outside the European site that contain significant areas of devils bit scabious. However, given that the boundary of Monmouthshire is approx. 12.5km away, it is considered unlikely that the Plan's implementation would result in the loss of functionally linked land for the marsh fritillary butterfly. The site is screened out from Appropriate Assessment.

The following policies of the Replacement Local Development Plan have been screened in for Appropriate Assessment because they allocate residential or employment growth, potentially leading to the loss of functionally linked land and LSEs on the above identified European sites:

4.6 Background to Water Quality

The quality of the water that feeds European sites is an important determinant of the nature of their habitats and the species they support. Poor water quality can have a range of environmental impacts:

- At high levels, toxic chemicals and metals can result in immediate death of aquatic life, and can have detrimental effects even at lower levels, including increased vulnerability to disease and changes in wildlife behaviour.
- Eutrophication, the enrichment of plant nutrients in water, increases plant growth and consequently results in oxygen depletion. Algal blooms, which commonly result from eutrophication, increase turbidity and decrease light penetration. The decomposition of organic wastes that often accompanies eutrophication deoxygenates water further, augmenting the oxygen depleting effects of eutrophication. In the marine environment, nitrogen is the limiting plant nutrient and so eutrophication is associated with discharges containing available nitrogen.
- Some pesticides, industrial chemicals, and components of sewage effluent are suspected to interfere with the functioning of the endocrine system, possibly having negative effects on the reproduction and development of aquatic life.

The most significant issue in relation to the Monmouthshire LP is the discharge of treated sewage effluent into surface watercourses, which is likely to increase the nutrient concentration, most importantly phosphate levels, in European sites that are hydrologically linked to these watercourses. The LP assessed in this HRA provides for development in the Dwr Cymru Welsh Water catchment, responsible for the public water supply and waste water treatment for large parts of Wales.

4.6.1 Screening for LSEs

The following European sites within 15km of Monmouthshire are sensitive to changes in water quality:

- **River Usk SAC**
- **River Wye SAC**
- **Severn Estuary SAC**
- **Severn Estuary SPA / Ramsar**
- Llangorse Lake SAC

The River Usk SAC is a riverine freshwater system of plain to montane levels with *Ranunculion fluitantis* and *Callitriche-Batrachion* vegetation. While this is a non-primary feature of the SAC it is essential in supporting the primary Annex II species, such as the qualifying fish and the otter. The Core Management Plan¹¹² published by Natural Resources Wales highlights the water quality in the system as a primary determinant of its ecological status, which is currently classified as unfavourable. While the main water quality impact in this catchment originates from agriculture, pollutants from sewage effluent, particularly increases in phosphorus concentrations, have the potential to increase the abundance of filamentous algae and to decrease the aquatic flowering plants. Eutrophication can lead to reduced dissolved

¹¹² https://naturalresources.wales/media/673384/River_Usk%20SAC%20core%20plan.pdf [Accessed on the 23/08/2019]

oxygen concentrations, which in turn reduces the viability of fish populations. The River Usk SAC is therefore screened in for Appropriate Assessment.

Given the similar qualifying features to the River Usk SAC, the River Wye SAC is also sensitive to aquatic pollutants. Natural England's Site Conservation Objectives Supplementary Advice Note highlights that elevated nutrient levels in the SAC, especially the concentration of phosphorus, are likely to lead to eutrophication. This might change plant growth and community composition of the 'water courses of plain to montane levels' qualifying feature, as well as having knock-on effects (e.g. loss of substrate for spawning and early life stages, reduced dissolved oxygen (DO) concentrations, increased turbidity) on fish species, such as Atlantic salmon and shad, which generally require high DO and clear water. The Monmouthshire LP makes a provision for 6,210 new dwellings and up to 6,240 new jobs (57ha of employment space), which will increase the production of sewage effluent and therefore input of phosphorus into the River Wye SAC. There is also the potential for industrial pollutants to be affecting the SAC, including pollutants such as zinc, cadmium and copper. Overall, LSEs of the Monmouthshire LP on the River Wye SAC cannot be excluded, and the site is therefore screened in for Appropriate Assessment.

The Severn SAC is designated for several habitats (e.g. estuaries, mud- and sandflats, Atlantic salt meadows) and species (lampreys, twaite shad) that are highly sensitive to changes in water quality. The document jointly published by Natural England and Natural Resources Wales highlights physico-chemical parameters, such as oxygen, nutrients and turbidity in the water column as a primary attribute for protecting the integrity of the SAC. Significant changes to any of these parameters could trigger an increase in phytoplankton or macroalgal biomass, leading to changes in the distribution (including recruitment and spawning processes) of the qualifying fish species. Changes to water quality, such as reduced dissolved oxygen concentrations, are also known to act as barriers to migration for river lamprey, brook lamprey and twaite shad. Overall, LSEs of the Monmouthshire LP on the Severn Estuary SAC cannot be excluded, and the site is therefore screened in for Appropriate Assessment.

The Severn Estuary SPA / Ramsar, designated for individual waterbirds as well as its composite waterfowl assemblage, is considered to be sensitive to water quality issues. The Severn River Basin Management Plan states that only 17% of the estuarine water bodies currently achieve good ecological status, with the remainder being at moderate status. On page 13, Natural England's Site Improvement Plan specifically highlights water pollution as a threat to the SPA / Ramsar¹¹³. This high nutrient loading may lead to an increase in benthic macroalgae, which have been identified in several locations in the Severn Estuary SPA / Ramsar, which is likely to have negative knock-on impacts on resident invertebrate communities. In turn, eutrophication effects could cascade up the food chain affecting the qualifying bird species. For example, increased nutrient input might change the sward composition of the saltmarsh, affect the Bewick's swans' ability to forage and ultimately impact the availability of adequate feeding habitat within the SPA / Ramsar. Ultimately, it is to be noted that any negative impacts of nutrient loading on the qualifying features in the SPA / Ramsar will occur as indirect effects on the birds' preferred foraging habitat and prey species. The Appropriate Assessment section of this report will therefore focus on discussing the Severn Estuary SAC, as this provides the essential supporting habitats for the SPA's / Ramsar's waterfowl species. Therefore, while LSEs of the Monmouthshire LP on the Severn Estuary SPA / Ramsar cannot be excluded, the site is screened out from Appropriate Assessment.

The Llangorse Lake SAC is a natural eutrophic lake, and its plants and animals are highly sensitive to changes in water quality. Furthermore, given that the Afon Llynfi is its only water outlet, any pollutants also remain within the lake for long periods. A significant portion of the current water pollutants derive from nearby agricultural practices and septic tanks. However, the lake is located in a lowland catchment and receives its hydrological input from a very small geographic area. Monmouthshire lies approx. 11.4km to the south-east of the Llangorse Lake SAC and is therefore considered to be beyond its hydrological catchment. Furthermore, the SAC is upstream of any watercourses that would be expected to receive wastewater or industrial run-off from development in Monmouthshire. As such it is considered that there is no hydrological connectivity between the LP area and the SAC. The Llangorse Lake SAC is screened out from Appropriate Assessment.

The following policies of the Replacement Local Development Plan have been screened in for Appropriate Assessment because they allocate residential or employment growth, which might lead to

4.7 Background to Water Quantity, Level and Flow

In addition to water quality, both the water level and flow (and its natural diurnal and annual variation) are important determinants of the ecological status of European sites. Hydrological processes are critical in influencing habitat characteristics, including current velocity, water depth, wetted area, dissolved oxygen levels and water temperature. In turn these habitat features determine the short- and long-term viability of plant and animal species, as well as overall ecosystem composition.

A highly cited review paper summarised the ecological effects of reduced flow in rivers¹¹⁴. Droughts (ranging in their magnitude from flow reduction to a complete loss of surface water) have both direct and indirect effects on stream communities. For example, a marked direct effect is the loss of water and habitat for aquatic organisms. Indirect effects include a deterioration in water quality, changes to the

¹¹⁴Lake P.S. 2003. Ecological effects of perturbation by drought in flowing waters. *Freshwater Biology* 48: 1161-1172.

food resources and alterations in interspecific interactions. An increased stability of baseflow and a reduction in the natural flow variability of rivers has been linked to the excessive growth of macrophytes and a reduction in fish populations¹¹⁵.

The variability in hydrological discharge does not only have ecosystem-level effects, but also affects specific functional groups and species more directly. Anadromous fish, the qualifying features of several of Monmouthshire's European sites, are especially sensitive to water fluctuations and flow variability. This is primarily because their life stages critically depend on specific flow levels. For example, a recent modelling study demonstrated that low-flow conditions in summer, a critical time when adult anadromous fish must reach their upstream spawning grounds, significantly reduces production in salmonids¹¹⁶.

4.7.1 Screening for LSEs

The following European sites within 15km of Monmouthshire are sensitive to changes in their water quantity, level and flow (the sites that are screened in for Appropriate Assessment following discussion in the text are marked in **bold**):

- River Usk SAC
- River Wye SAC
- Severn Estuary SAC
- Severn Estuary SPA / Ramsar
- Aberbargoed Grasslands SAC
- Llangorse Lake SAC
- Coed y Cerrig SAC

The integrity of the River Usk SAC is dependent on both the volume and the stability of water flow. The Conservation Objectives for the SAC state that the quantity of water, including the natural flow variability, is to be maintained or restored to maintain the site's qualifying features in the future¹¹⁷. Hydrological processes, most importantly river flow level and variability, are critical in determining various habitat properties, such as current velocity, water depth and dissolved oxygen levels. Furthermore, the water depth and flow velocity influence the ability of adult anadromous fish of reaching their upstream spawning grounds. Species of shad are particularly sensitive to variations in flow levels. An ideal flow regime is to encourage high flows in March-May to stimulate upstream migration and maximise the upstream penetration of adult fish. In June-September low flows should be encouraged to ensure that juveniles are not washed into saline water prematurely. The development outlined in the Monmouthshire LP will require the abstraction of water for households and industry, and therefore could result in LSEs on the River Usk SAC. This site is therefore screened in for Appropriate Assessment.

The River Wye SAC is designated for the same anadromous fish species as the River Usk SAC. As for the Usk, the natural flow regime is therefore also critical to all its qualifying fish species, particularly the shad. Since development allocated in the Monmouthshire LP could also be supplied with water abstracted from the River Wye SAC, LSEs cannot be excluded and the site is screened in for Appropriate Assessment.

Being hydrologically connected with, and therefore also being dependent on, both the River Usk SAC and the River Wye SAC, the Severn Estuary SAC is highly vulnerable to changes in water flow rates for several reasons. Firstly, changes in the water flow rate are likely to lead to increases in sediment erosion or accretion respectively, to which the seagrass in the estuary is highly sensitive. Furthermore, the SAC's biotopes are also considered to be sensitive to changes in salinity, such as a long-term increase in salinity. Water abstraction for the public water supply in Monmouthshire from the main rivers supplying the Severn Estuary SAC, might lead to decreased freshwater input and could, ultimately,

¹¹⁵Bunn S.E. & Arthington A.H. 2002. Basic principles and ecological consequences of altered flow regimes for aquatic biodiversity. *Environmental Management* 30: 492-507.

¹¹⁶Ohlberger J., Buehrens T.W., Brenkman S.J., Crain P., Quinn T.P. & Hilborn R. 2018. Effects of past and projected river discharge variability on freshwater production in an anadromous fish. *Freshwater Biology* 63: 331-340.

¹¹⁷Ibid.

increase salinity levels in the estuary. As such, LSEs of the Monmouthshire LP cannot be excluded, and the site is screened in for Appropriate Assessment.

The Severn Estuary SPA / Ramsar, which harbours several species of qualifying waterfowl and waders, is considered to have an indirect sensitivity to changes in the hydrological regime. It is unlikely that changes in the water flow rate would affect any of the qualifying species (e.g. Bewick's swans) directly, because there is no linking impact pathway. However, an altered hydrological regime would likely affect their supporting habitats, including the Atlantic salt meadows, and the mud- and sandflats. For example, this could occur through changes in the species composition of the saltmarsh and a subsequent impact on the suitability of the saltmarsh for the birds or changes to the pattern of habitat use. However, since this impact pathway is already screened in for the Seven Estuary SAC, which addresses impacts on the birds' supporting habitats, the Severn Estuary SPA / Ramsar is screened out from Appropriate Assessment regarding the impact pathway water quantity, level and flow.

The Aberbargoed Grasslands SAC is an area comprising 48% of humid grassland with impeded drainage. This grassland and its characteristic plant community is sustained by both groundwater and surface water flow, depending on the variable water table. While the hydrological regime is not explicitly mentioned in the site's Core Management Plan, the integrity of the site is clearly partly dependent on the continued supply of sufficient water. However, due to the site's relatively long distance of 12.7km to Monmouthshire and the fact that it only requires a limited amount of water, which will be associated with superficial deposits with poor drainage rather than underlying aquifers, it is considered unlikely that the Monmouthshire LP will result in LSEs on the SAC through changes in the water level. The site is therefore screened out from Appropriate Assessment.

The Core Management Plan for the Llangorse Lake SAC highlights that the site is sensitive to the hydrological input into the lake, which should follow a natural seasonal cycle. The lake only has a mean depth of 2-3m (with a maximum depth of 7.5m), which will be further reduced through the gradual infilling of the lake with sediment from its banks. Any changes to the water supply of the SAC, especially a reduction in inflow, is therefore likely to threaten the integrity of the site. However, Welsh Water produced a final Water Resource Management Plan in 2019. This identifies that there will be no adverse effects on Llangorse Lake SAC from public water supply up to 2050. The Core Management Plan highlights that no new structures that will reduce inflow should be established in the vicinity of the Llangorse Lake SAC. However, as discussed in the previous section, the SAC lies approx. 11.4km to the north-west of Monmouthshire, which is considered to be beyond its hydrological catchment. There is no realistic way in which the abstraction of water for new development in Monmouthshire would change the water quantity, level or flow in the SAC. The site is screened out from Appropriate Assessment.

The Coed Y Cerrig SAC comprises alluvial forest in a valley bottom, which is dependent on a constant supply of water to maintain its waterlogged conditions. A significant alteration in the water quantity supplied might cause a drying out of the site and might potentially affect the qualifying feature of the SAC. The Coed y Cerrig SAC is only approx. 294m from the River Usk and is therefore likely to be hydrologically connected with this river. Drinking water for the western part of Monmouthshire might be extracted from the River Usk, however an abstraction effect is likely to affect the river a relatively long distance downstream from the Coed y Cerrig SAC. Welsh Water produced a final Water Resource Management Plan in 2019. This identifies that there will be no adverse effects on this SAC from public water supply up to 2050. It is therefore concluded that there is no linking hydrological impact pathway between Monmouthshire and the SAC. The site is screened out from Appropriate Assessment.

The following policies of the Replacement Local Development Plan have been screened in for Appropriate Assessment because they allocate residential or employment growth, leading to increased water abstraction from local water resources and potentially LSEs on European sites through changes to the water quantity, level and flow:

- Strategic Policy S1 – Growth Strategy
- Strategic Policy S2 – Spatial Distribution of Development – Settlement Hierarchy
- Policy H1 – Residential Development in Primary and Secondary Settlements

5. Appropriate Assessment

5.1 Atmospheric Pollution

All traffic growth on major roads within 200m of the relevant European sites was modelled. This included both traffic growth due to Monmouthshire Local Plan and wider traffic growth on the road network over the plan period to 2033. The assessment is therefore inherently in combination with other plans and projects. All modelling results are presented in Appendix C. Oxides of nitrogen, ammonia and nitrogen deposition were modelled. Four scenarios were modelled:

- Baseline – the current situation based on traffic counts for the relevant roads.
- Future baseline – the situation in 2033 in the hypothetical situation of no traffic growth.
- Do minimum – the situation in 2033 allowing for traffic growth on the road network, including from other authorities (e.g. Blaenau Gwent) but excluding Monmouthshire Local Plan; and
- Do something – identical to the Do minimum scenario but including Monmouthshire Local Plan.

The difference between the Do something and Do minimum scenarios identifies the contribution of Monmouthshire Local Plan, while the difference between the Do something and Future baseline scenarios identifies the ‘in combination’ effect of all traffic growth. The air quality modelling is therefore inherently in combination with other plans or projects.

Paragraph 5.26 of Natural England guidance (the only detailed guidance on the issue)¹¹⁸ states that ‘*An exceedance [of a critical level or load] alone is insufficient to determine the acceptability (or otherwise) of a project*’. Where an exceedance of the Critical Load is expected, it is also necessary to consider whether the forecast dose will be imperceptible. As per paragraph 4.25 of same guidance ‘*... 1% of critical load/level are considered by Natural England’s air quality specialists (and by industry, regulators and other statutory nature conservation bodies) to be suitably precautionary, as any emissions below this level are widely considered to be imperceptible... There can therefore be a high degree of confidence in its application to screen for risks of an effect*’. However, the 1% threshold is not a damage threshold. Guidance goes on to state that Paragraph 5.28 of that guidance states ‘*In practice, where a site is already exceeding a relevant benchmark, the extent to which additional increments from plans and projects would undermine a conservation objective to ‘restore’ will involve further consideration of whether there is credible evidence that the emissions represent a real risk that the ability of other national or local measures and initiatives to otherwise reduce background levels will be compromised in a meaningful manner*’[emphasis added].

5.1.1 Severn Estuary SAC/SPA/Ramsar

Three transects were modelled into this SAC/SPA/Ramsar site. These are transects E01a, E01b and E02b, all on the M48 road bridge as it traverses the site. The most sensitive designated habitat to atmospheric pollution is the saltmarsh habitat. Saltmarsh does not support significant lichen or bryophyte populations such that the appropriate critical level is $3 \mu\text{g m}^{-3}$. For nitrogen deposition saltmarsh has a critical load range of 10-20 kgN/ha/yr. The lower part of the critical load range is appropriate to be used for upper saltmarsh (rarely inundated) while the upper part of the critical load range is appropriate for lower saltmarsh (frequently inundated).

All available critical loads (and levels) are based on research into impacts on ‘rooted macrophytes’ (i.e. conventional plants) or (for ammonia) lichens & bryophytes. In other words, they have all been based on impacts on plant communities which obtain their nutrients either through their roots or directly from atmosphere. Unvegetated intertidal mudflat has no such vegetation communities and therefore it is not considered sensitive to atmospheric nitrogen deposition.

5.1.1.1 NOx

Oxides of nitrogen (NOx) are not identified as a concern on any modelled transect as at no point on any transect will it exceed the critical level for all vegetation of $30 \mu\text{g m}^{-3}$. Since the critical level is not forecast to be breached no adverse effect on integrity will arise notwithstanding traffic growth.

¹¹⁸ <http://publications.naturalengland.org.uk/publication/4720542048845824>

5.1.1.2 Ammonia

The relevant critical level of $3 \mu\text{g m}^{-3}$ is not exceeded on any transect under any scenario for ammonia. Since the critical level is not forecast to be breached no adverse effect on integrity will arise notwithstanding traffic growth.

5.1.1.3 Nitrogen deposition

On the English side the nearest saltmarsh in the SAC (Transect E01b) is 20m from the road. At this point the modelled in combination effect from all traffic growth is 0.01 kgN/ha/yr , while on the Welsh side at 10m from the road it is 0.02 kgN/ha/yr . This is well below 1% of the critical load (10 kgN/ha/yr as a minimum) and therefore adverse effects on integrity can be dismissed. The forecast impact is very low despite the forecast in combination increase in traffic on the M48 because the modelled road is a bridge situated high above the SAC/SPA meaning the dispersion and deposition patterns are very different than if the road was at grade.

5.1.2 Wye Valley Woodlands SAC

Two transects were modelled into this SAC, transects E03 (A466) and E05 (A40), representing the two major roads within 200m of the SAC likely to be used by Monmouthshire traffic. Since the woodland for which the SAC is designated may support significant lichen or bryophyte populations the appropriate ammonia critical level is $1 \mu\text{g m}^{-3}$. For nitrogen deposition the SAC woodlands have a critical load range of $10\text{-}20 \text{ kgN/ha/yr}$.

5.1.2.1 NOx

Oxides of nitrogen (NOx) are not identified as a concern on any modelled transect as at no point on any transect will it exceed the critical level for all vegetation of $30 \mu\text{g m}^{-3}$. Since the critical level is not forecast to be breached no adverse effect on integrity will arise notwithstanding traffic growth.

5.1.2.2 Ammonia

The relevant critical level of $1 \mu\text{g m}^{-3}$ is exceeded throughout both transects under all scenarios due to background concentrations from existing sources such as agriculture. However, at the distances the SAC lies back from the road (100m and beyond), modelling shows that there is no impact of traffic growth (alone or in combination) on ammonia concentrations.

5.1.2.3 Nitrogen

At the closest point of the SAC to the road, the 'in combination' nitrogen impact is a maximum of 0.06 kgN/ha/yr or 0.6% of the lowest part of the critical load range. The contribution of the Monmouthshire Local Plan is also very small being 0.01 kgN/ha/yr on transect E03 and 0.02 kgN/ha/yr on transect E05. As a result a conclusion of no adverse effect on integrity alone or in combination can be reached.

5.1.3 Cwm Clydach Woodlands SAC/ Usk Bat Sites SAC

These two SACs are considered together because they both lie adjacent to A465 Heads of the Valleys Road at Daren-felen, with Cwm Clydach Woodlands SAC lying immediately beyond the Usk Bat Sites SAC to the south of the road. Three transects were modelled: E06, E07a and E07b. Transect E7a covers Cwm Clydach Woodlands SAC as well as Usk Bat Sites SAC. Cwm Clydach Woodlands is typically c. 50m from the road. Usk Bat Sites SAC is either side of the road, right up to roadside. Despite its name Usk Bat Sites SAC is designated for its habitats as well as its bat populations.

The part of Usk Bat Sites SAC relevant to this assessment (i.e. within 200m of the A465) is Management Unit 5 of Mynydd Llangatwg SSSI. That Management Unit contains the SAC interest feature 'Tilio-Acerion forests of slopes, screes and ravines'. This habitat is of relatively low sensitivity to nitrogen deposition (with a critical load range of $15\text{-}20 \text{ kgN/ha/yr}$) but of high sensitivity to atmospheric ammonia due to the presence of lichens and bryophytes (critical level of $1 \mu\text{g m}^{-3}$). The habitat within the relevant section of Cwm Clydach Woodlands SAC is W15a and W12a Fagus Sylvatica woodland, or scrub¹¹⁹, which is an SAC interest feature (beech woodland) with a critical load range for nitrogen of $10\text{-}15 \text{ kgN/ha/yr}$.

¹¹⁹

https://datamap.gov.wales/search/?title_icontains=Phase%202&abstract_icontains=Phase%202&keywords_name_icontai

5.1.3.1 NOx

Oxides of nitrogen (NOx) are not identified as a concern on any modelled transect as at no point on any transect will it exceed the critical level for all vegetation of 30 µgm⁻³. Since the critical level is not forecast to be breached no adverse effect on integrity will arise notwithstanding traffic growth.

5.1.3.2 Ammonia

The relevant critical level of 1 µgm⁻³ is not exceeded on transect E06, or on E07a beyond 90m from the road. However, it is exceeded throughout the rest of E07a and throughout the entirety of transect E07b under all scenarios. This is due to background concentrations from existing sources such as agriculture. The in combination impact on ammonia concentrations does not exceed 1% of the critical level on transect E06 but does exceed 1% of the critical level within 70m of the road on transect E07a and within 50m of the road on transect E07b, although the contribution of Monmouthshire Local Plan is imperceptible in the modelling by 40m from the road, and 20m from the road, respectively. Adverse in combination effects cannot therefore be dismissed on purely numerical grounds.

5.1.3.3 Nitrogen

In combination nitrogen deposition rates exceed 1% of the critical load up to 50m from the road along transect E07a and 40m from the road on transect E07b, although the contribution of Monmouthshire Local Plan is imperceptible in the modelling beyond 10m from the road, and 5m from the road, respectively. As with ammonia, therefore, adverse in combination effects cannot therefore be dismissed on purely numerical grounds.

5.1.3.4 Interpretation

'In combination' effects on the two SACs from ammonia and nitrogen deposition from traffic growth on the A465 to 2033 cannot be dismissed. However, the A465 is one of the major trunk roads in Wales and is a main east-west route in South Wales along with the M4 motorway. Moreover, large sections of the road are being converted to dual carriageway by 2025. As such, traffic-related changes in air quality on the A465 are not a local (Monmouthshire) issues but a Wales-wide issue and is the responsibility of the Welsh Government or South Wales Trunk Road Agent (SWTRA). This is relevant because Joint Nature Conservation Committee (JNCC) guidance on the issue¹²⁰ states (pages 20/21) that: *'The trunk road network forms the core of the national transport system. Trunk roads are central to long distance travel and connectivity across the UK and traffic patterns on trunk roads are a consequence of predicted growth across the UK generally. The effects of development on traffic flows on truck roads are more appropriately taken into account as part of national and regional strategic plan level HRAs.'* As such, this is considered to be an issue to be address at a strategic national scale rather than through the Monmouthshire Local Plan.

5.2 Recreational Pressure

5.2.1 Severn Estuary SPA / Ramsar

5.2.1.1 Existing Evidence Base

The Severn Estuary SPA / Ramsar is a destination with a unique funnel shape, meaning that it runs diagonally through several authorities, including Forest of Dean, Stroud and Monmouthshire. The site is likely to have a unique recreational draw on residents in these adjacent authorities and, given that the likelihood of visits decreases with distance from a destination, residents are likely to visit the stretches of the Severn Estuary SAC with suitable access points that are closest to home. However, Footprint Ecology undertook a visitor survey in Lydney (Forest of Dean) in 2017 to inform a recreation strategy for that part of the estuary¹²¹. A visitor survey was also undertaken by EPR in 2016 for the part of the SPA / Ramsar within Stroud District¹²². These surveys were undertaken to establish a

[ns=Phase%20&purpose_icontains=Phase%20&f_method=or&limit=20&offset=0](#), and [New map | DataMapWales \(gov.wales\)](#)

¹²⁰ [Main Report: Guidance on Decision-making Thresholds for Air Pollution \(jncc.gov.uk\)](#)

Unpublished report by Footprint Ecology for the Forest of Dean District Council. 55pp. Available at: <https://www.footprint-ecology.co.uk/reports/Liley%20et%20al%202017%20Lydney%20Severn%20Estuary%20Visitor%20Survey%20and%20Recreation%20Strategy.pdf> [Accessed on the 13/08/2024]

¹²² Southgate J. & Colebourn K. 2016. Severn Estuary (Stroud District) Visitor Survey Report. Report for Stroud District Council. Ecological Planning & Research, Winchester. 68pp.

baseline of visitor pressure in the relevant parts of the SAC to these Councils, and to assess the potential impacts of residential growth in the respective authorities, similar to the development proposed in the Monmouthshire LP. The results of these surveys are not directly relevant to Monmouthshire, illustrated by the fact that the surveys did not capture visitors from Monmouthshire (likely due to the presence of stretches of the SAC much closer to home). Nevertheless, some of the patterns of visitor use highlighted in these surveys are likely to be similar in Monmouthshire (for example, the proportion of dog walkers), and are therefore discussed in the following.

5.2.1.2 Visitor survey

To obtain visitor data for the Severn Estuary SPA / Ramsar (and also the SAC), a survey (comprising visitor counts and interviews) was undertaken at four key access locations along the estuary. The survey followed a similar methodology to surveys carried out by Footprint Ecology in other European sites, which have provided the evidence base for numerous Habitats Regulations Assessments. To summarise, the key features of the survey methodology were:

- Interviewer roams survey location and approaches first adult seen (alone or part of a larger group) for interview – the interview involves a set of questions to obtain key information such as activity undertaken and home postcode; upon completion of the interview the next adult is approached
- Interviewer counts the number of adults, minors and dog walkers to get an overview of the ‘busyness’ of the site at a given location
- Survey day is divided into a morning (07:30 to 12:30) and an afternoon shift (12:30 to 17:30)
- Each location is to be surveyed on two days, a weekday (Monday to Friday) and a weekend day (Saturday and Sunday), avoiding public holidays and special events resulting in high footfall

Using satellite imagery and in collaboration with Monmouthshire’s Countryside Team, AECOM identified four key access locations to the Severn Estuary SPA / Ramsar / SAC based on their proximity to existing conurbations, the presence of parking opportunities and dedicated foot access points. The following locations from east to west along the estuary were identified for surveying:

- Caldicot Coast Path (ST 48103 87124)
- Black Rock Car Park (ST 51308 88083)
- RSPB Newport Wetlands (ST 32771 82905)
- Lighthouse Inn Car Park (ST 30030 81596)

5.2.1.3 Key Results

The data summarised in Table 3 below provide the key results of the visitor survey. A fuller note on the survey is presented in Appendix D.

Table 3: Visitor counts (including adults and minors) at access points to the Severn Estuary SPA / Ramsar / SAC provided as totals and split by weekday / weekend.

Survey Location	Visitor Count Weekday	Visitor Count Weekend	Total Visitor Count
Caldicot Coast Path	73	54	127
Black Rock Car Park	58	212	268
RSPB Newport Wetlands	135	478	613
Lighthouse Inn Car Park	50	97	147

The total number of visitors varied significantly between survey locations. The RSPB Newport Wetlands was by far the busiest survey point (613 visitors over two survey days), followed by the Black Rock Car Park (268 visitors), Lighthouse Inn Car Park (147 visitors) and Caldicot Coast Path

(127 visitors). The relatively low visitor count at Caldicot is most likely due to it providing foot access only, whereas all other survey locations adjoin car parks. This increases accessibility and is expected to draw visitors from further afield, resulting in higher overall busyness.

In context, it appears that the stretch of the Severn Estuary SPA / Ramsar / SAC in southern Wales is busier than parts in other authorities, such as the Forest of Dean in England. For example, a visitor survey in Lydney showed that the busiest location had 98 people entering over two days¹²³. That is a similar count to the one obtained for Lighthouse Inn Car Park in a single day of surveying. Visitor numbers ranged between 8 and 153 people across 20 survey locations in a survey conducted in the Humber Estuary¹²⁴. Overall, these data indicate that the Severn Estuary SPA / Ramsar / SAC in Monmouthshire is already a key recreation destination for people (even in winter) and would be highly attractive to new residents moving to the wider area around the site. It also implies that recreational pressure is an impact pathway requiring thorough assessment in relation to future housing growth.

The geographic source of visitors was also assessed. Of the 188 interviewees, 80 (44.4%) visitors derive from Monmouthshire, the authority within which the surveyed stretch of the Severn Estuary SPA / Ramsar / SAC lies (Table 4). The second biggest contribution is made by Newport, where 40 (22.2%) of the interviewees live. Together, Monmouthshire and Newport account for 66.6% of the recreational burden in the estuary. Notable origins of visitors were also Cardiff (12 interviewees, 6.7%), Caerphilly (10 interviewees, 5.6%) and Torfaen (5 interviewees, 2.8%).

Table 4: Local Authorities from which visitors to the Severn Estuary SPA / Ramsar / SAC derived. Only authorities contributing over 1% to the recreational burden are shown.

Source of Visitors (Local Authority)	Number of Visitors	Percentage of Visitors (%)
Monmouthshire	80	44.4
Newport	40	22.2
Cardiff	12	6.7
Caerphilly	10	5.6
Torfaen	5	2.8
Forest of Dean	3	1.7
Bristol	2	1.1
Wiltshire	2	1.1
Total	188	100

The home postcodes of interviewees provide the key most important parameter that is used to identify recreational catchments. Typically, the 75th percentile of interviewees (i.e. the distance from the SPA / Ramsar from which 75% of interviewees originate) is used to denote the core recreational catchment. This cut-off point is used to remove the influence of outliers and to demark the catchment that forms the most likely visitor pool. Pooling the postcodes from all 'local' visitors (i.e. those on a day trip from home; n = 158), 75% of visitors travelled a linear Euclidean distance of 6.5km to the SPA / Ramsar. This core recreational catchment is broadly similar to those identified for stretches of the estuary in other geographic areas.

For example, a visitor survey carried out in the estuary in Stroud District in 2017 established a core catchment of 7.7km for that authority (though this has since been updated, see below). Survey work undertaken for the West of England authorities delineated a core catchment of 7.36km for survey

¹²³ Liley D, Panter C & Hoskin R. (2017). Lydney Severn Estuary Visitor Survey and Recreation Strategy. Unpublished report by Footprint Ecology for the Forest of Dean District Council.

¹²⁴ Fearnley H, Liley D & Cruickshanks K. (2012). Results of the recreational visitor surveys across the Humber Estuary. Unpublished report by Footprint Ecology for the Humber Management Scheme.

points in North Somerset and South Gloucestershire. One notable aspect of the various surveys undertaken in the Severn Estuary SPA / Ramsar / SAC is that the core recreational catchments, even though the surveys have been undertaken for different authorities, have a broad consistency of approx. 7km regarding the core catchment identified. This is useful since it is standard practice when European sites are involved for the affected authorities to agree on a standardized core catchment. For the Severn Estuary SPA / Ramsar / SAC it appears that 7km is a reasonable precautionary recreational buffer for all European sites.

Core recreational catchments were also drawn up for dog walkers and frequent visitors (ranging from daily visits to several visits per week). This was done to delineate the geographic zone that user groups with the highest ecological impacts on overwintering birds derive from. For dog walkers the core recreational catchment is approx. 3.1km, whereas for frequent visitors the core catchment is approx. 1.9km. This is notable because it highlights that the visitors with the highest impact potential come from a relatively small zone around the European sites.

Stroud Council (in England) and Forest of Dean Council (also in England) have both recently increased the recreational catchment in their area for Severn Estuary from 7km to 12.6km, based on more recent visitor survey from 2022¹²⁵. It is to be expected that different parts of the Severn Estuary have different recreational catchments, and the survey data for Monmouthshire clearly indicates a smaller core catchment. However, there is also value in authorities around the Severn Estuary adopting a consistent core catchment. Therefore, it may be advisable for Monmouthshire Council to adopt 12.6km as their core catchment, and thus the zone within which financial contributions to recreational pressure mitigation on the SAC/SPA/Ramsar site would be collected.

5.2.1.4 Implications of the Visitor Survey for Monmouthshire

The data from the visitor survey presented here, which suggest that Monmouthshire contributes by far the highest proportion of visitor pressure in the stretch of the Severn Estuary SPA / Ramsar / SAC that was surveyed, have implications for the Monmouthshire RLDP. The catchment zones for dog walkers and frequent visitors, the user groups with the highest disturbance impacts, include both these Strategic Growth Areas. Furthermore, of the 188 interviewees, 19 (23.8%) live in Caldicot, further underlining the importance of this part of Monmouthshire to the SPA's / Ramsar's / SAC's visitor pool. Allocations within 7km and 12.6km of the SPA/Ramsar site are identified in Tables 5 and 6 below. It can be seen that increasing the catchment to 12.6km would only capture one more residential development site.

Table 5. Residential and Mixed Use Sites with 7km Severn Estuary SPA/Ramsar

Policy	Settlement	Site Name	Units	Area (ha)
HA3	Chepstow	Land at Mounton Road, Chepstow	146	12.8

¹²⁵ [Agenda Item 9 - Appendix A - Severn Estuary Mitigation Strategy.pdf \(moderngov.co.uk\)](https://www.moderngov.co.uk)
<https://www.stroud.gov.uk/environment/planning-and-building-control/conservation-biodiversity-listed-buildings-trees-and-hedgerows/habitats-regulations-assessment-hra/>
<https://www.stroud.gov.uk/environment/planning-and-building-control/conservation-biodiversity-listed-buildings-trees-and-hedgerows/habitats-regulations-assessment-hra/severn-estuary-special-area-of-conservation-sac/>

Given the high sensitivity of the SPA / Ramsar to impacts resulting from recreational pressure, adverse effects on its site integrity due to additional residential development cannot be excluded. It is anticipated that mitigation measures will be required to avoid adverse effects on the SPA / Ramsar. These could be delivered in the form of Strategic Access Management and Monitoring (SAMM) in the estuary itself, and / or through access enhancements and improvements to appropriately sited, existing or newly developed greenspaces. This section does not advocate or propose a full mitigation strategy, but rather scopes out the options that are available to the Council to address the issue of recreational pressure.

In England, authorities within the recreational catchment of sites that are sensitive to recreational pressure have developed SAMM strategies to avoid adverse effects on the European sites; the most prominent examples being the Thames Basin Heaths SPA and the Dorset Heaths SPA. For example, to protect the Dorset Heaths, the authorities proposing residential development within the SPA catchment zones have set out the Dorset Heathlands Planning Framework Supplementary Planning Document (SPD)¹²⁶. For example, in the case of the Dorset Heaths, the SPD proposes a series of SAMM projects, including undertaking of educational activities and employing wardens to manage visitor pressure. The funding for these measures is collected through a combination of Community Infrastructure Levy (CIL) and Section 106 agreements (planning obligations) payable by the developer. It is considered that similar measures (and funding mechanisms) could be deployed in the Severn Estuary SPA / Ramsar, to help manage recreational pressure. Such measures would have to be identified and developed in collaboration with all key stakeholders (i.e. authorities, private landowners) and in consultation with Natural Resources Wales.

The visitor survey data indicate that there are ample opportunities for SAMM projects in Monmouthshire's section of the Severn Estuary SPA / Ramsar / SAC. Most visitors are not aware of (125 interviewees, 66.5%) or unsure (21 interviewees, 11.2%) whether any conservation designations apply to the site. Furthermore, only one interviewee (0.5%) indicated that they knew about the site's SPA / Ramsar status and its international importance to overwintering birds. Regarding active conservation measures, a total of 87 interviewees (46.3%) had come across information boards along the estuary. Only 18 interviewees (9.6%) indicated that they were aware of any signage (e.g. dog-on-lead signs) along the estuary. Furthermore, only 3 interviewees (1.6%) had noticed a ranger presence along the estuary. These were all recorded at the RSPB Newport Wetlands, indicating that these are likely to have been RSPB employees rather than rangers specifically managing recreation in the estuary. Overall, 82 interviewees (43.6%) are not aware of any measures that are in place to deliver conservation in the SPA / Ramsar / SAC.

Therefore, various SAMM measures along the estuary could be deployed to decrease the likely impact of future housing growth delivered under the RLDP. For example, enhanced signage (e.g. dog-on-lead signs covering the overwintering period) along the estuary is likely to increase public awareness and reduce disturbance to sensitive bird species. Changes in how the estuary is managed may also be beneficial to the Severn Estuary SPA / Ramsar / SAC, provided they support the site Conservation Objectives. While 155 interviewees (82.5%) did not provide any changes they would like to see in how the area is managed, 23 interviewees (12.2%) highlighted footpath improvements (particularly in Caldicot) and 5 interviewees (2.7%) wanted more dog bins (Appendix D). Improvements to footpaths along the estuary could be a key tool in discouraging off-track walking and reducing the number of major bird disturbance events.

Opening new areas of greenspace to the public or enhancing existing greenspaces is the second pillar of mitigating recreational pressure. Importantly, these alternative greenspaces should be less sensitive to disturbance, while aiming to recreate as best as possible a feeling of expanse and wilderness. Regarding the Monmouthshire LP, growth around Caldicot and Chepstow is of primary concern. Therefore, it is considered that enhanced greenspace provision should be a priority for the Caldicot area. The most obvious candidate for improvements would be the Caldicot Castle Country Park (CCCP), which is approx. equidistant from existing residential development in Caldicot than the Severn Estuary SPA / Ramsar and therefore represents a realistic destination alternative. The CCCP is also owned and operated by Monmouthshire County Council, which facilitates the delivery of

¹²⁶ The consultation draft of the Dorset Heathlands Planning Framework 2020-2025 can be found at: <https://www.bournemouth.gov.uk/planningbuilding/PlanningPolicy/PlanningPolicyFiles/dorset-heathlands-planning-framework/dorset-heathlands-spd-2019-consultation.pdf> [Accessed on the 30/06/2020].

mitigation measures compared to sites under multiple ownership. It is noted that the CCCP is already an attractive destination for visitors¹²⁷ and any mitigation measures deemed acceptable are likely to have to improve the capacity of the park to attract further visitors. A list of potential enhancements may include¹²⁸:

- Provision of a variety of routes (ideally at least one circular route) leading out from the castle into the woodland
- Enhancements to the existing main car park off Church Road (e.g. increasing capacity, renewing surfacing, etc.)
- Provision of enhanced information boards along the key walking routes, which may address the cultural / historical heritage of the CCCP and ecological features of interest in the site
- Incorporation of Nedern Brook as a main feature into the walking routes starting at the Castle

Notwithstanding the provision of enhanced local greenspaces, it is noted that these cannot fully alleviate the increase in recreational pressure on European sites. Estuarine and coastal sites in particular, such as the Severn Estuary SPA / Ramsar, have a unique recreational draw (illustrated by their large core catchments) and will continue to attract visitors regardless of other destination alternatives. The enhancement of non-designated greenspaces most likely fulfils its most important role in attracting local residents that have frequent and relatively short outings, including dog walkers, walkers and people exercising. Therefore, such an approach is considered to be particularly effective for residential development in Caldicot, for which future residential development is expected to follow a similar access pattern to that established in the visitor survey.

It is concluded that, providing an appropriate set of mitigation measures in and / or the wider area around the Severn Estuary SPA / Ramsar is delivered (in agreement with the Natural Resources Wales), the Monmouthshire LP will not result in adverse effects on the designated site regarding recreational pressure. Furthermore, AECOM recommends that appropriate reference to these mitigation measures is made in the relevant policies, such as policies providing for housing growth or addressing ecological features that present (and require protection) in Monmouthshire.

It is noted that relevant Deposit Site Allocation policies, with the exception of Site HA14 include reference to the site being within 7km of the Severn Estuary European Marine Site (site HA14 is within 12.6km) and that a financial contribution may be required as part of a mitigation strategy as well the SANG requirements to reduce recreational pressures on the features of the estuary. These requirements are set out in the following site-specific policies:

- HA2 – Land to the East of Caldicot
- HA3 – Land at Mounon Road, Chepstow
- HA9 – Land at Former MoD, Caerwent
- HA13 – Land adjacent to Piercefield Pub House, St Arvans
- HA18 – Land West of Redd Landes, Shirenewton

Policy NR2 – Severn Estuary Recreational Pressure also sets out requirements for proposals that would result in visitor pressure on the Severn Estuary SAC, SPA, Ramsar site, or Functionally Linked land will not be supported unless it can be demonstrated that no adverse impact on the integrity of the European Marine Site will occur.

The supporting text links this requirement to a Core Recreational Catchment Zone of 7km identified by the HRA.

AECOM recommends that the mixed use sites EA1m and EA1l are also included in this solution along with residential site HA14. As such AECOM recommends that the same policy

¹²⁷ The Caldicot Castle Country Park is widely advertised as an attractive destination for outings, for example on the Monmouthshire tourism website available at: <https://www.visitmonmouthshire.com/Caldicot-Caldicot-Castle-and-Country-Park/details/?dms=3&venue=1000670> [Accessed on the 30/06/2020].

¹²⁸ Note that rather than focussing on a specific site, greenspace enhancements may also be delivered as a series of small-scale projects designed to improve access to multiple greenspaces or to encourage responsible recreation in the estuary. This would be analogous to the Heathland Infrastructure Projects (HIPs) delivered in the Dorset Heaths.

requirement is included in those policies as has already been included in other relevant allocations.

5.2.1.1 In-Combination Assessment

In addition to growth within Monmouthshire, new dwellings are currently planned within 7-12.6km of the SAC, SPA and Ramsar site in Cardiff, Torfaen, North Somerset, South Gloucestershire, Bristol, Stroud District, Forest of Dean District, and the Somerset Council area (previously including Sedgemoor, Somerset West & Taunton, and other districts). At least 50,000 dwellings are therefore likely to have been delivered within 12.6km of the SPA and Ramsar site to 2040 and probably more as the Local Plans of several local councils in the vicinity are in the process of being updated. However, the mitigation strategy identified above would address Monmouthshire's contribution to any such in combination effect.

5.2.2 Severn Estuary SAC

As identified in the screening section for LSEs, the Monmouthshire LP might also result in negative impacts on sensitive habitat features of the Severn Estuary SAC, including the estuary feature, the subtidal sandbanks, the sand- and mudflats, and the Atlantic salt meadows. In contrast to the SPA / Ramsar features which would mostly be subject to direct disturbance, the SAC features are likely to be affected by trampling, erosion, pollution and abrasion associated with boating activities. The estuaries feature of the SAC is defined as highly vulnerable to physical disturbance and abrasion, which could result from anchoring, power boats, jet skis, bait digging, littering and walking on sensitive habitat features. In the intertidal sand- and mudflats, boating, anchoring, trampling and the use of off-road vehicles are most likely to cause physical disturbance, such as the compaction of substratum. For example, trampling and the use of vehicles results in the collapse of burrows of clam species, heart urchin and razor shell. Due to the longevity of these species, these habitats have long recovery rates of up to five years following disturbance events. Physical disturbance and abrasion are also key issues for saltmarsh communities, where they can cause damage to individual plants and change the ecological structure of the sward. Furthermore, wash arising from boating increases saltmarsh erosion. The assessment and mitigation strategy relevant to Severn Estuary SPA/Ramsar would also serve to protect the SAC features.

It is generally considered that adverse effects on the site integrity of the Severn Estuary SAC could be avoided within the remit of a Strategic Access Management and Monitoring Strategy. While this would be primarily designed to mitigate recreational pressure on the SPA / Ramsar features, any suite of measures could be extended to include the SAC features. For example, information boards for the general public could be enhanced to provide background information on the negative impacts of boating or bait-digging, thereby helping to raise awareness. Furthermore, detailed information about the distribution of the most important SAC habitats could be provided to encourage that boating visitors avoid such areas. A Code of Conduct for boaters could be published online, via leaflets and on information boards.

There are also several policy mechanisms through which the Severn Estuary SAC could be protected, for example by introducing the following wording into a policy addressing the protection of European sites in Monmouthshire: **'Any development proposals that would increase visitor access to sensitive habitat features in the Severn Estuary SAC, SPA and Ramsar site, especially on to saltmarsh and mudflat habitat, will not be supported unless no adverse effect on the integrity of the sites could be confirmed.'**

5.2.2.1 In-Combination Assessment

The in combination assessment for Severn Estuary SPA/Ramsar site also applies to Severn Estuary SAC.

5.2.3 Usk Bat Sites SAC

Primarily, the Usk Bat Sites SAC is designated for its lesser horseshoe bat population of European significance. Both the maternity roost and the numerous hibernation sites (e.g. in Agen Allwedd Cave and Clydach Gorge Cave) are highly sensitive to recreational disturbance due to potential changes to a variety of habitat conditions, such as ventilation, temperature, light level and noise level.

Given the high sensitivity of this bat species to disturbance, the most important caves have been gated for conservation reasons, including Agen Allwedd, Craig a Ffynnon and Daren Cilau. Access to these caves requires prior application for a permit to the Mynydd Llangatwg cave Management Advisory Committee¹²⁹. However, numerous other roost and hibernation sites are not gated and as such potentially sensitive to higher visitor footfall. However, the Bannau Brycheiniog National Park (BBNP) website identifies caving as a potentially dangerous activity that requires prior consent of a local caving club and the assistance of a qualified expedition leader¹³⁰. Furthermore, the Caves of South Wales website outlines the Cave Conservation Code, which aims at minimising impacts on cave biota as well as geological formations¹³¹.

In the BBNP visitor survey, Brecon Canal was identified by 154 interviewees (9%) as one of the destinations during their visit. The Brecon Canal was the closest destination to the Usk Bat Sites SAC (1.7km) given by interviewees, which may also involve a visit to the SAC. Assuming the same proportion of Monmouthshire visitors than that obtained for the whole visitor survey dataset (i.e. 8%), this would imply that the area of NP in proximity to the Bat Sites SAC is visited by roughly 12 visitors travelling from Monmouthshire per every two days (the survey effort in the BBNP). It should also be highlighted that caving was not among the most popular recreational activities mentioned by interviewees and as such is likely to be carried out by very few people. Given its specialised nature, it cannot be assumed that this activity is directly linked to a general increase in the local population, in the same way as dog-walking.

Given the relatively small number of Monmouthshire residents that visit the approximate area around the SAC, the existing access controls (e.g. locked gates) of the most important roost and hibernation caves and the wider regulation of caving activities, it is considered that the implementation of the Monmouthshire RLDP would not result in adverse effects on the integrity of the caves in the Usk Bat Sites SAC, both alone and in-combination.

The residential growth outlined in the Monmouthshire RLDP might also result in additional recreational pressure on various sensitive habitat elements of the Usk Bat Sites SAC. Notably, European dry heath elements are likely to be negatively impacted by off-trail trampling damage. Undoubtedly, any potential negative effects of recreation related to the physical modification of habitats, are likely to be linked to the amount of visitor footfall and the maintenance of the available path network. The Usk Bat Sites SAC lies within easy walking distance (c.1km) of only a small number of dwellings in Monmouthshire. Car-based visitors will of course visit sites further afield but scrutiny of the small number of public roads that provide access into the SAC's component sites indicates that they are generally narrow, and parking is very limited, which will inherently control the number of casual visitors. The site will therefore not be a destination for mass recreational visits arising from Monmouthshire.

Consulting the results of the BBNP visitor survey, most visitors find that the NP is well managed (92% agree) and that information about the NP is easy to find before a visit (81% agree). This is important because it demonstrates the general access conditions in the NP and how easy it is for people to plan their visits, which crucially includes the planning of hiking or exercising routes. Furthermore, 'conditions of upland paths' (rated highly by 52%), 'conditions of lowland paths' (49%) and 'signage' (36%) were all features that were rated highly by interviewees. These results appear to indicate that the path network in the NP is well managed / maintained. This is important because having a variety of well-maintained paths to choose from, encourages visitors to stay on paths and reduces off-path trampling damage.

The potential adverse effects of recreational climbing in the SAC are appropriately addressed in the Core Management Plan of the site. This highlights that climbing in the management units 1 and 2 of the Mynydd Llangatwg SSSI, a component of the Usk Bat Sites SAC, requires the issue of a permit. Therefore, the number of climbers affecting the sensitive rocky slopes can be relatively easily controlled. Like caving, rock climbing is a niche activity undertaken by relatively few people (compared to mainstream activities such as walking and dog walking). This is reflected in the BBNP visitor questionnaire, where rock climbing was not among the reported recreational activities. The overall increase in the number of climbers as a result of the Monmouthshire RLDP is therefore

¹²⁹ <http://mlcmac.org/llangatwg.htm> [Accessed on the 27/08/2019]

¹³⁰ <http://www.breconbeacons.org/caves> [Accessed on the 27/08/2019]

¹³¹ <http://www.ogof.org.uk/> [Accessed on the 27/08/2019]

expected to be limited and is adequately addressed through the permit system that already operates in the SAC.

5.2.3.1 In-Combination Assessment

Authorities adjacent to Monmouthshire, including Powys and Blaenau Gwent (both authorities that encompass components of the Usk Bat Sites SAC), would have also had to undertake HRA of their proposed Plans prior to adoption. For example, the Powys Deposit Plan HRA Screening Report concludes that there is no linking impact pathway between development in the Plan and the SAC, and the site therefore can be screened out. Furthermore, the HRA of the previous Blaenau Gwent LDP did not conclude adverse impacts on the Usk Bat Sites SAC regarding recreational pressure. Given the relatively small additional number of visitors likely arising from the Monmouthshire RLDP, it is considered that the implementation of the Monmouthshire RLDP would not result in adverse effects on the integrity of habitats in the Usk Bat Sites SAC, in-combination with development Plans in surrounding authorities.

5.2.4 River Usk SAC

The River Usk SAC is a freshwater system that is designated for its plain to montane water course, several anadromous fish species and otter. The source of the River Usk SAC lies in upland Wales and it then flows in a south-easterly direction, entering Monmouthshire to the west of Abergavenny. The SAC then runs south through the authority before entering the Severn Estuary.

As highlighted in the LSEs screening section, the Core Management Plan for the SAC highlights that recreational pressure is a potential threat to the interest features of the site. For example, both twaite and allis shad are under pressure from recreational anglers, which sometimes take large numbers of these species. Rod fishing is also a potential concern for some of the other qualifying fish species, such as Atlantic salmon. There are several other mechanisms through which SAC features might be impacted, including disturbance of otters by dog walkers, the cutting of water crowfoot beds for boat navigation and effects on the riverine system by canoeists (e.g. disturbance of gravel beds that are used for spawning by the qualifying fish). Given that the Monmouthshire RLDP allocates additional residential housing, there is a clear impact pathway potentially linking to this riverine SAC.

The Monmouthshire RLDP allocates new residential housing within three PSSAs not all of which will be equally relevant to the River Usk SAC. In relation to the River Usk SAC, the PSSA in Abergavenny is most relevant, the outskirts of the town lying only approx. 100m from the SAC. Further individual sites in the vicinity of the SAC may be allocated in the Deposit Plan. Overall, this increase in the local population might lead to more people visiting local greenspaces, including the river. Therefore, this HRA assesses suitable access points to and paths adjoining the SAC, which might facilitate an increase in visitor numbers.

The Ordnance Survey Map on ViewRanger was consulted to investigate the path access network to the Usk around Abergavenny. The map indicates that there are Public Right of Ways (PRoWs) on both sides of the river leading from the Llanfoist bridge approx. 2.8 miles upstream to Glangrwyney. South of Abergavenny, there is no PRoW along the river for several kilometres until Llanellen. Notably, near Llanellen, the Usk Valley Walk (an advertised long-distance hiking route) tracks the river until Llantrisant in southern Monmouthshire. The Usk Valley Walk is an 80km long-distance hiking trail from Brecon to Caerleon (Newport), which is widely advertised online and social media platforms (e.g. ¹³²). Regarding canoeing, the primary river access point is the Brecon Promenade a long distance upstream from Abergavenny where recreationists can launch their own canoes or rent one. However, in practice canoes can be launched from various other points along the bank of the SAC. Overall, given that the site is easily accessible to various forms of recreation, including hiking, canoeing and fishing, it is likely that the Monmouthshire RLDP would result in an increase in recreational pressure within the SAC. However, it is to be noted that several mechanisms are already in place, which buffer adverse recreational impacts within the site.

Overall, it is considered that adverse disturbance impacts on otter from dog walkers and other recreational activities are very unlikely to arise. Otter are nocturnal animals and therefore predominantly active when recreational activities typically are not taking place. Furthermore, otter show high adaptive resilience towards disturbance, illustrated by the presence of breeding sites in

¹³² https://www.ldwa.org.uk/ldp/members/show_path.php?path_name=Usk+Valley+Walk [Accessed on the 01/11/2019]

highly disturbed conurbations (e.g. Glasgow)¹³³. They are likely to be most sensitive when being disturbed in their holts or resting on couches. A typical response of radio-tracked otters to anglers and dog walkers is to move to a position where they can see the disturbance stimulus, followed by a 50m dive and resting on a riverbank for 30 minutes¹³⁴. Overall, it is concluded that the overall health of otter populations is not adversely impacted by human disturbance. In the context of disturbance to otter, it should also be noted that for adverse impacts to arise, pathways should be 'real' rather than 'hypothetical'. There is no hard evidence that recreation in the River Usk SAC is negatively impacting its qualifying otter population.

For example, canoeing access in specific stretches of the River Usk SAC is subject to voluntary access arrangements by the Wye and Usk Foundation¹³⁵. The advice set out by this organisation stipulates that canoeing and kayaking should only be undertaken freely in winter, when the rivers are in spate flow. The Foundation gives clear guidance on where paddling is permitted and has live webcams that show the rivers' water levels. Restricting boating activities to the winter ensures that damage to the qualifying species and habitat is minimised. For example, it is less likely that canoeists will disturb gravel bars in high water flows and paddling in winter also protects the spawning period, when the anadromous fish are most sensitive. The Bannau Brycheiniog National Park website, which promotes canoeing in the River Usk SAC, advises all users to follow both the Countryside Code¹³⁶ and the Waterways Code¹³⁷. These Codes of Conduct are designed to raise public awareness to reduce disturbance and pollution of the countryside.

Regarding recreational fishing, catch and release is now promoted by Natural Resources Wales as an angling technique to aid the conservation of fish stocks. Furthermore, any Atlantic salmon that is caught before the 16th of June must be returned to the river¹³⁸. There are also rod fishing byelaws in place for Wales, detailing the open seasons for a range of fish species, which are designed to protect the integrity of qualifying fish populations.

While canoeing and fishing are popular in the River Usk SAC, these activities should be set into context of the number of people undertaking other recreational activities. While canoeing and fishing can result in damaging effects, they are undertaken by a small percentage of the population. For example, only approx. 1.5% of the UK population engage in recreational fishing¹³⁹, which is exceedingly small compared to more popular recreational activities such as dog walking. Therefore, of the new residents arising from the RLDP, only a small fraction would add to the number of canoeists and fishers along the river corridor. Consequently, a direct link between the delivery of new housing in an area and a significant increase in the number of people that will engage in fishing or canoeing cannot be drawn. Furthermore, the qualifying species are considered to be at relatively low risk of negative impacts from a general increase in the surrounding population. While an increase in river recreation infrastructure (e.g. further boat moorings) may pose a threat to the *Ranunculus* vegetation, this is not an automatic consequence of the Monmouthshire RLDP.

Overall, given that only a very small portion of new residents are expected to undertake activities that would threaten the integrity of the riverine SAC, and the fact there are current regulatory measures of these activities in place, it is concluded that there will be no adverse effects of the Monmouthshire RLDP alone on the site integrity of the River Usk SAC. Moreover, there is currently a motion towards introducing new, more protective catch controls for some of the qualifying fish species in these SACs. For example, the River Usk SAC's Core Management Plan highlights that exploitation of shad is currently unregulated and that a cessation of fishing activity might become necessary near known spawning grounds. Controls on shad catches are currently being considered in the review of freshwater fisheries legislation. Furthermore, Natural Resources Wales is applying for more protective catch controls on Atlantic salmon, which are being reviewed by the Welsh Government.

¹³⁹ approximately 1 million fishing licences are sold annually in the UK, equating to approximately 1.5% of the UK population; even assuming that an equal number of people regularly fish without licences that still equates to only 3% of the population

5.2.4.1 In-Combination Assessment

Authorities adjacent to Monmouthshire, including the Bannau Brycheiniog National Park, Newport (closest to the River Usk SAC), Forest of Dean, Hereford, South Gloucestershire and Bristol, also undertook HRAs of their proposed Plans prior to adoption. Given the relatively small additional number of residents undertaking canoeing and fishing that are likely to arise from the Monmouthshire RLDP, it is considered that the implementation of the plan is unlikely to result in adverse effects on the integrity of the River Usk SAC in-combination.

5.2.5 River Wye SAC

The River Wye SAC is a freshwater system that is designated for its plain to montane water course, various anadromous fish species and otter. It rises in the Welsh mountains (at Plynlimon), from where it runs in an easterly direction, before turning in a southerly direction, straddling the English-Welsh border and entering the Severn Estuary near Chepstow.

The Core Management Plan for the River Wye SAC indicates that some qualifying features of the site are sensitive to recreational impacts. For example, it states that *'anglers occasionally fish for shad, and they are sometimes taken in quite large numbers. Further research is necessary to define sustainable levels of angling. If this shows there is cause for concern a temporary cessation of fishing activity in the vicinity of known spawning grounds during the spawning period should be considered, particularly where shad are known to be taken regularly. Exploitation of shad is currently unregulated...'* Rod fisheries are a potential concern for Atlantic salmon, but this is regulated by EA licensing and byelaws by defining the fishing season and permissible methods of catching. As highlighted in the section on the River Usk SAC, the designated features may be impacted by a range of other pathways, such as the cutting of aquatic vegetation for navigational purposes, disturbance of spawning gravels by canoeists and disturbance to otter by dog walkers.

The Monmouthshire RLDP allocates new residential housing in three PSSAs, not all of which will be equally relevant to the River Wye SAC. For example, potential new residents in the PSSA of Chepstow, which are interested in visiting a river for recreation, are likely to visit the River Wye SAC, which is only a short travel distance from home. Further individual sites in proximity of the River Wye SAC may be allocated in the Deposit Plan. Overall, this increase in the local population might lead to more people visiting local greenspaces, including the river. Therefore, this HRA assesses suitable access points to and paths adjoining the SAC, which might facilitate an increase in visitor numbers.

Ordnance Survey Maps show that the River Wye SAC is very accessible to recreationists. There is a PRoW, the Wye Valley Walk, straddling both sides of the banks of the River Wye in the area of Monmouth. Upstream of central Monmouth, the path lies on the western side of the river with no footpath on its eastern side. At the Wye Bridge, the Wye Valley Walk traverses to the eastern side of the river, from where it follows the meandering river downstream all the way to Chepstow. Access to the River Wye SAC by Chepstow residents is likely to be less of an issue, because the SAC is less accessible near its confluence with the Severn Estuary. The available evidence indicates that canoeing is a highly popular activity on the River Wye. For example, a google search for 'canoeing the Wye Valley' brings up 279,000 results and five different companies that offer canoeing activities. In Monmouth there is a facility for canoe hiring just north of the Wye Bridge, which is accessible to new Monmouthshire residents that are interested in canoeing. As is the case for the River Usk SAC, while most canoeists might launch from the main canoeing hubs, canoes can be launched from many other locations on the banks of the Wye. Overall, there is clearly a potential of the Monmouthshire RLDP to result in disturbance to the qualifying features of the River Wye SAC.

Regarding the River Wye SAC otter population, it is concluded that there will be no adverse disturbance impacts of the RLDP. This is because otters are relatively tolerant of human presence (see discussion of this in the section on the River Usk SAC) and there is no current evidence that recreation along the River Wye is negatively impacting its qualifying otter population.

There are several existing mechanisms in place that will reduce the potential impacts of recreational pressure on the SAC features. As highlighted previously, the Wye and Usk Foundation oversees voluntary access codes along the R. Wye, including advice on when paddling activities are advised (e.g. in winter under spate flows). The R. Wye is navigable, with the Environment Agency (EA) or Natural Resources Wales being responsible for non-tidal navigation (mainly canoeing and rowing) to

Bigweir Bridge. Gloucester Harbour Trustees are the navigation authority for the tidal section of the river south of Bigweir Bridge, although this section is less relevant for recreation. The EA has published a River Wye Code of Conduct¹⁴⁰, which stipulates that waterweed and gravel beds should not be disturbed. Furthermore, '*it is an offence to willfully disturb breeding fish or spawning beds.*' The guidance also identifies that trampling and launching on spawning gravels used by salmon and trout between October and April should be avoided. Furthermore, the EA canoeists' guide to the River Wye¹⁴¹ provides detailed information on the nature conservation features of the site and sets out good practice guidelines to follow. It addresses qualifying features of the SAC, such as migratory allis and twaite shad. For example, disturbance of fast-flowing gravel areas of the river must be avoided. Ignoring the advice set out in the guide could lead to a criminal offence being committed and enforcement action to be taken. The Forest of Dean and Wye Valley tourism website also promotes a Code of Conduct for canoeists¹⁴², which includes avoiding damage to beds of waterweed and disturbance of nesting birds along the riverbanks.

Measures are also in place to protect the qualifying fish populations from recreational angling. For example, catch and release is now promoted by Natural Resources Wales as an angling technique to aid the conservation of fish stocks. Furthermore, any Atlantic salmon that is caught before the 16th of June must be returned to the river¹⁴³. There are also rod fishing byelaws in place for Wales, detailing the open seasons for a range of fish species, which are designed to protect the integrity of qualifying fish populations.

Canoeing and fishing in the River Wye SAC are certainly popular activities, drawing visitors from across the country. However, these activities are only undertaken by a small percentage of the population (e.g. only 1.5% of the UK population engages in recreational fishing). Furthermore, these activities are much less relatable to Local Plan growth than more frequently undertaken activities such as dog walking, walking and cycling (which often have very small core recreational catchments). A direct link between residential growth proposed in the RLDP and a significant increase in the number of canoeists and anglers cannot be drawn.

Overall, given that only a very small portion of new residents are expected to undertake activities that would threaten the integrity of the River Wye SAC and there are current regulatory measures of these activities in place through the Environment Agency and Natural Resources Wales, it is concluded that there will be no adverse effects of the Monmouthshire RLDP alone on the site integrity of the SAC.

5.2.5.1 In-Combination Assessment

Authorities adjacent to Monmouthshire, including the Bannau Brycheiniog National Park, Newport, Forest of Dean, Hereford, South Gloucestershire and Bristol, also undertook HRAs of their proposed Plans prior to adoption. For example, the HRA of the adopted Herefordshire Core Strategy concluded that there would be no adverse effects of the plan on the River Wye SAC in relation to recreational pressure. Given the relatively small additional number of residents undertaking canoeing and fishing that are likely to arise from the Monmouthshire RLDP, it is considered that the implementation of the plan is unlikely to result in adverse effects on the integrity of the River Wye SAC in-combination.

5.2.6 Sugar Loaf Woodlands SAC

The Sugar Loaf Woodlands SAC is a composite site that encompasses three distinct areas, The Park, St Mary's Vale and The Deri. Approx. 70% of the site is covered by woodland with mature sessile oaks dominating the canopy layer. The underlying ground flora comprises native plants such as hazel, holly, common bent, wavy-hair grass, creeping soft-grass, wood sorrel, heath bedstraw and bracken. As highlighted in the background chapter, an increase in recreational pressure (particularly when people venture off-path) may lead to increased soil compaction around the sensitive root systems of ancient trees. Furthermore, trampling could lead to direct damage to tree roots and the surrounding ground flora. The emerging Monmouthshire RLDP makes provision for approximately 5,400 – 6,210 new homes, of which at least some will be delivered in the Abergavenny PSSA within potential walking distance of the SAC. Recreational pressure could especially arise in-combination with the

¹⁴² http://www.wyedeantourism.co.uk/canoe_conduct [Accessed on the 05/11/2019]

¹⁴³ <https://naturalresources.wales/days-out/things-to-do/fishing/?lang=en> [Accessed on the 01/11/2019]

adopted Bannau Brycheiniog National Park (BBNP) LDP, which allocates 1,990 dwellings. The area covered by the BBNP LDP adjoins Monmouthshire and the provision of housing in Crickhowell would place new residents within easy travel distance of the SAC.

The area encompassing the Sugar Loaf Woodlands SAC is managed by the National Trust. The Sugar Loaf mountain is a very popular recreation destination. The community app outdooractive shows that 40 visitor routes (varying in length from 0.9 to 32.5 miles) have been mapped within and near the SAC woodland parcels. Furthermore, the National Trust (NT) website advertises the Sugar Loaf circuit walking trail, which starts in the town centre of Abergavenny, leads through SAC woodland, Sugar Loaf summit and back to Abergavenny. The NT describes the mountain as an '*iconic peak*', offering wildlife adventures and '*glorious panoramic views*' over the surrounding countryside.

Despite being a highly rated recreation area, the integrity of the Sugar Loaf Woodlands SAC is unlikely to be at significant risk from housing proposed in the Monmouthshire RLDP. Several well-established tracks cut through the three component parts of the SAC. These paths would avoid the most sensitive parts of the site (e.g. roots of mature trees) and are maintained in good condition by the NT. Given that a suitable path network is in place, there is little incentive for visitors to walk off-track. The steep terrain of the woodland also discourages off-track activities (which are most damaging to sensitive habitat features) and the creation of new desire lines. Overall, given that the steep gradient of the SAC restricts visitor activities to the main paths and the site is under appropriate management by the NT, it is concluded that the Monmouthshire RLDP will not lead to adverse effects on site integrity regarding recreational pressure in-combination. No policy recommendations are made in relation to this impact pathway.

5.2.6.1 In-Combination Assessment

Authorities adjacent to Monmouthshire, including the Bannau Brycheiniog National Park (most relevant to the Sugar Loaf Woodlands SAC), Powys (most relevant to the River Usk SAC), Herefordshire and Forest of Dean (the latter two being most relevant to the River Wye SAC), have undertaken their own HRAs in relation to European sites, both alone and in-combination. For example, the Powys Deposit Plan HRA Screening Report concludes that there is no linking impact pathway between development in the Plan and the River Usk SAC, the site therefore being screened out from Appropriate Assessment. The HRA of the previous Blaenau Gwent LDP determined that there were no adverse impacts on the River Wye SAC regarding recreational pressure. It is therefore concluded that the implementation of the Monmouthshire RLDP would not result in adverse effects on the integrity of these SACs, in-combination with development Plans in surrounding authorities.

5.2.7 Wye Valley Woodlands SAC

The Wye Valley Woodlands SAC is designated for several woodland habitats, including *Asperulo-Fagetum* beech forest, *Tilio-Acerion* forest of slopes, screes and ravines and *Taxus baccata* woods. These habitats are not generally considered to be highly sensitive to recreational pressure due to the difficult topography, but the segments of ancient forest within the SAC are potentially more vulnerable. It is well known that the condition in the soil surrounding mature trees affects their roots, mycorrhizal fungi, nutrient uptake and growth rate. Recreational activities might lead to compacted soil with less space for air and water, both essential for plant growth, and could negatively impact trees in the SAC. However, walking routes in the general area of the Wye Valley Woodlands SAC appear to be well publicised, waymarked and used by the public (e.g. near Beacon View, Monmouth¹⁴⁴).

The woodland walks maintained by Natural Resources Wales (or by Natural England within SAC components in England) would have considered ecological interest features (e.g. ancient trees) and their use by the public is not considered to negatively impact the qualifying habitats of the SAC. It was, however, anecdotally noted by Natural Resources Wales in comments on the Preferred Strategy HRA that damage had been caused to the SAC by walking, mountain biking and rock climbing activities. A review of the contours on Ordnance Survey Maps indicates that most of the SAC's woodland components are very steep and that visitors are therefore likely to stick to the paths provided, which would further protect the site's interest features. The lesser horseshoe bats, Annex II qualifying species

¹⁴⁴ <https://naturalresources.wales/days-out/places-to-visit/south-east-wales/beacon-view/?lang=en> [Accessed on the 09/08/2024]

of the SAC, are highly sensitive to recreation, but access to the component sites of the SAC that act as maternity roosts or hibernacula is regulated by grills.

To further investigate potential impacts on Wye Valley Woodlands SAC a visitor survey was undertaken for the Monmouthshire Replacement Local Plan in 2023. The results are discussed in detail in Appendix E. The home postcodes of interviewees provide the key parameter that is used to identify recreational catchments. Typically, the 75th percentile of interviewees (i.e. the distance from the SAC from which 75% of interviewees originate) is used to denote the core recreational catchment. This cut-off point is used to remove the influence of outliers and to demarcate the catchment that forms the most likely visitor pool.

Using these data, the 75th percentile of all visitors that travelled to the SAC is 39.3km. In other words, three quarters of visitors live within 39.3km of the SAC boundary. This is a very large catchment and represents the importance of the SAC in drawing visitors from long distances. For example, visitors come from as far afield as Lincolnshire, Sheffield, Devon, Hampshire and Nottinghamshire, and visitors from outside Monmouthshire and Wales, make up a large proportion of the survey pool. Even excluding people on holiday to focus entirely on people 'visiting from home' still leaves a relatively large catchment of 24km. This indicates that the Wye Valley Woodlands SAC has a regional, not to say national, draw rather than a local one. In contrast, during surveys of the Severn Estuary SPA/Ramsar/SAC, 75% of visitors lived within 6.5km of the site, indicating the much greater proportion of local residents in the visitor pool. The core recreational catchment for the Wye Valley Woodlands SAC for residents of Monmouthshire (i.e. the zone within which 75% of Monmouthshire-resident visitors are found) is 7km, but it is important to remember that Monmouthshire residents make up a minority of visitors, with 71% of visitors living in other local authorities.

The data from the visitor survey strongly suggest that:

- The visitor pressure in the Wye Valley Woodlands SAC is relatively low compared to other European sites. This is relevant given that, like most sites designated for their habitats, the SAC is more resilient to recreational pressure than a site harbouring easily disturbed/displaced interest features such as Severn Estuary SPA/Ramsar.
- The visitor profile is dominated by residents of other local authorities, some very far afield, who visit site infrequently (51% of survey respondents), possibly even just once given the high percentage who are on their first visit, but who stay on site for a considerable time (3-4 hours or more).
- A total of 71% of visitors derive from local authorities other than Monmouthshire, with only 29% of visitors being Monmouthshire residents.
- This visitor profile influences the core recreational catchment, yielding a very large core catchment of 39km. Even excluding holidaymakers, the SAC still has a large core catchment of 25km, indicating that some people travel a considerable distance from home to visit Wye Valley Woodlands SAC. For example, five visitors had travelled over 30km from home to visit the SAC, including one person from Swindon, located more than 60km away.
- The large distances travelled to visit the SAC do not apply to residents of Monmouthshire, who travel an average distance of 3km to visit the SAC, with 75% of Monmouthshire-based visitors living within 7km.

Given these data it is considered that visitor pressure within the SAC is limited, is a regional or national issue, and will not be heavily affected by housing and population growth within Monmouthshire. As such, no mitigation strategy for the Local Plan is required and a conclusion of no adverse effect on integrity is reached. The foregoing assessment inherently takes account of growth in Monmouthshire in combination with growth elsewhere in the recreational catchment of the SAC.

5.3 Loss of Functionally Linked Land

5.3.1 Usk Bat Sites SAC & Wye Valley and Forest of Dean Bat Sites SAC

Given that both SACs are designated for similar species and that the impact mechanisms relating to the Monmouthshire LP are the same, the Appropriate Assessment of the two sites is combined in the following. The concept of functionally linked land addresses that mobile qualifying species, such as the lesser horseshoe bat (qualifying species of both the Usk Bat Sites SAC and the Wye Valley and Forest of Dean SAC) and the greater horseshoe bat (qualifying species of the latter SAC only), are not only dependent on the designated European sites, but also on habitat features (e.g. commuting corridors, foraging sites) that are not part of the formal site designation. The highly mobile nature of bats implies that areas of habitat of crucial importance to the maintenance of their populations, for example linear features such as hedgerows that are used as flightlines, are located outside the physical limits of Habitats Sites.

The same also applies to suitable foraging habitat and loss of seasonal roosts. These can be affected directly by removal, or effectively rendered unsuitable by inappropriate lighting. Such functionally linked land is considered to be important for maintaining the integrity of bat populations within SACs. Both SACs lie partly within Monmouthshire and the LP might therefore result in land parcels that are functionally linked to these European sites. The Usk Bat Sites SAC is located partly within the north-western section of Monmouthshire and The Wye Valley and Forest of Dean Bat Sites SAC comprises several component parts in the eastern section of Monmouthshire.

To assess the impact pathway loss of functionally linked land, an assessment of the behaviour and habitat requirements of bats is required in the first instance. Most bats are likely to use natural linear landscape features (e.g. hedges and treelines) to navigate and open areas of grassland for foraging. Therefore, it is generally the allocation of greenfield sites for development, which is expected to have the largest impact on lesser and greater horseshoe bat populations. Developing greenfield sites is likely to mean that such features are lost, (or effectively loss such as through inappropriate lighting) resulting in the loss of functionally linked land parcels. Conversely, redeveloping existing brownfield sites is likely to be less damaging because these are generally presumed to have a lower ecological value to the bats. However, it is to be noted that bats also use man-made habitat features to roost and / or navigate. Therefore, even the conversion of a brownfield site could mean that functionally linked land is lost. The Monmouthshire LP currently allocates primarily greenfield sites, which are likely to be most suitable as functionally linked land.

The linear landscape features and grassland used by bats for navigating, commuting and foraging provide an adequate starting point for an assessment of functionally linked land. Review of online satellite imagery indicates that there are various areas with suitable bat off-site supporting habitat in the vicinity of new development. The following provides a brief overview of some of these. For example, the area to the north of the A465 (Heads of the Valley Road) and the south of the settlement of Clydach, comprises open habitat with streams, treelines and semi-improved grassland; and this habitat might be used by lesser horseshoe bats stemming from the nearby Usk Bat Sites SAC. Furthermore, two component parcels of the Wye Valley and Forest of Dean Bat Sites SAC lie relatively close to the development around Monmouth. The Newton Court Stable Block, SSSI component of the SAC, is in an area of tree- and hedge-lined fields, adjacent to Mally Brook and the River Wye. Given that the designation here only covers the stables, it is certain that the bats will be using some of these habitat features, which are not part of the designation. Equally, the Wye Valley Lesser Horseshoe Bat Site (another SSSI component) also lies adjacent to fields with linear habitat features and the River Wye. The lesser horseshoe bats are likely to utilise some of these features for commuting and / or foraging.

Further scientific evidence relating to the use of functionally linked land is provided by the Bat Conservation Trust's Core Sustainance Zones (CSZs)¹⁴⁵, within which habitat preservation will have a significant influence on the conservation status of a bat species. The CSZs are calculated by

¹⁴⁵ Research published by the Bat Conservation Trust. 2016. Core Sustainance Zones: Determining zone size. Available at: https://cdn.bats.org.uk/pdf/Resources/Core_Sustainance_Zones_Explained_04.02.16.pdf?mtime=20190219173135 [Accessed on the 04/11/2019]

averaging the mean-maximum foraging radii across all studies reporting this metric, weighted by the number of bats tracked in the study. The weighted average is then rounded to the nearest kilometre to reflect the level of precision in the bat tracking. According to the Trust, lesser horseshoe bats have a CSZ of 2km, while greater horseshoe bats have a CSZ of 3km. Given the scientific knowledge on CSZs, this impact pathway will only have to be reassessed further, if development is allocated within a 2km buffer zone of the Usk Bat Sites SAC and / or within a 3km buffer zone of the Wye Valley and Forest of Dean Bat Sites SAC. Any development sites within these buffers will require further assessment regarding their suitability for and usage by the lesser and greater horseshoe bat.

Note that the use of a 2km and 3km CSZ for the bat SACs in this assessment does not mean that bats from these SACs will not travel more widely across the countryside. Rather, it is intended to identify those allocations where the risk of an adverse effect on SAC bats is particularly high (in the absence of detailed mitigation) given the presence of suitable habitat. Since lesser and greater horseshoe bats are legally protected species wherever they roost, and thus material considerations in the planning process, any site identified to be used by these species of bat will require further assessment and potentially mitigation for any planning application, irrespective of distance from these SACs.

No sites have been allocated by the local plan within the CSZ of Usk Bat Sites SAC. Table 7 details the sites that have been allocated within the CSZ of the Wye Valley and Forest of Dean Bat Sites SAC.

Table 7. Local Plan Allocations within 3km of Wye Valley and Forest of Dean Bat Sites SAC

Policy	Settlement	Site_Name	Units	areaha
HA8	Monmouth	Land at Tudor Road, Wyesham, Monmouth	50	2.1
EA1b	Monmouth	Poultry Units, Rockfield Road, Monmouth	N/A	1.3
HA4	Monmouth	Land at Leasbrook, Monmouth	270	11
HA13	St Arvans	Land adjacent to Piercefield Public House, St Arvans	16	1.1
HA18	Shirenewton	Land west of Redd Landes, Shirenewton	26	1.76

With the exception of the existing poultry units at Monmouth, which are industrial agricultural, and the existing industrial/employment sites in Chepstow, these appear to be greenfield sites and potentially of use to SAC bats. Moreover, there was a lesser horseshoe roost at the poultry units identified during surveys for a planning application (DM/2018/02026) for the site confirming that this site is used by bats potentially linked to the SAC.

It is recommended that the following text (or similar) is inserted into a suitable policy in the next iteration of the LP: ***'To meet the requirements of the Habitats Directive regarding allocated greenfield sites within the Core Sustainance Zones (CSZs) of the Usk Bat Sites SAC and the Wye Valley and Forest of Dean Bat Sites SAC, the applicant is required to provide evidence that the development will not result in adverse effects on site integrity. To achieve this, a habitat assessment will have to be undertaken by a suitably qualified professional. Where habitats are suitable, a suite of bat surveys (e.g. bat activity surveys, roost emergence surveys) will need to be undertaken between April and September. Where a land parcel is demonstrably used by SAC bats, mitigation and avoidance measures might be required, and the planning application will likely need to be assessed through a project-level Habitats Regulations Assessment and will need to consider matters such as habitat connectivity, foraging value and minimised lighting.'***

This would not only apply to development that is specifically allocated within the Local Plan but would also apply to development that would come forward for planning consent (including the potential solar

farm identified in Policy CC2) but is not specifically allocated, such as renewable energy development (wind turbines if such were to come forward in response to Policy CC3).

With regard to this recommendation Monmouthshire Council expressed concern as to whether the extent of the suggested wording is needed as it is too prescriptive. Instead, the Deposit Plan addresses these recommendations by providing less prescriptive form of wording in Policy NR1 – Nature Recovery and Geodiversity and its supporting text in paragraphs 11.10.2 – 11.10.8 under the heading International/National (Statutory) Sites and Protected Sites and Species with specific reference to Functionally Linked Land in paragraph 11.10.5, but without providing specific details of the need for bat surveys, survey seasons and the potential need for mitigation. Policy LC5 – Dark Skies and Lighting, offers further policy requirements in relation to external lighting and potential impacts on biodiversity and ecology. Strategic Policy S8 – Site Allocation Placemaking Principles also covers dark corridors as well as requirements in the site-specific allocation policies where relevant, for example Policy HA4 – Land at Leasbrook, Monmouth. Further specific requirements can be set out in Supplementary Planning Guidance.

The recommendation was made to provide guidance to developers over the specific issue and investigations that would need to undertake. However, it is recognised that the inclusion of further details in guidance such as Supplementary Planning Guidance or by reference to this HRA report would provide advice to developers regarding the steps needed to investigate this specific issue of functionally-linked land for bats, without being too specific in policy, given that functionally linked land is a consideration for other European sites such as Severn Estuary SPA/Ramsar, and bat surveys at periods other than April to September may sometimes be required. It is therefore considered that the policy in the Local Plan does provide a sufficient policy framework to ensure no adverse effects on the integrity of European sites will arise.

5.3.1.1 In-Combination Assessment

Authorities adjacent to Monmouthshire, including Powys and Blaenau Gwent (both authorities that encompass components of the Usk Bat Sites SAC) and Forest of Dean (containing components of Wye Valley & Forest of Dean Bat Sites SAC) also have potential to impact functionally linked land associated with the SAC using the same Core Sustainment Zones as in this HRA. However, given the implementation of the recommendations in the preceding section it is considered that the implementation of the Monmouthshire RLDP would not result in adverse effects on the integrity of the Usk Bat Sites SAC or Wye Valley & Forest of Dean Bat Sites SAC, in-combination with development Plans in surrounding authorities.

5.3.2 Severn Estuary SPA / Ramsar

Generally, it is to be noted that the Severn Estuary SPA / Ramsar covers most of the habitat that is used by its qualifying bird species, including the wet coastal grazing marsh, improved grassland and open standing water. However, some of its more mobile waterfowl and wader species, most notably the Bewick's swan and the white-fronted goose, might be expected to move the longest distance beyond the site boundary. The Natural England Advice Note¹⁴⁶ identifies that '*some species will also use areas of land and coastal waters outside the boundaries of both the European Marine Site, SPA and Ramsar site. Relevant authorities need to have regard to such adjacent interests, as they might be affected by activities taking place within, or adjacent to the European Marine Site.*' Effectively, this statement highlights that regarding the Severn Estuary SPA / Ramsar, due consideration must be given to the loss of functionally linked land.

Bewick's swans feed on several species of soft meadow grasses, including *Agrostis stolonifera* and *Alopecurus geniculatus* that are component species of wet meadows. Some of such habitat features might be located outside the European site. The distance travelled to foraging grounds beyond the boundary of the SPA / Ramsar is likely to depend on the time of year, resource conditions within the SPA / Ramsar and interspecific competition. Due to a combination of these factors, Bewick's swans

¹⁴⁶ Published by Natural Resources Wales and Natural England. Available at:
<https://naturalresources.wales/media/673887/severn-estuary-sac-spa-and-ramsar-reg-33-advice-from-ne-and-ccw-june-09.pdf>
[Accessed on the 05/11/2019]

partially forage in fields at relatively great distances from their roosting locations. A study in the Netherlands determined that Bewick's swans foraged in arable fields 7.1km away from their roosts¹⁴⁷.

A review of satellite imagery of the growth area of Severnside, shows an extensive network of drainage ditches to the north of the SPA / Ramsar, in proximity to the M4 motorway. The land around Chepstow also comprises a combination of wet grassland and arable fields, with the potential to act as supporting habitat to the SPA / Ramsar. However, given that the distance to the SPA / Ramsar is further, a potential for the M48 to act as a barrier and the more built-up nature of the wider area, its general suitability is considered to be slightly lower than the Severnside area. It is less likely that birds from the SPA's / Ramsar's intertidal zones would traverse the motorways and the River Wye to settle on fields around Chepstow. In other areas (e.g. Merseyside) SPA birds travel considerable distances inland to roost or feed, but that is most likely because the immediate coastal zone is heavily urbanised. Given that southern Monmouthshire is less built up, it is expected that the birds will fly the shortest possible distance to find suitable feeding grounds. However, in the absence of bird monitoring data for the arable fields in question, it remains a possibility that the birds are using greenfield sites in the vicinity of Chepstow.

The Severn Estuary SPA/Ramsar is designated for its large population of waterfowl and waders generally, and for its specific populations of non-breeding Bewick's swan, white-fronted goose, dunlin, redshank, shelduck, gadwall, ringed plover, curlew and pintail. To aid consideration of functionally-linked land issues Natural England has produced unpublished guidance (there is no Natural Resources Wales equivalent). This guidance groups birds by their maximum foraging distance. According to this guidance most waterfowl and waders remain within 2km of their core roost areas (i.e. the SPA/Ramsar site) when foraging. Of those species for which Severn Estuary SPA/Ramsar is designated the exceptions are Bewick's swan and white-fronted goose which forage up to 10km from their core roost sites. The same Natural England guidance considers that residential development could have an adverse effect on these two species if it resulted in loss of functionally-linked land up to 5km from the core roost areas (the SPA/Ramsar).

The following sites in Table 9 were identified as being of sufficient size and proximity to the SPA and Ramsar to be utilised by SPA birds.

Table 8. Local Plan sites over 2ha and within 5km of Severn Estuary SPA/Ramsar

Policy	Settlement	Site Name	Units	Area ha
HA3	Chepstow	Land at Mounton Road, Chepstow	146	12.8
HA2/EA1m	Severnside	Land to the East of Caldicot	770	64
HA9/EA1l	Severnside	Land at Former MOD land, Caerwent	40	4.2
EA1d/W3c	Chepstow	Newhouse Farm, Chepstow	N/A	2
EA1f/W3d	Magor	Quay Point, Magor	N/A	14
EA1g	Undy	Rockfield Farm, Undy	N/A	3.2
EA1h/W3e	Magor	Gwent Euro Park, Magor	N/A	7
EA1/W3f	Caldicot	Land adjoining Oak Grove Farm, Caldicot	N/A	6

These sites were all identified as greenfield sites, although without further survey the level of suitability is difficult to assess. These are generally the parameters that are used for the identification of potential functionally linked land.

¹⁴⁷ Nolet B.A., Bevan R.M., Klaassen M., Langevoord O. & van der Heijden Y.G.J.T. 2002. Habitat switching by Bewick's swans: Maximisation of average long-term energy gain? *Journal of Animal Ecology* 71: 979-993.

In addition to the size of the candidate sites and distance of the candidate sites from the Severn Estuary, the Monmouthshire Council ecologists reviewed Preliminary Environmental Appraisals where available and undertook a desk study to determine whether housing sites should be considered (during plan preparation / application preparation) for potential use by overwintering birds. This formed part of the proforma preparation for candidate sites. Of the sites listed in Table 9 many were determined to be unsuitable with the exception of the Caldicot site HA2 due to habitats present, disturbance levels, agricultural practices. This assessment also applies to site EA1/W3f, which has been considered to have potential for overwintering birds. Other sites considered to be suitable are Gwent Europark and Quay Point.

Given that the area north of the SPA / Ramsar contains habitat of sufficient size and several parcels were deemed suitable as functionally-linked land, it was recommended as part of the Preferred Strategy HRA that the following text (or similar) was inserted into an appropriate policy of the Deposit Plan: ***'To meet the requirements of the Habitats Directive, the applicant should be required to provide evidence that the development will not result in adverse effects on the integrity of the Severn Estuary SPA / Ramsar regarding its qualifying bird species. To demonstrate this, a survey will be required to determine the habitats and current site use to verify if the land parcel is indeed suitable for supporting a significant population¹⁴⁸ of designated bird species. Where habitats are suitable, non-breeding bird surveys will be required to determine if the site and neighbouring land constitute a significant area of supporting habitat. Bird surveys will need to be undertaken during autumn, winter and spring. If habitat within the site or adjacent land are identified to support significant populations of designated bird species, avoidance measures and mitigation will be required, and the planning application will likely need to be assessed through a project specific Habitats Regulations Assessment to ensure that the development does not result in adverse effects on integrity.'***

With regard to this recommendation, Monmouthshire Council expressed concern as to whether the extent of the suggested wording is needed as it is too prescriptive. Instead, the Deposit Plan addresses these recommendations by providing a less prescriptive form of wording in Policy NR1 – Nature Recovery and Geodiversity and its supporting text in paragraphs 11.10.2 – 11.10.8 under the heading International/National (Statutory) Sites and Protected Sites and Species. Site specific allocation policies also set out policy requirements, such as for Policy HA2 – Land to the East of Caldicot.

The recommendation was made to provide guidance to developers over the specific issue and investigations that would need to undertake. However, it is recognised that the inclusion of further details in development application specific consultations, or by reference to this HRA report, would provide advice to developers regarding the steps needed to investigate this specific issue of functionally-linked land for birds, without being too specific in policy, given that functionally linked land is a consideration for other European sites such as Usk Bat Sites SAC. It is therefore considered that the policy in the Local Plan does provide a sufficient policy framework to ensure no adverse effects on the integrity of European sites will arise.

5.3.2.1 In-Combination Assessment

In addition to growth within Monmouthshire, new dwellings are currently planned within 5km of the SPA and Ramsar site in Cardiff, Torfaen, North Somerset, South Gloucestershire, Bristol, Stroud District, Forest of Dean District, and the Somerset Council area (previously including Sedgemoor, Somerset West & Taunton, and other districts). However, the implementation of the recommendations in the preceding section would address Monmouthshire LDPs contribution to any in combination effect.

5.4 Water Quality

5.4.1 River Usk SAC & River Wye SAC

Due to the similar ecological nature and qualifying features of the River Usk SAC and the River Wye SAC, this section combines the Appropriate Assessment for both sites.

¹⁴⁸ A significant population is classified as a site that regularly used by 1% or more of the population of qualifying bird species

Both SACs are designated for a variety of features that are dependent on water quality. For example, the *Ranunculus fluitans* and *Callitriche-Batrachion* vegetation elements are highly dependent on good water quality status. Under high nutrient conditions, the growth of algae and the risk of eutrophication increases. In turn the excessive growth of epiphytic algae is likely to suppress the flowering of aquatic plants. However, unfavourable water quality status will also affect the fish species that the sites are designated for. For example, both sea and brook lampreys require clear, well-oxygenated water for spawning, and eutrophication associated with domestic sewage effluent will reduce their spawning success. Atlantic salmon also need high water quality, particularly high dissolved oxygen levels, for survival. Maintaining the good chemical status within the rivers is therefore integral to protecting their integrity.

The River Usk rises on the northern slopes of the Black Mountain and flows 125km in a south-easterly direction through the towns of Brecon, Crickhowell, Abergavenny and Usk, before discharging into the Severn estuary at Newbridge. The SAC comprises a long narrow catchment, partly owed to the surrounding rugged terrain that receives inflow from various tributaries. The Environment Agency (EA) river catchment data explorer highlights that the north-western part of Monmouthshire (for example the area surrounding Abergavenny) lies in the River Usk catchment¹⁴⁹. The developments allocated in the Monmouthshire LP will result in the increased production of wastewater in this part of Monmouthshire. It is expected that new housing in the western part of Monmouthshire will be served by local Wastewater Treatment Works, such as the one just south of Abergavenny. Any WwTWs in this area of Monmouthshire will discharge treated sewage effluent directly into the River Usk SAC, or in tributaries feeding it. As such, there is a clear linking impact pathway between the new development in Abergavenny and the SAC.

The Lower Wye flows from Glasbury in Wales south through Herefordshire, Monmouthshire, Gloucestershire and then joins the Severn Estuary near Chepstow. The surrounding area is primarily rural with mixed agricultural land use, including livestock, arable and horticulture. As identified in the EA catchment explorer development within the vicinity of Monmouth and Chepstow may lie within the operational catchment of the River Wye. Therefore, it is likely that sewage treated near these settlements will be discharged into the River Wye SAC. As for the River Usk SAC, there is therefore a clear linking impact pathway between Monmouth and Chepstow, and the River Wye SAC.

The Core Management Plans for both SACs indicate that the most significant source of water pollution is agriculture, including the input of fertiliser run-off, livestock manure, silage effluent and soil erosion from ploughed land. However, they also highlight that discharges from sewage treatment works, urban drainage systems and other urban sources are also significant sources of aquatic pollution and require consideration. To assess the likely impacts of sewage discharge on the SAC, it is important in establishing the rivers' current performance in relation to the Environment Agency's current water quality standards. For example, targets of 0.06 mg/l for phosphorus and 80% saturation for dissolved oxygen have been set for the River Usk SAC, to protect the integrity of the site. For the River Wye SAC, the site's Conservation Objectives Supplementary Advice Note states that dissolved oxygen should be at 85% saturation, the mean biological oxygen demand at 1.5 mg/l and the total ammonia 0.25 NH₃-N mg/l¹⁵⁰. The Usk catchment management summary¹⁵¹ highlights that out of 45 river water bodies, eight fail to achieve good chemical status due to pollution from sewage and waste water. A particular cause of concern is the Llwyd operational catchment, a sub-catchment of the Usk, where four of the five water bodies fail to reach their water quality target. In the River Wye SAC, the water industry (including wastewater) is cited as being responsible in 11 instances for water bodies in the Wye catchment not achieving good chemical status¹⁵².

In Wales, the water quality of rivers is protected through the Review of Consents process agreed upon by the Environment Agency Wales (now Natural Resources Wales). This sets out the volume of sewage effluent that can be discharged into local watercourses by WwTWs, including thresholds for the discharge of phosphate, nitrogen, dissolved oxygen, biological oxygen demand and ammonia. WwTWs have a permitted headroom, based on their ability to process additional sewage effluent whilst remaining within the consented volume of discharge and water chemistry thresholds. While

¹⁴⁹ <https://environment.data.gov.uk/catchment-planning/ManagementCatchment/3107>

¹⁵⁰ <http://publications.naturalengland.org.uk/publication/6096799802589184>

¹⁵¹ Published by Natural Resources Wales. Available at: <https://naturalresources.wales/media/3214/usk-management-catchment.pdf>

¹⁵² Published by the Environment Agency Wales. Available at: <https://environment.data.gov.uk/catchment-planning/OperationalCatchment/3549/Summary>

these discharge consents typically consider the requirements of designated SAC features (implying that remaining within the permitted headroom would not lead to adverse effects on site integrity), there is new evidence that the existing WwTWs technology, sewer infrastructure and discharge consents are insufficient to protect SAC water quality.

For example, data on the Environment Agency Catchment Data Explorer indicate that various stretches of the River Wye SAC are failing the Water Framework Directive (WFD) target of good ecological status, partially fuelled by elevated phosphorus concentrations. Furthermore, the sewerage network feeding relevant WwTWs have not been upgraded to accommodate further growth. Combined sewers are designed to collect rainwater runoff, domestic sewage and industrial wastewater in the same pipe. In periods of heavy rainfall, their capacity can be exceeded, and these systems are designed to discharge untreated sewage directly to the environment (a process known as Combined Sewer Overflows; CSOs). CSOs are an existing issue in several waterbodies, including the Gavenny (in Abergavenny), Clydach and Llwyd. Other sources (e.g. agriculture, private Package Treatment Plants; PTPs) contribute additional phosphorus to the hydrological catchments of the two SACs. Elevated phosphorus concentrations within the River Usk SAC and River Wye SAC have been directly linked to negative changes in their ecosystems. High levels of algae have been recorded in both SAC rivers in summer 2021, coinciding with peak phosphorus concentrations (due to the combined input from agricultural and domestic sources).

Due to the increasing concern about high phosphorus concentrations in both riverine systems, Natural Resources Wales and Natural England have recently advised that development plans should not result in a net increase in phosphorus levels, a concept known as nutrient neutrality. Where developments do not achieve nutrient neutrality, mitigation measures are required to offset any increased phosphorus input. Natural Resources Wales provides detailed guidance on nutrient neutrality on their website¹⁵³. Specifically, all new housing or development that leads to a temporary increase in the local population (e.g. self-service and serviced tourism accommodation) within the identified nutrient-sensitive areas is likely to increase phosphorus concentrations within the SAC rivers. While agricultural businesses (e.g. pig, poultry farms and organic manure developments / slurries) are a major source of nutrients, they are not typically allocated in Local Development Plans (LDPs) and, therefore, are excluded from further consideration on this HRA. Private sewage treatment systems (or PTPs) are deployed where it is unfeasible to connect new housing to the sewerage network and fall within the remit of LDPs.

Natural Resources Wales is currently undertaking a review of existing phosphorus discharge permits against the revised phosphorus targets, which is likely to result in lowered permits for some WwTWs. For residential developments that will connect to WwTWs which have been reviewed in context of the revised Conservation Objectives and where headroom is available to accommodate this additional wastewater, a conclusion of no adverse effects on site integrity can be drawn. Development proposals for which this is the case should be supported by a formal response from the sewerage undertaker, confirming the following:

- Headroom is available to treat additional wastewater from the development within the revised environmental permits (where applicable); and
- Headroom availability is guaranteed to be delivered in the agreed Asset Management Plan (AMP) period.

There is also additional information on the Council website¹⁵⁴. A proposed development within a Phosphate sensitive area will need to ensure that it complies with the Planning Guidance from Natural Resources Wales (Version 3) referenced earlier. Head of planning on the SAC River Planning all Wales working group is reviewing the implications of NRW planning guidance and to try and work collaboratively to find solutions to the issue and allow development proposals. This working group is attended by NRW, Dwr Cymru Welsh Water, Welsh Government (Planning) and Local Planning Authorities that are impacted by the development. Monmouthshire Council has been meeting with DCWW and NRW to try and enable the installation and upgrading of their sewerage treatment plans to allow phosphate stripping capability in most sustainable settlements north of the county i.e. Llanfoist and Monmouth. In order to deliver growth and support sustainable forms of development

¹⁵³ Available at: <https://naturalresources.wales/guidance-and-advice/business-sectors/planning-and-development/our-role-in-planning-and-development/advice-to-planning-authorities-for-planning-applications-affecting-phosphorus-sensitive-river-special-areas-of-conservation/?lang=en> [Accessed on the 31/10/2022]

¹⁵⁴ <https://www.monmouthshire.gov.uk/planning/water-quality/>

within the north of the county it will be necessary to upgrade the drainage infrastructure or determine ways to mitigate for the impact of development.

In the Preferred Strategy HRA no housing was allocated in Monmouth due to issues with nutrient neutrality. However, in response to that document the Welsh Government has advised Monmouthshire Council that new site allocations should be considered in Monmouth on the basis that sufficient certainty is provided by Dwr Cymru Welsh Water's (DCWW) planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025¹⁵⁵. Monmouthshire Council produced a phosphate briefing note in July 2023¹⁵⁶ which updates developers and sets out how issues with nutrients in the River Usk and Wye catchments will be addressed. Given the clear commitment from DCWW to provide phosphate mitigation at the Llanfoist and Monmouth WwTWs by 31st March 2025, the Local Planning Authority is now able to issue planning permissions within the area served by these two WwTWs, subject to a suitably worded 'Grampian condition' preventing commencement of development until 31st March 2025. This will give confidence to the development industry and unlock stalled sites while ensuring new development proposals do not have an adverse impact on water quality within the river SACs.

In relation to the other WwTWs within Monmouthshire, NRW is currently conducting a review of larger discharges (20m³ per day or above) permits and water quality to review what capacity (if any) exists to enable development proposals to come forward while ensuring betterment or neutrality of phosphate levels. This pan-Wales approach is supported by the Welsh Government. Source apportionment data shows that the majority of phosphates entering the rivers come from agricultural activity. Some of these activities, such as new intensive poultry units, require planning permission and are therefore subject to the requirement to demonstrate phosphate neutrality or betterment. There are no such proposals currently within the Monmouthshire LPA area, however there are several proposals upstream in Powys and Herefordshire. Other agricultural activity such as fertiliser spreading and muck spreading fall outside of the Council's control and are in part regulated by Natural Resources Wales (or the Environment Agency in England) and are in part unregulated. The Welsh Government is currently considering the introduction of additional controls over such activities.

In addition to recent human activity, the soil naturally contains phosphates. Together with historic fertiliser application, the river catchments contain elevated levels of 'legacy phosphates' which will take many years to reduce. These phosphates enter the rivers via both normal land drainage and, most notably, via flood events. The Welsh Government and the Council may also seek to work with farmers and other bodies to explore the potential for natural flood management solutions, which would have the combined benefits of reducing surface water flooding and reducing phosphate levels entering the rivers from surface water runoff.

5.4.1.1 Wye Nutrient Management Board, Wye Cabinet Commission, Wye Catchment Partnership and Usk Catchment Partnership

Monmouthshire County Council is a member of the Wye Nutrient Management Board, the Wye Cabinet Commission, the Wye Catchment Partnership and the Usk Catchment Partnership. These groups seek to achieve the long-term ecological sustainability within the river catchments.

The Wye Nutrient Management Board is the body responsible for ensuring the delivery of the Conservation Objectives for the River Wye Special Area of Conservation. It provides an oversight and direction to all involved in delivering the Nutrient Management Plan, with the aim of reducing phosphorus in the river. Members of the Board include Local Planning Authorities, NRW, DCWW, Natural England, Environment Agency, Construction Industry Lobby Group, representatives of the farming industry, The Wye and Usk Foundation and members of the public. The Board works together to review contributions across all organisations, working collaboratively to achieve the objectives and ensuring all members understand the issues and work together to resolve them. A technical group supports the Board to inform decision making. The Nutrient Management Action Plan is reviewed every four years to ensure it is fit for purpose.

¹⁵⁵ [Latest News - Monmouthshire.](#)

¹⁵⁶ [Phosphate Briefing Note July 2023 \(monmouthshire.gov.uk\)](#)

Monmouthshire County Council has recently joined the Wye Cabinet Commission, which comprises of local government political and officer leads from Herefordshire, Powys and Monmouthshire County Councils and Bannau Brycheiniog National Park Authority.

The Usk Catchment Partnership's aim is to develop an action-focused partnership to build back ecological resilience to the River Usk. The main contributors are Local Planning Authorities, Wye and Usk Foundation, Gwent Wildlife Trust, NRW, DCWW, farming representatives, community representatives and Cardiff Water School. The long-term aim of the partnership is to develop a Catchment Action Plan that can be adopted by all partners to deliver its actions and ensure the ecological health of the wider river catchment improves over time.

It is noted that the Monmouthshire LP already contains some broad policy wording that protects the water quality within the authority from adverse effects. Strategic Policy S4 (Climate Change) stipulates that new development should be '*Incorporating water efficiency measures and minimising adverse impacts on water resources and quality*'. Furthermore, Strategic Policy S5 (Green Infrastructure, Landscape and Nature Conservation) outlines that development proposals must '*maintain, protect and enhance the integrity and connectivity of Monmouthshire's green infrastructure, landscape and biodiversity assets through the following key functions:... iii) Biodiversity and resilient ecosystems by protecting, assessing, positively managing and enhancing biodiversity and geological interests, including designated and non-designated sites, protected and priority species and their habitats, and the ecological connectivity between them*'.

One of the key concerns whether new development can be delivered without adverse effects on European sites with aquatic habitats, is whether the appropriate WwTW infrastructure is in place. Strategic Policy S6 (Infrastructure Provision) states that '*the infrastructure needed to service and deliver sustainable development must be in place or provided in phase with proposed development. Where existing infrastructure is inadequate to serve the development, new or improved infrastructure and facilities to remedy deficiencies must be provided.*' While this would include the sewage infrastructure, this is currently not specifically mentioned.

Monmouthshire Council has confirmed that phosphate solutions have been agreed as part of a wider approach to the issue in partnership with Natural Resources Wales and Welsh Water. Natural Resources Wales has issued a new version of detailed planning guidance that has to be met satisfied in relation to both planning applications and allocations. This guidance will be considered as part of the HRA process. The RLDP allocations have been made in consultation with Welsh Water and Natural Resources Wales, having regard to headroom limits and phosphate solutions proposed Policy NR3 – Protection of Water Sources and the Water Environment sets out requirements for development which may impact upon the water environment and associated land. Given this, it is concluded that there would not be adverse effects on the site integrity of the River Usk SAC and the River Wye SAC regarding water quality.

5.4.1.2 In-Combination Assessment

It is to be noted that the evidence used to set the thresholds for aquatic parameters (e.g. dissolved oxygen, nitrogen) is derived from an in-combination approach that aims at protecting the integrity of the riverine SACs. The Natural Resources Wales (formerly Environment Agency) Review of Consents process sets wastewater discharge limits for WwTWs within Monmouthshire, while accounting for discharged effluent arising from development allocated within the Plans of adjacent authorities. The same also applies to the concept of nutrient neutrality, which emerges from the cumulative growth in all hydrologically linked authorities contributing phosphorus to the River Wye SAC and River Usk SAC. As such, the impact pathway water quality, including the phosphate neutrality issue, is by definition assessed in-combination with growth in other authorities. Furthermore, the HRAs of development plans of surrounding authorities (e.g. those of Powys, Herefordshire and Blaenau Gwent) concluded there were no adverse impacts of Plans on the river SACs (although it is noted that some of these assessments will require updating in line with the emerging nutrient neutral approach adopted for the SACs). The HRA for the Forest of Dean Local Plan¹⁵⁷ states that the River Wye is close to its phosphate targets at some monitoring points but levels are stable, with concerns being for the River Lugg upstream of the Forest of Dean Local Plan area. However, it also identifies that a precautionary approach should be taken to incombination effects with the emerging Monmouthshire

¹⁵⁷ <https://www.fdean.gov.uk/media/pd4llk1n/habitats-regulations-assessment-screening-and-appropriate-assessment-report-june-2024.pdf>

LDP at Chepstow. It is therefore concluded that, provided adequate phosphate mitigation is identified and secured, there would be no adverse effects on the site integrity of the River Usk SAC and the River Wye SAC regarding water quality, in-combination with other Plans.

5.4.2 Severn Estuary SAC

The Severn Estuary SAC is designated for several habitats and species, which are potentially sensitive to a deterioration in water quality. The estuary and the subtidal sandbanks habitats are both considered sensitive to changes in nutrient loading in principle, however due to the high turbidity of water in the SAC, algal productivity is generally low except for very localised hotspots. However, the sand- and mudflats present in the SAC are highly vulnerable to increasing nutrient loading. One consequence of increased nutrient input is the growth of green seaweeds and reduced oxygenation on the mudflats. Importantly, at high nutrient enrichment levels, species diversity declines with a modal shift to fewer, but pollution tolerant species. The Atlantic salt meadows habitat component is also highly vulnerable to nutrient enrichment. Elevated concentrations of phosphorus and, particularly, nitrogen lead to the dominance of some seaweed species with an adverse effect on glasswort and the overall structure of the sward. All additional treated sewage effluent discharge arising from development allocated in the Monmouthshire LP is likely to enter the Severn Estuary SAC, either because it is directly discharged into the SAC or because it enters indirectly, via the Rivers Usk and Wye (see previous section on the Appropriate Assessment).

The underlying mechanism through which water quality impacts of development may be ameliorated, is the process of pollutant attenuation. Importantly, catchment-scale modelling has shown that the total nitrogen and total phosphorus load within watercourses is generally attenuated within a few tens of kilometres¹⁵⁸. Another study demonstrated that 100% of the nitrogen and phosphorus loads was attenuated within a 5km section of a coastal watershed¹⁵⁹. It is to be noted that pollutant attenuation is a complex process and dependent on various site-specific conditions, but these attenuation distances nevertheless serve as a useful starting point for an Appropriate Assessment of the impact pathway water quality.

Assuming that the net new residential dwellings in Monmouth would be treated and discharged locally, the wastewater effluent would enter the River Wye approx. 32km flow distance to the north of the Severn Estuary SAC. Given the above cited distances for nutrient attenuation, it is assumed that phosphorus and nitrogen in wastewater discharge from Monmouth would effectively be inconsequential for the SAC. Similarly, development in Abergavenny is located far beyond 30km of flow distance to the north of the Severn Estuary SAC, rendering any water quality impacts immaterial for the estuary. In contrast, both Severnside and Chepstow are located within 1km flow distance of the Severn Estuary SAC. Additional development in these areas therefore has the potential to result in significant nutrient enrichment in the SAC.

However, it is considered that any adverse effects on the Severn Estuary SAC regarding water quality are addressed through the Environment Agency's (now Natural Resources Wales) Review of Consents process (see previous Appropriate Assessment on the River Usk SAC and the River Wye SAC). Given that this process considers the qualifying features of European sites, it also ensures that the permitted headroom of WWTWs does not damage the integrity of the Severn Estuary SAC. It is concluded that there would be no adverse effects of the LP on the site integrity of the Severn Estuary SAC regarding the impact pathway water quality.

5.4.2.1 In-Combination Assessment

Numerous authorities border the Severn Estuary SAC, including Newport, Forest of Dean and South Gloucestershire. Development allocated within the Plans of these authorities therefore has the potential to affect the water quality in the Severn Estuary SAC in-combination. However, as a legal requirement, HRAs have been undertaken on all these Plans, assessing in-combination effects on European sites. The HRAs have concluded that there will be no in-combination effects on the water quality in the Severn Estuary SAC. For example, the HRA of the Newport LDP concluded that the proposed schemes would have no in-combination effects on the Severn Estuary SAC due to there

¹⁵⁸ Bray E.N., Chen X. & Keller A.A. 2010. Instream attenuation of nitrogen and phosphorus in non-point source dominated streams: Hydrologic and biogeochemical controls. AGU Fall Meeting Abstracts.

¹⁵⁹ Ensign S.H., McMillan S.K., Thompson S.P. & Piehler M.F. 2006. Nitrogen and phosphorus attenuation within the stream network of a coastal, agricultural watershed. *Journal of Environmental Quality* 35: 1237-1247.

being no local waterways connecting to the SAC. Given the evidence in the relevant HRAs, it is concluded that there would be no adverse effects of the Monmouthshire LP on the site integrity of the Severn Estuary SAC regarding the impact pathway water quality in-combination with other Plans.

5.5 Water Quantity, Level and Flow

5.5.1 River Usk SAC & River Wye SAC

Due to the similar ecological nature and qualifying features of the River Usk SAC and the River Wye SAC, this section combines the Appropriate Assessment for both sites.

As highlighted in the screening section for LSEs, both SACs depend on naturally fluctuating hydrological regimes with annual fluctuations in water volume and current velocity. While a certain degree of variability is desirable, the changes in water flow and level need to remain within natural limits and in accordance with the life cycle of the SAC's qualifying features. For example, Atlantic salmon require changing water depth depending on its life stage. During the spawning and incubation periods, the water depth should be 15 – 75 cm, suitable fry habitat should be below 20 cm in depth and parr habitat between 20 – 40 cm. Major water abstractions are also likely to reduce the maximum river flows in the migratory period and on a diurnal timescale, resulting in the exposure of lamprey nests and nurse areas above the water level. Furthermore, the flow conditions are highly important in enabling anadromous fish to reach their spawning grounds and ensuring that juveniles are not washed into marine water prematurely. Overall, the natural flow regime within the SACs maintains the characteristic biotope mosaic that is necessary to maintain the biological integrity of the site. The main target for the rivers is to maintain 90% of the naturalised daily mean flow throughout the year.

An investigation into water resources, level and flow requires, in the first instance, the consideration of the available water resources in area. The available resources then need to be set into the context of the current and future exploitation rates. Based on the Environment Agency's water stress classification system, the rivers are located within a wider area of low water stress¹⁶⁰. Irrespective of this, water abstraction for domestic water supply is the most important pressure on the water volumes in both the Usk and the Wye catchments. For example, in the River Usk the public water supply accounts for 94% of the catchment's total annual abstraction¹⁶¹. This abstraction accounts for a large proportion of the potable water supply across south-east Wales and is transported across the region through an intensive system of water transport infrastructure. This water abstraction system is augmented by six public water supply impoundment reservoirs within the catchment. At low flow conditions, potentially prohibitive of abstraction, these reservoirs discharge water into the 'low flow' Usk for abstraction further downstream.

In 2019, Welsh Water, the company responsible for the potable water supply in Wales, published its final Water Resources Management Plan (WRMP) for the period between 2010 and 2050¹⁶². This was updated in 2024¹⁶³. This strategic report primarily exists to ensure that there is sufficient potable water to supply future housing growth in Wales (considering factors such as climate change) and that water abstraction is undertaken sustainably, particularly during dry periods when the impact of water abstraction is likely to be greatest. The water supply area of Dwr Cymru Welsh Water is divided into three regions (North Wales, South West Wales, South East Wales), which are further subdivided into Water Resource Zones (WRZs). Development allocated in the Monmouthshire LP would be spread between the South East Wales Conjunctive Use System (SEWCUS), the largest of the WRZs with approx. 40% of the total demand in Wales, and the Monmouth WRZ, which supplies the market town of Monmouth and the surrounding villages.

¹⁶² Dwr Cymru Welsh Water. 2019. Final Water Resources Management Plan 2019. Available at: <https://www.dwrcymru.com/en/My-Water/Water-Resources/Final-Water-Resources-Management-Plan-2019.aspx> [Accessed on the 28/08/2019]

¹⁶³ [Revised Draft Water Resources Management Plan 2024 | Dwr Cymru Welsh Water \(dwrcymru.com\)](#) [Accessed on 16/08/2024]

The potable water supply in the SEWCUS WRZ is abstracted from the downstream reaches of both the River Usk and the River Wye catchments, indicating that water supplying development in Chepstow and Abergavenny will be derived from a combination of the two SACs. The WRMP notes that there is an anticipated deficit in water resources over the local plan period and details preferred actions to be taken in order to ensure sufficient drought resilience within the system. An HRA of the works required under this plan has been conducted and has concluded that there will be no significant impacts of the WRMP on either of the SACs.

The Monmouth WRZ primarily sources its potable water from the Mayhill abstraction from the River Wye at Monmouth. Furthermore, a small spring abstraction is at Ffynnon Gaer, which supplies an area south of Monmouth. The supply-demand balance projected in the 2019 plan for the zone indicates that the reported deployable output is approx. 4.1 MI/d throughout the planning period, which exceeds the maximum demand of approx. 3.6 MI/d in 2020/21. As such, the water resources that are available exceed the demand for water supply throughout the entire LP period. The 2024 update did not highlight any deficit and highlighted that the existing system is resilient to both 1 in 200-year and 1 in 500-year droughts throughout the plan period. Overall, the WRMP covers the entire Monmouthshire LP period, and the growth allocated therein. It is therefore considered that implementation of the Plan would not negatively impact the water quantity, level and flow within the River Usk SAC and the River Wye SAC.

The Core Management Plans for the SACs, published by Natural Resources Wales, highlight the potential impact that a few major abstractions (if fully utilised) might have on flow conditions within these rivers. Due to this, the Review of Consents process has set flow targets to remove effects of this impact pathway on the qualifying fish species (for example as detailed in Annex 1 of the Core Management Plan for the River Usk SAC). This process uses recent daily mean flow data to set abstraction license conditions and hourly maximum abstraction rates to reduce human-induced diurnal flow variations. Of particular significance for the SAC features is the inclusion of hands-off flow conditions. Hands-off flow conditions mark the water threshold that is required to maintain the ecological integrity of the SAC, below which any abstraction activities must be stopped. Overall, due to the projected headroom in Monmouthshire's WRZs and the principle of Hands-off Flow, it is concluded that the Monmouthshire LP will not result in adverse effects on the integrity of the River Usk SAC and the River Wye SAC regarding the impact pathway water quantity, level and flow.

As outlined in the previous section, the Monmouthshire LP (see Policies S4 and S5) already contains some broad policy wording that protects European sites, which are reliant on water supply, from adverse effects. It is acknowledged that these policies provide some basic protection to the River Usk SAC and the River Wye SAC regarding adverse effects from the impact pathway water quantity, level and flow. However, due to the sensitivity of these SACs to water abstraction, it is recommended that specific reference to the sites and the relevant flow targets established by Natural Resources Wales is made in the supporting text to either of these policies. **The following text could be added to ensure greater protection of the rivers' flow regimes: 'Any development proposals have to ensure that there will be no adverse effects on the site integrity of the two riverine SACs, the River Usk SAC and the River Wye SAC, regarding water quantity, level and flow. In particular, development will not be permitted if it cannot be accommodated under the Review of Consents for flow in these rivers, including the maximum permissible percentage reduction from naturalised flow levels and hands-off flow conditions.'**

Monmouthshire Council have commented that this has been considered as part of the plan making process in consultation with Welsh Water in relation to allocations. Proposals coming forward via planning applications are required to satisfy detailed planning guidance published by Natural Resources Wales so a specific DM policy is not considered necessary.

5.5.1.1 In-Combination Assessment

Similar to the evidence base for the water quality impact pathway, the thresholds for abstraction licenses and hand-off flows are set according to an in-combination approach, such that the integrity of the riverine SACs is protected. As such, the impact pathway water quantity, level and flow, is by definition assessed in-combination with growth in other authorities. Abiding by these thresholds, which account for the most accurate available scientific evidence, therefore implies that there will be no adverse impacts in-combination with the growth in surrounding authorities. Furthermore, the HRAs of development plans of surrounding authorities (e.g. those of Powys and Blaenau Gwent) concluded

there were no adverse impacts of Plans on the river SACs. It is therefore concluded that there would be no adverse effects on the site integrity of the River Usk SAC and the River Wye SAC regarding water quantity, level and flow in-combination with other Plans.

5.5.2 Severn Estuary SAC

The Severn Estuary SAC includes habitats and species that are likely to be sensitive to changes in the water quantity and flow rate. The primary mechanism by which the Monmouthshire LP could affect this would be a change in the water quantity supplied by the Rivers Usk and Wye, most likely a reduction in freshwater input due to water abstraction for the public water supply of new development. For example, the estuary, and the sand- and mudflat habitats are sensitive to changes in water flow rates, which might potentially lead to sediment accretion or erosion in certain locations. Similarly, the Atlantic salt meadow components might be sensitive to a reduction in water flow rates because of the increased deposition rates of sediments in the habitat. The sensitivity of the Severn Estuary SAC also extends to its animal species, which will depend on sufficient hydrological input to migrate up the Rivers Usk and Wye. While many of the qualifying features of the SAC are sensitive to changes in salinity, this mainly relates to reduced salinity within the estuary, for example as a consequence of heavy rainfall events. There is no mechanism by which the Monmouthshire LP could trigger a reduction in the salinity of the SAC, and this is therefore not discussed further in this HRA. Changes to the water flow rate within an estuary can be associated with a multitude of further impact pathways, including substratum loss, smothering and changes in wave exposure, and often interact with coastal squeeze. However, in its current form, the Monmouthshire LP does not propose for development that might directly affect these processes in the SAC. The remainder of this section therefore addresses whether the LP might affect the water flow rate within the Severn Estuary SAC.

As discussed in detail in the Appropriate Assessment section on the River Usk and the River Wye SACs, the Monmouthshire LP will increase the water abstraction from both riverine SACs, which may affect the water flow rates in the rivers. However, Dwr Cymru's WRMP (see previous section) concludes that the water supply for Monmouthshire is in surplus for the entire planning period, indicating that the water can be supplied without an adverse effect on relevant European sites. Furthermore, the Review of Consents process undertaken in relation to the River Usk and the River Wye SACs, ensures that the flow will not deviate significantly from natural conditions. While the Review of Consents process was carried out to protect the integrity of the riverine SACs, maintaining the natural flow conditions within the Usk and the Wye will also maintain an appropriate freshwater input into the Severn Estuary SAC. In turn, this ensures that the water flow rate and the hydrological connectivity within the SAC will not adversely affect qualifying habitats (e.g. Atlantic salt meadows) or species (e.g. twaite shad, lampreys). For example, the maintenance of freshwater flow into the SAC will provide hydrological connectivity for anadromous fish species to migrate from the estuary to their upstream spawning grounds. Therefore, given that the policy wording recommended in the previous section (impact pathway water quantity, level and flow in relation to the Rivers Usk and Wye SACs), it is concluded that the Monmouthshire LP will not result in adverse effects on the integrity of the Severn Estuary SAC regarding the impact pathway water quantity, level and flow.

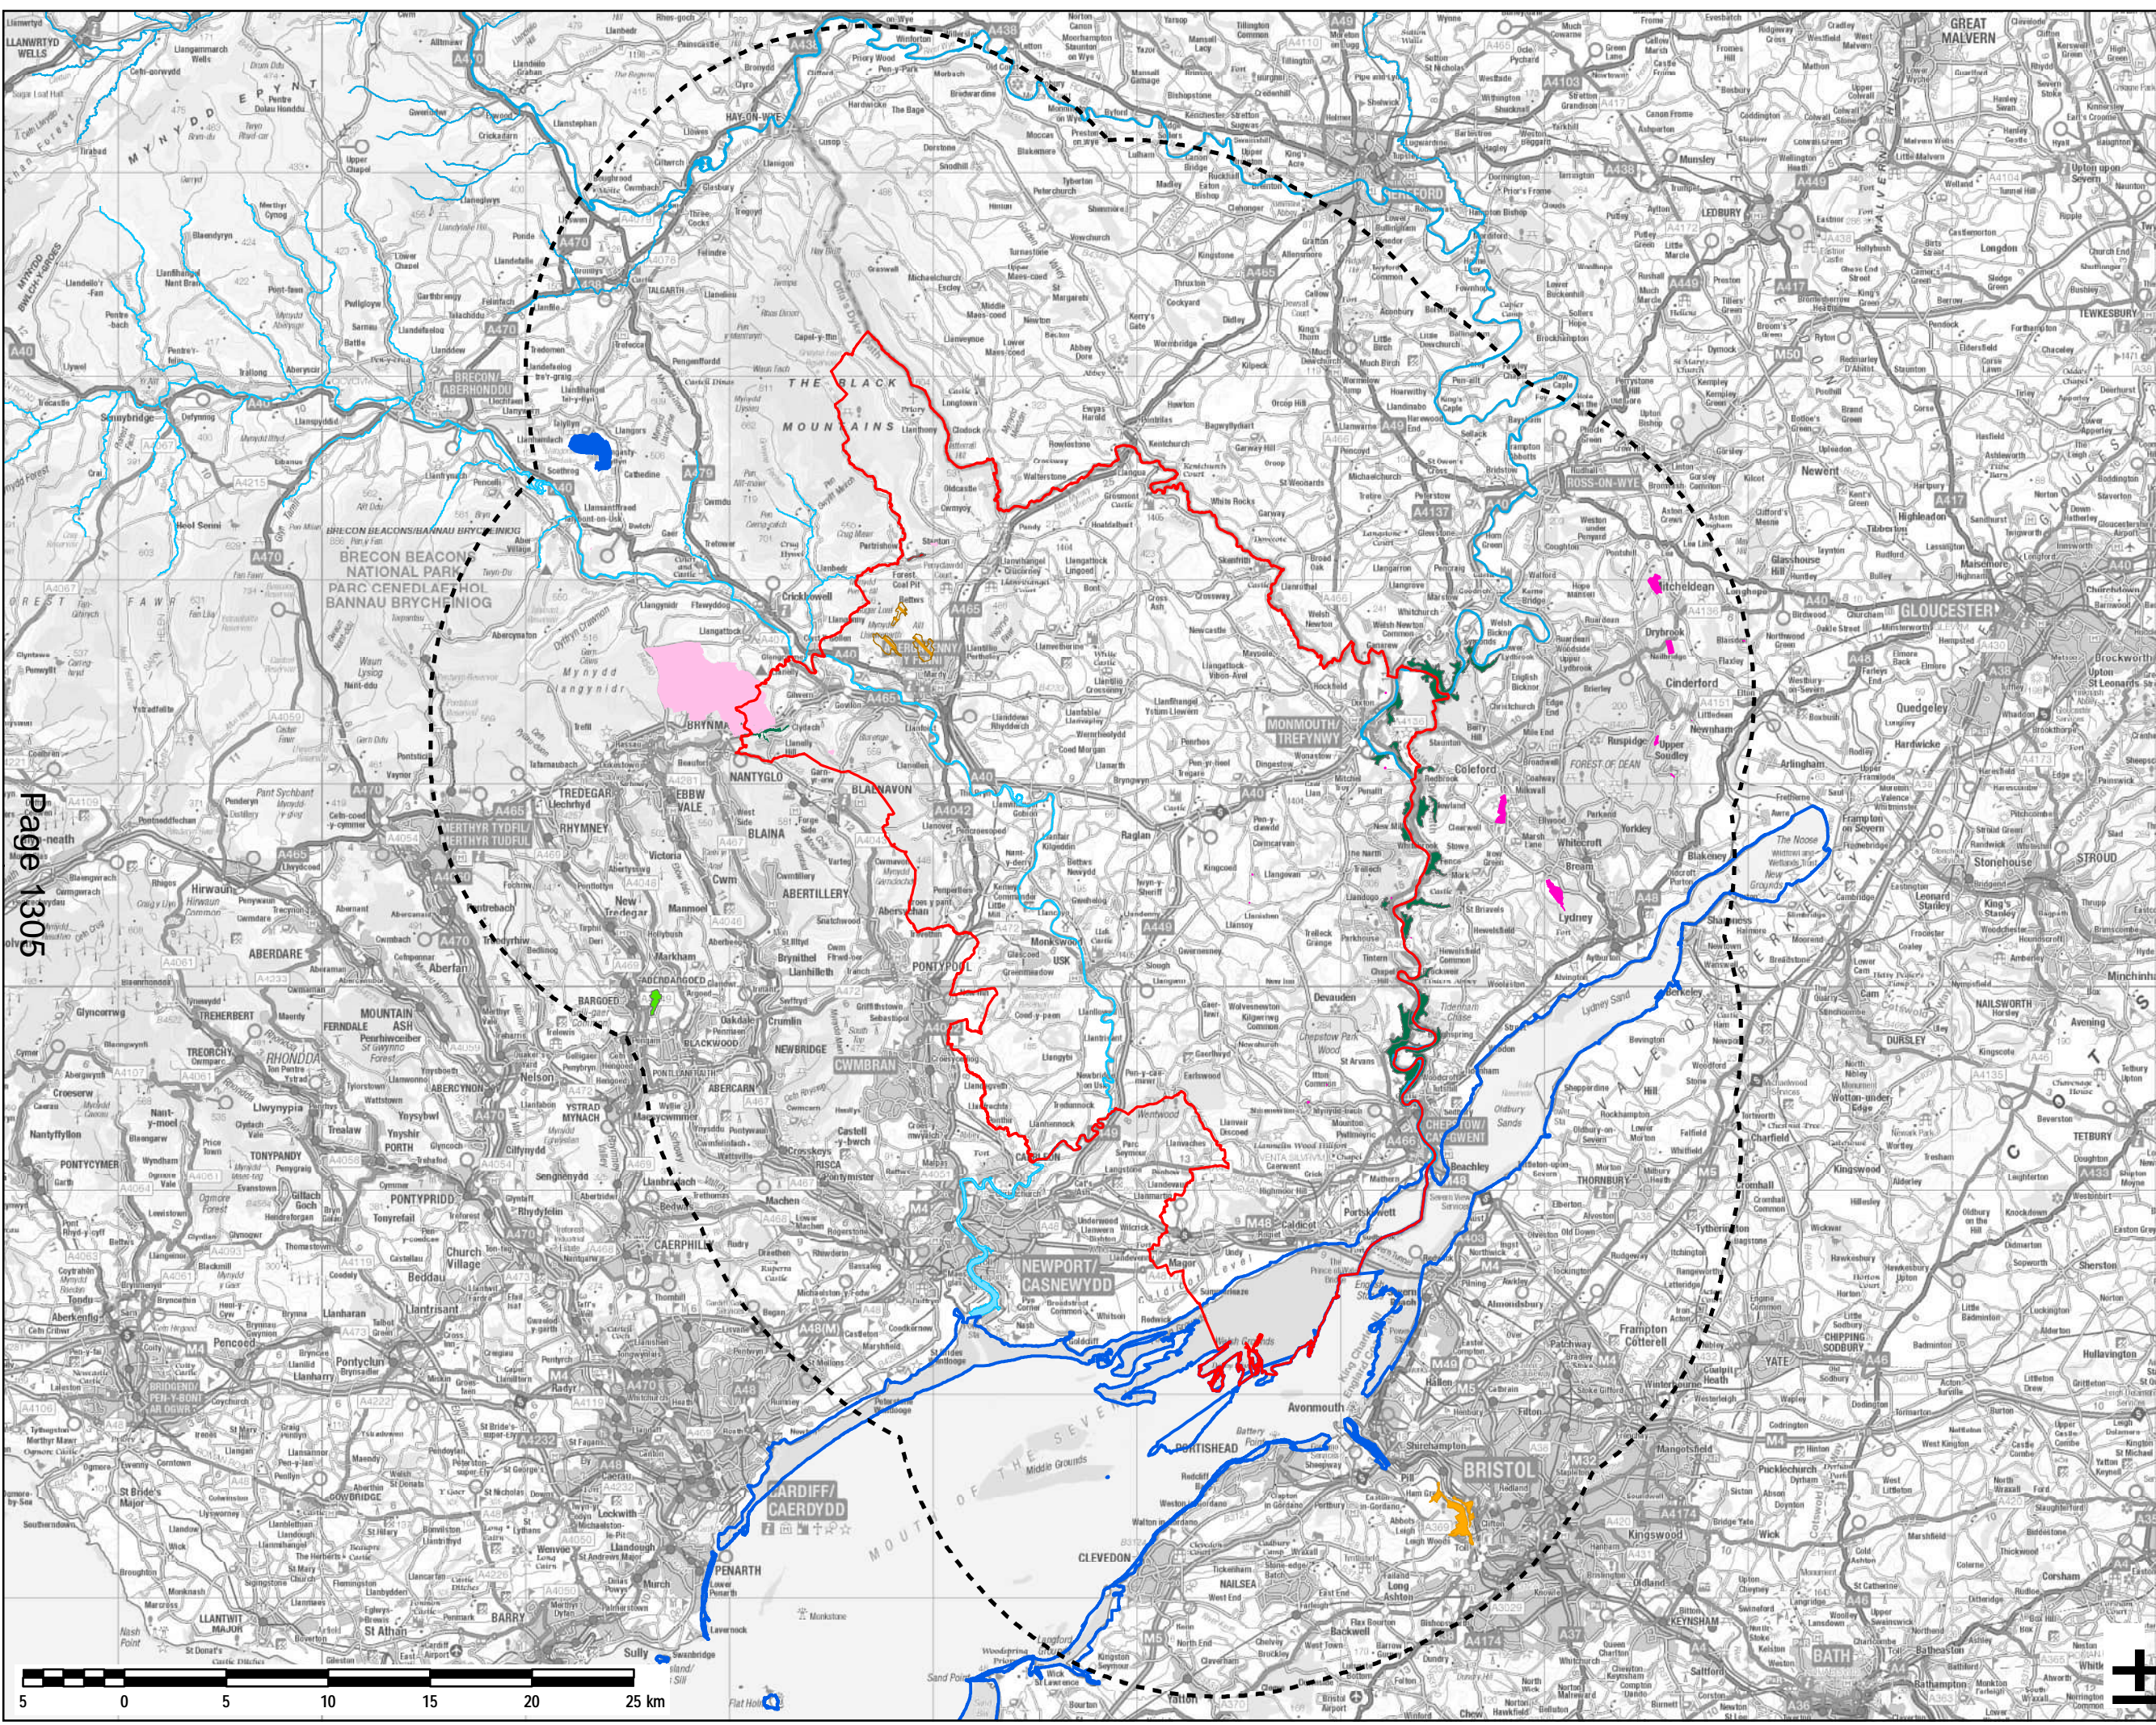

5.5.2.1 In-Combination Assessment

Numerous authorities border the Severn Estuary SAC, including Newport, Forest of Dean and South Gloucestershire. Development allocated within the Plans of these authorities therefore has the potential to affect the water quantity, level and flow in the Severn Estuary SAC in-combination. However, as a legal requirement, HRAs have been undertaken on all these Plans, assessing in-combination effects on European sites. The HRAs have concluded that there will be no in-combination effects on the water quantity, level and flow in the Severn Estuary SAC. For example, the HRA of the Newport LDP concluded that the proposed schemes would have no in-combination effects on the Severn Estuary SAC due to there being no waterways connecting to the SAC. Given the evidence in the relevant HRAs, it is concluded that there would be no adverse effects of the Monmouthshire LP on the site integrity of the Severn Estuary SAC regarding the impact pathway water quantity, level and flow in-combination with other Plans.

6. Conclusion

With the changes made to the Local Plan in response to recommendations, it is considered that the Monmouthshire Local Plan contains a sufficient policy framework that no adverse effect would arise on Habitats sites either alone or in combination with other plans or projects.

Appendix B Policy Screening Table

Policy	Text	Assessment
LP Strategic Framework		
LP Sustainable and Resilient Communities Strategy		
Strategic Policy S1 – Growth Strategy	<p>In order to meet Monmouthshire’s core purpose of building sustainable and resilient communities for all, between 2018 and 2033 the Plan will make provision for:</p> <ul style="list-style-type: none"> • 6,210* homes to meet a housing requirement of 5,400 homes. • A minimum of 38ha of employment land (Use Classes B1, B2, B8). <p>The focus of this growth will be on the County’s most sustainable settlements, as outlined in the sustainable settlement hierarchy set out in Policy S2.</p>	<p>Likely Significant Effects on European sites cannot be excluded.</p> <p>This policy identifies that a quantum of 6,210 net new homes and 38ha net new employment land will be delivered in Monmouthshire during the LP period to 2033. The growth will be focused in the county’s most sustainable settlements.</p> <p>Potential impact pathways are present:</p> <ul style="list-style-type: none"> • Atmospheric pollution • Recreational pressure • Loss of functionally linked land • Water quality • Water quantity, level and flow <p>Due to these potential linking impact pathways Strategic Policy S1 is screened in for Appropriate Assessment.</p>

Page 1307

Policy	Text					Assessment		
Strategic Policy S2 – Spatial Distribution of Development – Settlement Hierarchy	In order to deliver sustainable and resilient communities for all, the main focus for new development will be distributed based on the following settlement hierarchy:					Likely Significant Effects on European sites cannot be excluded.		
	Settlement Hierarchy		Distribution of Residential Growth*		Distribution of Employment Growth		<p>This policy identifies the settlements in which development will occur in Monmouthshire during the Plan period of 2018-2033. It also provides the quantum of residential and employment development to be delivered in each of the settlements across the county. The largest amount of residential growth is predicted for the Primary Settlements Abergavenny (22%), Chepstow (13%), Monmouth (15%) and Caldicot (35%, which includes the Severnside Area). The largest overall quantum of employment development is also forecast in the Primary Settlements.</p> <p>The quantum and location of development are key factors in determining the magnitude of negative impact pathways linking to European sites.</p> <p>Potential impact pathways are present:</p> <ul style="list-style-type: none"> • Atmospheric pollution • Recreational pressure • Loss of functionally linked land • Water quality • Water quantity, level and flow <p>Due to these potential linking impact pathways Strategic Policy S2 is screened in for Appropriate Assessment.</p>	
			Indicative % of distribution	Indicative No. of homes	% of distribution	Hectares		
	Tier 1	Primary Settlements: Abergavenny <i>(inc. Llanfoist)</i> Chepstow Monmouth <i>(inc. Wyesham)</i> Caldicot <i>(inc. Severnside Area comprising of: Caerwent, Crick, Magor Undy, Portskewett, Rogiet and Sudbrook)</i>	22%	1,362	3%	1.7ha**		
			13%	829	11%	6.4ha		
			15%	923	11%	5.84ha		
		35% across Severnside Area	2,190 across Severnside Area	66%	37.86ha			
Tier 2	Secondary Settlements: Penperlleni Raglan Usk	6% across Secondary Settlements	350 across Secondary Settlements	10%	6.05ha			
Tier 3	Main Rural Settlements: Devauden Dingestow Little Mill Llandogo Llanellen Llangybi Llanover Llanvair Discoed

Policy	Text	Assessment
	<p>Settlement boundaries will be defined for Settlement Tiers 1 – 3, within which the principle of development is considered to be acceptable, subject to detailed policy considerations set out in the RLDP.</p> <p>Within Tier 4 – Minor Rural Settlements, minor infilling between existing buildings will be considered acceptable, subject to detailed policy considerations set out in the RLDP.</p> <p>Outside of Tiers 1 – 4, open countryside policies will apply where planning permission will only be allowed for the following types of development, subject to satisfying detailed planning criteria:</p> <ul style="list-style-type: none"> • Acceptable conversions of rural buildings • Sub-division of existing dwellings • Rural Enterprise Dwellings • One Planet Development • Rural diversification and rural enterprise uses • Affordable housing exception sites adjoining settlement boundaries to meet local needs • Gypsy and Traveller Sites 	
Managing Settlement Form		
<p>Policy OC1 – New Built Development in the Open Countryside</p>	<p>There is a presumption against new built development in the open countryside, unless justified under national planning policy.</p> <p>Proposals for new built development in the open countryside will only be permitted where justified under national planning policy and all the following criteria are met:</p> <p>a) The proposal is satisfactorily assimilated into the landscape and complies with Policies LC1, G11, T1, RE3, RE4 and NR1;</p> <p>New buildings are wherever possible located within or close to existing groups of buildings;</p> <p>The development design is of a form, bulk, size, layout and scale that respects the character of the surrounding countryside; and</p> <p>The development will have no unacceptable adverse impact on landscape, historic / cultural or geological heritage, biodiversity, dark skies and local amenity value.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects the open countryside from new development, unless a range of criteria are met (such as having no adverse impacts on biodiversity and dark skies).</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy OC1 is screened out from AA.</p>

Page 1510

Policy	Text	Assessment
<p>Policy GW1 – Green Wedge Designations</p>	<p>Green Wedges have been designated in the land between the following areas, as shown on the Proposals Map.</p> <ul style="list-style-type: none"> a) Abergavenny, Llanfoist and the BBNP boundary; Chepstow, Pwllmeyric and Mathern; Portskewett and Sudbrook; Rogiet and Caldicot; Shirenewton and Mynyddbach Undy, Llanfihangel Rogiet and Rogiet. <p>There is a presumption against new built development within green wedge designations unless exceptionally justified under national planning policy.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that designates green wedges across Monmouthshire in which no new development will be permitted.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy GW1 is screened out from AA.</p>
<p>Placemaking and Design</p>		

Policy	Text	Assessment
Strategic Policy S3 – Sustainable Placemaking and High Quality Design	<p>Development will contribute to creating high quality, attractive and sustainable places that support the health and well-being of the community and respond to climate change. In order to achieve this, development must:</p> <ul style="list-style-type: none"> i. Incorporate high quality, sustainable, safe and inclusive design that offers ease of access for all and provides connectivity between uses; ii. Incorporate an appropriate mix of uses, where applicable, to minimise the need to travel and to maximise opportunities for sustainable travel; iii. Incorporate a green infrastructure-led approach that respects local distinctiveness and the character of the site and its surroundings; and iv. Protect and enhance the natural, historic and built environments and show an understanding of how these function together to contribute towards the quality of places. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that promotes high quality, attractive and sustainable places across Monmouthshire. It specifies that green infrastructure should be incorporated in new developments and the natural environment should be protected / enhanced.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Strategic Policy S3 is screened out from AA.</p>

Policy	Text	Assessment
Policy PM1 – Creating Well-Designed Places	<p>All development should be of a high-quality sustainable design and respect the local character and distinctiveness of Monmouthshire’s built, historic and natural environment. Development proposals will be required to:</p> <ul style="list-style-type: none"> a) Respect the existing form, scale, siting, height, massing, materials (including colour) and layout of its setting; <p>Ensure a safe, secure, pleasant and accessible environment for all members of the community supporting the principles of community safety and maximising opportunities for connectivity to the wider environment;</p> <p>Contribute towards a sense of place and identity whilst ensuring that the location, scale, amount, mix of use and density of development, including cumulative impact, is compatible with existing uses and its local context;</p> <p>Respect and enhance local distinctiveness and landscape character as defined through the LANDMAP process, particularly where built and natural views, panoramas or historical features are present;</p> <p>Maintain reasonable levels of privacy and amenity of occupiers of neighbouring properties, where applicable;</p> <p>Ensure that existing residential areas are protected from overdevelopment and insensitive or inappropriate infilling;</p> <p>Integrate multifunctional green and blue infrastructure and public open space within site boundaries, providing connectivity to wider networks as appropriate.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that delivers high-quality sustainable design across Monmouthshire, respecting its local character and distinctiveness. Importantly, multifunctional green and blue infrastructure with connectivity to the wider network will be integrated.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Strategic Policy PM1 is screened out from AA.</p>

Policy	Text	Assessment
Policy PM2 – Environmental Amenity	<p>Development proposals that would cause or result in a significant risk/harm to local amenity, health, the character/quality of the countryside or interests of nature conservation, landscape or built heritage importance, due to the following, will not be permitted unless it can be demonstrated that measures can be taken to overcome any significant risk:</p> <ul style="list-style-type: none"> Air pollution; Light pollution; Noise pollution; Water pollution; Contamination. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects Monmouthshire’s environmental amenity (including interests of nature conservation) from various pollution sources.</p> <p>This is positive for European sites, which are sensitive to a wide range of pollution issues listed here, including air, light, noise and water pollution. For example, protection from air pollution is essential for nitrogen-sensitive habitats / species, such as those present in the Cwm Clydach SAC.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy PM2 is screened out from AA.</p>

Policy	Text	Assessment
Policy PM3 – Advertisements	<p>Proposals for advertisements will only be permitted where:</p> <ul style="list-style-type: none"> a) Having regard to the existing number and siting of advertisements in the locality the proposal would not result in an unacceptable clutter of advertisements; <p>Existing means of support are used for signs, wherever possible;</p> <p>If located within the open countryside they would not unacceptably detract from the rural setting of the locality;</p> <p>If located in a Conservation Area, they would not unacceptably detract from the character or appearance of the area;</p> <p>If located within the open countryside or a Conservation Area, externally lit signs are only appropriate to enable signposting to uses trading outside of daylight hours;</p> <p>There would no adverse impact on public or highway safety.</p> <p>Proposals for bilingual signs and advertisements will be supported in principle, subject to detailed planning considerations.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that relates to the provision of advertisements across Monmouthshire. However, this has no relevance to the integrity of European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy PM3 is screened out from AA.</p>
Policy HE1 – Conservation Areas	<p>Development including proposals for alterations, extensions or conversions of existing buildings within Conservation Areas or their settings must preserve or enhance the character or appearance¹⁶⁴ of the Conservation Area. They must also have regard to the Conservation Area Appraisal for that area.</p> <p>Development proposals within Conservation Areas will be permitted if they meet all of the following criteria:</p> <ul style="list-style-type: none"> a) Have no adverse effect on important views into and out of the Conservation Area; <p>Have no adverse effect on important vistas within and out of the area and the character and appearance of the street scene and roovescape, townscape or landscape setting;</p> <p>Pay special attention to complementing or reflecting the special architectural qualities and distinctiveness of the Conservation Area including development pattern, profile, form, scale, mass, detailing and materials;</p> <p>Pay special attention to the setting of the development and its open areas;</p> <p>Retain, restore or reinstate historic features and details of buildings, including garden or forecourt features, boundary walls, paving etc. as appropriate.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects Conservation Areas from changes in their character and / or appearance. However, preserving Conservation Areas has no bearing on European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy HE1 is screened out from AA.</p>

Page 1315

¹⁶⁴ Section 72 of the Planning (Listed Buildings and Conservation Area) Act 1990 test refers to preserve or enhance character or appearance.

Policy	Text	Assessment
	<p>Parking and servicing arrangements associated with new uses must not detract from the character or appearance of the Conservation Area. High quality modern design may be acceptable, particularly where new compositions and points of interest are created.</p> <p>Permission will be refused where proposals are unsympathetic to an existing building and/or detract from the character or appearance of the Conservation Area.</p> <p>Specialist recording, archiving and publishing may be required prior to the demolition of any historic building within a Conservation Area and may be required in other cases of alteration.</p>	
<p>Policy HE2 – Design of Shop Fronts in Conservation Areas</p>	<p>In Conservation Areas the removal of traditional shop fronts will not be permitted.</p> <p>Improvements to non-traditional shop fronts will be permitted where they retain historic features and the proposed improvements are in character with the area. Proposals to replace modern shop fronts will be permitted where they meet the following criteria:</p> <ul style="list-style-type: none"> a) Reinstate or restore lost details which will enhance the Conservation Area; Use traditional arrangement, materials and paint colours; Integrate positively with the surrounding area, and where it replaces two or more units, respects the character of individual units; Have fascia boards and signage in keeping with the design, materials and scale of the character of the building in which they are set; and Use unobtrusive security measures such as internal shutters, toughened glass or traditional timber shutters. Do not incorporate internal illumination and any external illumination where necessary for night time trading is externally mounted and is of a scale, design and lux level appropriate to the building and shop front. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects the design of traditional shop fronts across Monmouthshire. However, preserving shop fronts has no relevance for European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy HE2 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy HE3 – Roman Town of Caerwent</p>	<p>Development within or adjacent to the walls and ditches of the Roman Town at Caerwent will only be permitted where it can be demonstrated:</p> <ul style="list-style-type: none"> a) That the archaeological remains are left undisturbed; and b) That the special character and openness of the Caerwent Conservation Area is preserved or enhanced in accordance with the Caerwent Conservation Area Appraisal. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that safeguards the Roman Town at Caerwent from development. However, this is of no relevance to European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy HE3 is screened out from AA.</p>

Policy	Text	Assessment
Climate Change		
Strategic Policy S4 – Climate Change	<p>All development proposals will be required to address the causes of, and adapt to the impacts of, climate change. Means of achieving this will include:</p> <ul style="list-style-type: none"> i. Avoiding locating development in areas at risk of flooding, or where appropriate, minimising the risk of flooding including the incorporation of measures such as Sustainable Drainage Systems (SuDs) and flood resilient design; ii. Incorporating low/zero carbon energy requirements by reducing energy demand and promoting energy efficiency through the design of buildings by prioritising fabric first and orientation design principles; iii. Supporting the development of renewable and low/zero carbon energy generation and storage and a presumption against energy generation utilising fossil fuels, fracking and methods that are not low/zero carbon; iv. Utilising sustainable construction techniques and local supplies through the adoption of the circular economy principles, where possible; v. Incorporating water efficiency measures and minimising adverse impacts on water resources and quality; vi. Using land efficiently and co-locating uses to minimise the overall need to travel and maximise opportunities for sustainable travel; vii. Providing ultra-low emission vehicles charging infrastructure to reduce emissions and improve air quality; and viii. Supporting the resilience of development through green infrastructure solutions, including opportunities for biodiversity and resilient ecosystems, greenspace provision and connectivity, and water resource management. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that requires all development proposals to address the causes of and adapt to climate change. This includes a wide range of adaptations, such as avoiding areas at risk of flooding, incorporating SuDS and water efficiency measures, providing electric vehicle charging infrastructure and others.</p> <p>Some of these measures will be beneficial to European sites that are sensitive to water quality changes, water resources and atmospheric pollution. For example, avoiding areas of flood risk and incorporating SuDS will reduce the input of pollutants to aquatic environments, as well as help limit runoff to pre-development greenfield rates.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Strategic Policy 4 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy NZ1 – Monmouthshire Net Zero Carbon Homes</p>	<p>All new build residential development will be required to demonstrate that the standards outlined below are met through the submission of an appropriate energy assessment with any planning application for a new home.</p> <p>Development proposals for new homes must demonstrate that the new home/s meets the following:</p> <ul style="list-style-type: none"> • Space heating demand less than 25KWh/m2/annum; • Evidence and achieve an energy performance rating of 'A' EPC; • Energy consumption generated by heating, hot water and lighting (regulated energy) must be generated by renewables on the dwelling or via the overall development (generated energy balance – net zero); • New homes should <u>not</u> connect to the gas grid and all heating should be provided through low carbon heating systems. No fossil fuels are to be used onsite; • Each home will have electric car charging infrastructure. <p>All developments must submit an as built performance survey following construction and prior to occupation of the home/s to demonstrate that they have been built to the standards outlined above.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that delivers net zero carbon homes across Monmouthshire. Development proposals will need to submit an appropriate energy assessment to demonstrate a range of criteria are met.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy NZ1 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy CC1 – Sustainable Drainage Systems</p>	<p>Development proposals will be expected to incorporate water management measures, including Sustainable Drainage Systems (SuDS), to reduce surface water run-off and minimise its contribution to flood risk elsewhere.</p> <p>The distribution of SuDS features across the site should be prioritised, reducing the size of any single SuDS feature.</p>	<p>..... sites.</p> <p>This is a development management policy that requires all development proposals to incorporate water management measures, such as SuDS.</p> <p>This policy will have positive impacts on European sites that are sensitive to changes in water quality and water resources. For example, incorporating SuDS will help reduce the input of pollutants to aquatic environments. Furthermore, run-off will be reduced to greenfield rates, which will limit excessive input of water to hydrologically connected European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy CC1 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy CC2 – Renewable Energy Allocation</p>	<p>Approximately 16 ha of Land at Raglan Enterprise Park, Raglan is identified as having potential for a ground mounted solar development, subject to detailed planning considerations. Opportunities for direct-access use should be fully explored and utilised as part of the proposal.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This policy identifies approx. 16ha of Land at Raglan Enterprise Park as having potential suitability for ground-mounted solar development.</p> <p>While the delivery of solar development at this site is potentially associated with impact pathways to European sites (e.g. loss of functionally linked habitat, visual / noise disturbance, water quality and others), this site is not formally allocated in the Deposit Plan. The policy only identifies potential suitability of the site for solar development.</p> <p>Any detailed planning proposal for the site would need to be subject to a project-level HRA to ensure that there are no LSEs and, where present, adverse effects on the integrity of any European sites.</p> <p>However, at the LP level, there are no impact pathways present and Policy CC2 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy CC3 – Renewable Energy Generation</p>	<p>Renewable and low carbon development proposals, inclusive of associated infrastructure, which contribute to meeting national and local renewable and low carbon energy efficiency targets will be permitted where:</p> <ul style="list-style-type: none"> a) A sequential approach to site selection has been followed to demonstrate that any reasonable alternatives have been considered; <p>Off-grid connection opportunities have been fully explored in addition to grid connection;</p> <p>There are no unacceptable cumulative impacts in combination with existing or consented development;</p> <p>There are no unacceptable adverse impacts upon the landscape, townscape and historic features and there is compliance with Policy LC1, with regard to protection and enhancement of landscape character;</p> <p>There are no unacceptable adverse impacts on biodiversity;</p> <p>There are no unacceptable adverse impacts on the amenities of nearby residents by way of noise, dust, odour or increases in traffic including construction and decommissioning stages;</p> <p>When the technology is no longer operational there is a requirement to decommission, remove the facility and complete a restoration of the site through an agreed restoration strategy;</p> <p>The wider environmental, economic, social and community benefits directly related to the scheme outweigh any potentially adverse impacts; and</p> <p>The distinct identity of Monmouthshire will not be compromised.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This policy identifies support in principle for renewable and low carbon development proposals across Monmouthshire, provided that a range of criteria are met. However, a general support of such proposals has no direct bearing on European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy CC1 is screened out from AA.</p>

Page 1322

Policy	Text	Assessment
Green Infrastructure, Landscape & Nature Recovery		
Strategic Policy S5 – Green Infrastructure, Landscape and Nature Recovery	<p>Development proposals will adopt a strategic and proactive placemaking approach. An evidence based Green Infrastructure Assessment and step wise approach will inform design and long-term delivery of a multifunctional landscape; capable of delivering a wide range of social, economic, environmental, health and well-being benefits for local communities and the County as a whole, including climate change action, net benefit for biodiversity and ecosystem resilience.</p> <p>Development proposals must:</p> <p>Maintain, protect and enhance the integrity and connectivity of Monmouthshire's green infrastructure, landscape, biodiversity, access and heritage assets through the following key functions:</p> <ol style="list-style-type: none"> i. Greenspace provision, connectivity and enjoyment by ensuring the creation of accessible multifunctional interconnected spaces and routes that offer opportunities for recreation and health and well-being; ii. Landscape setting and quality of place, by identifying, assessing, protecting and enhancing the natural and distinctive landscape, historical, cultural, ecological and geological heritage, including natural and man-made elements associated with existing landscape character; iii. Biodiversity and resilient ecosystems by protecting, assessing, positively managing and enhancing biodiversity and geological interests, including designated and non-designated sites, protected and priority species and their habitats, and the ecological connectivity between them; iv. Sustainable energy use; v. Local food production; and vi. Flood attenuation and water resource management. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that requires all proposals to adopt a proactive placemaking approach, such as by undertaking a Green Infrastructure Assessment. For example, accessible multifunctional interconnected greenspaces will need to be created to offer opportunities for recreation.</p> <p>The provision of greenspace resources is positive for European sites that are sensitive to recreational pressure, as these constitute alternative recreation destinations and absorb some of the recreational demand created by new housing locally.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Strategic Policy S5 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy GI1 – Green Infrastructure</p>	<p>Development proposals will be expected to maintain, protect and enhance the integrity and connectivity of Monmouthshire’s diverse GI network by:</p> <ul style="list-style-type: none"> a) Undertaking an appropriate GI asset and opportunities assessment and step wise approach based on the scale and complexity of development to inform development proposals. All major development proposals will be required to submit a GI Assessment. a) Ensuring that existing GI assets are protected, retained and integrated into new development. Where loss of GI is unavoidable, in order to secure sustainable development, appropriate mitigation and/or compensation of the lost assets will be required. b) Incorporating new and /or enhanced GI of an appropriate type, standard and size. Where on-site provision of GI is not possible, contributions will be sought to make appropriate provision for GI off-site. <p>A GI Statement must be provided with all planning applications. The statement will be proportionate to the scale, nature and complexity of the development proposed and will describe how GI has been incorporated into the proposal. The GI Statement will need to demonstrate how a step wise approach as outlined in chapter 6 of PPW12 has been applied.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy which ensures that planning proposals will enhance the integrity and connectivity of Monmouthshire’s green infrastructure network. For example, developments will need to incorporate new or enhanced green infrastructure, as well as provide a Green Infrastructure Statement.</p> <p>The provision of greenspace resources is positive for European sites that are sensitive to recreational pressure, as these constitute alternative recreation destinations and absorb some of the recreational demand created by new housing locally.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy GI1 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy GI2 – Trees, Woodland and Hedgerows</p>	<p>Development proposals that would adversely impact on trees, woodland and hedgerows that are either a public amenity, of cultural heritage, provide important ecosystem services, are protected, or significantly contribute to GI connectivity will not be permitted.</p> <p>Where trees, woodland and hedgerows are present, development will only be permitted where they are informed by appropriate surveys, assessment and plans to identify and inform biodiversity, GI and landscape value, methods for retention, integration, protective mitigation and long-term protection through maintenance and management.</p> <p>If removal and/or damage is necessary, a scheme for replacement trees, woodland or hedgerows must be agreed as part of the development proposal design and will be subject to the minimum planning ratios as set out in National Policy.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects trees, woodland and hedgerows from adverse impacts.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy GI2 is screened out from AA.</p>
<p>Policy LC1 – Landscape Character</p>	<p>Development proposals that would impact upon landscape character, as defined by LANDMAP, must demonstrate through a landscape assessment how landscape character has influenced their design, scale, nature and site selection.</p> <p>Development will be permitted provided it would not have an unacceptable adverse effect on the special character or quality of Monmouthshire’s landscape in terms of its visual, historic, geological, ecological or cultural aspects by:</p> <ul style="list-style-type: none"> a) Causing significant visual intrusion; b) Causing significant adverse change in the character of the built or natural landscape; c) Being insensitively and unsympathetically sited within the landscape; d) Introducing or intensifying a use which is incompatible with its location; e) Failing to harmonise with, or enhance the landform and landscape; f) Losing or failing to incorporate important traditional features, patterns, structures and layout of settlements and landscapes of both the built and natural environment; and /or g) Respecting dark skies. <p>Particular emphasis will be given to those landscapes identified through the LANDMAP Landscape Character Assessment as being of high and outstanding quality because of a certain landscape quality or combination of qualities.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that safeguards the special character and quality of Monmouthshire’s landscape. A range of criteria that proposals should satisfy are specified. While positive from a visual perspective, maintaining the wider landscape character has no direct relevance to European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy LC1 is screened out from AA.</p>

Page 1325

Policy	Text	Assessment
<p>Policy LC2 – Blaenavon Industrial Landscape World Heritage Site</p>	<p>Development within or, in the vicinity of, the Blaenavon Industrial Landscape World Heritage Site (BILWHS) will only be permitted where it would:</p> <ul style="list-style-type: none"> a) Preserve or enhance the landscape setting and character as defined through the LANDMAP process; <p>Have no serious adverse effect on significant views into and out of the World Heritage site;</p> <p>Promote the standards of design in terms of distinctiveness, siting, mass, scale and materials that are sympathetic to, preserve or enhance the character of the local area.</p> <p>Development that would cause unacceptable harm to the outstanding universal values and unique character as set out in the BILWHS Management Plan that justify the designation of the World Heritage Site, or its setting, will not be permitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects the Blaenavon Industrial Landscape World Heritage Site. However, maintaining this site has no bearing on European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy LC2 is screened out from AA.</p>
<p>Policy LC3 – Bannau Brycheiniog National Park</p>	<p>Development in the vicinity of the Bannau Brycheiniog National Park will only be permitted where it would:</p> <ul style="list-style-type: none"> a) Preserve or enhance the landscape setting, as defined through the LANDMAP process; <p>Have no serious adverse effect on significant views into and out of the National Park.</p> <p>Have no adverse impact on the International Dark Skies Reserve designation.</p> <p>Development that would cause unacceptable harm to the qualities that justify the designation of the Bannau Brycheiniog National Park or its setting will not be permitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that prevents development in the vicinity of the Bannau Brycheiniog National Park, unless certain criteria are fulfilled. However, protecting this National Park has no direct bearing on European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy LC3 is screened out from AA.</p>

Page 100

Policy	Text	Assessment
<p>Policy LC4 – Wye Valley National Landscape (AONB)</p>	<p>Within the Wye Valley National Landscape (AONB), any development must be subservient to the primary purpose to conserve and enhance the natural beauty of the area. In considering development proposals regard will be given to:</p> <ul style="list-style-type: none"> a) The long term effect of the proposal, and the degree to which its nature and intensity is compatible with the character, purpose and overall management of the National Landscape (AONB); <p>The degree to which design, quality and use of appropriate materials harmonise with the surrounding landscape and built heritage;</p> <p>The extent of the landscaping proposed;</p> <p>The need to protect features in the landscape identified as important through LANDMAP;</p> <p>The extent to which a proposed new building or use will generate additional traffic and the requirement for improvement of existing roads and lanes, including the surfacing of green lanes;</p> <p>The impact of the proposed development upon nature conservation interests.</p> <p>Development proposals that are outside the National Landscape (AONB) but would detract unacceptably from its character and setting will not be permitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that secures the natural beauty of the Wye Valley National Landscape AONB. Regard should be given to a range of factors, such as sensitive design and additional traffic. However, while protection of this AONB is generally positive, it has no direct relevance for European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy LC4 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy LC5 – Dark Skies and Lighting</p>	<p>Development proposals involving external lighting must include appropriate lighting details and where proportionate a strategy to ensure:</p> <ul style="list-style-type: none"> a) Lighting is necessary for the development; <p>The proposed lighting and associated infrastructure is the minimum required;</p> <p>Light spillage is minimised;</p> <p>The prevention of glare and respect for the amenity of neighbouring land uses;</p> <p>The visual and landscape character of the built and natural environment is not unacceptably affected;</p> <p>In open countryside locations dark skies are retained;</p> <p>Potential adverse impacts on biodiversity and ecological connectivity are minimised; and</p> <p>Cumulative and in-combination lighting impacts are avoided.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that requires planning proposals to consider lighting, such as installing a minimum of external lighting and minimising light spillage. It also specifies that adverse impacts on biodiversity should be minimised.</p> <p>This policy is particularly positive for qualifying bats from the Usk Bat Sites SAC and the Wye Valley and Forest of Dean Bat Sites SAC. Minimising potential light spillage is important for ensuring that bats can successfully move along commuting routes between roosts and foraging areas.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy LC5 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy NR1 – Nature Recovery and Geodiversity</p>	<p>Where biodiversity or ecosystem resilience could be impacted by a development proposal, applications must be accompanied by an ecological survey and assessment of the likely impact of the proposal on locally designated site(s) and functionally linked land, species or habitat(s) and shall make appropriate provision for their safeguarding and delivery of net benefit for biodiversity.</p> <p>Development proposals in sites containing protected species or habitats which are defined as irreplaceable by PPW12 are unacceptable.</p> <p>Development proposals that are likely to damage a locally designated site of biodiversity and / or geological importance, or a site that satisfies the relevant designation criteria, or the continued viability of priority habitats and species, or Section 7 list of species and habitats, will only be permitted where:</p> <ul style="list-style-type: none"> a) The need for the development clearly outweighs the biodiversity, ecosystem resilience or geological importance of the site; and <p>It can be demonstrated that the development cannot reasonably be located elsewhere.</p> <p>Where development addresses criteria a) and b), it will be expected that any unavoidable harm is minimised by effective avoidance measures and mitigation. Where this is not feasible, appropriate provision for compensatory habitats and features of equal or greater quality and quantity must be provided on-site and where not possible, off-site. Where appropriate, long-term management and maintenance of biodiversity must be secured.</p> <p>Development proposals must deliver net benefit for biodiversity and ecosystem resilience and will be expected to:</p> <ul style="list-style-type: none"> Maintain, incorporate, and enhance existing semi-natural habitats, linear habitat features, the ecological connectivity between them, other features of nature conservation interest and geological features. These must be safeguarded during construction work. Incorporate locally appropriate, climate resilient, native, and local provenance vegetation in any landscaping or planting scheme, except where special requirements in terms of purpose or location may dictate otherwise. Ensure the protection and enhancement of biodiversity and landscape resources through appropriate building design, site layouts, retention of dark corridors, landscaping techniques and choice of plant species. Where appropriate, make provision for on-going maintenance of retained or created nature conservation interests. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects biodiversity and ecosystem resilience across Monmouthshire. It requires applications to undertake ecological surveys both in relation to locally designated sites and functionally linked land. Furthermore, where impacts on biodiversity are likely to occur, avoidance or mitigation measures will be needed to address unavoidable harm.</p> <p>It also specifies that a net benefit for biodiversity must be delivered, such as by maintaining, incorporating and enhancing semi-natural habitats, linear habitat features and ecological connectivity between them. While the policy does not explicitly refer to European sites, it is considered that it provides a positive framework for their protection.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy NR1 is screened out from AA.</p>

Policy	Text	Assessment
Policy NR2 – Severn Estuary Recreational Pressure	Development proposals that would result in an increase in visitor pressure on features of the Severn Estuary SAC, SPA, Ramsar site, or Functionally Linked Land will not be supported unless it can be demonstrated that no adverse impact on the integrity of the European Marine Site will occur.	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that explicitly protects the integrity of the Severn Estuary SAC / SPA / Ramsar from adverse impacts associated with recreational pressure.</p> <p>Recreational pressure is identified as one of the key pressures on the SAC / SPA / Ramsar in Natural England's SIP. Ensuring that the integrity of the site is protected, such as through delivery of adequate mitigation measures, is one of the key HRA-relevant policy mechanisms in the LP.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy NR2 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy NR3 – Protection of Water Sources and the Water Environment</p>	<p>Development, which may impact upon the water environment and associated land, will only be permitted where it:</p> <ul style="list-style-type: none"> a) Would not harm or pose an unacceptable risk to the capacity or flow of groundwater, surface water or coastal water systems; <p>Would not harm or pose an unacceptable risk to the quality and quantity of ground waters, surface waters, wetlands or coastal water systems including, where appropriate, their ecological and amenity value; and</p> <p>Where practicable and reasonable, improves water quality,</p>	<p>There are no LSEs of this policy on European</p> <p>-----</p> <p>This is a development management policy that prevents planning proposals from negatively impacting the water environment. The policy extends protection to the quality and quantity of groundwater and surfaces water.</p> <p>This is a key policy that protects the integrity of the River Wye SAC, River Usk SAC and Severn Estuary SAC / SPA / Ramsar, all of which are directly or indirectly to a deterioration in water quality and reduced hydrological flows. Of particular importance in this context is the phosphorus neutrality requirement in parts of the catchment of the River Wye and River Usk, which will need to be adhered to as a result of this policy.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy NR3 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy PROW1 – Public Rights of Way</p>	<p>Any Public Rights of Way (PROW) affected by a development proposal will require retention or a successful Path Order to either move the PROW on to a suitable alternative or to extinguish the PROW. Any predicted adverse impacts on the character, safety, enjoyment and convenient use of a PROW must be mitigated.</p> <p>Provision of additional routes where appropriate, will be sought in new developments with linkages to the existing network.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that requires PROWs to be retained by development proposals or a Path Order to be obtained for their rerouting / removal. Furthermore, additional routes will be sought in new developments. Generally, the retention of or provision of new PROWs is positive because it will ensure that Monmouthshire continues to be served by a suite of recreational assets.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy PROW1 is screened out from AA.</p>

Page 1332

Policy	Text	Assessment
Infrastructure		
Strategic Policy S6 – Infrastructure	<p>Where existing infrastructure is inadequate to serve the proposed development, new or improved infrastructure and facilities must be provided as part of the proposed development to mitigate any likely adverse impacts. Where possible, infrastructure improvements should be provided prior to occupation. Where provision on-site is not appropriate, off-site provision, or a financial contribution towards it, will be sought.</p> <p>Arrangements will be required towards the future management and maintenance of facilities provided, either in the form of initial support or in perpetuity, including the use of management companies where appropriate.</p> <p>Planning agreements and obligations will be sought to secure improvements in infrastructure, facilities, services and related works, where they are necessary to make development acceptable. In identifying appropriate contributions, due regard will be paid to the overall development viability, including the cost of measures that are necessary to physically deliver a development and ensure that it is acceptable in planning terms. The requirements for such agreements/obligations will include consideration and appropriate provision of:</p> <ul style="list-style-type: none"> • Affordable housing • Education facilities and/or required improvements • Sustainable transport measures • Transport infrastructure • Recreation and leisure facilities including formal and informal open space • Green and blue infrastructure • Community and cultural facilities • Welsh language including Welsh language facilities • Ecological mitigation and enhancement • Strategic utilities including water and sewerage infrastructure • Waste management facilities • Health infrastructure and/or facilities <p>In the event that viability considerations indicate that not all the identified contributions can be reasonably required, priority contributions will be determined on the basis of the individual circumstances of each case. In the case of residential developments, priority will be given to the affordable housing requirement set out in Policy S7 unless there is an overwhelming need for the contribution, in whole or in part, to be allocated for other necessary purpose/s.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that ensures the necessary infrastructure is in place to meet the requirements of new developments. Planning agreements and obligations will be sought to secure the appropriate provision of a diverse range of infrastructure, including sustainable transport measures, recreation facilities, green / blue infrastructure and water / sewerage provision.</p> <p>This is an important policy mechanism that helps protect the integrity of European sites that are sensitive to recreational pressure and water quality changes. For example, the policy will ensure that sufficient headroom is available at the relevant WwTWs to accommodate the increase in sewage produced as a result of the Monmouthshire LP.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Strategic Policy S6 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy IN1– Telecommunication, broadband and other digital infrastructure</p>	<p>Telecommunication, broadband and other digital infrastructure proposals will be considered in light of technical and operational requirements and permitted where the following criteria are met:</p> <ul style="list-style-type: none"> a) The development relates to planned development/provision of a wider network; <p>The siting and appearance of the proposed apparatus and associated structures should seek to minimise impact on the visual amenity, character and appearance of the surrounding area and, the amenity of neighbouring residents;</p> <p>There would be no significant adverse impact on the built or natural heritage or, the historic environment. Particular care should be given in the Wye Valley National Landscape (AONB) and adjacent the Bannau Brycheiniog National Park (BBNP);</p> <p>The application is accompanied by evidence of compliance with Government guidelines on health impacts of telecommunications infrastructure.</p> <p>Where new apparatus/structures are proposed, the application is accompanied by evidence that explores opportunities to utilise existing buildings, masts or structures in the first instance, and provides justification of why the application location is necessary.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that considers the delivery of telecommunication, broadband and other digital infrastructure proposals provided that a range of criteria are met. However, the mere consideration of such proposals has no direct bearing on European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Strategic Policy IN1 is screened out from AA.</p>

Policy	Text	Assessment
New Housing		
Policy H1 – Residential Development in Primary and Secondary Settlements	<p>Settlement boundaries have been drawn for the following Primary and Secondary Settlements identified in Policy S2:</p> <p>Primary Settlements</p> <ul style="list-style-type: none"> • Abergavenny (inc. Llanfoist) • Chepstow • Monmouth (inc. Wyesham) • Caldicot (inc. Severnside area comprising of: Caerwent, Crick, Magor Undy, Portskewett, Rogiet and Sudbrook) <p>Secondary Settlements</p> <ul style="list-style-type: none"> • Penperlleni • Raglan • Usk <p>Within the settlement boundaries new build residential development / redevelopment or conversion to residential, or subdivision of large dwellings or reuse of accommodation, such as upper vacant floors in town centres for residential use, will be permitted subject to detailed planning considerations and other policies of the RLDP that seek to protect existing retail, employment, community uses and tourism.</p>	<p>Likely Significant Effects on European sites cannot be excluded.</p> <p>This policy identifies the settlement boundaries for Primary Settlements and Secondary Settlements in which new residential development will be permitted.</p> <p>In conjunction with Strategic Policy 2, the location of new residential development is a key factor in determining the magnitude of negative impact pathways linking to specific European sites.</p> <p>Potential impact pathways are present:</p> <ul style="list-style-type: none"> • Atmospheric pollution • Recreational pressure • Loss of functionally linked land • Water quality • Water quantity, level and flow <p>Due to these potential linking impact pathways Policy H1 is screened in for Appropriate Assessment.</p>

Policy	Text	Assessment
<p>Policy H2 – Residential Development in Main Rural Settlements</p>	<p>Settlement boundaries have been drawn for the following Main Rural Settlements identified in Policy S2:</p> <ul style="list-style-type: none"> • Devauden • Dingestow • Little Mill • Llandogo • Llanellen • Llangybi • Llanover • Llanvair Discoed • Mathern • Pwllmeyric • Shirenewton/ Mynyddbach • St Arvans • Tintern • Trellech • Werngifford/Pandy <p>Within the Settlement Boundaries of Main Rural Settlements planning permission will be granted for new residential development/redevelopment, or conversion to residential, or sub-division of large dwellings, subject to detailed planning considerations, including no unacceptable adverse impact on village form and character and surrounding landscape, and other policies of the RLDP that seek to protect existing retail, employment, community uses and tourism.</p>	<p>Likely Significant Effects on European sites cannot be excluded.</p> <p>This policy identifies the settlement boundaries for Main Rural Settlements in which new residential development will be supported.</p> <p>In conjunction with Strategic Policy 2, the location of new residential development is a key factor in determining the magnitude of negative impact pathways linking to specific European sites.</p> <p>Potential impact pathways are present:</p> <ul style="list-style-type: none"> • Atmospheric pollution • Recreational pressure • Loss of functionally linked land • Water quality • Water quantity, level and flow <p>Due to these potential linking impact pathways Policy H2 is screened in for Appropriate Assessment.</p>

Policy	Text	Assessment
<p>Policy H3 – Residential Development in Minor Rural Settlements</p>	<p>In the following Minor Rural Settlements planning permission will be granted for minor small scale rounding off or infilling of a small gap between existing buildings, of no more than 1 or 2 dwellings, or residential redevelopment, or conversion to residential or sub-division of large dwellings, subject to detailed planning considerations, including no unacceptable adverse impact on village form and character and surrounding landscape, and other policies of the RLDP that seek to protect existing retail, employment, community uses and tourism.</p> <p>Minor Rural Settlements:</p> <ul style="list-style-type: none"> • Bettws Newydd • Broadstone /Catbrook • Brynygwenin • Coed y Paen • Cross Ash • Cuckoo’s Row • Great Oak • Grosmont • Gwehelog • Llanarth • Llanddewi Rhydderch • Llandegveth • Llandenny • Llangwm • Llanishen • Llansoy • Llantilio Crossenny • Llantrisant • Llanvair Kilgeddin • Llanvapley • Mitchel Troy • Penallt • Penpergwm • The Bryn • The Narth • Tredunnoch 	<p>Likely Significant Effects on European sites cannot be excluded.</p> <p>This policy identifies Minor Rural Settlements in which small scale residential development will be supported.</p> <p>In conjunction with Strategic Policy 2, the location of new residential development is a key factor in determining the magnitude of negative impact pathways linking to specific European sites.</p> <p>Potential impact pathways are present:</p> <ul style="list-style-type: none"> • Atmospheric pollution • Recreational pressure • Loss of functionally linked land • Water quality • Water quantity, level and flow <p>Due to these potential linking impact pathways Policy H3 is screened in for Appropriate Assessment.</p>

Policy	Text	Assessment
<p>Policy H4 – Conversion/Rehabilitation of Buildings in the Open Countryside for Residential Use</p>	<p>The conversion / rehabilitation of a building in the open countryside for residential use will be permitted where all the following criteria are met:</p> <ul style="list-style-type: none"> a) The form, bulk, materials and general design of the proposal, including any extensions, respect the rural character and design of the building; <p>The proposal, including curtilage and access, is in scale and sympathy with the surrounding landscape and does not require the provision of unsightly infrastructure;</p> <p>Rebuilding works, necessitated by poor structural conditions and / or the need for new openings in walls, should not involve substantial reconstruction, with structural surveys being required for marginal cases;</p> <p>The more isolated and prominent the building, the more stringent will be the design requirements with regard to new door and window openings, extensions, means of access, service provision and garden curtilage, especially if located within the Wye Valley National Landscape (AONB);</p> <p>Buildings of modern and / or utilitarian construction and materials such as concrete block work, portal framed buildings clad in metal sheeting or buildings of substandard quality and / or incongruous appearance will not be considered favourably for residential conversion; and</p> <p>The building is capable of providing adequate living space within the structure. Only very modest extensions and ancillary buildings will be allowed having regard to the context and scale of the existing building and normal permitted development rights to extend further or to construct ancillary buildings will be withdrawn.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for the refurbishment and conversion of existing rural buildings for residential use. While this policy does concern the enhancement of building to create residential space, the policy sets no quantum or allocation for any development.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H4 is screened out from AA.</p>
<p>Policy H5 – Replacement Dwellings in the Countryside</p>	<p>The replacement of existing dwellings in the countryside will be permitted provided that:</p> <ul style="list-style-type: none"> a) The original dwelling <ul style="list-style-type: none"> i) Is not a traditional farmhouse, cottage or other building that is important to the visual and intrinsic character of the landscape; ii) Has not been demolished, abandoned its residential use or fallen into such a state of disrepair so that it no longer has the appearance of a dwelling; b) The design of the new dwelling is of a form, bulk, size and scale that respects its setting; c) The proposal does not require an unacceptable extension to the existing residential curtilage; d) The replacement dwelling shall be of similar size to the replaced; and e) Any outbuildings should be modest in size and sensitively located and it can be demonstrated at the time of the original application that adequate ancillary garage and storage space can be achieved for the dwelling. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for replacement of rural dwellings.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H5 is screened out from AA.</p>

Policy	Text	Assessment
Policy H6 – Extension of Rural Dwellings	<p>In order to protect the character of the countryside, extensions to dwellings in the open countryside should be modest and respect or enhance the appearance of the existing dwelling. They will be required to:</p> <ul style="list-style-type: none"> a) Be subordinate to the existing building; and b) Where the building is of a traditional nature, to respect its existing form, including the pattern and shape of openings, and materials. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for extension of rural dwellings.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H6 is screened out from AA.</p>
Policy H7 – Specialist Housing	<p>Proposals for specialist housing development, and extensions to established specialist housing facilities, will be permitted within or adjacent to defined settlement boundaries where:</p> <ul style="list-style-type: none"> a) There is safe and convenient access to shops, services, community facilities and public transport appropriate to the needs of the intended occupiers; <p>It is appropriate for its intended residents and the neighbourhood in terms of form, scale and design, type and affordability of the accommodation, as well as the provision of support and care; and</p> <p>It meets the affordable housing requirements of Policy S7 where the development falls within Use Class C3.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for the development of specialist housing.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H7 is screened out from AA.</p>
Policy H8 – Housing Mix	<p>To assist in addressing the demographic and affordability challenges in Monmouthshire, development proposals of 10 or more homes must include a range and mix of house types, tenure and size, to be agreed by the Council.</p> <p>Such development proposals must be accompanied by a statement setting out how the mix of market housing will assist in achieving balanced communities, including the site allocations included within the RLDP.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that ensures there is a mix of housing tenure and size in new developments.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H8 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy S7 – Affordable Housing</p>	<p>The affordable homes target for the Plan period of 2018 – 2033 is 1,595 – 2,000 homes. This will be delivered in accordance with the following framework:</p> <ul style="list-style-type: none"> a) New site allocations – On-site provision of 50% affordable homes on all new site allocations. b) Sites of 20 homes and over – On-site provision of 50% affordable housing applies to development proposals on sites within existing settlement boundaries as identified in Tiers 1-3 of Strategic Policy S2. c) Sites of 5 to 19 homes – On-site provision of 40% affordable housing applies to development proposals on sites within existing settlement boundaries as identified in Tiers 1-3 of Strategic Policy S2. d) Sites of 1 to 4 homes – Financial contributions towards the provision of affordable housing in the local planning authority area will be required in accordance with details set out in the Affordable Housing Supplementary Planning Guidance. e) Conversions and sub-divisions – Financial contributions towards the provision of affordable housing in the local planning authority area will be required in accordance with details set out in Affordable Housing Supplementary Planning Guidance. <p>In determining how many affordable homes should be provided on a development site, the figure resulting from applying the proportion required to the total number of dwellings will be rounded to the nearest whole number, where half rounds up.</p> <p>All proposals must meet national policy guidance in relation to the most efficient use of land and should not be subdivided or phased in an attempt to avoid on-site provision of affordable homes.</p> <p>This Strategic Policy applies to all residential planning applications. Exceptions will not be made for sites that previously had planning permission and have been resubmitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that ensures housing is affordable.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H8 is screened out from AA.</p>

Policy	Text	Assessment
Policy H9 – Affordable Housing Exception Sites	<p>Favourable consideration will be given to the siting of 100% affordable housing exception sites adjoining Tier 1, 2, 3 and 4 settlements identified in Strategic Policy S2, that would not otherwise be released for residential development provided that all of the following criteria are met:</p> <p>a) The scheme meets a genuine local need which could not otherwise be met within the locality; The proposed homes are of a size, tenure and design which is commensurate with the identified affordable housing need of the locality;</p> <p>The proposal relates to:</p> <ul style="list-style-type: none"> i) 25 or less homes in Tier 1 Primary Settlements, ii) 15 homes or less in Tier 2 Secondary Settlements, iii) 10 homes or less in Tier 3 Main Rural Settlements or iv) 5 homes or less in Tier 4 Minor Rural Settlements; <p>b) The site represents a logical extension to the existing settlement with no significant adverse impact on settlement form, character and surrounding landscape;</p> <p>The affordable housing meets the needs of local people and will be managed by a Registered Social Landlord (RSL) in perpetuity, which will be secured via a S.106 legal agreement. In exceptional circumstances where an RSL is not involved, clear and adequate legal agreements must be in place to ensure that the benefits of affordable housing will be secured for initial and subsequent occupiers.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that favours the creation of affordable housing. This policy does not set any quanta or location for this development and is primarily concerned with the affordability of the dwellings, which has no bearing on their ecological impacts.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H9 is screened out from AA.</p>
Residential Allocations		

Policy	Text	Assessment
<p>S8 – Site Allocation Placemaking Principles</p>	<p>All residential site allocations must comply with and incorporate the following placemaking principles into the schemes:</p> <p>Sustainable Communities</p> <ul style="list-style-type: none"> • Creation of a high-quality and well-connected extension to the settlement, which responds to its edge of settlement location. Where appropriate, the layout will identify and respect key views to and from the wider landscape setting. • Provision of 50% affordable homes on-site comprising a mix of housing types and tenures to meet local need. • Dwellings built to net zero carbon standards, including the incorporation of renewable energy generation technologies and low carbon heating systems and ULEV charging points. • Provide a mix of house types, tenures, sizes, materials and colour to be developed at an appropriate density. • Broadband /digital infrastructure must be provided to serve each new home. <p>Green Infrastructure, Landscape and Nature Recovery</p> <ul style="list-style-type: none"> • Make provision within the development for appropriate green infrastructure, multifunctional streetscapes and useable public open space in accordance with National Policy and agreed standards, including play and recreation provision, community growing opportunities and accessibility for all. • Demonstrate a proposal that is informed by the surrounding landscape character and reflects the distinctive landscape character, qualities and sensitivities of the area. • Take a proactive approach to deliver a net benefit for biodiversity and ecosystem resilience within the development site by maintaining, incorporating and enhancing semi-natural habitats and ecological connectivity between them. • Ensure the protection and enhancement of biodiversity through appropriate building design, site layouts, lighting proposals that retain dark corridors, landscaping techniques and choice of plant species. • Ensure that trees, woodland and hedgerows along site boundaries and within the site are retained and protected as far as possible with adequate space to allow access for maintenance and to maintain functional and viable wildlife corridors and green infrastructure assets. <p>Sustainable Travel and Highways</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that does not set any quanta or location for this development and is primarily concerned with the affordability of the dwellings, which has no bearing on their ecological impacts.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy H9 is screened out from AA.</p>

Policy	Text	Assessment
	<ul style="list-style-type: none"> • Design of the site and its connections must prioritise active travel to local trip attractors and public transport, in line with the Sustainable Transport Hierarchy (PPW12/Wales Transport Strategy). Active Travel Act guidance should be applied to routes, facilities and sustainable transport promotion. • Sites must contribute to active travel and public transport improvements as necessary. • Ensure that the development does not adversely affect the safety, capacity and operation of the highway network. • Streets must be designed and built to adoption standards in accordance with national and local design standards and offered for adoption pursuant to the requisite highway adoption agreements. <p>Education Requirements</p> <ul style="list-style-type: none"> • Sites must contribute to primary and secondary school provision in the area in accordance with capacity requirements. <p>Residential amenity</p> <ul style="list-style-type: none"> • Ensure a safe, secure, pleasant and accessible environment for all members of the community. • Maintain reasonable levels of privacy and amenity of occupiers of neighbouring properties. • Incorporate satisfactory air quality measures for mitigating and/or reducing emissions, as appropriate. • Incorporate good acoustic design which must be compatible with thermal comfort by ensuring adequate ventilation and avoidance of overheating, in the interests of protecting residents from the harmful effects of noise. <p>Flood Risk and Sustainable Drainage Systems</p> <ul style="list-style-type: none"> • Potential flood risk to, or as a consequence of, the development of the site must be suitably assessed in accordance with national planning policy. • The development must manage surface water through a sustainable drainage system in accordance with Welsh Government's Statutory Standards for Sustainable Drainage Systems 2018. The distribution of SuDS features across the site should be prioritised, reducing the size of any single SuDS feature. <p>Site specific considerations are set out in Policies HA1 to HA18.</p>	

Policy	Text	Assessment						
<p>Policy HA1 - Land to the East of Abergavenny</p>	<p>Allocated as a residential-led mixed-use development</p> <p>Development of the site should accord with the following parameters, placemaking principles and development requirements, which should be delivered in an appropriately phased manner and be formally tied to planning consents.</p> <table border="1" data-bbox="405 424 1487 858"> <thead> <tr> <th data-bbox="405 424 736 488">Site Area</th> <th data-bbox="736 424 1126 488">Allocation Type</th> <th data-bbox="1126 424 1487 488">Total Homes</th> </tr> </thead> <tbody> <tr> <td data-bbox="405 488 736 858">Total Site: 35.9 ha</td> <td data-bbox="736 488 1126 858"> Strategic Mixed-use Development including: <ul style="list-style-type: none"> • Residential • Mixed -use Commercial Hu • Park & Rid • B Use Class Uses </td> <td data-bbox="1126 488 1487 858"> Approx No. of Homes: 500 Open Market: 250 Affordable Homes: 250 </td> </tr> </tbody> </table> <p>*Within the Plan period</p> <p>In addition to the Placemaking Principles identified in Policy S8, the site must comply with the following:</p> <p>Sustainable Communities</p> <p>a) To provide a mixed-use development containing the following key uses:</p> <ul style="list-style-type: none"> • Approximately 500 homes including 50% affordable homes. • A minimum 1 hectare of B1 Use Class uses. • A neighbourhood centre, the uses and scale of which to be agreed by MCC. • Green infrastructure and open space provision, including allotments/community food growing spaces, incorporating the creation of focal points for the community. • Park and ride facility serving Abergavenny Railway Station. • Active travel connections with visible, prioritised routes to/from the site to the Railway Station and Abergavenny. <p>b) The completion of non-residential elements must be delivered in line with an agreed phasing programme.</p>	Site Area	Allocation Type	Total Homes	Total Site: 35.9 ha	Strategic Mixed-use Development including: <ul style="list-style-type: none"> • Residential • Mixed -use Commercial Hu • Park & Rid • B Use Class Uses 	Approx No. of Homes: 500 Open Market: 250 Affordable Homes: 250	<p>Likely Significant Effects on European sites cannot be excluded.</p> <p>This policy allocates a 35.9ha large site on Land to the East of Abergavenny for residential-led mixed-use development, including the delivery of 500 homes.</p> <p>Importantly, the policy also specifies that the development proposal will need to comply with a number of provisions, including the protection of Green Infrastructure assets, retention of hedgerows as viable wildlife corridors, incorporating / enhancing existing PRoWs and sustainable travel (e.g. walking / cycling links). These measures have the potential to mitigate some of the impact pathways identified below.</p> <p>Potential impact pathways are present:</p> <ul style="list-style-type: none"> • Atmospheric pollution • Recreational pressure • Loss of functionally linked land • Water quality • Water quantity, level and flow <p>Due to these potential linking impact pathways Policy HA1 is screened in for Appropriate Assessment.</p>

Policy	Text		Assessment
	EA2y	Mamhilad	
Policy E1 – Protection of Existing Employment Land	<p>Proposals that will result in the loss of existing or allocated industrial and business sites or premises (Use Classes B1, B2 and B8) to other uses will only be permitted if:</p> <ul style="list-style-type: none"> a) The site or premises is no longer suitable or well-located for employment use; b) A sufficient quantity and variety of industrial sites or premises is available and can be brought forward to meet the employment needs of the County and the local area; c) There is no viable industrial or business employment use for the site or premises; d) There would be substantial amenity benefits in allowing alternative forms of development at the site or premises; e) The loss of the site would not be prejudicial to the aim of creating a balanced local economy. <p>Exceptionally, planning permission may be granted for a change of use of existing employment land when the above criteria are not fully complied with if:</p> <ul style="list-style-type: none"> i) The proposal is for small scale retail uses which are ancillary to the main business / industrial activity; or ii) Small scale service activities of an industrial nature which are not suited to the high street and involve the sale, service or repair of vehicles or machinery. 		<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for any loss of existing or allocated industrial and business sites. It also states that exceptions for small scale ancillary uses may be granted.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy E1 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy E2 – Non-allocated Employment Sites</p>	<p>Proposals for industrial and business development (Use Classes B1, B2 and B8) by non-speculative single-site users will be permitted provided that all the following conditions are met:</p> <ul style="list-style-type: none"> a) The proposed site is within or adjoining settlement boundaries of Primary Settlements or existing and proposed industrial / business sites; b) It can be demonstrated that the proposal cannot be accommodated on existing or proposed industrial or business sites within the County; c) The proposal is compatible with adjacent land uses; d) There is a demonstrable need for the type and scale of development in that location; and e) The proposal would cause no unacceptable harm to the surrounding landscape, historic / cultural heritage, biodiversity or local amenity value. f) Such developments will be controlled with a Section 106. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for proposals for non-allocated employment sites. This includes being located within or adjacent to existing settlement boundaries, being compatible with adjacent land uses and not causing unacceptable harm.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy E2 is screened out from AA.</p>
<p>Strategic Policy S11 – Rural Economy</p>	<p>Development to enable rural enterprise uses and the diversification of the rural economy will be permitted outside settlement boundaries where it is of a scale and type compatible with the surrounding area and will cause no unacceptable harm to the surrounding landscape, historic and cultural heritage, biodiversity or local amenity value.</p> <p>Development must re-use or adapt existing buildings where possible. The exceptional circumstances in which new buildings may be permitted outside settlement boundaries to support the rural economy are set out in RE1, RE3, RE4, RE5 and RE6.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy providing for the development of the rural economy, provided there is no unacceptable harm to the surrounding landscape and biodiversity value. While the policy might therefore accommodate employment development, this is covered in Strategic Policy S10, and as such is not reassessed here.</p> <p>Overall, there are no impact pathways present and this policy can be screened out from Appropriate Assessment.</p>

Policy	Text	Assessment
Policy RE1 – Secondary and Main Rural Settlements Employment Exceptions	<p>Within or adjoining the settlement boundaries of the Secondary and Main Rural Settlements identified in Policy S2, the construction of small-scale purpose built industrial and business development will be permitted, subject to detailed planning considerations, including:</p> <ul style="list-style-type: none"> a) The proposal would cause no unacceptable harm to the natural or built environment; b) It can be demonstrated that the proposal cannot be accommodated on existing or proposed industrial or business sites with the County; c) The proposal is compatible with surrounding land uses and in scale with the existing settlement. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for industrial and business developments in rural settlements. This includes not causing unacceptable harm to the natural environment and being compatible with surrounding land.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RE1 is screened out from AA.</p>
Policy RE2 – The Conversion and Rehabilitation of Buildings in the Open Countryside for Employment Use	<p>Proposals for the conversion or rehabilitation of existing buildings in the open countryside, to employment use will be permitted provided that all the following criteria are met:</p> <ul style="list-style-type: none"> a) The form, bulk, and general design of the proposal, including any extensions, respect the rural character and design of the building; b) In respect of farm diversification proposals, any necessary re-building work should respect or be in sympathy with the location and traditional characteristics of the building; in all other cases the buildings should be capable of conversion without major or complete reconstruction; c) The more isolated and prominent the building the more stringent will be the design requirements with regard to new door and window openings, extensions and means of access, service provision and curtilage, especially if located within the Wye Valley National Landscape (AONB); d) The conversion of modern farm and forestry buildings will only be permitted if the building has been used for its intended purpose for a significant period of time. Particularly close scrutiny will be given to proposals relating to buildings that are less than 5 years old, or which are known to have been used for their intended purpose for less than 5 years, and where there has been no change in farming or forestry activities on the unit since the building was erected permission may be refused; 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for the conversion of existing rural buildings to employment use. This includes not requiring extensive expansion.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RE2 is screened out from AA.</p>

Policy	Text	Assessment
	<ul style="list-style-type: none"> e) The proposal including curtilage and access, is in scale and sympathy with the surrounding landscape and does not require the provision of unsightly infrastructure and ancillary buildings; and f) The building is capable of accommodating the proposed use without substantial extension. <p>The above criteria will also be applied to proposals to extend buildings that have already been converted.</p>	
<p>Policy RE3 – Agricultural Diversification</p>	<p>Development proposals which make a positive contribution to agriculture diversification will be permitted where the new use or building meets the following criteria:</p> <ul style="list-style-type: none"> a) The proposed non-agricultural development is run in conjunction with, and is complementary to, the agricultural activities of the enterprise; b) The proposal is supported by an appropriate business case which demonstrates the link to existing business activity and the benefits of the scheme in terms of sustaining employment / the rural economy; c) In relation to new build, the applicant must demonstrate that there are no existing buildings suitable for conversion / re-use in preference to new build; d) Any rebuilding work should respect or be in sympathy with the local and traditional characteristics of the building; e) Proposals for new built development meet the criteria set out in Policy OC1. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for agricultural diversification. This includes having an appropriate business case and operating alongside agricultural activities.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RE3 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy RE4 – New Agricultural and Forestry Buildings</p>	<p>New agricultural and forestry buildings, as well as any means of access and yard spaces, that are subject to planning control, will be permitted where:</p> <ul style="list-style-type: none"> a) The building, hard standing or access is necessary for agricultural or forestry purposes; b) The building is functionally suitable for the specific use; c) Adequate provision is made for the disposal of foul and surface water and any animal waste without risk to the environment. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for new agricultural and forestry buildings.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RE4 is screened out from AA.</p>
<p>Policy RE5 – Intensive livestock / Free Range Poultry Units</p>	<p>Intensive livestock or free-range poultry production units will be permitted subject to the following criteria:</p> <ul style="list-style-type: none"> a) New livestock units and associated slurry tanks and lagoons are sited so as not to cause unacceptable nuisance to any non-agricultural dwelling or building; b) New units are sited so as to minimise their visual impact by avoiding exposed locations and, where practicable, locating them within or adjoining existing groups of buildings; c) Units that have serious implications for the surrounding highway network will be resisted; d) The unit is designed, and uses appropriate technology, to minimise the nuisance of smell, noise, air pollution and neutralise impact on water quality. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for new livestock and poultry production units. This includes being designed to minimise the impacts on smell and noise as well as neutralising impact on water quality.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RE5 is screened out from AA.</p>

Policy	Text	Assessment
Policy RE6 – Provision of Recreation and Leisure Facilities in the Open Countryside	<p>Development proposals for recreation and leisure uses in the countryside will be permitted subject to detailed planning considerations provided that:</p> <ul style="list-style-type: none"> a) They are of a small-scale, informal nature and, including adequate safeguards for the character and appearance of the countryside (particularly its landscape, biodiversity and local amenity value). b) Development must re-use or adapt existing buildings where possible. <p>In exceptional circumstances new buildings of an appropriate scale may be acceptable where justified and where the proposal meets the criteria set out in Policy OC1.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for recreation and leisure facilities in the countryside.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RE6 is screened out from AA.</p>
Visitor Economy		
Strategic Policy 12 – Visitor Economy	<p>Development proposals that support Monmouthshire’s visitor economy and promote sustainable forms of tourism will be permitted subject to material planning considerations.</p> <p>Development proposals that would have an unacceptable adverse impact on features and areas of tourism interest and their landscape character and settings, or that would result in the unjustified loss of tourism facilities will not be permitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that broadly supports tourism development within the LP area. It specifically encourages sustainable tourism. While this policy does support increases tourism development it does not allocate and quanta or sites for growth</p> <p>Overall, there are no impact pathways present and Policy S12 is screened out from AA.</p>

Page 1382

Policy	Text	Assessment
<p>Policy T1 – New or Extended Tourism Accommodation and Facilities in the Open Countryside</p>	<p>Development proposals for sustainable tourism accommodation and facilities in the open countryside will only be permitted if the proposal can be justified against any of the following criteria:</p> <ul style="list-style-type: none"> a) Is of a small scale appropriate to its context and a non-permanent nature that would cause no material harm to the landscape character and environmental/biodiversity quality of the surrounding area, either individually or cumulatively with other development in the area; or b) Contributes to agricultural diversification or an existing rural enterprise business and meets the criteria set out in S11 and RE3; or c) Consists of the conversion/rehabilitation of an existing rural building meeting criteria set out within Policy H4; or d) Relies upon a geographically fixed resource which exceptionally justifies the development; or e) Is located within or adjacent to an existing visitor attraction or accommodation as ancillary development to established medium or large hotels.; or f) Demonstrates significant economic benefit to Monmouthshire. <p>Sustainable tourism proposals in the open countryside that accord with any of the criteria above must also meet all of the following criteria set out in (g)-(l) below:</p> <ul style="list-style-type: none"> g) Protect, maintain and enhance landscape character, biodiversity, the resilience of ecosystems and the historic environment; h) Are of a scale, permanency and design appropriate to site context; i) Incorporate sustainable and efficient resource use; j) Have the necessary infrastructure capacity; k) Prioritise, promote and facilitate sustainable travel and have safe and efficient highway design; l) Do not have an unacceptable amenity impact on occupiers of neighbouring properties. <p>All tourism proposals must be evidenced with a ‘Sustainable Tourism Need and Impact Assessment’ (STNIA).</p> <p>All tourism proposals are required to be short-stay only and not extend beyond a period of stay of 28 days.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for the development of sustainable tourism facilities in the open countryside. These include protecting, maintaining and enhancing the biodiversity and resilience of ecosystems, and promoting sustainable travel.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy T1 is screened out from AA.</p>

Policy	Text	Assessment
Policy T2 – Protection of Existing Tourism Facilities	<p>The loss of a tourism facility will only be permitted if:</p> <ul style="list-style-type: none"> a) Its loss would not adversely affect the range and quality of tourism facilities available within the locality and/or County; and b) It can be demonstrated that the facility is no longer suitable or financially viable and could not be expected to become financially viable for tourism use. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets criteria for the loss of a tourism facility.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy T2 is screened out from AA.</p>
Sustainable Transport		
Strategic Policy S13 – Sustainable Transport	<p>Development proposals will be required to accord with the Sustainable Transport Hierarchy, as set out in National Policy. This will be facilitated by:</p> <ul style="list-style-type: none"> a) Promoting and prioritising active travel (walking, wheeling and cycling) and public transport above private motor vehicles, using location and design to reduce the need to travel; b) Maintaining and improving on the Active Travel Network Maps (ATNMs) to maximise active travel opportunities, including links to these networks associated with new developments; c) Ensuring development enables transition to Ultra Low Emission Vehicles (ULEVs) by providing necessary underlying infrastructure; d) Ensuring developments are designed to provide safe and efficient access and safe and efficient capacity to the transport network; e) Ensuring developments are served by an adequate level of parking provision, with cycle parking given competitive advantage, in accordance with relevant guidance; f) Demonstrating how proposals enable solutions to rural transport issues, where appropriate, and; g) Promoting digital and innovative infrastructure in both urban and rural areas to enable remote access to work, education and services. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets a requirement for new development to accord with the Sustainable Transport Hierarchy that is national Policy.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy S13 is screened out from AA.</p>

Page 134

Policy	Text	Assessment
Policy ST1 – Sustainable Transport Proposals	<p>All developments which are likely to have a significant impact on trip generation and travel demand must be accompanied by a Transport Assessment (TA). The TA must include a Transport Implementation Strategy that accords with the Sustainable Transport Hierarchy as set out in National Policy and develop a strategy to reduce the need to travel, facilitate, promote and prioritise active travel and ensure access to the public transport network. In town centre locations car-free development will be supported where practicable.</p> <p>If a rural location is essential for the proposed development, links to public transport should be considered and if necessary, included. A proportionate approach will be applied to the assessment of TAs and their accordance with the Sustainable Transport Hierarchy.</p> <p>Any new highway infrastructure and design will be expected to satisfy Active Travel Act Guidance (ATAG), National and Local highway design guides and parking guidelines.</p> <p>Financial contributions may be required for safety/congestion mitigation measures, or towards improvements to the highway network and sustainable travel.</p> <p>Developments that are likely to create significant additional road traffic growth, or adversely affect the safe and efficient operation of the highway system will not be permitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets a requirement for the preparation of a Transport Assessment for developments that are likely to have significant impact on travel demand, as well as considering public transport, Active Travel Act Guidance, and required highway improvements.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy ST1 is screened out from AA.</p>
Policy ST2 – Highway Hierarchy	<p>The following transport routes are identified as the main routes in the County for the movement of people and goods. Development proposals should be assessed from the appropriate level highway in the hierarchy, which comprises the following routes:</p> <p>a) Strategic Routes:</p> <ul style="list-style-type: none"> • Motorways M4 and M48; • Trunk roads A40T, A48T, A4042T, A449T, A465T, and A466T <p>Only in exceptional circumstances, will new direct accesses be permitted off Strategic Routes. Proposals that would result in short local journeys on these routes and add to unacceptable congestion will be refused.</p> <p>b) Arterial Routes:</p> <ul style="list-style-type: none"> • A48 (High Beech Roundabout, Chepstow to Newport) • A466 (High Beech Roundabout, Chepstow to Herefordshire boundary north of Monmouth) • A472 (Little Mill to Usk Interchange) 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets a hierarchy for main transport routes in Monmouthshire. This hierarchy informs what parking, turning movements, and route connections will be deemed acceptable in the interests of road safety.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy ST2 is screened out from AA.</p>

Policy	Text	Assessment
	<ul style="list-style-type: none"> • A4077 (Gilwern to Powys boundary) • A4136 (Monmouth to Gloucestershire boundary) • A4143 (Llanfoist to Brecon Road, Abergavenny) • B4245 (Parkwall to Magor) <p>On arterial routes proposals for on street parking, new frontage access and turning movements will be considered against the interests of road safety and the efficient movement of traffic.</p> <p>c) Local Routes:</p> <ul style="list-style-type: none"> • B4233 (Monmouth to Abergavenny) • B4235 (Usk to Chepstow) • B4246 (Llanfoist to Gilwern) • B4251 (Abergavenny to Skenfrith) • B4269 (Llanfoist to Llanellen) • B4293 (Chepstow to Monmouth) • B4347 (Rockfield to Grosmont) • B4598 (Abergavenny to Usk). <p>On local routes parking and turning movements may be restricted and the number of frontage accesses limited on road safety and traffic movement (especially public transport) grounds.</p> <p>d) Access Routes</p> <p>These roads are those not listed in (a), (b) or (c) above. If appropriate, parking, turning movements, traffic speeds and the number of frontage access will be limited on road safety, amenity and traffic movement grounds.</p>	

Policy	Text	Assessment
Policy ST3 – Freight	<p>To reduce or prevent heavy road freight traffic, opportunities to develop freight transfer points between road / rail / last mile sustainable transport should be explored and will be favourably considered subject to detailed planning considerations.</p> <p>The development of facilities for the movement of freight by rail will be favourably considered, subject to detailed planning considerations. Proposals which would prejudice the operation of, or cause the loss of, freight sites and facilities will not be permitted, unless the facility has closed or is closing and it can be shown that there is no realistic prospect of it resuming, having regard to its potential viability in the long term.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that favourably considers development of freight transfer points between road/rail/last mile sustainable transport. This support for rail freight and sustainable last mile freight could have positive effects in terms of air pollution.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy ST3 is screened out from AA.</p>
Policy ST4 – Rear Access/Service Areas within Central Shopping and Commercial Areas	<p>Development within the defined Central Shopping and Commercial Areas that require servicing must, where feasible, include provision for rear access and servicing.</p> <p>Development that relies on the use of on-street servicing will only be permitted where this would not conflict with walking, cycling and general traffic flows, or create highway dangers.</p> <p>Development that would result in the loss of rear service roads or yards will only be permitted if satisfactory alternative provision is made.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a design management policy that supports rear servicing of developments in Central Shopping and Commercial Areas.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy ST4 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy ST5 – Transport Schemes</p>	<p>The following transport schemes identified in the Local Transport Strategy will be supported and safeguarded from development that would likely prejudice their implementation:</p> <p>Active Travel schemes</p> <ul style="list-style-type: none"> a) Abergavenny and Llanfoist Active Travel Schemes b) Caldicot Active Travel Schemes c) Chepstow Active Travel Schemes d) Monmouth Active Travel Schemes e) Usk Active Travel Schemes f) Magor and Undy Active Travel Schemes g) Undy to Rogiet Active Travel improvements alongside B4245 <p>Public Transport Improvement schemes</p> <ul style="list-style-type: none"> h) Abergavenny Train Station improvements i) Abergavenny Bus Station improvements j) Chepstow Transport Hub (rail and bus) k) Severn Tunnel Junction Interchange improvements (rail and bus) l) Monmouth Bus/Coach Stop m) Magor Walkway Station <p>Road Schemes</p> <ul style="list-style-type: none"> n) B4245 /M48/ Severn Tunnel Junction Link Road o) B2425/Severn Tunnel Junction Link Road p) Chepstow Highbeech Roundabout improvements 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy which indicates general support for several active transport improvements and schemes. This is a positive policy which will encourage greater use of active travel and public transport, thus reducing air pollution and its potential impact on European sites.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy ST5 is screened out from AA.</p>

Policy	Text	Assessment												
Policy ST6 – Protection of Redundant Routes	Redundant routes, such as former canal and rail routes and associated features, will be protected from development that would prejudice future sustainable transport use.	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects redundant transport routes.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy ST6 is screened out from AA.</p>												
Retail and Commercial Centres														
Strategic Policy S14 – Town, Local and Neighbourhood Centres	<p>All new or enhanced retail, commercial and social developments, including leisure, cultural and entertainment uses, will be focused in accordance with the hierarchy defined below. Developments should be consistent in scale and nature with the size and character of the centre and its role in the hierarchy.</p> <p>Proposals must maintain or enhance the vibrancy, vitality and attractiveness of the centre. Proposals which would undermine the vibrancy, vitality and attractiveness of the centre will not be permitted.</p> <table border="1" data-bbox="398 927 1480 1367"> <tbody> <tr> <td data-bbox="398 927 864 1002">Town Centres:</td> <td data-bbox="864 927 1480 1002">Abergavenny, Caldicot, Chepstow, Monmouth</td> </tr> <tr> <td data-bbox="398 1002 864 1077">Minor County Town Centres:</td> <td data-bbox="864 1002 1480 1077">Usk, Magor</td> </tr> <tr> <td data-bbox="398 1077 864 1152">Local Centres:</td> <td data-bbox="864 1077 1480 1152">Raglan, Bulwark</td> </tr> <tr> <td data-bbox="398 1152 864 1227">Neighbourhood Centres:</td> <td data-bbox="864 1152 1480 1227"></td> </tr> <tr> <td data-bbox="398 1227 864 1302">Abergavenny:</td> <td data-bbox="864 1227 1480 1302">Hillcrest Road, Rother Avenue and Hereford Road</td> </tr> <tr> <td data-bbox="398 1302 864 1367">Caldicot:</td> <td data-bbox="864 1302 1480 1367">West End</td> </tr> </tbody> </table>	Town Centres:	Abergavenny, Caldicot, Chepstow, Monmouth	Minor County Town Centres:	Usk, Magor	Local Centres:	Raglan, Bulwark	Neighbourhood Centres:		Abergavenny:	Hillcrest Road, Rother Avenue and Hereford Road	Caldicot:	West End	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets out the retail hierarchy and protects the vitality, vibrancy and attractiveness of centres.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy S14 is screened out from AA.</p>

Policy	Text		Assessment
	Chepstow	The Old Farm Shopping Centre, Thornwell and Larkfield Business Estate	
	Monmouth:	Overmonnow, Wyesham, The Albion and Monmouth District Centre	
Policy RC1 – Central Shopping and Commercial Areas	<p>Central Shopping and Commercial Areas (CSCAs) are designated for Abergavenny, Caldicot, Chepstow, Monmouth, Magor and Usk. Within CSCAs (except for Primary Shopping Frontages) the following policy criteria apply, subject to detailed planning considerations:</p> <ul style="list-style-type: none"> a) Development will be permitted where the proposal relates to a retail or commercial use which will safeguard the vitality, attractiveness and viability of the defined CSCAs; b) Change of use at ground floor level to uses other than retail or commercial will not be permitted unless it can be demonstrated that the vitality and viability of the CSCA will not be adversely affected; c) Change of use of ground floor premises to residential will not be permitted unless evidence is provided to demonstrate that the premises is not viable for retail or commercial use, including that the premises has been vacant for at least one year and that genuine attempts at marketing the existing use have been unsuccessful; <p>The loss of car parking within CSCAs will be resisted, unless it can be demonstrated that the proposal is linked to a town centre regeneration scheme and sufficient parking is available.</p>		<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that supports rear servicing of developments in Central Shopping and Commercial Areas.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RC1 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy RC2 – Primary Chopping Frontages</p>	<p>Primary Shopping Frontages are designated in Abergavenny, Caldicot, Chepstow and Monmouth in the following locations:</p> <p>Abergavenny PSF1 Cross Street, High Street & Frogmore Street PSF2 Cibi Walk PSF3 Cross Street (51-60 & Town Hall)</p> <p>Caldicot PSF4 Newport Road (17-41 & 26-32 & Holman House)</p> <p>Chepstow PSF5 High Street (2-23 & 24-29) PSF6 St Mary Street</p> <p>Monmouth PSF7 Monnow Street (1-93 & 6-114) PSF8 Church Street & Agincourt Square</p> <p>Within Primary Shopping Frontages, development or redevelopment proposals for non-A1 commercial uses on ground floors, or a change of use on ground floors from Use Class A1 to non-A1 commercial uses, will only be permitted where all of the following apply:</p> <ul style="list-style-type: none"> a) It retains or delivers an active shopfront; b) The use would not create an over-concentration or unacceptable balance of non-A1 uses that would disproportionately dilute the continuity of the primary shopping frontage detracting from its established retail character; c) It would not result in the loss of A1 retail units in prominent locations, corner units or those with long frontages. <p>Where a proposal fails to meet all of the above criteria, an exception may be considered provided:</p> <ul style="list-style-type: none"> i) It can be demonstrated that the proposed use would not harm the vitality, attractiveness and viability of the street frontage; and ii) The premises have been vacant for at least a year, genuine attempts at marketing the existing use have been unsuccessful, and the proposal would bring a vacant premises back into an active commercial or community use. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that designates certain areas as primary shopping frontages. This policy also limits development in these areas to ensure the provision of an active shop front and suitable commercial uses.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RC2 is screened out from AA.</p>

Policy	Text	Assessment
	<p>A justification statement must be submitted to provide evidence for all proposals considered to be exceptions.</p>	
<p>Policy RC3 – Local Centres and Neighbourhood Centres/ Shops</p>	<p>The County's local centres, neighbourhood centres and shops are defined in Strategic Policy S14 and are identified on the Proposals Map.</p> <p>Development proposals for A1 retail development in designated local centres and neighbourhood centres will be permitted provided that the development, either individually or cumulatively with other recent or proposed developments, does not undermine the vitality, attractiveness or viability of town centres.</p> <p>Proposals for A1, A2, A3 and other complementary commercial uses will be supported in local and neighbourhood centres where they are in keeping with the scale, role and function of the individual centre.</p> <p>Proposals that would result in the loss of A1, A2, A3, or commercial uses within local centres and neighbourhood centres will not be permitted unless genuine attempts at marketing the existing use have been unsuccessful.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that prevents development within local and neighbourhood centres if it would harm town centres. This policy also limits development in these areas to ensure the provision is appropriate to its location.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RC3 is screened out from AA.</p>
<p>Policy RC4 – New Retail Proposals Outside of Identified Town and Local Centres</p>	<p>The preferred location for new retail and commercial uses, including extensions to existing retail and commercial premises, will be in the designated Central Shopping and Commercial Areas (CSCAs) and Local Centres. Where it can be demonstrated that no suitable sites exist in the CSCA/local centre, then sites on the edge of the CSCA/local centre should be considered before finally considering out-of-town sites. Development proposals outside these areas will be required to be assessed against the following criteria:</p> <ul style="list-style-type: none"> a) A demonstrable need exists for the proposed development; b) The proposed development, either individually or cumulatively with other recent or proposed developments, would not have a detrimental impact on the trade/turnover, vitality and viability of town, local or neighbourhood centres; c) The proposed development is of an appropriate scale and type to the size, character and function of the centre and its position in the retail and commercial hierarchy; d) The proposed development would not have a detrimental impact on future public or private investment needed to safeguard vitality and viability of the centres; e) The proposal is in a location accessible by sustainable travel; 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that set criteria for the development of any retail and commercial development outside of designated centres. These criteria include that the site must be accessible by sustainable transport</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy RC4 is screened out from AA.</p>

Page 1392

Policy	Text	Assessment
	<p>f) The proposal is not on land allocated for other uses. This especially applies to land designated for industry, employment and housing, where retail and commercial development can be shown to limit the range and quality of sites for such uses.</p> <p>Retail Impact Assessments will be required for retail and commercial developments outside the centres identified in the retail and commercial hierarchy in Strategic Policy S10, the content of which should be proportionate to the potential impact of the proposed use. The following floorspace thresholds will apply:</p> <p>a) Outside the CSCAs of Abergavenny, Caldicot, Chepstow & Monmouth – 500 sq.m gross</p>	
Community Infrastructure		
Strategic Policy S15 – Community and Recreation Facilities	<p>Development proposals that provide and/or enhance community and recreation facilities will be permitted within or adjoining settlement boundaries subject to detailed planning considerations.</p> <p>Development proposals that result in the unjustified loss of community and recreation facilities will not be permitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects existing community and recreation facilities and supports their provision in and adjoining settlements.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Strategic Policy S15 is screened out from AA.</p>

Page 1393

Policy	Text	Assessment														
Policy CI1 – Retention of Existing Community Facilities	<p>The change of use or conversion of neighbourhood or village shops, halls, public houses and other community facilities to other uses will only be permitted where all of the following criteria are met:</p> <ul style="list-style-type: none"> a) The local community would continue to be adequately served by facilities to which there is convenient access by sustainable travel; b) Evidence is provided that the existing use is no longer viable. In respect to commercially operated facilities evidence must be provided that the facility is no longer financially viable; c) Evidence is provided that appropriate marketing of the facility, whether in use or vacant, has been unsuccessful. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that set criteria for the change of use of community facilities.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy CI1 is screened out from AA.</p>														
Policy CI2 – Provision of Formal and Informal Open Space and Allotments/Community Growing Areas	<p>New development proposals will be assessed against the Council's standards for recreation facilities, open space, allotments and community growing, as set out below:</p> <table border="1" data-bbox="398 730 1496 1377"> <thead> <tr> <th data-bbox="398 730 604 842"></th> <th data-bbox="604 730 904 842">Open Space Typology</th> <th data-bbox="904 730 1178 842">Quantity Guideline (hectares per 1,000 population)</th> <th data-bbox="1178 730 1496 842">Definition</th> </tr> </thead> <tbody> <tr> <td data-bbox="398 842 604 1377" rowspan="3">FORMAL OUTDOOR SPACE</td> <td data-bbox="604 842 904 991">Playing pitches</td> <td data-bbox="904 842 1178 991">1.2 ha</td> <td data-bbox="1178 842 1496 991">Sports pitches including football rugby, hockey, lacrosse, cricket and American football</td> </tr> <tr> <td data-bbox="604 991 904 1198">All outdoor sports</td> <td data-bbox="904 991 1178 1198">1.6 ha</td> <td data-bbox="1178 991 1496 1198">Courts and greens comprising natural or artificial surfaces, including tennis courts, bowling greens, athletics tracks and other outdoor sports areas</td> </tr> <tr> <td data-bbox="604 1198 904 1377">Equipped/designated play areas</td> <td data-bbox="904 1198 1178 1377">0.25 ha</td> <td data-bbox="1178 1198 1496 1377">Local Area for Play (LAP) and Locally Equipped Areas for Play (LEAP) aimed at children who can play independently, as well as</td> </tr> </tbody> </table>		Open Space Typology	Quantity Guideline (hectares per 1,000 population)	Definition	FORMAL OUTDOOR SPACE	Playing pitches	1.2 ha	Sports pitches including football rugby, hockey, lacrosse, cricket and American football	All outdoor sports	1.6 ha	Courts and greens comprising natural or artificial surfaces, including tennis courts, bowling greens, athletics tracks and other outdoor sports areas	Equipped/designated play areas	0.25 ha	Local Area for Play (LAP) and Locally Equipped Areas for Play (LEAP) aimed at children who can play independently, as well as	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that set criteria for the provision of outdoor space and allotments and community growing.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy CI2 is screened out from AA.</p>
	Open Space Typology	Quantity Guideline (hectares per 1,000 population)	Definition													
FORMAL OUTDOOR SPACE	Playing pitches	1.2 ha	Sports pitches including football rugby, hockey, lacrosse, cricket and American football

				Neighbourhood Equipped Areas of Play (NEAP)	
		Other outdoor provision	0.3ha	All weather multi-use games areas (MUGA) including skateboard parks	
		Sub total	3.35ha		
	INFORMAL OUTDOOR SPACE	Parks and gardens	0.8ha	Green spaces including urban parks, country parks, forest parks and formal gardens	
		Amenity green space	0.6ha	Informal recreation spaces, public squares, communal green spaces in and around housing, village greens	
		Natural and semi -natural space	2.0ha	Woodland, scrub, grassland and open access land	
		Sub total	3.4ha		
	ALLOTMENTS & COMMUNITY GROWING	Allotments & Community growing	0.3ha	Allotments, community gardens and community orchards	

Policy	Text	Assessment
Policy CI3 – Safeguarding Existing Recreational Facilities, Public Open Spaces and Allotments/Community Growing	<p>Development proposals that involve the loss of land and facilities with recreational, open space, allotments and community growing uses will only be permitted where:</p> <ul style="list-style-type: none"> a) Alternative provision of at least equivalent community benefit is made available in the locality by the developer on a site acceptable to the local planning authority; or b) There is, and would be, an excess of accessible recreational facilities, public open space and allotments/community growing areas in the locality having regard to the standard as set out in Policy CI2. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that set criteria for developments resulting in the loss of land and recreational facilities.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy CI3 is screened out from AA.</p>
Policy CI4 – Areas of Amenity Importance	<p>Areas of Amenity Importance are identified on the Proposals Map. Development proposals that lead to the loss of Areas of Amenity Importance will not be permitted.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects areas of Amenity Importance.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy CI4 is screened out from AA.</p>
Minerals		
Strategic Policy S16 – Sustainable Minerals Management	<p>The Council will sustainably manage its mineral resources by:</p> <ul style="list-style-type: none"> i) Safeguarding known/potential land won sand and gravel, sandstone and limestone resources for future possible use; ii) Maintaining a minimum 10-year bank of crushed rock reserves throughout the Plan period in line with the requirements of the latest South Wales Regional Aggregates Working Party Regional Technical Statement on Aggregates; and iii) Encouraging the efficient and appropriate use of high-quality minerals and maximising the potential for the use of secondary and recycled aggregates as an alternative to primary won resources. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects areas of value as mineral resources.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy S16 is screened out from AA.</p>

Page 1396

Policy	Text	Assessment
Policy M1 – Local Building and Walling Stone	Proposals for new or the re-opening of small-scale quarries for building and walling stone for local conservation and heritage projects or new build to meet any unmet need will be permitted, subject to national planning policy and detailed planning considerations.	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that permits development of small quarries subject to national planning policies.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy M1 is screened out from AA.</p>
Policy M2 – Minerals Safeguarding Areas	<p>Development proposals which may impact on the minerals safeguarding areas shown on the Proposals Map will be considered against the following requirements, as applicable:</p> <ul style="list-style-type: none"> a) Proposals for permanent development uses within identified mineral safeguarding areas will not be approved unless: <ul style="list-style-type: none"> i) The potential of the area for mineral extraction has been investigated and it has been shown that such extraction would not be commercially viable now or in the future or that it would cause unacceptable harm to ecological or other interests; or ii) The mineral can be extracted satisfactorily prior to the development taking place; or iii) There is an overriding need for the development; or iv) The development comprises infill development within a built up area or householder development or an extension to an existing building. b) Proposals for development uses of a temporary nature within identified mineral safeguarding areas will not be approved unless they can be completed and the site restored to a condition that does not inhibit mineral extraction within the timescale that the mineral is likely to be needed. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that protects the mineral safeguarding zones from development.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy M2 is screened out from AA.</p>

Policy	Text	Assessment
Policy M3 – Mineral Site Buffer Zones	Development proposals for sensitive or minerals development will not be permitted within the mineral site buffer zones identified on the Proposals Map.	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that prevents development proposals within the mineral site buffer zones.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy M3 is screened out from AA.</p>
Waste		
Strategic Policy S17 – Sustainable Waste Management	<p>To facilitate the delivery of sustainable management of waste the Plan will:</p> <ul style="list-style-type: none"> i) Require waste proposals to conform to the principle of the waste hierarchy, supporting those that move waste up the hierarchy; ii) Support an integrated and adequate network of waste management installations that has regard to the nearest appropriate installation concept and self-sufficiency principles where necessary; iii) Identify suitable allocated and protected Class B2 industrial sites that are appropriate for in-building waste management treatment facilities, subject to detailed planning considerations; iv) Support the circular economy by encouraging the minimisation of waste production and the use of reused and recycled materials in the design, construction and demolition stages of development; and v) Ensure that provision is made for the sustainable management, sorting, storage and collection of waste in all new development. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a policy requiring waste to be sustainably managed with measures implemented to minimise the creation of waste.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy S17 is screened out from AA.</p>

Policy	Text	Assessment
<p>Policy W1 – Waste Management Facilities</p>	<p>Proposals for waste management facilities, except those involving the final deposit of waste on land at the site or open windrow composting, will be permitted within industrial sites (Class B2 of the Town and Country Planning Use Classes Order 1987) subject to detailed planning considerations, other RLDP policies and national and regional considerations.</p> <p>Where such proposals cannot be accommodated on existing or proposed Class B2 industrial sites they will be permitted provided that all the following conditions are met:</p> <ul style="list-style-type: none"> a) The proposal site is within settlement boundaries or existing and proposed industrial/business sites; and <p>There is a demonstrable need for the type and scale of development in that location.</p> <p>All proposals for waste management facilities should also comply with the following criteria:</p> <ul style="list-style-type: none"> i) Where energy is recovered as part of the waste management process the means of access to the appropriate national grid or identified end user is demonstrated; ii) Where appropriate, the maximum possible use is made of non-road transportation for the receipt of the waste arisings and the distribution of the output products; iii) There is no processing and no substantial storage of waste material in the open air; and iv) The proposals are compatible with adjoining land uses. <p>Development of sustainable waste management facilities in appropriate open countryside locations, including open windrow composting and anaerobic digestion, will be supported subject to detailed planning considerations.</p>	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that sets out the criteria for considering waste management proposals .</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy W1 is screened out from AA.</p>
<p>Policy W2 – Agricultural Land – Disposal of Inert Waste</p>	<p>Proposals to deposit inert waste on an agricultural holding that has been brought in from elsewhere for the purpose of agricultural improvement will only be permitted where:</p> <ul style="list-style-type: none"> a) A significant improvement in the agricultural land classification grade of the land will be achieved; b) It can be demonstrated that the improvement sought is essential for the purposes of agriculture within the holding and cannot be achieved by means other than by deposit of waste; c) The proposal involves depositing the minimum volume of waste consistent with achieving the agricultural land improvements sought; and d) Waste material capable of being economically recycled is not deposited on site. 	<p>There are no LSEs of this policy on European sites.</p> <p>This is a development management policy that controls the deposition of inert waste on agricultural land.</p> <p>The policy does not specify any quantum or location of housing and / or employment development.</p> <p>Overall, there are no impact pathways present and Policy W2 is screened out from AA.</p>

Policy	Text			Assessment
Policy W3 – Identified Waste Management Sites	The following sites are identified as having potential for the location of in-building waste management facilities, subject to detailed planning considerations:			<p>Potential likely significant effects on European sites.</p> <p>Although this policy states that suitability of these sites for waste uses will be subject to detailed planning considerations, it does indicate they are potentially suitable.</p> <p>Potential impact pathways are present:</p> <ul style="list-style-type: none"> • Atmospheric pollution • Recreational pressure • Loss of functionally linked land • Water quality • Water quantity, level and flow <p>This policy is therefore taken forward to appropriate assessment.</p>

1. Introduction

- 1.1 Monmouthshire County Council (MCC) has prepared a Replacement Local Development Plan (RLDP), setting out planned development from 2018 to 2033. The Council has commissioned AECOM Limited to conduct an air quality assessment to inform the Habitats Regulations Assessment (HRA) of the Regulation 18 Local Plan 2033.
- 1.2 The work presented in this report is to be used to inform the Appropriate Assessment of the HRA. It focuses on the impact of traffic related emissions due to planned development during the Local Plan period on sensitive ecosystems within River Wye, Severn Estuary, Wye Valley Woodlands, Cwm Clydach Woodlands and Usk Bat Sites Special Areas of Conservation (SAC). The River Wye, Cwm Clydach Woodlands and Wye Valley Woodlands SACs are mainly designated for beech and oak forest habitat, whilst the Severn Estuary and Usk Bat Sites SACs are mainly designated for bog, dry heath, sandflats, meadow and woodlands habitat. These habitats are all sensitive to nitrogen and acid deposition due to several reasons, such as soil acidification and toxicity to species (Natural England, 2018). It should be noted that the Cwm Clydach Woodlands and Usk Bat Sites are on the border with the Blaenau Gwent County Borough Council (BGCBC) and MCC areas and include transects in both counties, however, the assessment is of the impact of the MCC RLDP.
- 1.3 This assessment considers the following four key pollutants shown to affect sensitive ecosystems: ammonia (NH₃), oxides of nitrogen (NO_x), total nitrogen deposition and total acid deposition. All pollutants are considered at receptor points, within transects, up to 200m of the roadside, within the SACs considered in this assessment.
- 1.4 The main aims of this study are to:
 - Identify potentially sensitive ecological receptor locations within the SAC within 200m of roads that are expected to be affected by the Local Plan 2033;
 - Predict annual mean NO_x and NH₃ concentrations and nitrogen and acid deposition rates for the following scenarios at selected ecological receptors;
 - Baseline year (2024): represents current air quality situation in 2024;
 - Future Baseline (2033): uses the traffic data from the 'current baseline' in 2024, but applies future assessment year vehicle emission factors and background pollutant concentrations to allow for the 'in combination' assessment required for the HRA;
 - 2033 'Do Minimum': future assessment year which does not include the influence of planned development from the MCC Local Plan but does allow for strategic planned development in neighbouring local authorities; and
 - 2033 'Do Something': future assessment year which includes the influence of planned development from the MCC Local Plan and from strategic planned development in neighbouring local authorities.
 - Determine if there are any exceedances of NO_x and NH₃ critical levels, and nitrogen and acid deposition critical loads within the SAC.
- 1.5 The results and implications of the modelling outputs are presented in the accompanying HRA of the 'Monmouthshire Local Plan'. More detail on the Transport Assessment and associated modelling are available separately.

2. Policy Context

Clean Air Strategy

- 2.1 In 2019, the UK government released its Clean Air Strategy 2019 (Defra, 2019) as part of its 25 Year Environment Plan (Defra, 2018). These documents include targets to reduce emissions of ammonia from farming activities, and nitrogen oxides from combustion processes, and thus reduce the deposition of nitrogen to sensitive ecosystems.

Environment Act

- 2.2 The Environment Act 2021 (HM Government, 2021) amends the Environment Act 1995 (HM Government, 1995). On 9th November 2021, the Act received Royal Assent after being first introduced to Parliament in January 2020 to address environmental protection and the delivery of the Government's 25 Year Environment Plan. It includes provisions to establish a set of statutory environmental principles to ensure environmental governance through an environmental watchdog, the Office for Environmental Protection (OEP).
- 2.3 The Secretary of State must publish a review report every five years (as a minimum and with yearly updates to Parliament). The 25 Year Environment Plan has been adopted as the first Environmental Improvement Plan (EIP) of the Environment Act 2021, with long-term legally binding targets being finalised by Defra¹. The EIP 2023 was published in January 2023 (updated February 2023), building on the 25 Year Environment Plan, and setting out how the delivery of environmental goals will be coordinated with landowners, communities and businesses.

Habitats Regulations Assessment

- 2.4 While the UK is no longer a member of the EU, a requirement for HRA will continue as set out in the Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019.
- 2.5 The HRA process applies the 'Precautionary Principle'² to European sites³. Plans and projects can only be permitted having ascertained that there will be no adverse effect on the integrity of the European site(s) in question. To ascertain whether or not site integrity will be affected, an Appropriate Assessment should be undertaken of the Plan or project in question.
- 2.6 Following evidence gathering, the first stage of any HRA is the screening for Likely Significant Effects (LSEs), a high-level assessment to decide whether the Appropriate Assessment is required. Where it is determined that a conclusion of 'no Likely Significant Effects' cannot be drawn, the analysis proceeds to the Appropriate Assessment.

Other Guidance documents

- 2.7 Best practice and advice / guidance contained within documents from Natural England (Natural England, 2018), the Institute of Air Quality Management (IAQM) (IAQM, 2020), the Chartered Institute of Ecology and Environmental Management (CIEEM) (CIEEM, 2021) and National Highways (Design Manual for Roads and Bridges DMRB LA105) (DMRB, 2019) have been used to determine the methodology applied, and in the accompanying ecological interpretation of the results.

Critical Levels

- 2.8 Annual mean critical levels of NO_x and NH₃ are summarised in Table 1. These are concentrations above which adverse effects on ecosystems may occur based on present knowledge. The critical level for NO_x is taken from the EU Ambient Air Quality Directive 2008/50/EU (EU Directives, 2008) which has also

¹ <https://www.gov.uk/government/news/update-on-progress-on-environmental-targets>

² The Precautionary Principle, which is referenced in Article 191 of the Treaty on the Functioning of the European Union, has been defined by the United Nations Educational, Scientific and Cultural Organisation (UNESCO, 2005) as: "When human activities may lead to morally unacceptable harm [to the environment] that is scientifically plausible but uncertain, actions shall be taken to avoid or diminish that harm. The judgement of plausibility should be grounded in scientific analysis".

³ <https://www.gov.uk/guidance/habitats-regulations-assessments-protecting-a-european-site> - "A European site is protected by the Conservation of Habitats and Species Regulations 2017 as amended (known as the Habitats Regulations)". These include Special Areas of Conservation (SACs), Special Protection Areas (SPAs), and Ramsar sites (wetlands of international importance).

been set as the Air Quality Strategy objective for the protection of vegetation and ecosystems and has been incorporated into English legislation.

- 2.9 The EU Directive (EU Directives, 2008) states that the sampling point to determine compliance should be sited more than 20 km away from agglomerations or more than 5 km away from other built-up areas, industrial installations or motorways or major roads with traffic counts of more than 50,000 vehicles per day, which means that a sampling point must be sited in such a way that is representative of an area of at least 1,000 km². Applying the critical level for NO_x to designated nature conservation sites that are located close to busy roads is therefore precautionary.
- 2.10 The critical levels for NH₃ have not been incorporated into legislation and are a recommendation made by the United Nations Economic Commission for Europe (UNECE) Executive Body for the Convention on Long-Range Transboundary Air Pollution (CLRTAP) (UNECE, 2013).

Table 1: Annual Mean Critical Levels (NO_x and NH₃)

Pollutant	Critical Level
Oxides of nitrogen (NO _x)	30 µg/m ³
Ammonia (NH ₃)	3 µg/m ³ for higher plants 1 µg/m ³ for lichens and bryophytes

Planning Policy Wales

- 2.11 Planning Policy Wales (PPW) sets out the land use planning policies of the Welsh Government. Llywyr Newydd: The Wales Transport Strategy (2021-2040).
- 2.12 Llywyr Newydd, the Wales Transport Strategy (Llywodraeth Cymru, 2021), provides the strategic policy framework for transport-related activities in Wales. It sets out a long-term vision for transport over the next 20 years and outlines priorities for the next five years.

Strategic Framework

- 2.13 Llywyr Newydd establishes two tiers of transport plans:
- National Transport Delivery Plan (NTDP) (2022-2027): This plan outlines specific projects, schemes, initiatives, or interventions to be undertaken in the next five years. It identifies expenditure based on the Strategy’s priorities, including ongoing projects. The NTDP supports the implementation of Future Wales – the National Plan 2040 and aligns with the Wales Infrastructure Investment Plan. It will be reviewed every five years and replaces the current National Transport Finance Plan (Llywodraeth Cymru, 2023).
 - Regional Transport Plans: These statutory documents, developed by Corporate Joint Committees, aim to deliver the ambitions and priorities of Llywyr Newydd. Covering north, mid, southeast, and southwest Wales, these plans will replace the Local Transport Plans approved in 2015.

Integration of Land Use and Transport Planning

- 2.14 Land use and transport planning must be integrated to ensure cohesive development. The planning system should enable integration within and between different types of transport, land use planning, environmental policies, and policies for education, health, social inclusion, and wealth creation.

Development Plans

- 2.15 Development plans are the primary means to achieve integration between land use and transport planning. They must explain the authority’s transport aims, how transport policies support other plan objectives, and how the development plan will support sustainable transport.

Integrated Planning and Transport Strategy

- 2.16 Planning authorities must set out an integrated planning and transport strategy in their development plans. This strategy should:

- Integrate and coordinate sustainable transport and land use planning
- Facilitate and promote accessibility for all
- Improve physical and digital connectivity
- Reduce the need to travel
- Reduce dependency on private vehicles
- Prioritize and support walking, cycling, and public transport
- Support the uptake of Ultra Low Emission Vehicles (ULEVs)
- Reduce transport-related airborne pollution
- Facilitate the provision of necessary transport infrastructure and sustainable transport improvements

Sustainable Transport

- 2.17 The Welsh Government is committed to reducing reliance on private cars and supporting a shift to walking, cycling, and public transport. This contributes to decarbonization, improves air quality, increases physical activity, and improves public health, aligning with the Well-being of Future Generations Act.
- 2.18 The planning system has a crucial role in reducing the need to travel and supporting sustainable transport by:
- Siting developments in locations easily accessible by sustainable travel modes
 - Designing developments to integrate with existing land uses and neighbourhoods
 - Facilitating short journeys by walking and cycling
- 2.19 Development proposals must maximize accessibility by walking, cycling, and public transport. This includes providing appropriate on-site infrastructure and, where necessary, mitigating transport impacts through off-site measures like developing active travel routes and bus priority infrastructure. Sustainable transport infrastructure and services should be prioritized and implemented before occupancy to establish sustainable travel patterns from the outset.

Sustainable Transport Hierarchy

- 2.20 Welsh Government policy mandates the use of a sustainable transport hierarchy in new developments, prioritizing walking, cycling, and public transport over private motor vehicles. This hierarchy aims to reduce travel needs, prevent car-dependent developments, and support schemes designed to facilitate active and sustainable transport.
- 2.21 The sustainable transport hierarchy should guide the preparation of development plans, site allocations, and planning application decisions. Careful consideration is needed to ensure new sites generating significant movement include provisions for walking, cycling, and public transport, and address any airborne pollution implications.

Active and Social Streets

- 2.22 Well-designed, people-oriented streets are fundamental to creating sustainable places. New developments should enhance place quality and create safe, social, attractive streets prioritizing pedestrians, cyclists, and public transport users. This includes integrating green infrastructure to filter pollutants, manage water, and provide urban cooling and habitats.

Public Transport and Ultra Low Emission Vehicles

- 2.23 Public transport accessibility is vital for sustainability, reducing dependency on cars for medium and long journeys. Development should be directed to locations with good public transport access, with site layouts and densities supporting public transport use.
- 2.24 To encourage ULEV adoption, the planning system should support the provision of ULEV charging points in new developments, integrating them into the overall design for maximum benefits. Charging points should be accessible, well-lit, and use renewable energy where possible.

Traffic Management and Car Parking

- 2.25 Traffic management aims to reduce traffic levels and speed in new developments, ensuring streets are designed for low speeds. Car parking provision should adopt a design-led approach, minimizing reliance on private cars and integrating parking into development designs without dominating the space.
- 2.26 Transport Assessments are crucial for understanding and mitigating development impacts on transport networks, promoting sustainable travel options, and minimizing air and noise pollution. They provide the basis for preparing Travel Plans, essential for managing transport impacts during and post-construction

3. Methodology

- 3.1 The Local Development Plan will significantly increase the population and employment opportunities within Monmouthshire County, which may result in more commuter and other journeys being undertaken within 200m of sensitive habitats. Therefore, Likely Significant Effects (LSEs) cannot be excluded, and the aforementioned European sites have been screened in for Appropriate Assessment regarding this impact pathway. This is in accordance with Natural England's approach to advising competent authorities on the assessment of road traffic emissions under the Habitats Regulations (Natural England, 2018).
- 3.2 As such, the air quality modelling methodology and analyses presented in this report have been undertaken to inform the HRA for the River Wye, Wye Valley Woodlands, Cwm Cyldach Woodlands, Usk Bat Sites and Severn Estuary SACs, which contain habitats and species that are sensitive to air quality impacts.
- 3.3 The following sections outline the methodology used to model air quality in the identified SACs, affected by changes to traffic associated with the Monmouthshire RLDP 2033. The following sources of information and data have been used to form the basis of the air quality assessment:
- Department for Environment, Food and Rural Affairs' (Defra) Air Quality Background Concentration Maps based on a 2018 base year (Defra, 2020a);
 - Defra's Vehicle Emission Factors (Defra, 2023);
 - Driver Vehicle Licencing Agency (DVLA) statistics on licensed road-using cars and light goods vehicles dataset for 2022 (DVLA, 2022);
 - Department for Transport's (DfT) Transport Decarbonisation Plan of future vehicle fleet projections (DfT, 2022);
 - Emission rates as published in the Calculator for Road Emissions of Ammonia (CREAM) tool (Air Quality Consultants, 2020);
 - 1x1 km modelled nitrogen and acid deposition data and ammonia background concentrations from the Air Pollution Information System (APIS, 2024);
 - Traffic count and speed data provided by the AECOM Transport Consultant for 2024 and 2033.
- 3.4 The modelling assessment was conducted following methodology within Defra's Local Air Quality Management Technical Guidance (LAQM.TG(22)) (Defra, 2022), and guidance contained within documents from Natural England (Natural England, 2018), the Institute of Air Quality Management (IAQM) (IAQM, 2020) and the Chartered Institute of Ecology and Environmental Management (CIEEM) (CIEEM, 2021).

Traffic Data

- 3.5 Traffic data were provided for the M48 Severn Bridge crossing near the Severn Estuary and River Wye SACs (covering transects E01a/b and E02a/b), for A466 near the Wye Valley Woodlands and River Wye SACs, for A40 near the River Wye SAC, and for the A465 near the Cwm Clydach Woodlands and Usk Bat Sites SAC (covering transects E06 and E07a/b). These roads are expected to experience changes in traffic flows over the Local Plan period to 2033. As such, an air quality effect due to emissions from additional traffic growth on these roads may occur. The modelled road links are shown in Figure 1 to Figure 6.
- 3.6 Traffic data were provided in the form of 24-hour Annual Average Daily Traffic (AADT) flows, with percentage heavy duty vehicle (HDV) flows and average speed for three scenarios – 2024 baseline (also used for the future baseline), future year 2033 'Do Minimum', and future year 2033 'Do Something' Scenario representing implementation of the Local Plan. A summary of the traffic data used in the air quality assessment is given in Annex A.1.

Modelled Vehicle Fleet

- 3.7 Version 12.0.1 of the Emissions Factor Toolkit (EFT) (Defra, 2023) includes a basic vehicle fleet mix for roads in England (excluding London) up to 2050. The basic vehicle fleet splits are based on data provided by DfT / Highways England (now National Highways). The composition of Euro emission standards and distribution of vehicle sizes/weights remain constant from 2030 until 2050. The intended use of the extended dataset to 2050 is in support of climate assessments and appraisals only. However, Defra advises that “Where emissions are to be used after 2030 to inform air quality assessments, the appropriate caveats around the limitations of the analysis must be included to accompany the assessment”.
- 3.8 For the baseline modelling of the SACs, the nominal EFT v12.0.1 “Basic Split” rural fleet for the 2024 year was used, as this aligns well with the 2024 base year traffic data and suitable meteorological data within the last 5 years of the baseline year, 2024, was used.
- 3.9 For the future year (2033) modelling, an approach has been taken to determine the vehicle fleet used in the modelling to apply a more up-to-date projection than that published in the EFT v12.0.1 in relation to the uptake of hybrid and zero emission / battery electric vehicles. A current vehicle fleet representative of the local area was determined, which was then projected forward to the future year (2033) following the methodology below.
- 3.10 The current (2022) fleet composition, from which the 2033 fleet projection is based, is derived from the most up-to-date available full-year dataset (2022) of registered light-duty vehicles (LDV) from DVLA (DVLA, 2022). A high-level review of the fleet characteristics was conducted for Monmouthshire County Council and neighbouring counties. Based on the relative similarities in vehicle type breakdown, it was decided to use the county-level fleet for Monmouthshire to represent the modelled fleet.
- 3.11 Light Duty Vehicles (LDVs), which are mainly cars and light goods vehicles (LGVs), comprise the majority of vehicles in the overall fleet (between approximately 91% and 97%), and therefore this dataset will give a robust and accurate starting point for future fleet projections. Heavy Duty Vehicles (HDVs) made up of buses, coaches and HGVs), which comprise the remaining ~3-9% of the fleet, have been apportioned based on the EFT basic split for 2033. The exact LDV/HDV split varies according to the provided traffic data and depends on the road link, and the fleet breakdown for each road link takes this split into account.
- 3.12 Transport projections out to 2050 of UK’s intended decarbonisation of the fleet and alignment with Net Zero are available from the DfT’s Transport Decarbonisation Plan (TDP) (DfT, 2022). These projections are based on high and low ambition for rates of decarbonisation for every year up to 2050. These projections were adjusted to determine the breakdown of individual fuel types in line with the EFT v12.0.1.
- 3.13 To take a more cautious approach, the lower ambition “Decarbonising Transport Upper” projection was used to project the 2022-based current fleet out to the future year of 2033, by using the calculated year-on-year car, LGV and HDV growth rates for each vehicle fuel type. This projection was deemed to represent a more cautiously realistic scenario than either the EFT v12.0.1 or TDP baseline projections.

Pollutants of Interest

- 3.14 The pollutants of interest with regard to sensitive ecosystems for which critical levels and critical loads exist, and which are included in the air quality modelling and assessment of impacts on the five SACs listed above, are NO_x, NH₃, and nitrogen and acid deposition. Modelling of these pollutants is undertaken to assess the air quality impacts of planned development in the Local Plan on the SACs alone, and ‘in combination’ with existing plans within surrounding authorities.
- 3.15 Whilst emissions of NO_x from road vehicles are regulated according to Euro standards, emissions of NH₃ are not. This means that emissions of NH₃ from individual vehicle types are highly uncertain, particularly as measurements are rarely made (as this is not required for regulatory purposes). The uncertainty associated with the predicted nitrogen deposition rates from NH₃ is also greater than for NO₂, with the NH₃ derived nitrogen deposition rates representing an upper estimate.
- 3.16 There is currently no tool publicly available for the assessment of road traffic emissions of NH₃ from National Highways, Defra, Natural England, or other nature conservation bodies. However, there is

evidence that exclusion of NH₃ from assessments leads to an underestimate of deposited nitrogen (Air Quality Consultants, 2020).

- 3.17 The methodology used to model NH₃ concentrations from road traffic, using ADMS Roads, and the subsequent contribution to nitrogen deposition within the SACs (described below), is considered the most appropriate that is available at this time. The methodology has been applied by AECOM in several Appropriate Assessments to inform HRA including those for Selby District, Horsham District, Test Valley Borough and Epping Forest District Councils.

Nitrogen Oxides

- 3.18 Defra's EFT contains NO_x emissions rates for local authorities to use for Local Air Quality Management (LAQM) assessments. The EFT is also used for other purposes including Environmental Impact Assessments (EIAs) and HRAs.
- 3.19 The EFT was used to calculate vehicle emissions in 2024 and 2033 assessment years using the fleet data which was calculated using the approach set out in paragraph 3.7 to 3.13.
- 3.20 Detailed dispersion modelling of road traffic emissions of NO_x has been undertaken using the latest version of ADMS Roads (currently v5), EFT v12.0.1 emission rates, and custom vehicle fleet projections from the DfT for the future year 2033 scenarios. The subsequent contribution of emitted NO_x to nitrogen deposition within the SAC has also been assessed.

Ammonia

- 3.21 In February 2020, Air Quality Consultants developed and published the Calculator for Road Emissions of Ammonia (CREAM) tool, *'in order to allow tentative predictions regarding trends in traffic-related ammonia emissions over time'*. The tool is based upon remotely sensed pollutant measurements, published real-world fuel consumption data, and ambient measurements of ammonia recorded in Ashdown Forest (2014-2016).
- 3.22 The report that was published alongside the CREAM tool states that:
- "It should be recognised that these emissions factors remain uncertain. Using them to make future year predictions will clearly be an improvement on any assessment which omits ammonia. They are also considered to be more robust than the emissions factors contained in the EEA Guidebook, which risk significantly under-predicting ammonia emissions. The emissions factors contained in the CREAM model can be considered to provide the most robust estimate of traffic-related ammonia possible at the present time, but they may be updated in the future as more information becomes available."*
- 3.23 The CREAM tool currently uses vehicle fleet information from Defra's EFT v9 which has now been superseded. AECOM has therefore applied the ammonia emission factors, as derived by Air Quality Consultants and in the current version of CREAM, with the vehicle fleet on rural roads from EFT v12.0.1, following the same vehicle fleet methodology as listed above, to estimate emissions in the SACs.
- 3.24 The latest version of ADMS Roads has been employed to model the dispersion of emissions of NH₃ from road traffic, consistent with the approach for modelling emissions of NO_x.

Figure 1: Modelled Road Network and Ecological Receptor Transects (Eco Transects E01a/b and E02a/b).

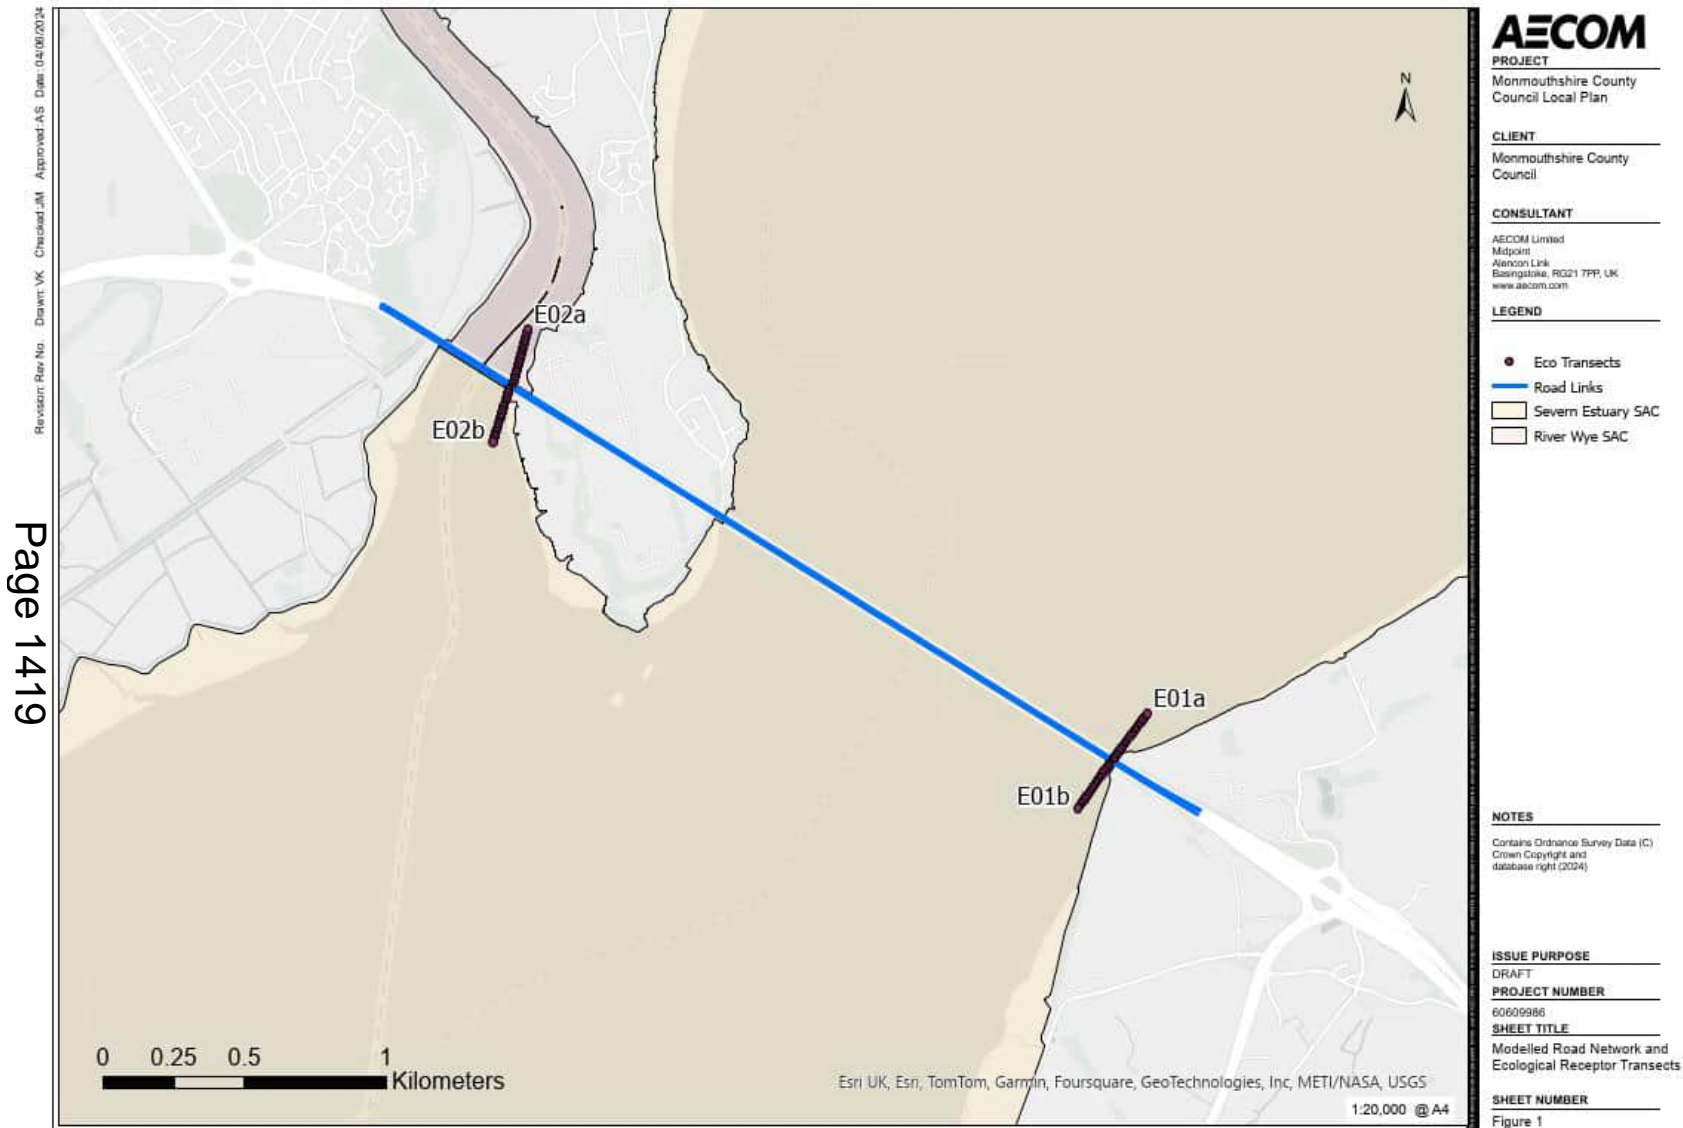

Figure 2: Modelled Road Network and Ecological Receptor Transects (Eco Transect E03)

Figure 3: Modelled Road Network and Ecological Receptor Transects (Eco Transect E04)

Figure 4: Modelled Road Network and Ecological Receptor Transects (Eco Transect E05)

Figure 5: Modelled Road Network and Ecological Receptor Transects (Eco Transect E06)

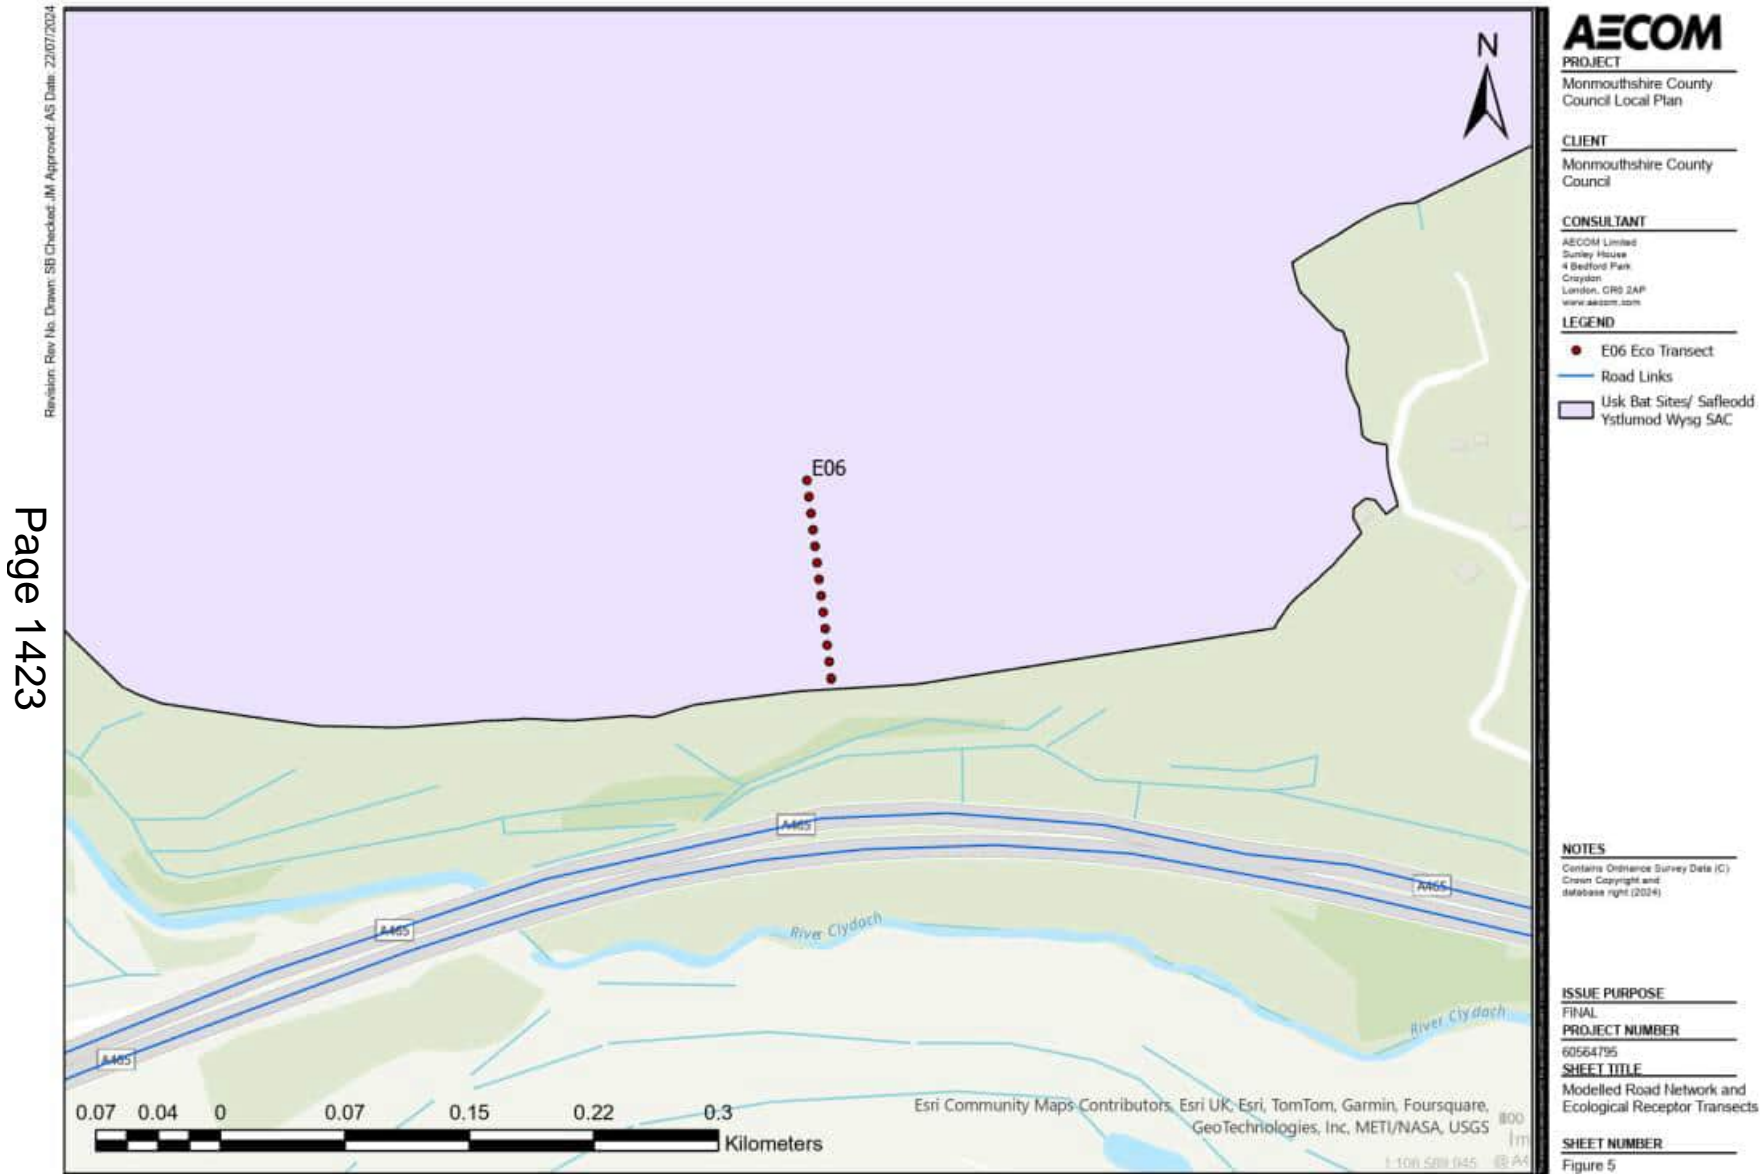

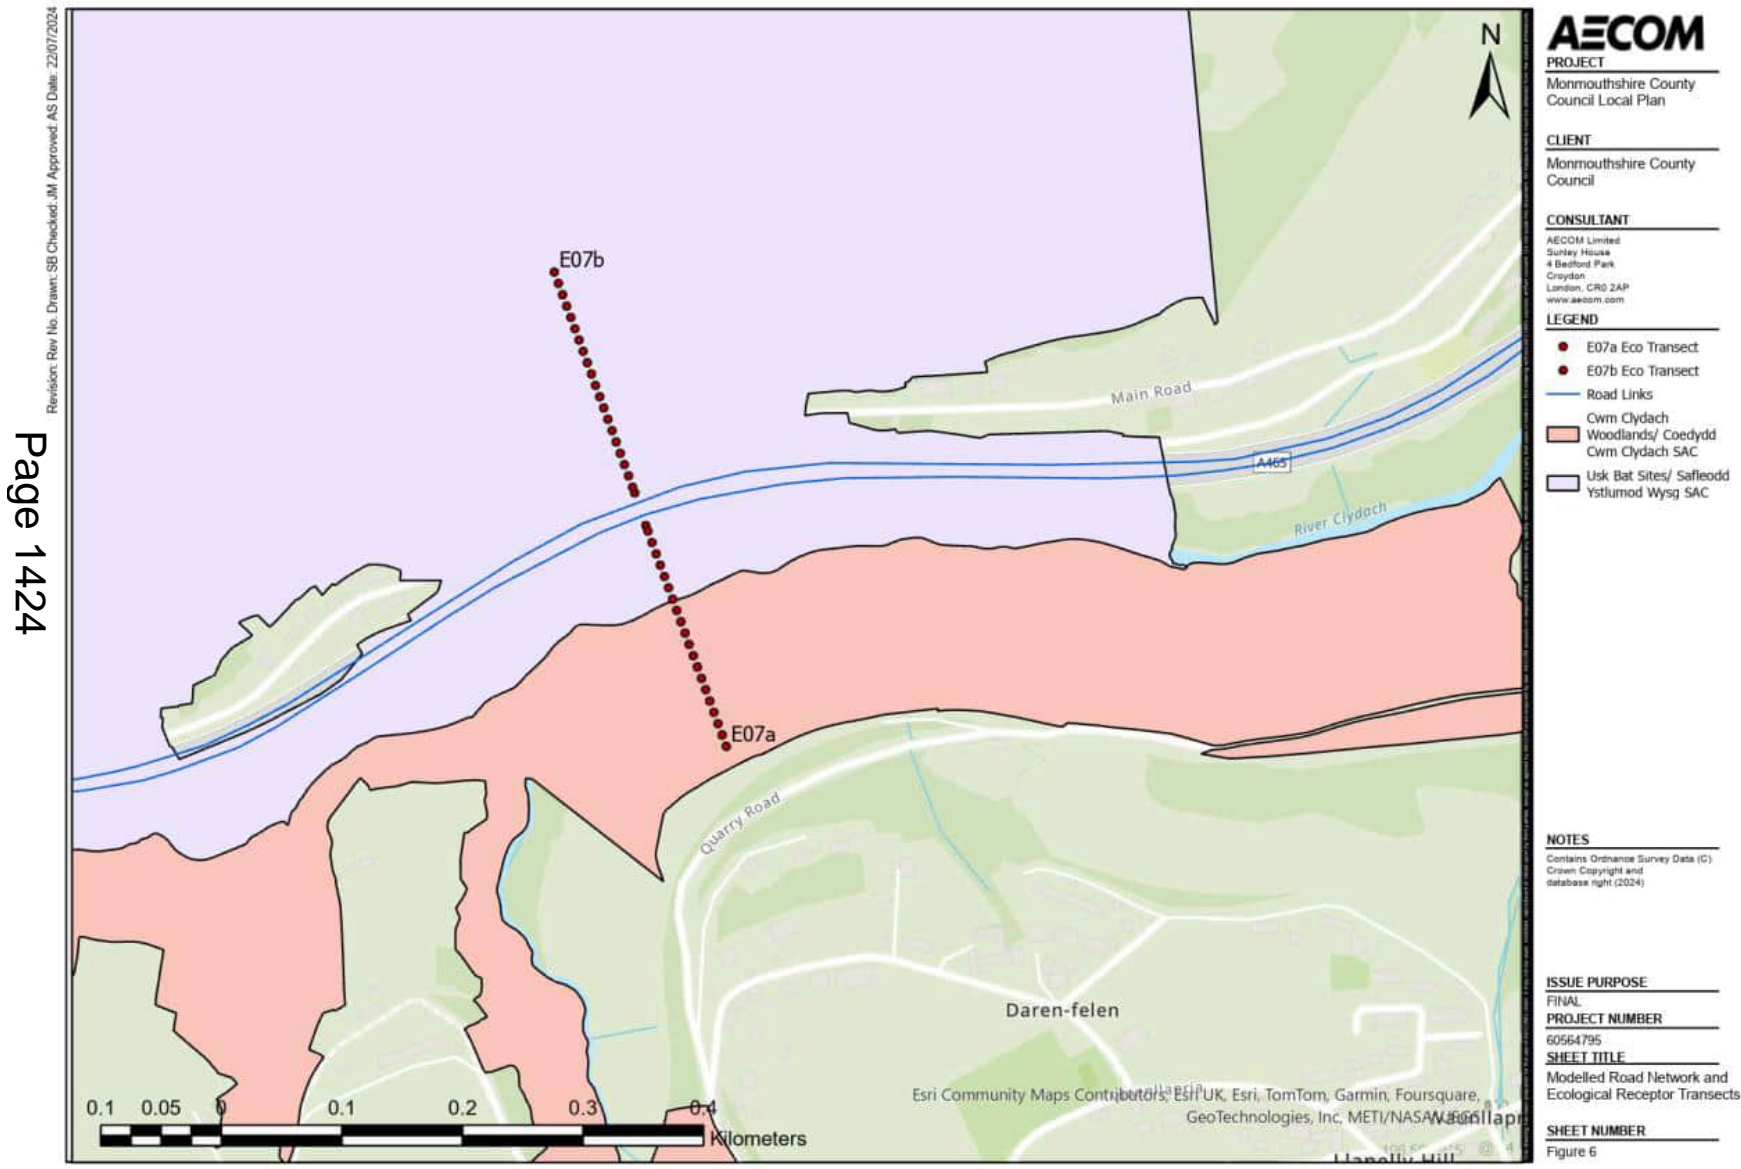

Figure 6: Modelled Road Network and Ecological Receptor Transects (Eco Transect E07a/b)

Receptors

- 3.25 Pollutant concentrations and deposition rates have been predicted along defined transects through the SACs within 200m of affected roads, in accordance with National Highways guidance for ecological assessments (LA105) (DMRB, 2019) and Natural England guidance (Natural England, 2018). The greatest impacts from changes in road traffic emissions will be observed and modelled closest to the roadside. Consideration of the road network within 200m of the SAC is therefore considered robust as background concentrations utilised in the assessment will account for all other sources that are not defined explicitly in the model.
- 3.26 The locations of the ecological transects relevant to this project were agreed with MCC and other stakeholders. The transects are situated at key locations where the greatest impacts upon each of the five SACs assessed are likely to occur. The locations are presented in Figure 1 to Figure 6 and further details are presented in Annex A.2.
- 3.27 For each SAC, the receptors are situated at the closest point to the road within the SAC, and spaced every 10m within the transect, up to 200m from the roadside. All receptors are modelled at ground level (0m height).
- 3.28 The greatest impacts will generally occur where both the greatest change in traffic flows is expected and the most sensitive SAC habitat lies closest to the road. This information has been used to select the transect locations. The usual approach is to place a transect on a modelled link (sometimes having a transect either side of the road to account for differences in the dispersion of emissions due to meteorology), with each link being defined as a stretch of road with changes in emissions i.e. where there are changes in traffic flows and/or speeds.
- 3.29 The modelled transects presented in Figure 1 to Figure 6 provide good coverage of the SACs.

Model Setup

- 3.30 As detailed above, road traffic emissions of NO_x were derived using Defra's EFT v12.0.1 and associated guidance and tools (Defra, 2023). For the base year (2024), the nominal EFT "Basic Split" rural vehicle fleet for 2024 was used, whereas for all the future year (2033) scenarios, the 2033 projected vehicle fleet, as described in the methodology above, was used with the default EFT emission factors for the latest year available (2030). Road traffic emissions of NH₃ were derived using emission rates taken from CREAM V1A (Air Quality Consultants, 2020) combined with the EFT v12.0.1 vehicle fleet for the relevant year, using the same vehicle fleet methodology as described above for NO_x.
- 3.31 Detailed dispersion modelling was undertaken using the current version of ADMS-Roads (v5.0) to model concentrations of NO_x and NH₃ using the parameters in Table 2 for the following scenarios:
- 2024 Baseline – 2024 AADT, 2024 emission factors and 2024 "Basic Split" fleet, and 2024 background concentrations;
 - 2033 Future Baseline – 2024 AADT, 2030 emission factors (latest available year), 2033 projected vehicle fleet (ANPR-adjusted), and 2030 background concentrations (the latest projected year available from Defra);
 - 2033 Do Minimum – 2033 AADT without Local Plan but with all committed development, 2030 emission factors, 2033 projected vehicle fleet, and 2030 background concentrations; and
 - 2033 Do Something – 2039 AADT with Local Plan and all committed development using 2030 emission factors, 2033 projected vehicle fleet, and 2030 background concentrations.
- 3.32 A baseline year was modelled, using 2024 traffic data although it was not possible to undertake a model verification exercise due to a lack of suitable monitoring in the model domain, and as such, standard verification factors based on previous project experience and professional judgment were applied. To support the assessment of the potential impact of the planned development in the Local Plan scenarios, a 'future baseline' and future year 'do minimum'

scenario were modelled. The ‘do minimum’ scenario includes the influence of development in neighbouring local authorities, whereas the ‘future baseline’ does not.

- 3.33 The future baseline is a hypothetical scenario as it applies improvements in vehicle emissions standards to the baseline vehicle fleet without allowing for any traffic growth. However, such an approach enables the ‘in combination’ effect of development and traffic growth to be seen unobscured by improvements in emissions technology / performance.
- 3.34 The difference between the ‘do something’ and the ‘do minimum’ scenarios provide the impact of the planned development within the Local Development Plan, alone. The difference between the ‘do something’ and the ‘future baseline’ scenarios provides a thorough and precautionary assessment of the impact of the planned development within the Local Plan ‘in combination’, as the ‘future baseline’ accounts for no future growth.

Table 2: General ADMS-Roads Model Conditions

Variables	ADMS-Roads Model Input
Surface roughness at source	0.5m
Surface roughness at Meteorological Site	0.2m
Minimum Monin-Obukhov length for stable conditions	30m
Terrain types	Complex terrain (E03, E04, E05, E06, E07a/b) Flat (E01a/b, E02a/b)
Receptor location	x, y coordinates determined by GIS, z = 0m for ecological receptors.
Emissions	NO _x – Defra’s EFT v12.0.1 NH ₃ – CREAM V1A
Meteorological data	hourly sequential data from a numerical weather prediction (NWP) reanalysis dataset, centred on the following locations (lat/lon): 51.61°N, 2.70°W (E01a/b, E02a/b) (2023) 51.74°N, 2.63°W (E03, E04, E05) (2023) 51.77°N, 3.38°W (E06, E07a/b) (2022)
Receptors	Ecological transects
Model output	Long-term (annual) mean NO _x and NH ₃ concentrations.

Complex Terrain

- 3.35 Due to the influence of steep-sided valley topography on meteorological conditions, air flow and pollutant dispersion conditions around transects E03, E04, E05, E06 and E07a/b, the complex terrain module in ADMS-Roads was activated for modelling these transects. Terrain data for the study area from the Shuttle Radar Topography Mission (SRTM) was downloaded from the CGIAR Consortium for Spatial Information (CSI) website⁴, via the ADMS-Roads “download terrain data” link. The SRTM terrain data is 30m spatial resolution at the equator, or approx. 50m at UK latitude, and was processed into an ADMS-Roads terrain file (.ter) covering the area encompassing the E03, E04, E05, E06 and E07a/b transects using a GIS application. Transects E01a/b and E02a/b were not affected by steep or complex terrain and were therefore modelled without the use of a complex terrain file.

Plume Depletion

- 3.36 Plume depletion due to dry deposition onto vegetation was considered in the model, which was enabled by using the ADMS-Roads ‘Dry Deposition’ module. The short vegetation or ‘grassland’ deposition rates presented in the Air Quality Technical Advisory Group (AQTAG) deposition velocities that are cited in 2020 IAQM guidance (IAQM, 2020), as shown in Table 3, were applied to transects E01a/b and E02a/b. The ‘forest’ deposition rates were applied to transects E03, E04,

⁴ CGIAR Consortium for Spatial Information (CSI). Available at <https://srtm.csi.cgiar.org/srtmdata/>

E05, E06 and E07a/b as along most of the transect length there was long vegetation in the form of forests.

- 3.37 The deposition velocity for NO₂ was applied to raw modelled NO_x. This assumes that 100% of NO_x is emitted as NO₂, and therefore represents an optimistic depletion of NO_x from the atmosphere.

Table 3: Nitrogen Deposition Velocities and Conversion Rates

Pollutant	Habitat	Nitrogen deposition conversion rates	Deposition velocity
NO ₂	Grassland	1 µg/m ³ NO ₂ = 0.14 kgN/ha/yr	0.0015 m/s
NO ₂	Forest	1 µg/m ³ NO ₂ = 0.29 kgN/ha/yr	0.003 m/s
NH ₃	Grassland	1 µg/m ³ NH ₃ = 5.2 kgN/ha/yr	0.020 m/s
NH ₃	Forest	1 µg/m ³ NH ₃ = 7.8 kgN/ha/yr	0.030 m/s

Meteorological Data

- 3.38 Three sets of hourly sequential numerical weather prediction (NWP) reanalysis data at locations 51.61°N, 2.70°W, 51.74°N, 2.63°W, 51.77°N, 3.38°W have been used in this modelling assessment. Meteorological data within the last 5 years of the baseline year, were used as they were deemed most suitable for comparison with baseline traffic data and emission factors. The former location being used to model transects E01a/b and E02a/b, the second location to model transects E03, E04 and E05, and the third to model transects E06 and E07a/b. The first station is located approximately 4km south-west of the River Wye and Severn Estuary SACs, the second station is located approximately 10km south of the Wye Valley Woodlands SAC, and the third station is located approximately 16km south-west, Cwm Clydach Woodlands and Usk Bat Sites SACs. All sites experience meteorological conditions that are representative of those within the air quality study area.
- 3.39 Figure 7, Figure 8 and Figure 9 show that the dominant direction of wind was from the west/south-west, as is typical for the UK.

Background Data

3.40 Background concentrations of nitrogen dioxide (NO₂) and NO_x for 2024 and 2030 were sourced from Defra’s 2018-based 1x1km background maps in the study area (Defra, 2020a). 2030 is the latest year for which background maps are published and, as concentrations of NO₂ and NO_x are predicted to reduce further in the future, is considered to be a worst-case representation of conditions in 2033.

3.41 It was decided to not remove explicitly modelled source sectors from the NO₂ and NO_x background concentrations, in order to give a worst-case assessment. The data presented in Table 4 show that the concentrations are predicted to decrease between 2024 and 2030.

3.42 The NH₃ background concentrations from APIS are presented in Table 5 on page 25.

Table 4: Defra Mapped Background Pollutant Concentrations

Transects	Road Name	Grid Square (X, Y)	Annual Mean Concentrations (µg/m ³)			
			2024 NO ₂	2024 NO _x	2030 NO ₂	2030 NO _x
E01a	M48	356500, 189500	6.40	8.11	5.44	6.84
E01b	M48	356500, 189500	6.40	8.11	5.44	6.84
E02a	M48	354500, 191500	6.20	7.84	5.26	6.61
E02b	M48	354500, 191500	6.20	7.84	5.26	6.61
E03	A466	353500, 208500	3.76	4.67	3.37	4.17
E04	A466	352500, 211500	4.08	5.07	3.59	4.45
E05	A40	352500, 213500	5.23	6.55	4.35	5.42
E06	A465	318500, 213500	4.44	5.54	3.93	4.89
E07a	A465	321500, 212500	5.04	6.31	4.27	5.31
E07b	A465	321500, 212500	5.04	6.31	4.27	5.31

Note: Modelled source sectors have not been removed from the total background.

Ecological Data

- 3.43 APIS provides 'a searchable database and information on pollutants and their impacts on habitats and species'. Data for the appropriate habitats, both forest and grasslands, have been applied for each receptor along the transects. This includes critical loads of nitrogen and the average nitrogen and acid deposition rates to the habitat, as presented in Table 5.
- 3.44 Background concentrations of ammonia were also sourced from 5x5 km modelled maps available from APIS, whereas background concentrations of NO_x and NO₂ were sourced from Defra's latest 1x1 km maps, thereby accounting for all sources that are not explicitly defined in the model.
- 3.45 In order to create a robust and scientifically agreed projection for background nitrogen deposition trends in the UK, even allowing for growth, the Joint Nature Conservation Committee (JNCC) commissioned the Nitrogen Futures project, which reported in 2020 (JNCC, 2020). The JNCC Nitrogen Futures project investigated whether a net improvement in nitrogen deposition (including expected development over the same period) was expected to occur to 2030 under a range of scenarios ranging from the most cautious scenario (Business As Usual, BAU, reflecting simply existing emission reduction commitments /measures already in place) to much more ambitious scenarios that would require varying amounts of additional, currently uncommitted, measures from the UK government and devolved administrations.
- 3.46 The report concluded that *'The scenario modelling predicts a substantial decrease in risk of impacts on sensitive vegetation by 2030, under the most likely future baseline [a scenario called '2030 NAPCP+DA (NECR NO_x)']'. This is estimated to achieve the UK Government's Clean Air Strategy (CAS) target for England, defined as a 17% decrease in total reactive N deposition onto protected priority sensitive habitats, with a predicted 18.9% decrease [for England] from a 2016 base year'*. The report predicted a fall in nitrogen deposition by 2030 under every modelled scenario, including the most cautious (2030 BAU). For the BAU scenario nitrogen deposition was forecast to decrease between 2017 and 2030 from 277.1 kt N to 239.5 kt N (i.e. a reduction of 37.6 kt N).
- 3.47 Background nitrogen deposition at Ashdown Forest was specifically discussed in Annex 5 of the report as a case study. The report predicted a 1-2 kgN/ha/yr reduction in background nitrogen deposition to low growing vegetation (i.e. the heathland interest feature) at the SAC between 2016 and 2030, depending on scenario, and noted that *'The emission reductions predicted between the 2017 and 2030 baseline scenarios cover a range of sectors, including road transport, and so improvements are predicted to occur over the whole site, including the worst-affected roadside locations'*. This was the case under all modelled scenarios.
- 3.48 In summary, the Nitrogen Futures study forecast a minimum rate of improvement in background nitrogen of 0.07 kgN/ha/yr at Ashdown Forest, with other forecasts indicating a greater rate of reduction. In line with the forecast for Ashdown Forest, and therefore taking a precautionary approach, this study applies a projected decrease in background nitrogen of 0.07 kgN/ha/yr. The corresponding decrease is also reflected in the total average acid deposition rate for nitrogen in the future scenarios (reduction of 0.065 keq/ha/yr N.).
- 3.49 Over the 9-year period, this equates to a reduction in the APIS background nitrogen deposition rate presented in Table 5 (3-year average, 2019-21/ 2020-2022) of 0.63 kg N/ha/yr for the 2033 model scenarios. This decrease is also reflected in the total average acid deposition rate for nitrogen in the 2033 scenarios (reduction of 0.045 keq/ha/yr N).
- 3.50 No other changes to the APIS data have been made from those presented (3-year average, 2019-21/ 2020-2022) for any modelled scenario.
- 3.51 Not to make any allowance for improvements in emission factors or background concentrations would result in increased emissions and hence concentrations over the plan period as an increased number of vehicles is expected on the roads. This is not expected to occur as can be seen from previous long-term trends in the UK, which show slowing of improvements over extended periods, not worsening. Historical records (e.g., Defra monitoring trends) show that as

increased vehicles enter the fleet that these increases are offset by the improvements in the emissions of the newer vehicles and the removal of older vehicles.

- 3.52 In 2018 the Court of Justice of the European Union (CJEU) ruled in cases C-293/17 and C-294/17 (often dubbed the Dutch Nitrogen cases). One aspect of that ruling concerned the extent to which autonomous measures (i.e., improvements in baseline nitrogen deposition that are not attributable to the Local Plan) can be taken into account in appropriate assessment, the CJEU ruled that it *was* legally compliant to take such autonomous measures into account provided the benefits were not uncertain' (paragraphs 130&132). Note that previous case law on the interpretation of the Habitats Directive has clarified that 'certain' does not mean absolute certainty but '*where no reasonable scientific doubt remains*⁵ [emphasis added].
- 3.53 The forecasts for improvements in NO_x emission factors, background concentrations and background deposition rates used in this report are considered to be realistic and have the requisite level of certainty. This is because a) data are used and to a large extent they build upon established historic trends in NO_x and oxidised nitrogen deposition and b) for total nitrogen deposition they are based on a cautious use of evidenced central government forecasts associated with uptake of technology that has either already been introduced or is widely expected within the professional community to be introduced and effective before 2030, as illustrated in the Nitrogen Futures project:
- When it comes to forecasting the NO_x emissions of additional traffic, it would overestimate those emissions to assume that by 2033 the emission factors will be no different to those in 2024; to make such an assumption would be to fail to take account of the expected continued uptake of Euro 6 compliant vehicles between 2024 and 2033 and would assume (putting it simply) that no motorists would replace their cars during the entire plan period. For example, the latest (Euro 6/VI) emissions standard only became mandatory in 2014 (for heavy duty vehicles) and 2015 (for cars) and the effects will not therefore be visible in the data available from APIS because relatively few people will have been driving vehicles compliant with that standard as early as 2019. Far more drivers can be expected to be using Euro 6 compliant vehicles by the end of the Local Plan period.
 - The vehicle emission factors within the air quality modelling tools available only project out to 2030. While the fuel technology is projected out to 2033 following the DfT decarbonisation pathway, as described earlier, the breakdown of euro classifications published in the EFT extends to 2030, and so the 2033 assessment year does not recognise the further three years of continued uptake of more stringent emissions standards. Therefore, the results are likely to be slightly more cautious in terms of emissions related to vehicle age.

⁵ Case C-239/04 Commission v Portugal [2006] ECR 10183, para. 24; Holohan et al vs. An Bord Pleanála (C-461/17), para. 33

Table 5: APIS Data for Ecological Transects

Transect	Av. N Dep kgN/ha/yr [§]	Critical Load N Dep kgN/ha/yr	Total Av. Acid Dep keq/ha/yr N [§]	Critical Load N Acid Dep keq/ha/yr MinCLMaxN	Background NH ₃ (µg/m ³)*
E01a	13.89	10 - 20	1.04	No critical load available	1.61
E01b	13.89	10 - 20	1.04	No critical load available	1.61
E02a	14.14	10 - 15	1.06	0.851	1.593
E02b	14.14	10 - 20	1.06	No critical load available	1.593

E04	28.18	10 - 15	2.10	0.851	1.61
E05	28.48	10 - 15	2.12	1.226	1.68
E06	25.88	5 - 15	2.04	0.709	0.906
E07a	26.42	10 - 15	2.06	1.645	0.935
E07b	26.42	5-15	2.06	0.709	0.935

Notes: Critical Load data for N and acid deposition were not available for Severn Estuary SAC (E01a/b and E02b transects). Transects E06, E07a and E07b used APIS data from 2020-2022 and transects E01a, E01b, E02a, E02b, E03, E04 and E05 use APIS data for 2019-2021.

[§] Average nitrogen deposition rate (kgN/ha/yr) projected to decrease by 0.63 kgN/ha/yr from base year to future year (i.e. 0.07 x 9 years = 0.63 kgN/ha/yr). This results in a corresponding decrease in acid deposition of 0.045 keq/ha/yr N.

* Average 2024 NH₃ background concentration applied in modelling assessment. No future projections used for background Ammonia

Verification

3.54 Model verification is the process by which the performance of the model is assessed to identify any discrepancies between modelled and measured concentrations at air quality monitoring sites within the study area.

3.55 There are no appropriately located local air quality monitoring stations within the model domain with which to make a comparison between modelled and measured concentrations. Therefore, verification factors have been used based upon professional judgement and experience of similar projects. Verification factors of 1.5 for NO_x and 1.0 for NH₃ have thus been applied to the modelled concentrations, based upon professional judgement and previous project experience to verify and validate the EFT and CREAM tools.

Deposition velocities

3.56 Deposited nitrogen from road traffic derived NH₃ and NO₂ was estimated using the relevant deposition velocities for grassland/short vegetation or forest habitat, presented in Table 3. The conversion rates were applied to the final modelled NO₂ and NH₃ concentrations from road traffic, to provide kgN/ha/year.

Appendix D Severn Estuary Visitor Survey Technical Note

To:
[REDACTED]
[REDACTED]

Memo

Subject: Severn Estuary SPA / Ramsar / SAC Visitor Survey Results

Background to the Visitor Survey

To obtain visitor data for the Severn Estuary SPA / Ramsar (and also the SAC), AECOM commissioned Strategic Research and Insight (SRI) to undertake a survey (comprising visitor counts and interviews) at four key access locations along the estuary. The survey followed a similar methodology to surveys carried out by Footprint Ecology in other European sites, which have provided the evidence base for numerous Habitats Regulations Assessments. To summarise, the key features of the survey methodology were:

- The interviewer roamed the survey location and approached first adult seen (alone or part of a larger group) for interview – the interview involved a set of questions to obtain key information such as activity undertaken and home postcode; upon completion of the interview the next adult is approached
- The interviewer counted the number of adults, minors and dog walkers to get an overview of the 'busyness' of the site at a given location
- The survey day was divided into a morning (07:30 to 12:30) and an afternoon shift (12:30 to 17:30)
- Each location was surveyed on two days, a weekday (Monday to Friday) and a weekend day (Saturday and Sunday), avoiding public holidays and special events resulting in high footfall

Using satellite imagery and in collaboration with Monmouthshire's and Torfaen's Countryside Teams, AECOM identified four key access locations to the Severn Estuary SPA / Ramsar / SAC based on their proximity to existing conurbations, the presence of parking opportunities and dedicated foot access points. The following locations from east to west along the estuary were identified for surveying (see Figure 4 in Appendix A):

- Caldicot Coast Path (ST 48103 87124)
- Black Rock Car Park (ST 51308 88083)
- RSPB Newport Wetlands (ST 32771 82905)
- Lighthouse Inn Car Park (ST 30030 81596)

It is to be noted that the visitor survey was paused on the 16th of March 2020 due to the outbreak of the Coronavirus pandemic. Following the end of COVID restrictions, the survey was continued on the 4th of March 2022. The non-breeding season was targeted for survey because, while visitor numbers will be lower than in the late spring and summer, the non-breeding period is when the flocks of disturbance-sensitive

waterfowl and waders congregate in the estuary. These data provide the only standardised evidence base that is available for the Welsh stretch of the Severn Estuary SPA / Ramsar / SAC.

Key Results

Visitor Counts

Table 1: Visitor counts (including adults and minors) at access points to the Severn Estuary SPA / Ramsar / SAC provided as totals and split by weekday / weekend.

Survey Location	Visitor Count Weekday	Visitor Count Weekend	Total Visitor Count
Caldicot Coast Path	73	54	127
Black Rock Car Park	58	212	268
RSPB Newport Wetlands	135	478	613
Lighthouse Inn Car Park	50	97	147

The total number of visitors varied significantly between survey locations. The RSPB Newport Wetlands was by far the busiest survey point (613 visitors over two survey days), followed by the Black Rock Car Park (268 visitors), Lighthouse Inn Car Park (147 visitors) and Caldicot Coast Path (127 visitors). The relatively low visitor count at Caldicot is most likely due to it providing foot access only, whereas all other survey locations adjoin car parks. This increases accessibility and is expected to draw visitors from further afield, resulting in higher overall busyness.

In context, it appears that the stretch of the Severn Estuary SPA / Ramsar / SAC in southern Wales is busier than parts in other authorities, such as the Forest of Dean in England. For example, a visitor survey in Lydney showed that the busiest location had 98 people entering over two days¹. That is a similar count to the one obtained for Lighthouse Inn Car Park in a single day of surveying. Visitor numbers ranged between 8 and 153 people across 20 survey locations in a survey conducted in the Humber Estuary². Overall, these data indicate that the Severn Estuary SPA / Ramsar / SAC in Monmouthshire is already a key recreation destination for people (even in winter) and would be highly attractive to new residents moving to the wider area around the site. It also implies that recreational pressure is an impact pathway requiring thorough assessment in relation to future housing growth.

Table 2: Local Authorities from which visitors to the Severn Estuary SPA / Ramsar / SAC derived. Only authorities contributing over 1% to the recreational burden are shown.

Source of Visitors (Local Authority)	Number of Visitors	Percentage of Visitors (%)
Monmouthshire	80	44.4
Newport	40	22.2
Cardiff	12	6.7
Caerphilly	10	5.6

² Fearnley H, Liley D & Cruickshanks K. (2012). Results of the recreational visitor surveys across the Humber Estuary. Unpublished report by Footprint Ecology for the Humber Management Scheme.

Torfaen	5	2.8
Forest of Dean	3	1.7
Bristol	2	1.1
Wiltshire	2	1.1
Total	188	100

The geographic source of visitors was also assessed. Of the 188 interviewees, 80 (44.4%) visitors derive from Monmouthshire, the authority within which the surveyed stretch of the Severn Estuary SPA / Ramsar / SAC lies (Table 2). The second biggest contribution is made by Newport, where 40 (22.2%) of the interviewees live. Together, Monmouthshire and Cardiff account for 66.6% of the recreational burden in the estuary. Notable origins of visitors were also Cardiff (12 interviewees, 6.7%), Caerphilly (10 interviewees, 5.6%) and Torfaen (5 interviewees, 2.8%). It is noted that, while visitors from Torfaen were recorded within the SPA / Ramsar / SAC, these fall outside the defined core recreational catchment of the site, based on the distance that 75% of visitors travel to their destination (see section 'Implications for the Torfaen RLDP').

Visitor Interviews

The focus of this assessment was primarily to capture a large enough number of interviews to provide a robust randomised selection of opinions and home postcodes from people that visit the Severn Estuary SPA / Ramsar / SAC in order to understand recreational behaviour and to define a core recreational catchment within which increases in the resident population can be expected to translate into increases in visitor pressure. Overall, a total of 188 visitor interviews were undertaken, including 45 interviews (23.9%) at Caldicot Coast Path, 52 interviews (27.7%) at Black Rock Car Park, 55 interviews (29.2%) at the RSPB Newport Wetlands and 36 interviews (19.1%) at the Lighthouse Inn Car Par.

Activities and Mode of Transport

Dog walking was by far the most common recreational activity (92 interviewees, 48.9%), followed by walking (56 interviewees, 29.8%) and visitors on a family outing (11 interviewees, 5.9%; see Figure 1). Several interviewees were engaging in wildlife watching (9 interviewees, 4.8%) and 'other' activities (8 interviewees, 4.3%). The proportion of different activities recorded was relatively consistent between survey points, except for the RSPB Newport Wetlands. At this survey location only six dog walkers were interviewed (10.9%), compared to 32 people that were walking (58.2%) and eight visitors that were wildlife watching (14.5%). In contrast, dog walking was most frequent at Black Rock Car Park (36 out of 52 interviewees, 69.2%) and Caldicot Coast Path (29 out of 45 interviewees, 64.4%). The most probable explanation for this trend is that these locations provide easy foot access from nearby residential development in Portskewett and Caldicot, a factor that is important for most dog walkers. This interpretation is supported by the mode of transport provided by interviewees, particularly at Caldicot. At this survey point, 33 (73.3%) of the interviewees travelled to the site on foot, indicating that this access point is mainly used by locals. In contrast, the RSPB Newport Wetlands (52 interviewees, 94.5%) and the Lighthouse Inn Car Park (28 interviewees, 77.8%) travelled to the site by car, indicating that these car parks attract visitors from further afield.

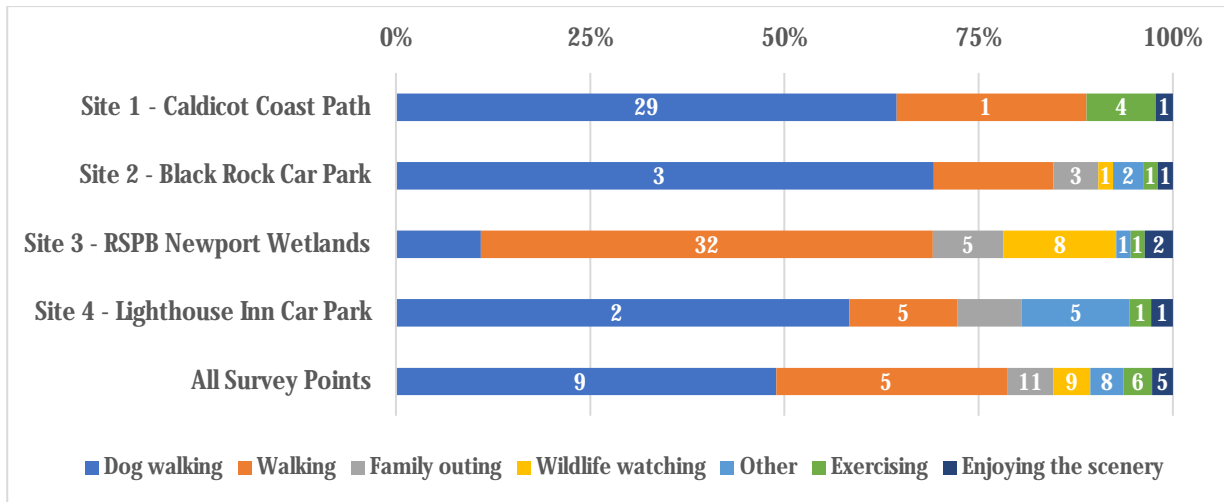

Figure 1: Main activities undertaken by interviewees in the Severn Estuary SPA / Ramsar / SAC across the four survey points.

Reasons for Visit

One of the main objectives of the visitor survey was to identify the main reasons for why visitors are drawn to the Severn Estuary SPA / Ramsar / SAC. By far the most important factor for visiting the estuary was 'proximity to home' (93 interviewees, 49.7%; Figure 2), followed by 'natural scenery' (24 interviewees, 12.8%), presence of the 'coast / estuary' (10 interviewees, 5.3%), 'good / easy parking' (9 interviewees, 4.8%) and 'quick travel route' (8 interviewees, 4.3%). Surprisingly, despite the high number of dog walkers interviewed at the site, relatively few interviewees provided dog-related reasons for visiting, including 'good for dog / dog enjoys it' (6 interviewees, 3.2%), 'ability to let dog roam off lead' (4 interviewees, 2.1%) and 'nearest safe place to let dog off lead' (4 interviewees, 2.1%). Identifying the main reasons for site choice is important in understanding visitor motivations and identifying potential opportunities for mitigation such as part of Suitable Alternative Natural Greenspaces (SANGs).

Figure 2: Main reasons for visiting the Severn Estuary SPA / Ramsar / SAC provided by interviewees.

Temporal Characteristics

Regarding the temporal characteristics of recreational pressure in the Severn Estuary SPA / Ramsar / SAC, an important trend is that more than half of interviewees (97 interviewees, 51.6%) visit the estuary frequently (i.e. they visit daily, most days or 1 to 3 times per week). Thirty-nine interviewees visit daily (20.7%), 16 come to the site on most days (180+ visits per annum; 8.5%) and 42 interviewees visit one to three times per week (40-180 visits per annum; 22.3%). The proportion of frequent visitors was by far the highest at Caldicot Coast Path (37 interviewees being high frequency visitors, 82.2%), providing further support to the notion that visitors to this stretch of the coast originate locally from the Caldicot area. Another trend that supports the notion of the estuary being primarily a local recreational resource is the relatively short duration of visits. 152 out of 188 interviewees (80.9%) stated that their visits last 'less than 30 minutes', 'between 30 minutes and 1 hour' and between '1-2 hours'. An exception is the RSPB Newport Wetlands site, where larger proportions of visitors stay on site between '2-3 hours' (16 interviewees, 29.1%) and '3-4 hours' (3 interviewees, 5.5%) compared to the other survey locations. Time spent on site is a major factor in determining the magnitude of recreational pressure, with longer visits likely to result in more disturbance events compared to shorter ones. Only a weak seasonal trend was discernible from the responses of interviewees. While most interviewees stated that they visit in summer (150 interviewees, 80%), visitation was only marginally lower in spring (148 interviewees, 79%), autumn (136 interviewees, 72%) and winter (132 interviewees, 70%). This is an important result because it implies that recreational pressure in the Severn Estuary SPA / Ramsar is relatively consistent across the year, including the sensitive overwintering period for the qualifying bird species (winter and early spring).

Home Postcodes

The home postcodes of interviewees provide the key most important parameter that is used to identify recreational catchments. Typically, the 75th percentile of interviewees (i.e. the distance from the SPA / Ramsar from which 75% of interviewees originate) is used to denote the core recreational catchment. This

cut-off point is used to remove the influence of outliers and to demark the catchment that forms the most likely visitor pool. Pooling the postcodes from all 'local' visitors (i.e. those on a day trip from home; n = 158), 75% of visitors travelled a linear Euclidean distance of 6.5km to the SPA / Ramsar. This core recreational catchment is broadly similar to those identified for stretches of the estuary in other geographic areas. For example, a visitor survey carried out in the estuary in Stroud District established a core catchment of 7.7km for that authority. Survey work undertaken for the West of England authorities delineated a core catchment of 7.36km for survey points in North Somerset and South Gloucestershire. One notable aspect of the various surveys undertaken in the Severn Estuary SPA / Ramsar / SAC is that the core recreational catchments, even though the surveys have been undertaken for different authorities, have a broad consistency of approx. 7km regarding the core catchment identified. This is useful since it is standard practice when European sites are involved for the affected authorities to agree on a standardized core catchment. For the Severn Estuary SPA / Ramsar / SAC it appears that 7km is a reasonable precautionary recreational buffer for all European sites.

Core recreational catchments were also drawn up for dog walkers and frequent visitors (ranging from daily visits to several visits per week). This was done to delineate the geographic zone that user groups with the highest ecological impacts on overwintering birds derive from. For dog walkers the core recreational catchment is approx. 3.1km, whereas for frequent visitors the core catchment is approx. 1.9km. This is notable because it highlights that the visitors with the highest impact potential come from a relatively small zone around the European sites. Notwithstanding this, in line with other visitor surveys and the evidence for other European sites, it is precautionary and advisable to work with the larger catchment of 7km.

Implications for the Torfaen RLDP

The data from the visitor survey presented here indicate that residential development coming forward in Torfaen does not fall within the core recreational catchment of 7km identified for the Severn Estuary SPA / Ramsar / SAC. While a total of 5 residents (2.8%) from Torfaen were interviewed in the estuary, the interviewee living closest to the site had travelled 8.8km from home, which is well beyond the 75th percentile of visitors. Applying the widely accepted methodology for delineating recreational catchments, Torfaen residents are not considered to meaningfully contribute to recreational impacts in the SPA / Ramsar / SAC. Therefore, housing that is projected to come forward under the Torfaen RLDP will not require mitigation.

Implications for the Monmouthshire RLDP

The data from the visitor survey presented here, which suggest that Monmouthshire contributes by far the highest proportion of visitor pressure in the stretch of the Severn Estuary SPA / Ramsar / SAC that was surveyed, have implications for the emerging Monmouthshire RLDP. Two of the Strategic Growth Areas identified in the RLDP (Severnside and Chepstow) lie within the core recreational catchment of the Severn Estuary SPA / Ramsar / SAC, particularly the easternmost stretch of the estuary including the Caldicot Coast Path and the Black Rock Car Park. The catchment zones for dog walkers and frequent visitors, the user groups with the highest disturbance impacts, include both these Strategic Growth Areas. Furthermore, of the 188 interviewees, 19 (23.8%) live in Caldicot, further underlining the importance of this part of Monmouthshire to the SPA's / Ramsar's / SAC's visitor pool.

Given the high sensitivity of the SPA / Ramsar to impacts from recreational pressure, adverse effects on its site integrity due to additional residential development cannot be excluded. It is anticipated that mitigation measures will be required to avoid adverse effects on the SPA / Ramsar. These could be delivered in the form of Strategic Access Management and Monitoring (SAMM) in the estuary itself, and / or through access enhancements and improvements to appropriately sited, existing or newly developed greenspaces (e.g. SANGs, if delivered to stringent guidelines). This memo does not propose or develop a full mitigation strategy, but rather identifies the options that are available to the Council to address the issue of recreational pressure.

In England, authorities within the core recreational catchment of European sites that are sensitive to recreational pressure have developed SAMM strategies to avoid adverse effects on the European sites; the most prominent examples being the Thames Basin Heaths SPA and the Dorset Heaths SPA. For example, to protect the Dorset Heaths, the relevant authorities have set out the Dorset Heathlands Planning Framework

Supplementary Planning Document (SPD)³. The SPD proposes a series of projects, including educational activities and on-site wardens to manage visitor pressure. The funding for these measures is collected through a combination of Community Infrastructure Levy (CIL) and Section 106 agreements (planning obligations) payable by the developer. It is considered that similar measures (and funding mechanisms) could be deployed for the Severn Estuary SPA / Ramsar / SAC, to help manage recreational pressure. Such measures would have to be identified and developed in collaboration with all key stakeholders (i.e. authorities, private landowners) and in consultation with Natural Resources Wales.

SAMM

The visitor survey data indicate that there are ample opportunities for SAMM projects in Monmouthshire's section of the Severn Estuary SPA / Ramsar / SAC. Most visitors are not aware of (125 interviewees, 66.5%) or unsure (21 interviewees, 11.2%) whether any conservation designations apply to the site. Furthermore, only one interviewee (0.5%) indicated that they knew about the site's SPA / Ramsar status and its international importance to overwintering birds. Regarding active conservation measures, a total of 87 interviewees (46.3%) had come across information boards along the estuary. Only 18 interviewees (9.6%) indicated that they were aware of any signage (e.g. dog-on-lead signs) along the estuary. Furthermore, only 3 interviewees (1.6%) had noticed a ranger presence along the estuary. These were all recorded at the RSPB Newport Wetlands, indicating that these are likely to have been RSPB employees rather than rangers specifically managing recreation in the estuary. Overall, 82 interviewees (43.6%) are not aware of any measures that are in place to deliver conservation in the SPA / Ramsar / SAC. Therefore, various SAMM measures along the estuary could be deployed to decrease the likely impact of future housing growth delivered under the RLDP. For example, enhanced signage (e.g. dog-on-lead signs covering the overwintering period) along the estuary is likely to increase public awareness and reduce disturbance to sensitive bird species. Changes in how the estuary is managed may also be beneficial to the Severn Estuary SPA / Ramsar / SAC, provided they support the site Conservation Objectives. While 155 interviewees (82.5%) did not provide any changes they would like to see in how the area is managed, 23 interviewees (12.2%) highlighted footpath improvements (particularly in Caldicot) and 5 interviewees (2.7%) wanted more dog bins (Figure 3). Improvements to footpaths along the estuary could be a key tool in discouraging off-track walking and reducing the number of major bird disturbance events.

A Recreation & Management Strategy (RMS) covering the Severn Estuary SPA / Ramsar / SAC is already in place for Stroud District, which aims at mitigating the 12,600 dwellings to be delivered over the Plan period. A similar approach could be adopted for Monmouthshire, which could take a lead in delivering a recreation management strategy in cross-boundary collaboration with other authorities in the area, such as Cardiff and Newport. The RMS proposes a range of mitigation approaches to be adopted for the estuary, including:

- Engaging with and educating dog walkers to raise awareness of disturbance issues and promote low-sensitivity sites and / or routes;
- Establishing a warden role for visitor engagement, targeting highly sensitive locations or focal areas with high visitor numbers;
- Reviewing and adapting parking opportunities to alter the spatial distribution of visitors along the estuary;
- Introducing Codes of Conduct that raise awareness and promote sustainable recreational use, particularly for wog walkers; and
- Ongoing monitoring of visitor numbers in line with 5-yearly LDP reviews to identify changes in use over time and evaluate the effectiveness of mitigation interventions put in place.

³ The consultation draft of the Dorset Heathlands Planning Framework 2020-2025 can be found at: <https://www.bournemouth.gov.uk/planningbuilding/PlanningPolicy/PlanningPolicyFiles/dorset-heathlands-planning-framework/dorset-heathlands-spd-2019-consultation.pdf> [Accessed on the 30/06/2020].

Figure 3: Changes interviewees would like to see in how the Severn Estuary SPA / Ramsar / SAC is managed across the four survey points.

Alternative Greenspaces

Enhancing existing greenspaces or opening new areas of greenspace to public access is the second pillar of mitigating recreational pressure. The rationale behind alternative greenspace provision is to attract a certain proportion of local residents, thereby reducing the recreational burden in more sensitive European sites. Understanding the factors underpinning site choice (see Figure 2) is important in devising effective mitigation approaches. As highlighted in the previous section, the main reasons for visiting the estuary included proximity to home (49.7%), natural scenery (12.8%), coast / estuary (5.3%), good / easy parking (4.8%) and quick travel route (4.3%). Some of these features, such as presence of the coast / estuary and natural scenery, will be impossible or difficult to recreate in alternative local greenspaces. Other characteristics (e.g. proximity to home and parking) are well recognised determinants of site choice and have influenced the greenspace provision underpinning many mitigation strategies in England. Alternative greenspaces should be adequately sited and designed to represent a realistic alternative to local residents, ideally being more attractive to potential users than the European sites themselves. In England, Natural England has published guidelines for the provision of Suitable Alternative Natural Greenspaces to mitigate recreational pressure in the Thames Basin Heaths SPA. These encompass a range of must-have parameters, including some of the characteristics mentioned by visitors to the Severn Estuary SPA / Ramsar / SAC such as the availability of parking, a well-maintained network of paths, habitat variety and suitable geographic location in relation to the proposed housing development.

Regarding the Monmouthshire RLDP, the Strategic Growth Areas of Caldicot and Chepstow, both within the core catchment of the Severn Estuary SPA / Ramsar / SAC, should be the main focus of mitigation. A review of satellite imagery on Google Maps indicates that there are extensive tracts of agricultural fields, grassland and woodland surrounding the two SGAs, which could form the starting point for evaluating alternative greenspace provision. In the first instance, this would entail a detailed site appraisal and early engagement with landowners to explore initial feasibility. The most obvious candidate site for improvements is the Caldicot

Castle Country Park (CCCP), which is approximately equidistant from existing residential development in Caldicot compared to the Severn Estuary SPA / Ramsar / SAC, thus representing a realistic alternative location geographically. The CCCP is owned and operated by Monmouthshire County Council, which would facilitate the delivery of mitigation measures compared to sites under multiple ownership. It is noted that the CCCP is already an attractive destination for visitors⁴ and any mitigation measures would have to improve the capacity of the park to attract further visitors. A list of potential enhancements may include⁵:

- Provision of a variety of routes (ideally at least one circular route) leading out from the castle into the woodland;
- Enhancements to the existing main car park off Church Road (e.g. increasing capacity, renewing surfacing, etc.);
- Provision of enhanced information boards along the key walking routes, which may address the cultural / historical heritage of the CCCP and ecological interest features in the site; and
- Incorporation of Nedern Brook as a main feature into the walking routes starting at the Castle.

Notwithstanding the provision of enhanced local greenspaces, it is noted that these are unlikely to fully mitigate the increase in recreational pressure on European sites. Estuarine and coastal sites (such as the Severn Estuary SPA / Ramsar / SAC) have unique recreational draws (illustrated by large core catchment zones) and will continue to attract visitors regardless of destination alternatives. Any improvements to existing or new local greenspaces will fulfil their primary role in attracting local residents that undertake frequent and relatively short outings, including dog walkers, walkers and people exercising. Therefore, alternative greenspace provision could be particularly effective for residential development in the Caldicot and Chepstow SGAs.

AECOM recommends that Natural Resources Wales is consulted in the next instance to assess any implications arising from the visitor survey. This would include setting the growth projected in the RLDP into the context of existing concerns regarding the qualifying features of the SPA / Ramsar / SAC. Following consultation, the next stage in the delivery of mitigation would be to develop a detailed list of interventions, identify their governance body and explore potential funding mechanisms.

It is concluded that, provided an appropriate set of mitigation measures in and / or the wider area around the Severn Estuary SPA / Ramsar / SAC is delivered in agreement with the Natural Resources Wales, the Monmouthshire RLDP will not result in adverse effects on site integrity regarding recreational pressure.

⁴ The Caldicot Castle Country Park is widely advertised as an attractive destination for outings, for example on the Monmouthshire tourism website available at: <https://www.visitmonmouthshire.com/Caldicot-Caldicot-Castle-and-Country-Park/details/?dms=3&venue=1000670> [Accessed on the 30/06/2020].

⁵ Note that rather than focussing on a specific site, greenspace enhancements may also be delivered as a series of small-scale projects designed to improve access to multiple greenspaces or to encourage responsible recreation in the estuary. This would be analogous to the Heathland Infrastructure Projects (HIPs) delivered to mitigate recreational pressure in the Dorset Heaths SPA.

Appendix E Wye Valley Woodlands Visitor Survey Technical Note

To:

Memo

Subject: Wye Valley Woodlands SAC Visitor Survey Results

Background to the 2023 Visitor Survey

To obtain visitor data for the Wye Valley Woodlands SAC, AECOM commissioned Strategic Research and Insight (SRI) to undertake a survey (comprising visitor counts and interviews) at two key access locations agreed with Monmouthshire Council. The survey followed a similar methodology to surveys carried out by AECOM in the Severn Estuary SPA/Ramsar/SAC, and Footprint Ecology in other European sites, which have provided the evidence base for numerous Habitats Regulations Assessments. To summarise, the key features of the survey methodology were:

- The interviewer roamed the survey location and approached first adult seen (alone or part of a larger group) for interview – the interview involved a set of questions to obtain key information such as activity undertaken and home postcode; upon completion of the interview the next adult is approached;
- The interviewer counted the number of adults, minors and dog walkers to get an overview of the 'busyness' of the site at a given location;
- The survey day was divided into a morning (07:30 to 12:30) and an afternoon shift (12:30 to 17:30);
- Each location was surveyed on two days, a weekday (Monday to Friday) and a weekend day (Saturday and Sunday), in summer 2023, avoiding public holidays and special events resulting in high footfall; and
- A total of 16 hours of survey was therefore undertaken at each of the two survey locations, split into 4 weekend 5-hr shifts (2 morning, 2 afternoon) and 4 weekday 5-hr shifts (2 morning, 2 afternoon) per site.

Using satellite imagery and in collaboration with Monmouthshire's Countryside Team, AECOM identified two key access locations to the SAC based on their proximity to existing conurbations, the presence of parking opportunities and dedicated foot access points directly into the SAC. These were:

- Lower Wyndcliff Car Park (ST 52669716)
- Chepstow Leisure Centre (ST 52889432)

Key Results

Visitor Counts

Table 1: Visitor counts (including adults and minors) at access points to the Wye Valley Woodlands SAC provided as totals and split by weekday / weekend.

Survey Location	Visitor Weekday	Count	Visitor Weekend	Count	Total Visitor Count
Lower Wyndcliff Park	Car	66		92	158
Chepstow Centre	Leisure	54		75	129

At Lower Wyndcliff Car Park, a total of 158 people were recorded entering the SAC over 16hrs of survey, equating to an average of 10 people per hour. At Chepstow Leisure Centre, 129 people were recorded entering the SAC over 16hrs of survey, equating to an average of 8 people per hour. Compared to surveys for other European sites in Monmouthshire this is modest. For example, during the surveys of the Severn Estuary in Monmouthshire in the winters of 2020-22, an average of 38 people per hour were recorded at RSPB Newport Wetlands, and 16.75 per hour were recorded at Black Rock Car Park. Moreover, that level of visitor activity was recorded in winter. In summer, levels of use at the Severn Estuary can be expected to be even greater. The face-to-face surveys also suggest relatively lower use of Wye Valley Woodlands SAC than other European sites. Over this standardised survey period it is typical to achieve 12 interviews in a 5hr shift. In this case an average of just 5.4 per 5hr shift was achieved (a total of 65 interviews). This reflects relatively low footfall.

Visitor Interviews

The focus of this assessment was primarily to capture interviews to provide a randomised selection of opinions and home postcodes from people that visit Wye Valley Woodlands SAC in order to understand recreational behaviour and to define a core recreational catchment within which increases in the resident population can be expected to translate into increases in visitor pressure. A total of 65 visitor interviews were undertaken, including 29 interviews (45%) at Chepstow Leisure Centre and 36 interviews (55%) at Lower Wyndcliff Car Park.

Activities and Mode of Transport

Walking was by far the most common recreational activity (38 interviewees, 58.5%), followed by dog walking (22 interviewees, 33.8%). A total of 92.3% of survey respondents were undertaking one or the other of these activities. The proportion of different activities recorded was relatively consistent between survey points.

In terms of mode of travel to site, 22 (33.8%) of interviewees walked to site, while 42 (64.6%) drove to site. This is unsurprising given the wide diversity of home postcodes and the large geographic area they covered. This is also reflected in the relatively large proportion of visitors (17 or 26.2%) who were on holiday or otherwise staying away from home. Of Monmouthshire residents surveyed, just over half had walked to the site.

Reasons for Visit

One of the objectives of the visitor survey was to identify the main reasons for why visitors are drawn to the Wye Valley Woodlands SAC. By far the most important factor for visiting the SAC was 'natural scenery/wild landscape' (42 out of 65 interviewees, or 64.6%). This ties in with the large distances from across England and Wales that people are travelling to visit the site. The second most important factor (although considerably less often cited than the most important reason) was 'proximity to home' (24 out of 65 interviewees, 36.9%). The third, fourth and fifth most important reasons (a long way behind either first or second) were 'bther' (8 interviewees or 12.3%), 'easy parking' (6 interviewees, or 9.2%) and 'ability to travel to site on foot' (5 interviewees or 7.7%). Where people answered 'other' their reasons included: 'meeting a friend', 'to see Giant's Cave', 'come every year in honour of father', and 'close to where we are camping'.

Figure 1: Main reasons for visiting the Wye Valley Woodlands SAC provided by interviewees. Note that not all interviewees provided a reason and some provided more than one reason.

Temporal Characteristics

Regarding the temporal characteristics of recreational pressure in the Wye Valley Woodlands SAC, an atypically small number of visitors (based on personal experience of surveying many European sites or reviewing such survey data) are frequent visitors. Just 13 (20%) of visitors attend the site at least once a week (i.e. said they visited the site 'daily', 'most days' or '1-3 times a week'). In contrast, 16 (24.6%) visit once a month or less, and 33 (50.8%) of survey respondents were on their first visit. Again, the large number of people on their first visit probably reflects the large number of non-locals and holidaymakers in the visitor sample.

Another trend that supports the notion of the SAC being primarily a regional or national recreational resource is the relatively long duration of visits. A total of 22 (33.8%) of survey respondents said they had spent, or intended to spend, at least three hours on site, with 17 of these (26.2% of the total) intending to spend over four hours on site. This is an unusually large proportion of visitors intending to spend a long time on site but is the response one would be more likely to expect where a relatively large number of visitors are holiday-makers or have travelled a considerable distance to the site. In contrast, during the Severn Estuary SPA/Ramsar/SAC visitor survey, where the majority of visitors were relatively local, 80.9% of interviewees stated that their visits last less than 2 hours. In the Wye Valley Woodlands this figure drops to 60%.

Home Postcodes

The geographic source of visitors was also assessed. Of the 48 interviewees who provided valid postcodes, 14 (29.2%) derive from Monmouthshire (The face-to-face surveys also suggest relatively lower use of Wye Valley Woodlands SAC than other European sites. Over this standardised survey period it is typical to achieve 12 interviews in a 5hr shift. In this case an average of just 5.4 per 5hr shift was achieved (a total of 65 interviews). This reflects relatively low footfall.

). The second biggest contribution is made by Bristol, where 8 (16.7%) of the interviewees live. A total of 70.9% of visitors live in seven local authorities with some being as far distant as Sandwell in the West Midlands. Despite the location of the survey points within Monmouthshire, a clear majority of survey respondents (70.8%) came from outside Monmouthshire. This illustrates that the Wye Valley Woodlands SAC, based on this survey, can be considered a regional or even national draw, rather than a predominantly local attraction. This differs from the section of the Severn Estuary (for example) in Monmouthshire, where almost half (44%) of visitors were residents of Monmouthshire and two-thirds (66.6%) were residents of either Monmouthshire or Newport.

Table 2: Local Authorities from which visitors to the Wye Valley Woodlands SAC derived.

Source of Visitors Authority)	(Local Number of Visitors	Percentage of Visitors (%)
Monmouthshire	14	29.2
Bristol	8	16.7
North Somerset	3	6.2
South Gloucestershire	3	6.2
Newport	2	4.2
Forest of Dean	2	4.2
Sandwell, West Midlands	2	4.2
Bath & North-East Somerset	1	2.1
Boston, Lincolnshire	1	2.1
Dacorum, Hertfordshire	1	2.1
East Yorkshire	1	2.1
Hart, Hampshire	1	2.1
Newark & Nottinghamshire	Sherwood, 1	2.1
North Devon	1	2.1
Bridgend	1	2.1
Powys	1	2.1
Sheffield, Yorkshire	1	2.1
South Oxfordshire	1	2.1
Stroud	1	2.1
Swindon	1	2.1
Torfaen	1	2.1
Total	48	100

The home postcodes of interviewees provide the key parameter that is used to identify recreational catchments. Typically, the 75th percentile of interviewees (i.e. the distance from the SAC from which 75% of

interviewees originate) is used to denote the core recreational catchment. This cut-off point is used to remove the influence of outliers and to demarcate the catchment that forms the most likely visitor pool.

Using these data, the 75th percentile of all visitors that travelled to the SAC is 39.3km. In other words, three quarters of visitors live within 39.3km of the SAC boundary. This is a very large catchment and represents the importance of the SAC in drawing visitors from long distances. For example, visitors come from as far afield as Lincolnshire, Sheffield, Devon, Hampshire and Nottinghamshire (Table 1), and visitors from outside Monmouthshire and Wales, make up a large proportion of the survey pool. Even excluding people on holiday to focus entirely on people 'visiting from home' still leaves a relatively large catchment of 24km. This indicates that the Wye Valley Woodlands SAC has a regional, not to say national, draw rather than a local one. In contrast, during surveys of the Severn Estuary SPA/Ramsar/SAC, 75% of visitors lived within 6.5km of the site, indicating the much greater proportion of local residents in the visitor pool. The core recreational catchment for the Wye Valley Woodlands SAC for residents of Monmouthshire (i.e. the zone within which 75% of Monmouthshire-resident visitors are found) is 7km, but it is important to remember that Monmouthshire residents make up a minority of visitors, with 71% of visitors living in other local authorities.

Implications for the Monmouthshire RLDP

The data from the visitor survey presented here strongly suggest that:

- The visitor pressure in the Wye Valley Woodlands SAC is relatively low compared to other European sites. This is relevant given that, like most sites designated for their habitats, the SAC is more resilient to recreational pressure than a site harbouring easily disturbed/displaced interest features such as Severn Estuary SPA/Ramsar.
- The visitor profile is dominated by residents of other local authorities, some very far afield, who visit site infrequently (51% of survey respondents), possibly even just once given the high percentage who are on their first visit, but who stay on site for a considerable time (3-4 hours or more).
- A total of 71% of visitors derive from local authorities other than Monmouthshire, with only 29% of visitors being Monmouthshire residents.
- This visitor profile influences the core recreational catchment, yielding a very large core catchment of 39km. Even excluding holidaymakers, the SAC still has a large core catchment of 25km, indicating that some people travel a considerable distance from home to visit Wye Valley Woodlands SAC. For example, five visitors had travelled over 30km from home to visit the SAC, including one person from Swindon, located more than 60km away.
- The large distances travelled to visit the SAC do not apply to residents of Monmouthshire, who travel an average distance of 3km to visit the SAC, with 75% of Monmouthshire-based visitors living within 7km.

Given these data it is considered that visitor pressure within the SAC is limited, is a regional or national issue, and will not be heavily affected by housing and population growth within Monmouthshire. As such, no mitigation strategy for the Local Plan is required.

Replacement Local Development Plan 2018-2033

Initial Consultation Report:
Preferred Strategy and Candidate Sites Register
October 2024

TABLE OF CONTENTS

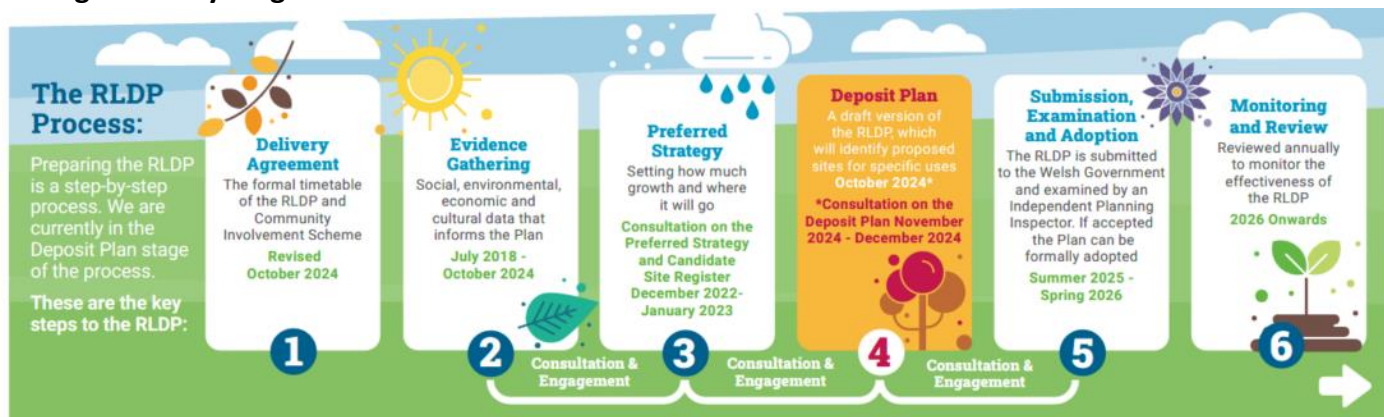

1. Introduction.....	1
2. Methods of Engagement	2
3. Preferred Strategy Summary of Representations	7
4. Candidate Sites Register Summary of Representations	145

Initial Consultation Report: Preferred Strategy and Candidate Site Register

1. Introduction

- 1.1. The Council is preparing a Replacement Local Development Plan (RLDP) for the County (excluding the area within Bannau Brycheiniog National Park), covering the period 2018 to 2033. The RLDP is a key Council policy document that allocates land for development, designates areas for protection and contains policies against which future planning applications will be assessed. When adopted, the RLDP will replace the existing adopted LDP as the statutory land use development plan for the County
- 1.2. The preparation of the RLDP involves a number of key stages, see figure 1, which includes a Delivery Agreement (Revised October 2024) setting out the timetable for Plan preparation and the Community Involvement Scheme (CIS)¹. The CIS sets out how the Council proposes to proactively involve the community and stakeholders in the preparation of the RLDP in order that a range of views can be considered as part of the process of building a wide consensus on the Plan’s strategy and policies.
- 1.3. This Initial Consultation Report sets out how we engaged with the community and stakeholders as part of the consultation and engagement on the Preferred Strategy² (December 2022) and Candidate Sites Register (CSR), which took place between 5th December 2022 and 30th January 2023. The structure of this report is as follows:
 - Section 2 sets out the methods of engagement utilised at the Preferred Strategy stage, in accordance with the CIS, to ensure effective and efficient consultation and engagement, including how and who we consulted. The documents that were available for public consultation at this stage are also provided.
 - Section 3 sets out the summaries of the key issues raised in relation to the Preferred Strategy consultation.
 - Section 4 sets out the summaries of the key issues raised in relation to the Candidate Site Register consultation, along with the Local Planning Authority (LPA) Response and LPA Recommendation.

Figure 1: Key Stages of the RLDP Process

¹ For further information see Delivery Agreement (Revised October 2024)
² As required by LDP Regulation 16a

2. Methods of Engagement

- 2.1. Consultation and engagement on the RLDP Preferred Strategy took place between 5th December 2022 and 30th January 2023. During this period we invited the views of communities and stakeholders on the following:
- The Plan’s key issues, challenges and opportunities for the County;
 - The Plan’s vision and objective that respond to the key issues, challenge and opportunities;
 - The Plan’s scale of future growth in homes and jobs and where this growth will be spatially located; and
 - The preferred strategic site allocations and strategic policies to deliver/implement the Plan.
- 2.2. Alongside consultation on the Preferred Strategy, consultation also took place on the RLDP Candidate Site Register (CSR), which provides the location and basic site information of the sites submitted during the Second Call for Candidate Sites. This consultation allowed communities and interested parties to comment on the candidate sites within the register.
- 2.3. It should be noted that at the time of the CSR consultation, sites had undergone a high level assessment and as part of this assessment sites which did not meet the initial filtering assessment criteria³ were ‘filtered out’ of the process. Of note, sites were filtered out due to an environmental phosphate constraint identified at the time, whereby sites within the Upper River Wye catchment, including those within the Primary Settlement of Monmouth were filtered out due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Subsequently, however, Welsh Government’s response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW’s planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025.
- 2.4. Consequently, in October 2023 Council agreed to the identification of a strategic site allocation in Monmouth. In addition, candidate sites within the Upper River Wye Valley catchment area that were previously filtered out have been reassessed as part of the Candidate Site Assessment process. As a result, the Candidate Site Register has been updated to reflect this change.

Consultation Documents

- 2.5. The consultation documents that were available for the Preferred Strategy and CSR Consultation are set out in Table 1. Paper copies of the Preferred Strategy, Preferred Strategy Summary, Preferred Strategy Easy Read, Candidate Sites Register, Initial Integrated Sustainability Appraisal Report and Habitats Regulations Assessment of the Preferred Strategy were available for public inspection at County Hall Usk, the Council’s Community Hubs and public libraries. All documents in table 1 were available to view on the Planning Policy Website. The Preferred Strategy, including the Summary and Easy Read documents were available bilingually in Welsh.

Consultation Engagement Methods

- 2.6. A number of engagement methods were utilised for the Preferred Strategy consultation to ensure a broad and effective reach out to different people within the community and that a range of views could be captured. The engagement methods that were undertaken are set out in table 2.

Table 2: Consultation Engagement Methods

Consultation Methods	
Members Workshops	Date
Members' Workshop (hosted by Place Scrutiny Committee) to brief Members of the RLDP process and allow for informal discussion.	2 nd November 2022
Press Release	
Press Release to inform the general public of the intention to report the Preferred Strategy to Council 1 st December 2022 and, if agreed, to consult on the Preferred Strategy between 5 th December 2022- 30 th January 2023. Emails were sent out to all on the RLDP database.	4 th November 2022
Place Scrutiny Committee	
Place Scrutiny Committee, to formally scrutinise the Preferred Strategy before being presented at Council on 1 st December	10 th November 2022
Council	
Council endorsed the Preferred Strategy for statutory consultation for an 8-week period from 5 th December 2022 – 30 th January 2023. Council also agreed to consult on the CSR, ISA and HRA alongside the Preferred Strategy. The Revised Delivery Agreement was agreed by Council on 1 st December 2022 and agreed with the Welsh Government on the 2 nd December 2022.	1 st December 2022
The Preferred Strategy, Easy Read Guide, Summary PS and animation, along with the Candidate Sites Register, Initial Integrated Sustainability Appraisal and Habitats Regulations Assessment were issued for statutory public consultation for an eight-week period between 5 th December 2022 and 30 th January 2023.	
Notification of the consultation on the Preferred Strategy and CSR Email consultation	

<p>Notification of the consultation, inviting comments, was sent to the statutory and approx. 1,000 other consultees, agents, and individuals on the RLDP consultation data base. This includes statutory consultees, including the Welsh Government, Natural Resources Wales, all Town and Community Councils in Monmouthshire, and neighbouring Local Authorities..</p>	<p>Emails and letters sent 2nd December 2022</p>
<p>Public Information Exhibitions ('Drop-in' Sessions)</p>	
<p>Eight public information exhibitions ('drop-in' sessions) were held in various locations across the County. All exhibitions were held between 2pm to 7pm and were widely advertised via the easy read, posters, social media and the Planning Policy website.</p> <p>The exhibitions displayed information bilingually with large display boards, such as maps of the preferred strategic sites, together with and with paper copies of the Preferred Strategy and supporting evidence. Copies of the Easy Read were available to take away.. The exhibitions allowed the public and local residents to 'drop-in' within the advertised time to discuss the Preferred Strategy and any of the supporting information with a Planning Policy Officer. The Head of Planning and Planning Policy Manager attended each exhibition session and a minimum of two Planning Policy Officers were available at each of the eight exhibitions to explain the process and answer /clarify any queries.</p>	<ul style="list-style-type: none"> • Abergavenny – Market Hall 12th December 2022 • Monmouth, Shire Hall 15th December 2022 • County Hall, Usk 19th December 2022 • Magor Baptist Church 11th January 2023 • Chepstow, Board School 12th January 2023 • Portskewett, Church Hall 17th January 2023 • Caldicot, Choir Hall 18th January 2023 • Raglan Village Hall 19th January 2023
<p>Virtual Consultation Sessions</p>	
<p>A virtual event for Town and Community Councils was held. This event presented information on the RLDP process, the implications of the Preferred Strategy and details of the how to respond to the consultation. We also invited members of the Town and Community Councils to disseminate this information to their communities and to raise awareness of the consultation.</p>	<p>6th December 2022</p>
<p>Two virtual events were held which were open to all. This was compèred by MCC Communications Team and facilitated members of the public to submit questions for the Head of Planning and Planning Policy Officers to answer. A presentation of the RLDP Process and Preferred Strategy was given and the animation played. Both events were recorded and available to watch back on the Planning Policy website.</p>	<p>8th December 2022, 6pm -7.30pm 10th January 2023, 2 pm - 3.30pm</p>
<p>Social Media</p>	

<p>Information regarding the Preferred Strategy and CSR was posed on various Social Media platforms, including via MCC X (Twitter) and MCC facebook accounts.</p> <p>Engagement also took place via the following:</p> <ul style="list-style-type: none"> • Developer Forum meeting • A MCC department-wide officer meeting 	<p>Various posts between 5th December 2022 – 30th January 2023</p>
---	--

Consultation Responses

- 2.7. Consultation responses to the Preferred Strategy and CSR were invited which could be submitted via Preferred Strategy and CSR representation forms. These were available as paper copies at the venues referenced in Table 2, and electronically. Electronic versions of the forms could be submitted directly via the Planning Policy website. The consultation questions for the Preferred Strategy were framed around specific questions designed to assist in ensuring that all key aspects of the Preferred Strategy were duly considered by respondents. The Preferred Strategy consultation questions and responses are set out in Section 3 below. The CSR form invited respondents to make comments in relation to specific candidate sites. The responses are grouped by the Candidate Site references, as set out in Section 4 below.
- 2.8. The consultation resulted in approximately 220 responses to the Preferred Strategy and 650 representations on the Candidate Sites register. The following sections of the report provide an overview of the main findings of the consultation exercise on the RLDP Preferred Strategy and CSR. This is not intended to be a comprehensive report on each comment received, rather a summary of the key issues raised in response to the specific questions in relation to the Preferred Strategy and specific sites in the CSR.

3. Preferred Strategy Summary of Representations

QUESTIONS ASKED DURING THE PREFERRED STRATEGY 2022 CONSULTATION

Question 1 – Do you have any comments on the key Issues, Vision and Objectives?	9
Question 2 – Do you have any comments on the Preferred Strategy?.....	26
Question 3 – Do you have any comments on Strategic Policy S1 – Growth Strategy?	35
Question 4 – Do you have any comments on Strategic Policy S2 Spatial Distribution of Development – Settlement Hierarchy?	43
Question 5 – Do you have any comments on Strategic Policy S3 Sustainable Placemaking & High Quality Design?	52
Question 6 – Do you have any comments on Strategic Policy S4 Climate Change?	55
Question 7 – Do you have any comments on Strategic Policy S5 Infrastructure Provision?.....	58
Question 8 – Do you have any comments on Strategic Policy S6 Affordable Homes?	64
Question 9 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site allocation?.....	70
Question 10 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site Allocation: a) Abergavenny East?	80
Question 11 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site allocation b) Bayfield Chepstow?	83
Question 12 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site Allocations: c) Caldicot East?.....	95
Question 13 – Do you have any comments on Strategic Policy S8 Gypsy and Travellers?	99
Question 14 – Do you have any comments on Strategic Policy S9 Sustainable Transport?.....	99
Question 15 – Do you have any comments on Strategic Policy S10 Town, Local and Neighbourhood Centres?	106
Question 16 – Do you have any comments on Strategic Policy S11 Community and Recreation Facilities?	109
Question 17 – Do you have any comments on Strategic Policy S12 – Employment Sites Provision	111

Question 18 – Do you have any comments on Strategic Policy S13 Rural Enterprise? 114

Question 19– Do you have any comments on Strategic Policy S14 Visitor Economy? 116

Question 20 – Do you have any comments on Strategic Policy S15 – Sustainable Waste Management?..... 118

Question 21 – Do you have any comments on Strategic Policy S16 – Minerals?..... 118

Question 22 – Do you have any comments on Strategic Policy S17 Green Infrastructure, Landscape and Nature Conservation?..... 120

Question 23 – Do you agree with the recommendations with regard to the existing Adopted LDP Development Management Policies? 124

Question 24 – Do you have any other comments on the Preferred Strategy? 128

Question 25 – We would like to know your views on the effects that the proposals would have on the Welsh language, specifically on opportunities for people to use Welsh and on treating the Welsh language no less favourably than English. What effects do you think there would be? How could positive effects be increased, or negative effects be mitigated?..... 134

Question 26 – Please also explain how you believe the proposals could be improved so as to have positive effects or increased positive effects on opportunities for people to use the Welsh language and on treating the Welsh language no less favourably than the English language?..... 136

Question 27 – Do you have any comments on the Initial Integrated Sustainability Appraisal Report? 137

Question 28 – Do you have any comments on the Habitats Regulations Assessment (HRA)? 143

Question 1 – Do you have any comments on the key Issues, Vision and Objectives?

89 organisations or members of the public submitted a response to question 1.

The responses were varied, many organisations and private individuals provided overall support for the issues, vision and objectives. Others wish to see changes to wording and some questioned how the objectives would be measured.

A number of area specific comments were made both supportive and of concern, particularly in relation to those areas where strategic sites are proposed.

Key Theme	Summary of Points Raised
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1475</p> <p>General support</p>	<ul style="list-style-type: none"> • Welcome the Preferred Strategy in particular the recognition of need for additional housing in Chepstow as so many families are in housing need [Chepstow Town Council]. • Provide general support, particularly through recognition of the challenge of the need for affordable housing and therefore reason for the high housing growth proposed [Torfaen County Borough Council]. • Note the Vision is clear and agree the objectives are sufficiently aspirational yet achievable within a spatial planning context [Llanover Estates, Leathdunn Ltd., Johnsey Estates UK, Johnsey Estates 2020 Ltd, Vistry Group, The Coldbrook Estate & Private individual x 1]. • Support the Vision and Objectives but believe a greater proportion of development should be directed towards the main rural settlements [Monmouthshire Housing Association]. • Accept the Objectives are sufficiently aspirational yet achievable to varying degrees [Abergavenny & District Civic Society]. • Support and agree with statement in paragraph 3.2 [Natural Resources Wales]. • Generally support the principle of the vision, in particular the aim to distribute growth to sustainable communities such as Usk. However note it is imperative that this is translated into policies [Private individual x 1]. • Generally support the principle of the vision, in particular the aim to distribute growth to existing rural communities such as Shirenewton, helping them become resilient with modest growth supporting local services and facilities and more housing choice including affordable to encourage younger populations to remain in communities they grew up in [Private individual x 1]. • Key objectives set out within the vision are supported [Hallam Land Management]. • Consider the relevant core issues have been identified [Redrow Homes]. • Suggest the vision, issues and objectives are fairly generic and uncontentious in nature [Barratt & David Wilson Homes South Wales, Candleston Homes, Taylor Wimpey PLC & Private individual x 1]. • Note it is demonstrated that the PS has been underpinned by the five ways of working set out in the Wellbeing of Future Generations Act (WBFGA) which will form an important part of evidencing that the RLDP is sound. Acknowledge and support the key issues, challenges and opportunities [Redrow Homes Limited]. • Support the key issues, challenges & opportunities and note the vision and objectives comply and integrate with the WBFGA [Edenstone Group, Barwood Development Securities Limited & Edenstone]. • Support the vision and objectives [Mathern Community Council & Private individual x 1]. • Note it is encouraging to see mention of active travel, green infrastructure, local food production, Monmouthshire's unique landscape, tourism potential and the need to improve water quality in rivers [Private individual x 1]. • Agree with the high level vision and broadly agree with the objectives [Private individual x 1]. • Comprehensive strategy, support all 17 objectives [Private individual x 1].

LPA Response	Support for the Issues, Vision and Objectives is welcomed and noted.
LPA Recommendation	No change required.
Key issues, challenges and opportunities	<ul style="list-style-type: none"> • Welcome reference in paragraph 3.6 noting there is a limited supply of previously developed land along with paragraph 3.7 noting it is not possible to avoid allocating land that is best and most versatile [Barratt & David Wilson Homes, Barratt & David Wilson Homes South Wales, Richborough Estates, Candleston Homes & Taylor Wimpey PLC]. • Suggest a full carbon footprint of the County Is needed to inform where maximum carbon reductions should be focussed, refer to remaining within 1.5oC suggesting this is too vague [Abergavenny Transition Town]. • Refer to the summary of key issues, suggest ‘appropriate growth sectors’ needs defining particularly given the climate emergency [Abergavenny Transition Town]. • Question what ‘opportunities associated with growth from both the Cardiff Capital Region and Bristol Region’ are, suggest recent examples be provided [Abergavenny Transition Town]. • Note rural isolation/sustaining rural communities/regenerating the rural economy are highlighted but no hint of what might lead to tackling these things other than diversification and tourism [Abergavenny Transition Town]. • Refer to the protection of landscapes and heritage noting more radical interventions are required if rural isolation/sustaining rural communities and regenerating the rural economy are going to happen [Abergavenny Transition Town]. • Regarding Tourism note nothing is mentioned about the seasonal and potential low-pay of this sector leading to inability to afford local accommodation, nor mention of impacts of second homes and Air BnB lettings in formally stable rural communities [Abergavenny Transition Town]. • Suggest the causes of phosphate pollution should be specified to allow policy to focus on the dominant causes [Abergavenny Transition Town]. • Refer to digital connectivity and note it would be useful to have statistics on the current roll out of high-speed fibre broadband and timescale for full coverage [Abergavenny Transition Town]. • Suggest nature emergency could be better addressed, noting differences should be recognised between land use and land management and by providing detail of the proposed actions that would be implemented through the policy framework [Natural Resources Wales]. • Do not feel the five aspects of ecosystem resilience as set out in the Environmental (Wales) Act 2016 are addressed in the RLDP, suggest this legislation and the South East Area Statement should be referenced in this section [Natural Resources Wales]. • Acknowledge reference to phosphates throughout but wish to highlight there are significant pre-existing pressures on the public sewer network across the County, the RLDP should not exacerbate these pressures [Natural Resources Wales]. • Wider water network failures should be listed as well as phosphates to ensure proposed growth doesn’t exacerbate this problem [Natural Resources Wales]. • Acknowledge changes to issues relating to biodiversity and also invasive non-native species [Natural Resources Wales]. • Key opportunities should also include the Nature Recovery Plan [Natural Resources Wales]. • State a number of the points are interlinked and must be considered holistically to ensure an appropriate policy response, such as demographic issues, high house prices, affordability, increasing need for affordable housing & opportunities for growth from both the Cardiff Capital and Bristol regions [Richborough Estates]. • Concern over statement relating to an older population reducing the number of people using and financially supporting businesses and services. Suggest some parts of Monmouthshire are well known to attract retired people [Private individuals x 2].

- Refer to loss of agricultural land referred to in paragraph 3.7, suggest measures need to be put in place to ensure developers don't buy up land, holding it as potential investment without using it in the meantime [Private individual x 1].
- Refer to paragraph 3.13 stating in addition to green spaces, footpaths and cycleways are needed to connect residential areas with the Monmouthshire countryside [Private individual x 1].
- Refer to the elderly noting they want to be part of an elderly community and that retirement villages should therefore be included in the RLDP, suggest their needs have not been considered in the issues, vision and objectives [Private individual x 1].
- State the plan should be for the current Welsh population and should not be catering for Bristolians that are looking for cheaper housing [Private individual x 1].
- Disagree the RLDP recognises the value and importance of placemaking and the provision of locally accessible/open spaces for health and wellbeing and recreation as green spaces are being built on [Private individual x 1].
- State there is no detail in paragraph 3.1 on how empty affordable housing is being dealt with, state this opportunity should be included and prioritised to utilise existing building stock and reduce carbon emissions inherent to building new [Cllr Christopher Edwards & Private individual x 1].
- Consider there is no overriding mandate by Welsh Government to resolve a demographic imbalance by aiming for high growth [Cllr Christopher Edwards & Private individual x 1].
- Suggest the response to climate and nature emergencies while promoting recovery is ignorant of guidance from Welsh Government to restrain growth in rural areas in order to protect the natural environment [Cllr Christopher Edwards & Private individual x 1].
- State there is no evidence to give confidence that the County's growth and location of growth will not continue to drive high levels of out-commuting [Cllr Christopher Edwards & Private individual x 1].
- Suggest the strategy is confused in that placemaking, active travel and environmental considerations are key sustainability principles to be achieved but the ambition is being undermined due to level of growth put forward in the Strategy [Cllr Christopher Edwards & Private individual x 1].
- State the high prevalence of best and most versatile land noted in paragraph 3.1 is one of the reasons why national growth in Wales has been directed elsewhere and that Monmouthshire should instead retain its rural character [Cllr Christopher Edwards & Private individual x 1].
- While recognise it is mentioned elsewhere state there is no mention of requirements to support and maintain nature/diversity within new housing developments, state this is a challenge locally and nationally [Private individual x 1].
- Refer to paragraph 3.7 state the priority and presumption should be to preserve and use the land to feed people now and in the future, suggest instead the statement leans towards granting permission to build on BMV [Private individual x 1].
- Note the key issues, vision and objectives are aspirational but vague, comment that to a degree this is unavoidable as seeks to set out a general picture [Usk Civic Society].
- Refer to phosphates, welcome that MCC are working with statutory bodies to find solutions to enable growth and allocate sites that do not harm the environmental capacity of Monmouthshire's watercourses [Vistry Group, The Coldbrook Estate & Private individual x 1].
- Welcome reference that all of the main towns are outside the Future Wales green belt [Candleston Homes & Taylor Wimpey PLC].
- Advocate the promotion of the role of rural land for employment opportunities with close connection with key defined urban settlements, suggest this would ease new development by re-use of previously developed land which accords with the principle of making efficient use of the land [Private individual x 1].
- Suggest there is an underlying assumption that all rural settlements are in need of housing development to become vibrant places, suggest the lack of development to date indicates insurmountable infrastructure deficiencies [Private individual x 1].
- State no mention of transport infrastructure as a key issue, particular concern in relation to Chepstow [Private individual x 1].
- Commend the key issues, vision and objectives but question how they will be implemented [Private individual x 1].

LPA Response	Minor updates have been made to the Key Issues, Challenges and Opportunities where relevant in response to some of the comments noted above to provide further clarity and also to account for factual changes such as updated Census data, the Local Housing Market Assessment Refresh and the Tourism STEAM report.
LPA Recommendation	Minor updates have been made to the Key Issues, Challenges and Opportunities. A summary of the key issues, challenges and opportunities are included in the Deposit RLDP. The updated Issues are included in full as an Appendix to the RLDP and also are set out in the Issues, Vision and Objectives Paper (updated September 2024).
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1478</p> <p>RLDP Vision</p>	<ul style="list-style-type: none"> • Suggest vision has not changed following change to Preferred Strategy other than last paragraph, suggest this appears to be an add on [Home Builders Federation]. • Provide comments to suggest a key element of the strategy should be to encourage vibrant, active and self-contained communities with a mixture of age groups, activities and land uses in line with PPW11. Also suggest the vision should include reference to the agricultural core of the County, and addressing constrained infrastructure that will require investment to achieve the overarching ambitions [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • State vision is acceptable but clear definition of net zero carbon ready is required [Abergavenny & District Civic Society]. • Suggest criterion 4) of the vision cannot be taken seriously until there is a full understanding of the County’s full carbon footprint [Abergavenny Transition Town]. • Applaud parts of the statement that state ‘Monmouthshire will be home to well-connected exemplar, affordable housing-led, net zero carbon ready places’ and that affordable homes will be delivered ‘at pace and at scale while also responding to the nature and climate emergency’. Note however that they have concerns these homes will be truly affordable [Abergavenny Transition Town]. • While broadly support the vision suggest it is inaccurate to say that by 2033 Monmouthshire will be affordable housing-led, suggest it is more a 70:30 ratio. Note the statement does not acknowledge the important role market housing has in delivering new communities. Suggest the vision is amended to omit this reference and instead add in ‘a balanced mix of market and affordable housing’ [Vistry]. • Suggest there is an opportunity for specific reference to be made to ensuring that sufficient housing is delivered to meet both forecast requirements and address the existing shortfall [Barratt & David Wilson Homes South Wales]. • Recommend amending the wording in the final paragraph of the vision to ‘by 2023 Monmouthshire will be home to exemplar places that are well-connected, net zero carbon ready and provide essential affordable homes, and support socially and economically sustainable and resilient communities for all’ [Richborough Estates]. • State the Council has a poor record of delivering or enabling delivery of homes at scale or pace, suggest it is commendable to raise the quality of homes but suggest the policy will be undeliverable [Cllr Christopher Edwards & Private individual x 1]. • Refer to the current adopted LDP suggests the vision and objectives are more appropriate than the PS, concern of overdevelopment in southern part of County and increase commuting [Cllr Louise Brown]. • Welcome recognition of need to address protection of environmental qualities, improve access to and facilities within town centres such as Chepstow, provide more affordable housing and address issues of water quality and wider environmental degradation [The Chepstow Society]. • Suggest there is perhaps opportunity in the vision for specific reference to be made to ensuring sufficient housing is delivered to meet both forecast requirements and to address existing shortfall [Candleston Homes & Taylor Wimpey PLC]. • Support vision, suggest it affords policy support specifically for brownfield sites in the countryside that can unlock employment opportunities where they enhance connection between both urban and rural communities [Private individual x 1].

	<ul style="list-style-type: none"> Suggest the vision would be of detriment to the countryside and due to lack of infrastructure result in further negative impact [Private individuals x 3].
LPA Response	Amend the Vision as appropriate.
LPA Recommendation	Appropriate amendments to the Vision have been made as a result of some of the consultation responses. The vision has been streamlined to avoid duplication and repetition.
Objective 1 (Economic Growth/ Employment)	<ul style="list-style-type: none"> Given the role of agriculture and related employment opportunities believe specific reference should be made in supporting the rural economy [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. Objective 1 would benefit from an emphasis on the circular economy and 'green' and/or 'clean' growth [Abergavenny & District Civic Society]. State 'economic growth' should be replaced with 'aiming for a circular economy' and a definition of 'appropriate sectors' of employment should be provided [Abergavenny Transition Town]. Note it is key to acknowledge changing working patterns and situations where sites currently cater for an employment use that are no longer fit for purpose and therefore more suitable for residential or mixed-use flexible spaces [Private individual x 1]. Suggest reference should be made to the increased role that home and agile working can be expected to make over the plan period, note it should seek to encourage/facilitate the increased propensity for home/agile working, alongside the need to bring forward 'traditional' business spaces [Richborough Estates]. Little indication on how this objective will be turned into a reality [Usk Civic Society]. Support objective [Private individual x 1].
LPA Response	Objective 1 is considered appropriate and reflects the issues the Plan is seeking to address. However, there has been one minor amendment to reflect comments above, to ensure there is no ambiguity 'appropriate growth sectors' has been removed from the objective. No other changes considered necessary. Further details relating to Economic Growth and Employment are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	Minor update has been made to Objective 1; no other changes are considered necessary. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 2 (Town and Local Centres)	<ul style="list-style-type: none"> Suggest consideration must be given to small scale agricultural and food industries and how they can be given a genuine platform to operate successfully in local markets as well as alongside larger retail centres and supermarkets, reducing food miles and giving confidence in food supplies [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. Agree with Objective [Abergavenny Transition Town]. Welcome that Objective 2 recognises Abergavenny as a County town and seeks to sustain and enhance its role by seeking to direct development and investment [Johnsey Estates UK & The Coldbrook Estate]. Support reference to three local centres including Raglan, the RLDP must help sustain and enhance these centres by directing a sufficient level of growth to settlements such as Raglan [Richborough Estates].
LPA Response	Objective 2 is considered appropriate and reflects the issues the Plan is seeking to address. However, there has been one minor factual amendment to bring the objective in line with the updated references made in the Town, Local and Neighbourhood Centres Strategic Policy. No other changes considered necessary. Further details relating to Town, Local and Neighbourhood Centres are included within the wider RLDP and detailed policy

	framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	Minor factual update has been made to Objective 2, with no further changes necessary. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 3 (Green Infrastructure, Biodiversity and Landscape)	<ul style="list-style-type: none"> • Should ensure it is demonstrated how new developments provide biodiversity benefits, greenfield sites provide significant opportunity for biodiversity gain to be made [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • No mention within objective of dramatic changes in use of the agricultural landscape over the next decade and how policy will need to adjust to those [Abergavenny Transition Town]. • Acknowledge the inclusion of 'ecosystem resilience' within this objective, note building connectivity and linkages should be thought about in an evidence based strategic way, state this objective must inform the strategic growth locations and allocated sites [Natural Resources Wales]. • State this objective is well defined and will help to ensure climate change and nature emergencies are effectively recognised and actioned [Private individual x 1].
LPA Response	Objective 3 is considered appropriate and reflects the issues the Plan is seeking to address. However, there has been one minor factual update to account for the change of name to the Wye Valley National Landscape (AONB). No other changes considered necessary. Further details relating to Green Infrastructure, Biodiversity and Landscape are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	Minor factual update has been made to Objective 3, with no further changes necessary. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 4 (Flood risk)	<ul style="list-style-type: none"> • Welcome inclusion of objective [Dwr Cymru/Welsh Water]. • Suggest control measures need to mention poor winter farming practices of leaving fields exposed with no cover crops exacerbating storm water run-off [Abergavenny Transition Town]. • Acknowledge the reference to natural flood management within this objective [Natural Resources Wales]. • State this is not being taken seriously by the removal of policy which provides a local reminder that there is a need to comply with TAN15 [Cllr Louise Brown].
LPA Response	Objective 4 is considered appropriate and reflects the issues the Plan is seeking to address. Further details relating to Flood Risk are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 5 (Minerals and Waste)	<ul style="list-style-type: none"> • Suggest should discourage carbon intensive consumption generally and encourage re-use, repair, refill and recycle [Abergavenny Transition Town]. • Reference to waste reduction in Objective 7 should be included in Objective 5 [Abergavenny Transition Town].

LPA Response	Objective 5 is considered appropriate and reflects the issues the Plan is seeking to address. Further details relating to Minerals and Waste are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 6 (Land)	<ul style="list-style-type: none"> • Note in losing a small amount of higher-grade agricultural land it may bring wider benefits to the agricultural sector as a whole [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • Suggest reference should also be made to the future ‘efficient use’ of agricultural land to account for increase of local food production [Abergavenny Transition Town]. • Welcome recognition that whilst BMV should be protected it is not always possible in a County like Monmouthshire, provides important context for the search sequence that must be followed in identifying new housing allocations [Richborough Estates]. • Recognise that this aligns with the search sequence set out in PPW but state caution should be taken to ensure that there is not an overreliance on brownfield sites, as they are slower to develop and will be unlikely to meet the RLDP requirement to deliver 50% affordable housing in all cases [Edenstone Group & Edenstone]. • Suggest the first two points state ambition but immediately create a reason not to meet it and are therefore considered weak policy points [Cllr Christopher Edwards & Private individual x 1]. • Refer to PPW11 and suggest that the approach to using BMV land is contrary to this. Concern there are no policies relating to allotment provision in all housing developments or use of Council owned land to be used for farming and food production [Cllr Louise Brown]. • Support objective as it maximises the opportunities for redevelopment of brownfield sites [Private individual x 1]. • Suggest efficient use of land must also address what is happening on the agricultural land and address local food production, carbon sequestration, restoration of biodiversity, flood risk management, water quality, reversing rural depopulation, tackling isolation and poverty, training and job creation, health, food security and the foundational economy. The RLDP should promote the creation of small farms with farmhouses. Suggest this could be done through housing cooperatives to avoid them being sold off. Promote need for small farms to enable local young people to start farming, state this is particularly needed on Council farms [Our Food 1200].
LPA Response	Objective 6 is considered appropriate and reflects the issues the Plan is seeking to address. Further details relating to Best and Most Versatile Land (including site search sequence), Allotments and Community Food Growing are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 7 (Natural resources)	<ul style="list-style-type: none"> • Welcome the sentiment of objective [Dwr Cymru/Welsh Water]. • Suggest the RLDP should commit to new development being net carbon zero and should only consider such sites for inclusion [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • Recommend this objective is strengthened by replacing ‘promote’ with ‘ensure’ given the detail in the SE Area Statement, noting it links with the theme of ‘Climate Ready Gwent’ and should therefore deliver a bold policy response by ensuring new development in the County implement measures to meet the objective [Natural Resources Wales].

LPA Response	Objective 7 is considered appropriate and reflects the issues the Plan is seeking to address. The Council’s approach to net zero carbon requirements is included within the wider RLDP and detailed policy framework of the Deposit Plan. The wording of this objective has been updated in line with the comments made and amended to ‘ensure’ to align with the SE Area Statement. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	Minor update has been made to Objective 7 in line with comments made. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 8 (Health and Well-being)	<ul style="list-style-type: none"> • Suggest there is a lack of provision of recreation and sports facilities particularly for the younger generation in Abergavenny. Recommend this matter be included [Abergavenny Transition Town]. • State this objective is well defined and will help to ensure climate change and nature emergencies are effectively recognised and actioned [Private individual x 1].
LPA Response	Objective 8 is considered appropriate and reflects the issues the Plan is seeking to address. Support for and provision of recreation and open space facilities is included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 9 (Demography)	<ul style="list-style-type: none"> • State the reference to providing opportunities of housing and employment for young people is not evidenced and is largely aspirational [Abergavenny Town Council]. • Note the impacts of lower levels of growth have previously been considered by the Council, suggest it is difficult to address these matters at levels below the previous version of the Preferred Strategy [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • Suggest adding ‘through increasing considerably, state-led third sector public housing provision, rather than relying on market-led development’ [Abergavenny Transition Town]. • State the policies must create a more balanced demography and social and economically sustainable communities if the issues are to be addressed [Richborough Estates]. • Refer to objective 9 stating this will not be achieved as rural areas have more older populations than younger, state comparison with Cardiff is false as it has a university population [Cllr Louise Brown]. • Suggest MCC have little influence in reality over who will live in the new housing stock, it may be just as attractive to downsizing retirees as young families [Usk Civic Society]. • Note this is an admirable ambition but should be more focus on retaining than attracting younger residents, many who plan to continue working in Bristol [Private individuals x 2].
LPA Response	Objective 9 is considered appropriate and reflects the issues the Plan is seeking to address. Addressing the core issues of housing affordability and rebalancing the demography of the County continue to be key priorities of the Deposit Plan, along with the climate and nature emergency and economic prosperity. This is appropriately reflected in the Deposit Plan’s policy framework which includes a policy approach to ensure allocated residential sites provide 50% affordable housing and a housing mix policy to encourage a better mix of house types, tenure and size to help address demographic and affordability challenges facing the County. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.

	<p>The core issues of housing affordability and rebalancing the demography of the County continue to be the focus of the Deposit Plan, along with the climate and nature emergency and economic prosperity. A housing mix policy is included in the plan to encourage a better mix of house types, tenure and size to help address demographic and affordability challenges facing the County.</p> <p>All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.</p>
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 11 (Placemaking)	<ul style="list-style-type: none"> Refer to Objective 11 and note ‘exemplar’ should be removed from wording and replaced with ‘good quality’ instead as this is considered a constraint that could slow down delivery of the plan [Home Builders Federation]. Suggest this largely repeats Objective 10 [Abergavenny Transition Town]. Suggest this is very subjective with aims open to developer spin and influence. Suggest language is more focussed on measurable characteristics [Cllr Christopher Edwards & Private individual x 1]. Support objective [Edenstone].
LPA Response	Objective 11 is considered appropriate and reflects the issues the Plan is seeking to address. The delivery of exemplar places is a Council ambition. Further details relating to Placemaking are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 12 (Communities)	<ul style="list-style-type: none"> Welcome and support objective 12 [Theatres Trust]. Suggest this should be reworded to ‘urban communities’ as there is already an objective specifically for ‘rural communities’ and they cannot have good access by active travel [Abergavenny Transition Town]. Note this will be reliant on delivering sufficient levels of growth capable of sustaining and enhancing the most sustainable settlements [Richborough Estates]. Refers to Objective 12 suggesting this recognises the need to provide for a level of housing sufficient to enable a wide-ranging choice of homes both for existing and future residents and supports the need for new homes in Monmouth [Edenstone].
LPA Response	Objective 12 is considered appropriate and reflects the issues the Plan is seeking to address. However, an update has been made to reflect the Community and Corporate Plan objectives which aims to ensure Monmouthshire is a connected place where people feel part of a community and are valued. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	Minor changes made, as above. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 13 (Rural communities)	<ul style="list-style-type: none"> Welcome growth being directed to a degree towards Secondary Settlements and Main Rural Settlements [Llanover Estates, Leathdunn Ltd., Johnsey Estates 2020 Ltd & The Coldbrook Estate].

	<ul style="list-style-type: none"> • Strongly suggest a distinction should be made between small, isolated settlements and the wider rural community as a whole, suggest changing objective to ‘thriving and sustainable settlements that are founded within the rural way of life’ [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • Suggest a lot of affordable housing additions will be required in order to sustain rural communities, suggest those closest to Primary and Secondary Settlements will offer easy access to markets and provide an expanded horticultural growing sector [Abergavenny Transition Town]. • Agree with this objective, note the appropriate distribution of new development to key rural settlements particularly those higher in the hierarchy will be critical to achieving this objective [Richborough Estates]. • Support objective, suggest focus should be on brownfield sites that are not isolated in the countryside that have a relationship with urban settlements to prevent longer journeys [Private individual x 1].
LPA Response	Objective 13 is considered appropriate and reflects the issues the Plan is seeking to address. The growth and spatial strategy focusses growth in the County’s most sustainable settlements, however some growth is directed to the most sustainable rural settlements to deliver much needed affordable homes and to address rural inequity and rural isolation in these areas, further details are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 14 (Infrastructure)	<ul style="list-style-type: none"> • State no figures are provided on how much broadband digital roll out is falling short of targets and the timescales this will be remedied [Abergavenny Transition Town]. • Note reference should also be made to the need to identify infrastructure capable of resolving the phosphate issue affecting the Upper River Wye catchment [Richborough Estates]. • Suggest this fails to note the lack of infrastructure in the south of the County, state this is currently at breaking point in Chepstow and surrounding areas [Cllr Louise Brown & Private individuals x 3]. • Suggest the need for appropriate physical and digital infrastructure should be assessed on a site-by-site basis in context to the scale of development proposed [Edenstone].
LPA Response	Objective 14 is considered appropriate and reflects the issues the Plan is seeking to address. Infrastructure requirements are included within the wider RLDP and detailed policy framework of the Deposit Plan. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites, a summary of which noting site specific considerations is included as an appendix to the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 15 (Accessibility)	<ul style="list-style-type: none"> • Support the use of private car as the last option for travelling [Abergavenny Transition Town]. • Welcome objective recognising accessibility can be achieved via a variety of means [Richborough Estates]. • Use of wording is questioned suggesting to ‘seek to’ and also ‘provide opportunities for’ is creating an excuse to fail and therefore weak and non-committal. Suggest should instead have a policy to improve transport connectivity, safety, frequency and reliability [Cllr Christopher Edwards & Private individual x 1].

LPA Response	Objective 15 is considered appropriate and reflects the issues the Plan is seeking to address. Further details relating to the transport hierarchy, active travel and sustainable transport are included within the wider RLDP and detailed policy framework of the Deposit Plan. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 16 (Culture, Heritage and Welsh Language)	<ul style="list-style-type: none"> • Support Objective 16 in the context of the Welsh language but it is unclear how the Council intends to achieve this [Welsh Language Commissioner]. • Suggest tourism shouldn't be included in this objective as many aspects demote the use of Welsh language [Abergavenny Transition Town]. • Suggest this objective won't be achieved as traffic queues will prevent repeat tourism visits [Cllr Louise Brown].
LPA Response	Objective 16 is considered appropriate and reflects the issues the Plan is seeking to address. Additional information relating to Welsh Language is considered further in the wider RLDP. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	No change required. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objective 17 (Climate and Nature Emergency)	<ul style="list-style-type: none"> • Disappointed Climate Crisis is the last objective, state would like this to be the principal objective overarching the RLDP [Abergavenny Town Council & Abergavenny Transition Town]. • Question whether it is possible for Monmouthshire to achieve this, suggest it cannot be monitored and should therefore be reworded to indicate the Council 'will play a part in wider global ambitions' [Home Builders Federation]. • Welcome inclusion of reference to a zero Carbon County in line with Monmouthshire's declaration of a climate emergency [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • Welcome the change to reflect the climate emergency, remain of the view that a commitment to carbon zero should be made and assessed through the candidate site process [Melin Homes & Llanarth Estates]. • Note there is no mention of lowering the carbon footprint of in-commuting [Abergavenny Transition Town]. • Acknowledge and support the change of wording in this objective, particularly support the commitment to deliver 'net zero carbon ready new homes' [Natural Resources Wales]. • State this is too high level to be deliverable at a site development scale, suggest it belongs better in the vision as it cannot be measured [Cllr Christopher Edwards & Private individual x 1]. • Suggest objective 17 won't be achieved as air quality will not be improved due to extra traffic flows in a small area in the south of the County. [Cllr Louise Brown]. • Rightly acknowledges the climate emergency as a key factor, need to ensure all site allocations are capable of meeting these provisions whilst remaining viable [Tompkins Thomas Planning]. • Suggest rewording 'To strive to limit the increase in global temperatures to 1.5oC' to 'To strive to pursue policies and action which contribute to the international goal of limiting the increase in global temperatures to 1.5oC' as it implies MCC policies could have this effect [Private individual x 1]. • Refer to objective wording 'provide ultra-low emission vehicle charging infrastructure' suggest replacing this with 'the provision of appropriate measures to reduce vehicle emissions' as in a rural farming county there are many diesel vehicles, the rewording would cover all possibilities [Private individual x 1].

	<ul style="list-style-type: none"> • Suggest the zero carbon requirement for new homes may put off developers given the expense [Usk Civic Society]. • Suggest building in the south of the County encourages out-commuting [Private individuals x 2]. • Refer to wording suggesting 'to strive to limit the increase' is vague wording and should instead be 'has committed to limit'. Questions what 'strengthened emphasis on nature recovery' means. State wording should be specific, targeted and meaningful due to the emergency [Private individual x 1]. • Question the link between the Monmouthshire Public Service Board Well-being plan objective and the Welsh language in objective 16 [Private individual x 1]. • State this objective is well defined and will help to ensure climate change and nature emergencies are effectively recognised and actioned [Private individual x 1]. • Suggest given the broad nature of climate change policies covering the topic should be prescriptive to particular types of mitigation and considered on a site-by-site basis [Edenstone].
LPA Response	Comments noted. The list of objectives is not ranked in any way. The Council's approach to climate change, nature recovery and net zero carbon requirements is included within the wider RLDP and detailed policy framework of the Deposit Plan. The wording of this objective has been updated in line with the Preferred Strategy Update in September 2023 to remove the word 'ready' (in relation to net zero carbon). All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
LPA Recommendation	Minor change made following the Preferred Strategy Update in September 2023 to remove references to 'ready' in the context of net zero carbon. Wider update for all objectives to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives.
Objectives general	<ul style="list-style-type: none"> • Refer to objectives that have increased emphasis in light of Covid-19, suggest objectives 11, 12, 15 and 16 are also of increased importance as they form part of the Welsh Government's Placemaking and the Covid-19 recovery planning guidance Building Better Places (July 2020) [Redrow Homes Limited & Barwood Development Securities Limited]. • State the objectives are aspirational and welcomed but not convinced based on evidence provided they are fully achievable within the existing statutory planning regulations and functions [Abergavenny Town Council]. • Suggest green tourism is missing from the objectives, suggest this can bring in younger visitors to the area [Private individual x 1].
LPA Response	Comments noted. The reference to objectives having increased emphasis in light of Covid-19 has been removed as this related to a fixed period of time and is no longer considered relevant. The Council's approach to tourism is included within the wider RLDP and detailed policy framework of the Deposit Plan.
LPA Recommendation	No change required.
Missing challenges	<ul style="list-style-type: none"> • State there are a number of challenges that are not specifically addressed: Covid 19/Recession/Cost of living crisis, Phosphates, Rural core of the Authority, Capacity of infrastructure, Constraints to main settlements, Commuter challenges [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • Refer to quality of existing housing in terms of insulation, carbon footprint, suggest this should be included as a challenge [Private individual x 1].

LPA Response	Comments noted, while some of these challenges are not specifically addressed many are considered in the wider RLDP and policy framework. All objectives have been updated to include the relevant Gwent Public Service Board Well-being Plan Steps and the Community and Corporate Plan Objectives where some of these issues are also considered.
LPA Recommendation	No change required.
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1488</p> <p>Area specific – Chepstow</p>	<ul style="list-style-type: none"> • Refer to Chepstow as being ‘The Green Gateway to Wales’ state this will be lost if the RLDP vision is put into practice [Private individual x 1]. • Concern over the lack of support for the high street in Chepstow, stating it is in gradual decline. State it is not a one strategy fitting all case and that other centres operate differently [Cllr Christopher Edwards & Private individuals x 2]. • Refer to the national green belt stating the spread of Chepstow towards the boundary should be resisted [Cllr Christopher Edwards, Cllr Louise Brown & Private individual x 1]. • State the South East Wales Metro Project will provide no benefits for commuters from Chepstow due to service frequency and reliability, suggest there is no confidence in adequate investment supporting the growth of Monmouthshire [Cllr Christopher Edwards & Private individual x 1]. • State the vision represents a planner’s utopia and is therefore aspirational, suggest it lacks local flavour. Consider County boundaries are not relevant to how people live their lives and that Chepstow is likely to experience this more than other towns. Question how the vision can better reflect the reality of lives without administrative borders [Cllr Christopher Edwards & Private individual x 1]. • Refer to objective 14 stating significant investment will be needed to bring current facilities in Chepstow up to an appropriate standard which is beyond the scope of S106 or other developer contributions, question how the Council will ensure there is improvement to these infrastructure needs before allowing growth to continue [Cllr Christopher Edwards & Private individual x 1]. • Refer to road infrastructure needed prior to new housing in Chepstow, concern over lack of response from Welsh Government for improvements to High Beech roundabout [Cllr Louise Brown]. • Concern there is no mention of impact of developments in Forest of Dean on Chepstow in this section, refers to the need for a by-pass and a need for road infrastructure to come first [Cllr Louise Brown & Private individual x 1]. • State the particular issues of Chepstow and the Severnside area are not taken in a coherent integrated way, should recognise the areas importance as an environmental resource and link between the Newport/Cardiff and Bristol areas [The Chepstow Society]. • Refer to the Bayfield allocation suggesting it contradicts objective 3 as it adjoins the AONB and is at odds with objectives 12 and 14 [Private individual x 1]. • While note the vision and objectives seem fair they try to meet different targets, concern over increase in Chepstow over recent years, the RLDP will worsen existing infrastructure issues [Private individuals x 2]. • Question why there are no proposals for hi-technology in the Chepstow area suggesting this is a missed opportunity to cater for the expanding industry as Bristol has reached capacity [Private individual x 1].
LPA Response	<p>The Council has worked/continues to work collaboratively with the Forest of Dean and South Gloucestershire councils on cross-boundary issues affecting Chepstow in relation to the A48.</p> <p>A Strategic Transport Assessment (STA) has been undertaken by TfW in order to understand the cumulative impact the proposed housing growth will have on Monmouthshire’s transport network. The STA concludes a slight increase in traffic flows with the proposed Chepstow/ Severnside developments. The STA considers the impact of highway travel and traffic pressure from the Forest of Dean and the surrounding area upon the highway network including Highbeech roundabout in the Chepstow locality. Transport Assessments will be required to identify localised issues, set out specific mitigation and highway improvements to ensure traffic safety and capacity on the roads and that proposed development accords with the ‘Sustainable</p>

	<p>Transport Hierarchy’. An infrastructure Delivery Plan (IDP) has also been prepared which sets out the highway infrastructure requirements for allocated sites.</p> <p>The RLDP aims to broadly align the spatial distribution of housing and employment growth through-out the County and provide a range and choice of sites. Employment site allocations are set out in the Employment and Economy section of the Plan - Policies EA1a-EA1m. This does not specify the exact use of employment sites but does note whether the sites are allocated for B1, B2 or B8 uses.</p> <p>It is not considered necessary to include settlement specific objectives in the RLDP. Details regarding the strategic site allocation in Chepstow are appropriately set out in the RLDP and relevant supporting background papers, please refer Questions 9 and 11 of the Report of Consultation in relation to the Chepstow Strategic Site allocation for further detail. No changes are proposed.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>
<p>Area specific – Severnside</p>	<ul style="list-style-type: none"> • Suggest encouraging developments in Severnside will affect goals of encouraging use of the Welsh language as likely to be people moving in from Bristol and the South East [Private individual x 1]. • Refer to Caldicot East site stating it will negatively impact the health and well-being goals by depriving the locality of green space and the tourist attraction of the David Broom Event Centre [Private individuals x 2]. • State the well-being objectives will not be achievable for Caldicot East, the exclusion of a site in Monmouth disproportionately affects the Severnside area [Private individual x 1]. • Refer to placemaking and need to develop appropriately to ensure balanced and attractive places to live, suggest the Caldicot East site results in overdevelopment and would result in a negative impact on communities in Severnside [Private individuals x 2].
<p>LPA Response</p>	<p>Comments noted, the promotion of greater opportunities for children, residents of all ages and the workforce to learn and speak Welsh is identified in the Monmouthshire Welsh Education Strategic Plan (WESP). Monmouthshire has Welsh medium primary schools in Abergavenny, Caldicot and Monmouth (Monmouth is using a seedling school model from September 2024), children in new developments across the County will have access to these schools should they wish to attend a Welsh medium primary school. National planning policies provide advice regarding the consideration of Welsh language in development and will be taken into account in the determination of planning applications, where appropriate.</p> <p>Policy HA2 relates to Land to the East of Caldicot, the proposal includes a substantial amount of public open space and recreation uses and brings more land into public use which is of benefit to the wider community. Part of the site in ownership by the David Broom Event Centre and has put forward as a development opportunity by the landowner.</p> <p>The Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government’s response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW’s planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government’s confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.</p> <p>It is not considered necessary to include settlement specific objectives in the RLDP. Details regarding the strategic site allocation at Caldicot East are appropriately set out in the RLDP and relevant supporting background papers. No changes are proposed.</p>

LPA Recommendation	No change required.
Area specific – Abergavenny	<p>Refer to greenbelt study and sites in Abergavenny, state this should take place before sites are considered for development/protection [Private individual x 1].</p> <p>Question how jobs are expected to appear in alignment with the proposed addition of 500 dwellings in Abergavenny as it is not in the Cardiff Capital City Region Deal area, suggest unlikely to see benefits [Private individual x 1].</p>
LPA Response	<p>Comments noted. A Green Belt is not proposed in Abergavenny in accordance with Future Wales (WG, 2021). The Green Wedge Assessment has informed the designation of green wedges throughout the County and has been considered as part of the site selection process.</p> <p>The RLDP seeks to support economic growth through the inclusion of an overarching strategy and potential jobs growth figure that could be supported by the population and housing growth planned over the Plan period. The RLDP will seek to achieve this through the allocation of a range of B use class employment sites and a supportive policy framework for jobs that will be delivered other sectors such as tourism, leisure food, retail and agriculture. It is recognised that the RLDP is only one mechanism for delivering on economic growth. The Economy, Employment and Skills Strategy (EESS) sets out the Council's direction of travel and action plan for achieving economic growth.</p> <p>It is not considered necessary to include settlement specific objectives in the RLDP. No changes are proposed.</p>
LPA Recommendation	No change required.
Area specific – Monmouth	<ul style="list-style-type: none"> • State the vision will be difficult to achieve in full on a County wide basis without the identification of any new housing/economic allocations in the Upper River Wye Catchment [Richborough Estates]. • Support a strategic site allocation in Monmouth subject to the solution to the phosphates issue, need to ensure the RLDP realises the role Monmouth has in contribution to sustainable growth of the County to 2033 [Richborough Estates, Vistry Group, Edenstone & Private individual x 1].
LPA Response	<p>Comment noted, the Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government's response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government's confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.</p>
LPA Recommendation	No change required.
Site specific - other	<ul style="list-style-type: none"> • Refer to CS0242 Land north of New House, Llangybi suggest objectives 3, 4, 5 and 14 cannot be met and would not meet statutory obligations under section 6 of the Environment Act (Wales) 2016 to protect the environment [Private individual x 1]. • Refer to CS0113 Castle Oaks Site D, CS0039 Land at Little Castle Farm & CS0282 Land north of Burrium Gate stating these would increase the volume or concentration of wastewater resulting in phosphate impact. Suggest they would not meet objectives 4, 12, 14 or 17 [Private individual x 1].
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Site Assessment Report.

LPA Recommendation	No change required.
Promotion of sites	<ul style="list-style-type: none"> • Promote CS0103 Land adjacent Berthon Road, Little Mill noting the ranking of settlements should be considered. Suggest the site aligns with Objective 13 [Monmouthshire Housing Association]. • Promote CS0247 Coopers III noting the Deposit Plan should continue to direct development and investment to the County towns, including this site [Johnsey Estates 2020 Ltd]. • Promote CS0105 Land at Former Goods Yard, Usk noting development of this land offers an opportunity to help achieve Objective 6 and in respect of Objective 4 opens an opportunity to redevelop a brownfield site with measures that can improve flood resilience and incorporate sustainable drainage principles [Private individual x 1]. • Promote CS0111 Land adjacent Thistledown Barn, Shirenewton noting Objectives 10, 12 and 13 can all be met [Private individual x 1]. • Promote CS0128 Land at Chapel Farm noting it can fully support the vision [Hallam Land Management]. • Promote CS0269 Land at Grove Farm, Llanfoist for a mixed-use care village noting it can deliver the vision, objectives and assist in key issues [Grove Farm Estates & Development]. • Promote CS0274 Land to the north of Wonastow Road as it represents an appropriate opportunity for a sustainable mixed use strategic allocation for the settlement [Richborough Estates]. • Promote CS0271 Land at Vauxhall Fields, Monmouth noting this aligns with the vision and will contribute to the achievement of the 17 RLDP objectives [Edenstone Group]. • Promote CS0165 noting this aligns with the vision and will contribute to the achievement of the 17 RLDP objectives [Barwood Development Securities Limited]. • Promote CS0206 South of Newport Road, Magor noting this aligns with the vision and will contribute to the achievement of the 17 RLDP objectives [Edenstone]. • Promote CS0280 Land at Walnut Tree Farm, Penperlleni noting this aligns with the vision and will contribute to the achievement of the 17 RLDP objectives [Edenstone]. • Promote CS0189 Land at Tudor Road, Wyesham noting it is sustainable and can contribute to the Council’s Vision and Objectives, delivering a ‘20-minute neighbourhood’ [Edenstone].
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Site Assessment Report.
LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> • Concerned over the emphasis on residential development with insufficient employment land allocation [Abergavenny Town Council]. • Suggest the issues, vision and objectives are well meaning but vague with no mention of the need to react to climate change [Abergavenny & Crickhowell Friends of the Earth]. • Suggests there is a conflict between becoming a zero carbon County and significant expansion of secondary settlements which will sharply increase commuting, state there is no evidence that the number of houses provided reflects what the population really need or population growth. Also concerned the evidence is based on an out of date census [Private individual x 1].

	<ul style="list-style-type: none"> • Suggest table of objectives informed by the PSB Well Being Plan creates a utopian wish list with a lack of hard focus on actions on the climate and nature emergency issue [Abergavenny Transition Town]. • A further matter for consideration is delivery immediately after the RLDP is adopted to ensure the implementation of the plan is possible in the remainder of the plan period [Leathdunn Ltd. & Johnsey Estates 2020 Ltd]. • Note Future Wales provides a positive basis for growth, disagree with Welsh Governments approach that suggests growth will undermine delivery of the National Plan [Redrow Homes & Richborough Estates]. • State the RLDP should make specific allocations for older peoples housing including care provision [Grove Farm Estates & Development]. • Suggest the plan period should be extended to cover an increased timescale beyond 2033 with associated amendments to the RLDP housing requirement [Edenstone Group & Edenstone]. • State housing numbers are too high and question where the evidence of jobs is and who will provide them, significant investment would be needed [Private individual x 1].
LPA Response	Comments noted, many of the comments raised above are considered in the wider RLDP and policy framework.
LPA Recommendation	No change required.

Page 14 of 142

Question 2 – Do you have any comments on the Preferred Strategy?

90 organisations or members of the public submitted a response to question 2.

Given the overlap with the Preferred Strategy and the policy content of S1 – Growth Strategy and S2 – Spatial Distribution, there are similarities in the answers given to consultation questions 2, 3 & 4. A range of comments have been made on the Preferred Strategy, with some representors in broad support, others suggesting the Strategy is not ambitious enough and other suggesting it is too high. There was a recognition on both sides that the Preferred Strategy represents a compromised approach to addressing the County’s issues and challenges whilst also addressing Welsh Government’s objections to the previous Preferred Strategy (2021).

General support given to the distribution of growth, focused on the Primary Settlements, however, more evenly dispersed growth across settlements, including Monmouth and lower tiers was raised. Concern was raised at the level of growth focussed in the south of the County.

In terms of the housing supply components, the consensus is that the flexibility allowance is too low with a 20% or 25% flexibility allowance suggested as more appropriate rates. An over-reliance on windfall/infills and existing commitments was expressed. Similarly, concerns were raised in relation to an over reliance on a small number of strategic sites and the potential impact on delivery homes and affordable homes within the plan period.

Key themes raised in relation to Question 2 on the Preferred Strategy are set out below:

Key Theme	Summary of Points Raised
Growth level represents compromise and is supported.	<ul style="list-style-type: none"> • Growth level is a more appropriate fit with FW 2020. The PS is in general conformity with Policies 1, 7 and 33 of FW 2020 and does not undermine the role of Cardiff, Newport, and the Valleys as the main focus for growth and investment in the Southeast region but reflects the urgent need to increase the supply of affordable housing in Monmouthshire. [WG] • Growth level represents a compromise between the 2021 Preferred Strategy and Welsh Government prescribed level. [Abergavenny Town Council, Private Individual, Abergavenny & District Civic Society] • PS provides a clear direction to enable sustainable growth across the County over the Plan period. [Llanover Estates, Leathdunn Ltd, Johnsey Estates, MHA, Vistry Group, Coldbrook Estate]

	<ul style="list-style-type: none"> Recognised the revised PS responds to a number of challenges including WG’s objection and water quality issues. [Hallam Land Management, Edenstone]
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">LPA Response</p>	<p>The 2022 Preferred Strategy growth level of 5,400 homes housing requirement and enabling the provision of up to 6,240 jobs strikes a compromise between achieving our local evidenced-based objectives that underpin the RLDP and the Welsh Government’s objection to the level of growth proposed in the 2021 Preferred Strategy. This level of growth has been informed by a wide range of evidence and responded to a number of challenges that have arisen throughout the plan making process including the Welsh Government objection to the level of growth set out in the 2021 Preferred Strategy and phosphate water quality issues in the Rivers Wye and Usk. In October 2023, a number of post-consultation updates to the Preferred Strategy (2022) were endorsed by Council forming the basis for the level of growth set out in the Deposit Plan. These include allowing for growth in Monmouth which was previously avoided due to no phosphates solution being identified for the River Wye Catchment area and an increase in the flexibility rate from 10% to 15%. This has resulted in the housing provision figure increasing from 5,940 homes (10% flexibility) to 6,210 homes (15% flexibility). Welsh Government formally responded to the Preferred Strategy consultation in January 2023 with a ‘green’ rating and noting that “Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government.</p> <p>The Deposit Plan is considered to represent a sustainable level of growth that addresses our local issues and objectives including the delivery of affordable homes, sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency and having regard to Welsh Government’s concerns regarding alignment with Future Wales.</p>
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">LPA Recommendation</p>	<p>In line with the October 2023 Council decision, the housing requirement remains at 5,400 homes based on a demographic-led scenario with added policy assumptions, however, the flexibility allowance is increased from 10% to 15% resulting in a housing provision figure of 6,210 homes.</p>
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Growth Level is too low</p>	<ul style="list-style-type: none"> Proposed growth level will not deliver enough homes to satisfy current needs. [Chepstow Town Council, BB3 Ltd, Richard Willett, Manor Farm Partnership, Private Individuals x 3] Disappointment at the significant reduction in the housing provision number from that justified by evidence in the previous version of the PS question whether the revised option enables a sufficiently aspirational vision and strategy for the Plan [Barratt & David Wilson] Approach taken seems to have been entirely shaped by Welsh Government’s policy position requiring a low growth approach rather than an approach that is capable of providing the more positive planning intervention required to address the issues identified. Higher growth option should have been considered based on the evidence and significant issues facing the County. [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero, Private Individuals x 2] Acknowledge the Council has had to temper the level of growth pursued due to WG’s objection, however, question whether the evidence base supports the reduced level of growth. Growth level does not provide sufficient growth to redress negative demographic trends for Monmouthshire and harness its economic potential. [Edenstone, Barnwood Development Securities Ltd] PS leaves the Plan without a clear strategy to deliver the housing needed by Monmouthshire and does not follow logically from the identified Key Issues, RLDP Vision and RLDP Objectives. It therefore fails to satisfy Soundness Tests 2 & 3. Disagree with the WG assertion that by meeting its evidenced growth needs the RLDP would undermine delivery of the FW 2020 growth area. [Redrow] Increase in housing supply should be pursued to address affordability issues rather than a blanket 50% affordable housing requirement. [Edenstone]
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">LPA Response</p>	<p>The 2022 Preferred Strategy growth level of 5,400 homes housing requirement and enabling the provision of up to 6,240 jobs strikes a compromise between achieving our local evidenced-based objectives that underpin the RLDP and the Welsh Government’s objection to the level of growth proposed</p>

	<p>in the 2021 Preferred Strategy. This level of growth has been informed by a wide range of evidence and responded to a number of challenges that have arisen throughout the plan making process including the Welsh Government objection to the level of growth set out in the 2021 Preferred Strategy and phosphate water quality issues in the Rivers Wye and Usk. In October 2023, a number of post-consultation updates to the Preferred Strategy (2022) were endorsed by Council forming the basis for the level of growth set out in the Deposit Plan. These include allowing for growth in Monmouth which was previously avoided due to no phosphates solution being identified for the River Wye Catchment area and an increase in the flexibility rate from 10% to 15%. This has resulted in the housing provision figure increasing from 5,940 homes (10% flexibility) to 6,210 homes (15% flexibility). Welsh Government formally responded to the Preferred Strategy consultation in January 2023 with a ‘green’ rating and noting that “Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government.</p> <p>The Deposit Plan is considered to represent a sustainable level of growth that addresses our local issues and objectives including the delivery of affordable homes, sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency and having regard to Welsh Government’s concerns regarding alignment with Future Wales.</p>
<p>LPA Recommendation</p> <p>Growth level is too high</p> <p>Pages 1494</p>	<p>In line with the October 2023 Council decision, the housing requirement remains at 5,400 homes based on a demographic-led scenario with added policy assumptions, however, the flexibility allowance is increased from 10% to 15% resulting in a housing provision figure of 6,210 homes.</p> <ul style="list-style-type: none"> • Housing target is excessive and contrary to FW 2040 creating a risk to the adoption of the RLDP. [Llanarth Fawr CC; Raglan CC, Private Individuals x 6, Cllr Louise Brown, Chepstow Society, Cllr Christopher Edwards] • PS growth level is contrary to a number of the RLDP objectives and will attract people from outside the County exacerbating out-commuting and worsening the affordability issues [Private Individual x 3] • Housing requirement figure is excessive – WG’s view is that it should be no more than 4,725 dwellings. Danger that an excessive housing target will cascade excessive development down to Secondary Settlements of Raglan, Usk and Penperlleni. [Raglan Village Action Group, Usk Civic Society, Private Individual]
<p>LPA Response</p>	<p>The 2022 Preferred Strategy growth level of 5,400 homes housing requirement and enabling the provision of up to 6,240 jobs strikes a compromise between achieving our local evidenced-based objectives that underpin the RLDP and the Welsh Government’s objection to the level of growth proposed in the 2021 Preferred Strategy. This level of growth has been informed by a wide range of evidence and responded to a number of challenges that have arisen throughout the plan making process including the Welsh Government objection to the level of growth set out in the 2021 Preferred Strategy and phosphate water quality issues in the Rivers Wye and Usk. In October 2023, a number of post-consultation updates to the Preferred Strategy (2022) were endorsed by Council forming the basis for the level of growth set out in the Deposit Plan. These include allowing for growth in Monmouth which was previously avoided due to no phosphates solution being identified for the River Wye Catchment area and an increase in the flexibility rate from 10% to 15%. This has resulted in the housing provision figure increasing from 5,940 homes (10% flexibility) to 6,210 homes (15% flexibility). Welsh Government formally responded to the Preferred Strategy consultation in January 2023 with a ‘green’ rating and noting that “Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government.</p>

	<p>The Deposit Plan is considered to represent a sustainable level of growth that addresses our local issues and objectives including the delivery of affordable homes, sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency and having regard to Welsh Government’s concerns regarding alignment with Future Wales.</p>
<p>LPA Recommendation</p>	<p>In line with the October 2023 Council decision, the housing requirement remains at 5,400 homes based on a demographic-led scenario with added policy assumptions, however, the flexibility allowance is increased from 10% to 15% resulting in a housing provision figure of 6,210 homes.</p>
<p>Spatial Distribution</p>	<ul style="list-style-type: none"> • Proportionate growth distribution is welcomed. [Dwr Cymru] • Support general approach, however, the Deposit Plan should place greater value on the Main Rural Settlements to accommodate growth. [Llanover Estates, Coldbrook Estate] • Support for focus on growth in the County’s most sustainable primary settlements [BDW] • Over provision in the south of the County, which will exacerbate out-commuting and loss of young people and place strain on inadequate infrastructure. [Melin Homes, Hallam Land Management, Llanarth Estates, Cllr Louise Brown, Private Individuals x 7, Tirion Homes, Candleston Homes, Sero Homes, Sero] • Focus of development in the south of the County contrary to FW2020 as intention is for a Green Belt in the area. [Cllr Louise Brown, Private Individual] • Inappropriate and unsound to rule out long term policy intervention such as a new settlement without fully considering the benefits it can bring. [Melin Homes] • Step change in approach, such as a new settlement, required if the Council is to address the issues facing the County. Adding incrementally to existing settlements alone will not achieve aims. [Llanarth Estates, Tirion Homes, Private Individual] • Increase distribution and provision at lower tier settlements [MHA, BB3 Ltd, Manor Farm Partnership, Coldbrook Estate, Private Individuals x 6] • Greater proportion of growth should be apportioned to Chepstow. [Barwood Development Securities] • NRW’s understanding is that Llanfoist WwTW (along with Monmouth WwTW) have been identified in the National Environment Programme (NEP) as requiring investment to reduce phosphorus discharges. These have been proposed for improvements in AMP8 (2025-2030), however some uncertainty remains as to whether the investment will be confirmed until the water company business plans have been reviewed and agreed by OFWAT. Therefore, if DCWW have advised that investment at Llanfoist can be brought forward from AMP8 to AMP7 with early completion of the improvement works by 2025, this needs to be evidenced. Situation with River Wye Catchment and solution at the Monmouth WwTW may change within the Plan period. [NRW] • The completion of over 1400 homes at Caldicot (including Severnside) is ambitious, particularly that upon adoption the plan will only have eight years remaining in the plan period. A re-distribution of sites to include additional allocations across the County would de-risk the Plan. [Johnsey Estates] • Not clear how the most sustainable rural sites are being identified - many are declining in terms of facilities. [Llangybi Fawr CC] • Willingness to allow housing development in rural areas should be brought together with the aim of strengthening the rural economy, by creating small farmhouses. [Our Food 1200]
<p>LPA Response</p>	<p>Support for spatial distribution of growth is welcomed. The Settlement Hierarchy set out in Policy S2 reflects the findings of the Sustainable Settlement Appraisal (SSA) which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. The SSA confirms the dominant role of the primary settlements of Abergavenny, Chepstow, Caldicot and Monmouth, with this reflected in 85% of the level of housing growth proposed in these settlements.</p>

Page 1496		<p>Spatially, the growth is considered to be well distributed throughout the County to help address affordability issues across Monmouthshire. The southern settlements of Chepstow and Caldicot account for 48% of the housing growth proposed and the northern primary settlements of Abergavenny and Monmouth account of 37%. It is recognised that Caldicot and the Severnside cluster account for 35% of housing growth, however, Welsh Government acknowledge the strong functional linkage with Newport, Cardiff and Bristol and “the concentration of new growth primarily in Caldicot and the Severnside area should reduce the potential to negatively impact on environmental assets and avoid consequences for climate and nature emergencies”.</p> <p>The spatial strategy has regard to Policy 34 and the indicative Green Belt boundary. Monmouthshire’s primary settlements fall outside of the indicative Green Belt boundary. National planning policy allows for extensions to existing settlements within and adjoining the Green Belt of appropriate scale having regard to the identified and longer-term need for development land, the effects of development pressures in areas beyond Green Belt, the need to minimise demand travel, and the purpose of the overall greenbelt designation. It states that this may require land to be safeguarded and boundaries of proposed Green Belts must be carefully defined to achieve this.</p> <p>Paragraph 3.53 of PPW12 states that due to their strategic nature new settlements should only be proposed as part of a joint LDP, an SDP or Future Wales.</p> <p>The RLDP approach to rural housing is consistent with national policy.</p> <p>The Council is working collaboratively with NRW and Dwr Cymru Welsh Water in relation to phosphate issue and this will continue as the Plan progresses to inform site specific delivery and reflect improvement timescales.</p>
	LPA Recommendation	No changes to the Settlement Hierarchy required, however, update Policy S2 to include housing and employment monitoring data up to the 1 st April 2024 base date; to reflect growth will now be allowed in the River Wye Catchment area following Dwr Cymru Welsh Water investment and Welsh Government advice and increases in the flexibility rate from 10% to 15%.
	Settlement Hierarchy	<ul style="list-style-type: none"> Little Mill should be recategorized as a Tier 2 Settlement. [MHA]
	LPA Response	The Settlement Hierarchy set out in Policy S2 reflects the findings of the Sustainable Settlement Appraisal (SSA) which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. Further information on the methodology can be found in the SSA.
	LPA Recommendation	No change required.
	Strategic Sites/Delivery	<ul style="list-style-type: none"> Spatial strategy realises the importance of focussing growth in the County’s primary and secondary settlements but could be considered to over-rely on two large strategic sites [Lethdunn Ltd, Johnsey Estates]. The ability of the large Strategic Sites to deliver the number of units allocated in the PS is questionable, given challenges in the County and adoption not scheduled until summer 2025. A greater number of small/medium allocations is considered essential to make up for this potential shortfall in delivery. [Hallam Land Management]
	LPA Response	<p>The Deposit Plan allocates 18 residential/mixed use sites. Whilst it is recognised that two of the strategic sites (HA1 – Land to the East of Abergavenny and HA2 – Land to the East of Caldicot) account for 1,270 homes, there are a further 16 residential allocations ranging in size from 15 units to 270 units contributing to housing delivery in the County.</p> <p>Furthermore, in October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. An increase in the flexibility rate from 10% to 15% was one of the changes agreed. This increased the housing provision figure from 5,940 (10% flexibility) to 6,210 (15% flexibility). The</p>

	<p>change seeks to ensure that the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst also allowing for the allocation of a handful of smaller sites across the County to sustain and enhance existing communities. Increasing the flexibility ensures that the plan is more robust and resilient as there is delivery in the short-term term while the large strategic sites take time to be developed out. An increased flexibility will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery of larger strategic sites which are more complicated to develop. A range of smaller sites will ensure the delivery of much needed affordable housing soon after the adoption of the plan to start addressing this current unmet affordable housing need.</p> <p>A housing trajectory has been prepared as part of the Deposit Plan, which demonstrates housing delivery rates throughout the Plan period can be achieved.</p>
<p>LPA Recommendation</p>	<p>In line with the October 2023 Council decision, the housing requirement remains at 5,400 homes based on a demographic-led scenario with added policy assumptions, however, the flexibility allowance is increased from 10% to 15% resulting in a housing provision figure of 6,210 homes.</p>
<p>Monmouth Growth</p>	<ul style="list-style-type: none"> • DWR Cymru – given the significant levels of iron at Monmouth WwTW the design of phosphorous removal scheme requires careful planning. Phosphorus permit limit following the review of permits needed and regulatory sign-off from NRW. However, the commitment is there to undertake necessary works. [Dwr Cymru] • HBF do not agree with the Monmouth sites can be classed as ‘bonus sites’ within the context of the definition set out in the Development Plans Manual. [HBF, Private Individual] • RLDP evidence base recognises the role Monmouth in the County. There should be allocations for housing made at Monmouth [BB3, Manor Farm Partnership, Vistry Group, Private Individuals x 4] • As set out in the DcWW Improving our River Water Quality (2022) document a £70 million commitment is also being made to reduce phosphate outputs from the WwTW in the River Wye (page 26). With a plan and funding commitment to resolve the phosphates issue moving forward from Monmouth WwTW as well as alternative mitigation routes being explored, there are no planning reasons not to allocate in the Wye Catchment. PS approach to Monmouth would result in no delivery of new housing allocations in Monmouth until 2032, having significant adverse economic and social impacts for Monmouth. [Redrow] • PS is not aspirational as it does not include additional developments in the North of the County and assumes there will be no solution to the river phosphates issue during the Plan period. [Cllr Louise Brown]
<p>LPA Response</p>	<p>The Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government’s response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW’s planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government’s confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.</p>
<p>LPA Recommendation</p>	<p>In accordance with the October 2023 Council, the Deposit Plan allows for growth in Monmouth.</p>
<p>PS Priorities</p>	<ul style="list-style-type: none"> • Prominence given to climate change and delivery of affordable housing is welcomed. [FoD] • Welcome policy shift from previous PS to prioritising land allocation for affordable housing and net zero ready homes and range and mix of house sizes. [Abergavenny Transition Town, Private Individual]

	<ul style="list-style-type: none"> • PS has made positive steps identifying and addressing the climate emergency, most notably reference to becoming a zero-carbon county. Welcome inclusion and reference to the nature emergency, however it is unclear how the policy framework practically seeks to deliver actions that tackle the nature emergency. [NRW] • Affordable housing threshold should not apply to windfall site. [Private Individual] • Supportive of a move towards zero carbon and believe an ambitious target should be set. [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero, Private Individuals x 3]. • Providing affordable housing in areas where there are no employment opportunities and rail connections makes no sense – blanket affordable housing requirement inappropriate for this reason. [Private Individual] • More effort/consideration should be given to remedial action to address phosphate and other water issues in the Wye. [Private Individual] • Reference to the role and opportunity presented by community led affordable housing would be beneficial. [Cwmpas] • Focus should be on making nice places to live, not building more houses. [Private Individual] • Not enough emphasis on transport issues. [Private Individual] • Stronger focus on energy efficient homes is needed. [Private Individual]
<p>LPA Response</p>	<p>Support for the Preferred Strategy priorities is welcomed, with the core issues of housing affordability, rebalancing our democracy, climate and nature emergency and economic prosperity continuing to be the key priorities of the Deposit Plan. Further details on how these will be achieved is set out in the detailed policy framework of the Deposit Plan.</p>
<p>LPA Recommendation</p>	<p>Refer to the detailed policies of the Deposit Plan for specific policy requirements.</p>
<p>Potential failure to deliver core strategy components</p>	<ul style="list-style-type: none"> • Risk that zero carbon objectives, extra jobs and extra infrastructure will not be in place in parallel with housing growth resulting in less sustainable settlements. [Abergavenny Town Council, Abergavenny & District Civic Society, Private Individual] • Power network will be a significant constraint on development of renewable energy generation systems and distribution of such energy [BB3 Ltd, Manor Farm Partnership, Private Individuals x3] • RLDP should also cater for the older population. [Grove Farm Estates & Development, Chepstow Society] • Ratio of affordable homes is unrealistic along with zero carbon aspirations. [Mathern CC, Private Individual] • Infrastructure and accessibility insufficient to deliver PS aims and objectives. [Private Individuals x 6, Cllr Louise Brown] • PS will fail to deliver its key aims and objectives and will therefore fail the Tests of Soundness. [Cllr Louise Brown] • More integrated approach needed to improving transport infrastructure and other infrastructure in and near Chepstow. [The Chepstow Society, Private Individuals x 4]
<p>LPA Response</p>	<p>The Deposit Plan is supported by a robust and comprehensive evidence base including the Infrastructure Delivery Plan, which provide further details on the points raised.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>
<p>Cross Boundary Issues</p>	<ul style="list-style-type: none"> • The Forest of Dean District Council keen to work collaboratively to bring about sustainable solutions to cross boundary transport issues. [FoD]

Page 1498

	<ul style="list-style-type: none"> • Gloucestershire County Council broadly support stated aims regarding climate and decarbonisation. The importance of reducing transport associated carbon, pollutants a nuisance is paramount and the need to work cooperatively across the Welsh and English border is fundamental to the successful delivery against the zero-carbon agenda. [GCC] • Essential to demonstrate how the targeted increase in population/jobs is consistent with other LDP strategies in the CCR. The level of growth proposed does not harness the economic opportunity presented by the CCR City Deal. [Edenstone] • Levels of growth for individual LPAs should be agreed at a strategic level through the preparation of an SDP. [Private Individual] • Has development across the border been considered? [Private Individual]
LPA Response	The Council has worked/continues to work collaboratively with neighbouring local authorities, including the Forest of Dean and South Gloucestershire councils and authorities in South East Wales, on cross-boundary issues such as growth levels and transport.
LPA Recommendation	No change required.
Flexibility Allowance	<ul style="list-style-type: none"> • Increase flexibility allowance to ensure the timely delivery of sites. [MHA, Private Individual] • Prudent to increase the flexibility allowance in light of the substantial reduction in growth that is now proposed [Hallam Land Management, Edenstone] • 20% flexibility allowance should be adopted to provide greater contingency to allow for unforeseen circumstances over the plan period, which will be important given the current economic climate and reliance on a small number of strategic sites to deliver a significant component of the RLDP's housing requirement. [Edenstone] • Flexibility allowance is not needed and is likely to be exploited by the developers [Private Individual, Cllr Christopher Edwards]
LPA Response	In October 2023 a report of post-consultation updates to the Preferred Strategy was agreed by Council. An increase in the flexibility rate from 10% to 15% was one of the changes agreed. This increased the housing provision figure from 5,940 (10% flexibility) to 6,210 (15% flexibility). The change seeks to ensure that the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst also allowing for the allocation of a handful of smaller sites across the County to sustain and enhance existing communities. Increasing the flexibility ensures that the plan is more robust and resilient as there is delivery in the short-term term while the large strategic sites take time to be developed out. An increased flexibility will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery of larger strategic sites which are more complicated to develop. A range of smaller sites will ensure the delivery of much needed affordable housing soon after the adoption of the plan to start addressing this current unmet affordable housing need.
LPA Recommendation	Incorporate a 15% flexibility allowance in the Deposit Plan as agreed by Council in October 2023.
Windfall/Small Site Allowance	<ul style="list-style-type: none"> • The PS has an over reliance on windfall provision which presents a risk to achieving the level of growth required. To de-risk the Plan less reliance should be given to windfall sites [Leathdunn Ltd, Johnsey Estates] • Ban on windfall sites in the Wye Catchment is an overreaction to an issue caused primarily by agriculture. [Private Individual]
LPA Response	The Housing Background Paper sets out the approach taken to windfall allowances in the preparation of the Deposit Plan. As with the Preferred Strategy, the Deposit Plan includes a windfall allowance based on the findings of the Housing Potential Study. This contributes approximately 230 units to the housing figures, less than an allowance based on past trends, which would contribute 366 homes to the housing figures. In this respect, a

	conservative approach to windfall provision has been taken. Similarly, a reduced contribution has been factored in for infill developments. The past trend rate of infill developments has been reduced by 15% to reflect the plan-led system and infill opportunities reducing.
LPA Recommendation	In accordance with details set out in the Housing Background Paper, base windfall allowances on the findings of the Housing Potential Study and the infill allowance on a reduced past trend rate.
Jobs Growth	<ul style="list-style-type: none"> • Creation of 6,240 jobs is difficult to believe, especially noting the large reduction in current employment opportunities forecast. Economic Development Strategy needed. [Private Individual, Cllr Christopher Edwards] • Given the continued lack of clarity about the economic growth and how it will be achieved, an Economic Development Strategy is needed. [Private Individual] • Surprised to see the removal of SAE1h Land at Pill Row. [FI Real Estate Management Ltd] • No evidence to support and drives the jobs growth figure. [Private Individual]
LPA Response	<p>The jobs figure contained in the RLDP is based on demographic-led modelling which is considered to be robust and includes reasonable assumptions. The associated jobs figure represents the number of jobs that could be supported by the population and housing growth planned for over the Plan period. It is recognised that it is above the baseline forecasts, however, a policy-on approach provides an appropriate basis for the RLDP to ensure that the Plan can be sufficiently flexible in respect of changing circumstances and that the County can support long term growth in accordance with Welsh Government policy, which encourages the adoption of a long term and positive strategy, and the ambitions of the CCR. Whilst it is recognised the jobs target of 416 jobs per annum is higher than some past trends, it is within the range of past performance in the County.</p> <p>The Council published its Economy, Employment and Skill Strategy in 2023 which sets out the Council's action plan for focussing on four key priority themes which have emerged from the Corporate and Community Plan.</p> <p>Adopted LDP allocation SAE1h – Land at Pill Row is within a flood risk area.</p>
LPA Recommendation	
Lacking details/information	<ul style="list-style-type: none"> • Question what the Council understand by 'new homes are net zero ready' and how it will be assessed and by whom. [HBF, Private Individual] • PS contains well-meaning but vague statements – Deposit plan must correct this. [Abergavenny & Crickhowell FoE] • Key evidence required for the Deposit Plan including economic growth levels, relationship to adjoining local authorities, ensuring the delivery of 50% affordable housing allocations, site delivery and viability, phosphates and nutrient neutrality and Gypsy and Traveller Accommodation. [WG]. • There is no definition included of an 'Affordable Home'. [Private Individuals x 2] • Data and statistics feeding into the strategy must be examined in more detail to explain the level of growth. [Private Individuals x 2]
LPA Response	The Deposit Plan is supported by a robust and comprehensive evidence base, which provide further details on the points raised.
LPA Recommendation	Refer to the RLDP evidence base for full details on the details requested.
Site Promoted in response to Question 2	<ul style="list-style-type: none"> • Leathdunn Ltd – CS0036 – West of B4293, Devauden [Leathdunn Ltd] • Johnsey Estates – CS0247 – Cooper III [Johnsey Estates Ltd] • Hallam Land management – CS0128 Chapel Farm [Hallam Land Management] • Grove Farm Estates – CS0269 – Grove Farm [Grove Farm Estates] • Johnsey Estates Ltd – CS0113 – Castle Oaks (Site D) [Johnsey Estates Ltd]

	<ul style="list-style-type: none"> • Johnsey Estates Ltd – CS0282 – NW Burrium Gate [Johnsey Estates Ltd] • Barwood Development Securities – CS0165 Mounton Road [Barwood Development Securities]
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in Candidate Site Assessment Report.
LPA Recommendation	See Candidate Site Assessment Report for Candidate Site recommendations.

Question 3 – Do you have any comments on Strategic Policy S1 – Growth Strategy?

99 organisations or members of the public submitted a response to question 3.

Given the overlap with the Preferred Strategy and the policy content of S1 – Growth Strategy and S2 – Spatial Distribution, there are similarities in the answers given to consultation questions 2, 3 & 4. A range of comments have been made on the Preferred Strategy, with some representors in broad support, others suggesting the Strategy is not ambitious enough and other suggesting it is too high. There was a recognition on both sides that the Preferred Strategy represents a compromised approach to addressing the County’s issues and challenges whilst also addressing Welsh Government’s objections to the previous Preferred Strategy (2021).

General support given to the distribution of growth, focused on the Primary Settlements, however, more evenly dispersed growth across settlements, including Monmouth and lower tiers was raised. Concern was raised at the level of growth focussed in the south of the County.

In terms of the housing supply components, the consensus is that the flexibility allowance is too low with a 20% or 25% flexibility allowance suggested as more appropriate rates. An over-reliance on windfall/infills and existing commitments was expressed. Similarly, concerns were raised in relation to an over reliance on a small number of strategic sites and the potential impact on delivery homes and affordable homes within the plan period.

Key themes raised in relation to Question 3 on the Preferred Strategy are set out below:

Key Theme	Summary of Points Raised
Support/ appropriate Growth Level	<ul style="list-style-type: none"> • Level of growth will ensure Monmouthshire continues to grow in a sustainable manner based on locally appropriate levels of development, which is compatible with Policies 1, 7 and 33 of FW 2020. Whilst it is above the 2018 based projections and past build rates of the last 5 and 10 years, a higher level of housing is only justified by the severe need to deliver affordable housing. The strategy of concentrating new growth primarily in Caldicot and the Severnside (44%) should reduce the potential to negatively impact on environmental assets and avoid adverse consequences for climate and nature emergencies. [WG] • Support quantum of growth as being sufficiently ambitious when considered against the WG 2018-based principal household projection. Level recognises that whilst Monmouthshire is not within the national growth area identified in FW 2020, the RLDP evidence base shows that the proposed level of growth is essential to deliver MCC’s local evidence-based issues and ensure the RLDP is sound. [Llanover Estates, Leathdunn Ltd, Johnsey Estates, Tompkins Thomas Planning, The Coldbrook Estate, Private Individual] • New housing target appears to be a reasonable compromise and is supported. [SOUL, The Chepstow Society]
LPA Response	The 2022 Preferred Strategy growth level of 5,400 homes housing requirement and enabling the provision of up to 6,240 jobs strikes a compromise between achieving our local evidenced-based objectives that underpin the RLDP and the Welsh Government’s objection to the level of growth proposed in the 2021 Preferred Strategy. This level of growth has been informed by a wide range of evidence and responded to a number of challenges that have arisen throughout the plan making process including the Welsh Government objection to the level of growth set out in the 2021 Preferred Strategy and

	<p>phosphate water quality issues in the Rivers Wye and Usk. In October 2023, a number of post-consultation updates to the Preferred Strategy (2022) were endorsed by Council forming the basis for the level of growth set out in the Deposit Plan. These include allowing for growth in Monmouth which was previously avoided due to no phosphates solution being identified for the River Wye Catchment area and an increase in the flexibility rate from 10% to 15%. This has resulted in the housing provision figure increasing from 5,940 homes (10% flexibility) to 6,210 homes (15% flexibility). Welsh Government formally responded to the Preferred Strategy consultation in January 2023 with a ‘green’ rating and noting that “Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region, but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government.</p> <p>The Deposit Plan is considered to represent a sustainable level of growth that addresses our local issues and objectives including the delivery of affordable homes, sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency and having regard to Welsh Government’s concerns regarding alignment with Future Wales.</p>
<p>LPA Recommendation</p>	<p>In line with the October 2023 Council decision, the housing requirement remains at 5,400 homes based on a demographic-led scenario with added policy assumptions, however, the flexibility allowance is increased from 10% to 15% resulting in a housing provision figure of 6,210 homes.</p>
<p>Growth level is too low</p> <p>Page 1502</p>	<ul style="list-style-type: none"> • Growth level represents a significant reduction in housing provision from that justified by evidence in the previous version of the PS. Appreciate PS has been strongly influenced by WG but the current PS does not fully align with the previous evidence base. [HBF, B&DW, Vistry, Redrow Homes, B&DW Homes, Richborough Estates, Llanarth Estates, Bellway Homes, Marston’s PLC, Candleston Homes, Taylor Wimpey PLC] • Approach to significantly reduce the number of homes and jobs will not address the key issues facing the County and is contrary to Soundness Tests 2 & 3. Trends such as ageing demographic, affordability, out commuting, concentration along the M4 corridor will be exacerbated. Noted that the Council is stifled by WG. [Melin Homes, Edenstone Homes, Stantonbury Building and Development Company, Tirion Homes, Candleston Homes, Sero Homes, Sero, Private Individuals x 2] • Merit in a higher growth level to address issues. [MHA, Persimmon Homes East Wales, MHA, Edenstone, Private Individuals x 2] • Plan period should be rolled forward by three years to take account of delays and consider the need for a higher provision of housing to accommodate additional plan period. [Hallam Land Management, TW, Edenstone Homes, Marston’s PLC]
<p>LPA Response</p>	<p>The 2022 Preferred Strategy growth level of 5,400 homes housing requirement and enabling the provision of up to 6,240 jobs strikes a compromise between achieving our local evidenced-based objectives that underpin the RLDP and the Welsh Government’s objection to the level of growth proposed in the 2021 Preferred Strategy. This level of growth has been informed by a wide range of evidence and responded to a number of challenges that have arisen throughout the plan making process including the Welsh Government objection to the level of growth set out in the 2021 Preferred Strategy and phosphate water quality issues in the Rivers Wye and Usk. In October 2023, a number of post-consultation updates to the Preferred Strategy (2022) were endorsed by Council forming the basis for the level of growth set out in the Deposit Plan. These include allowing for growth in Monmouth which was previously avoided due to no phosphates solution being identified for the River Wye Catchment area and an increase in the flexibility rate from 10% to 15%. This has resulted in the housing provision figure increasing from 5,940 homes (10% flexibility) to 6,210 homes (15% flexibility). Welsh Government formally responded to the 2022 Preferred Strategy consultation in January 2023 with a ‘green’ rating and noting that “Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region, but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government.</p>

	<p>The Deposit Plan is considered to represent a sustainable level of growth that addresses our local issues and objectives including the delivery of affordable homes, sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency and having regard to Welsh Government’s concerns regarding alignment with Future Wales.</p>
<p>LPA Recommendation</p>	<p>In line with the October 2023 Council decision, the housing requirement remains at 5,400 homes based on a demographic-led scenario with added policy assumptions, however, the flexibility allowance is increased from 10% to 15% resulting in a housing provision figure of 6,210 homes.</p>
<p>Growth level is too high</p>	<ul style="list-style-type: none"> • The level of growth is not in conformity with FW 2020 and the level of growth proposed is twice the amount for a County which has only 6% of the population of the SDP region. [Abergavenny Town Council, Abergavenny & Crickhowell FoE, Abergavenny & District Society, Cllr Christopher Edwards, Private Individuals x 7] • Growth is excessive, contrary to WG target and could lead to unsustainable and environmentally damaging levels of growth in settlement tiers. [Llanarth Fawr CC, Raglan CC, Raglan Village Action Group, Usk Civic Society, Private Individuals x 3] • Growth level is too high and cannot be accommodated within the existing infrastructure in the County. [Mathern CC, Cllr Louise Brown, Private Individuals x 6]
<p>LPA Response</p> <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1503</p>	<p>The 2022 Preferred Strategy growth level of 5,400 homes housing requirement and enabling the provision of up to 6,240 jobs strikes a compromise between achieving our local evidenced-based objectives that underpin the RLDP and the Welsh Government’s objection to the level of growth proposed in the 2021 Preferred Strategy. This level of growth has been informed by a wide range of evidence and responded to a number of challenges that have arisen throughout the plan making process including the Welsh Government objection to the level of growth set out in the 2021 Preferred Strategy and phosphate water quality issues in the Rivers Wye and Usk. In October 2023, a number of post-consultation updates to the Preferred Strategy (2022) were endorsed by Council forming the basis for the level of growth set out in the Deposit Plan. These include allowing for growth in Monmouth which was previously avoided due to no phosphates solution being identified for the River Wye Catchment area and an increase in the flexibility rate from 10% to 15%. This has resulted in the housing provision figure increasing from 5,940 homes (10% flexibility) to 6,210 homes (15% flexibility). Welsh Government formally responded to the 2022 Preferred Strategy consultation in January 2023 with a ‘green’ rating and noting that “Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government.</p>
<p>LPA Recommendation</p>	<p>In line with the October 2023 Council decision, the housing requirement remains at 5,400 homes based on a demographic-led scenario with added policy assumptions, however, the flexibility allowance is increased from 10% to 15% resulting in a housing provision figure of 6,210 homes.</p>
<p>Jobs Growth Figure</p>	<ul style="list-style-type: none"> • Significant concerns with ability of the RLDP to meet the aspirational targets. There is a lack of robust evidence that Monmouthshire has realistic prospects of attracting 6,240 jobs. [Abergavenny Town Council, Abergavenny & Crickhowell FoE, Abergavenny & District Society, Usk Civic Society, Cllr Christopher Edwards, Private Individuals x 5] • HBF question why the level of housing proposed has been reduced by 2,966 yet the provision of new jobs has only been reduced by 975. Uncertain there will be enough homes to deliver the jobs given 50% are to be affordable. [HBF] • Generally, support the provision of 6,240 jobs, however it is vital that sufficient housing growth underpins the economic growth strategy. [Barwood Dev Securities Ltd] • Lowered jobs growth target is regrettable representing a 15% reduction. This will diminish the potential of the plan to deliver its growth objectives, including to reduce commuting. [F1 Real Est Management]

	<ul style="list-style-type: none"> Working from home trend not guaranteed. [Private Individual] Growth strategy misses the importance of agriculture in growing Monmouthshire's economy. [Our Food 1200]
LPA Response	<p>The jobs figure contained in the RLDP is based on demographic-led modelling which is considered to be robust and includes reasonable assumptions. The associated jobs figure represents the number of jobs that could be supported by the population and housing growth planned for over the Plan period. It is recognised that it is above the baseline forecasts, however, a policy-on approach provides an appropriate basis for the RLDP to ensure that the Plan can be sufficiently flexible in respect of changing circumstances and that the County can support long term growth in accordance with Welsh Government policy, which encourages the adoption of a long term and positive strategy, and the ambitions of the CCR. Whilst it is recognised the jobs target of 416 jobs per annum is higher than some past trends, it is within the range of past performance in the County.</p> <p>The RLDP recognises the importance of the agricultural sector in Monmouthshire and provides a supportive policy framework to assess rural diversification and enterprise proposals that come forward. However, many agricultural processes do not require planning permission and are therefore beyond the scope of the RLDP.</p>
LPA Recommendation	No change required.
Assumptions/Evidence	<ul style="list-style-type: none"> Lack of evidence relating to a number of assumptions including migration, household membership rates and commuting ratio. No evidence to support assumptions will happen, for example young people will move into the new houses. [Abergavenny Town Council, Abergavenny & Crickhowell FoE, Private Individuals x 5] Support the requirement for net zero ready homes and associated infrastructure to ensure the development is sustainable and well-connected. Definitions required on these terms and how they will be measured. [Abergavenny & Crickhowell FoE, Vistry, Usk Civic Society, Private Individuals] Clear housing trajectory needed identifying the phasing and timings of sites. Selected strategic growth options should be progressed further with greater clarity including schematic diagrams and the key issues. [WG] Higher variant of the WG 2018-based Household Projection should be used as the starting point. [Candleston Homes, Taylor Wimpey PLC] Net zero ready requirement does not go far enough. [Cllr Christopher Edwards] Support the 20-minute neighbourhood principle. [Private Individual]
LPA Response	The Deposit Plan sets out a more detailed policy framework and is supported by a robust and comprehensive evidence base. Relevant supporting evidence and background papers should be referred to for further information.
LPA Recommendation	Refer to the supporting evidence base for further information.
Affordable Housing	<ul style="list-style-type: none"> Fully endorse the proposal for 50% affordable homes but question deliverability. [Abergavenny Town Council] Commitment to ensure new site allocations provide 50% affordable homes is ambitious. Positive that the PS recognises that WG funding may be required to achieve target. [Llanover Estates, Leathdunn Ltd, Johnsey Estates, Vistry Group, The Coldbrook Estate, Private Individual] What is the definition of affordable homes. [Abergavenny & Crickhowell FoE, Private Individuals x 2] Unlikely affordable housing targets will be fulfilled based on past experience. [Private Individual, Llangybi Fawr CC, Cllr Louise Brown] Agree with focus on delivering affordable homes. [Abergavenny Transition Town] Viability assessments required to take account of all required costs including building regs and net zero ready requirements to demonstrate 50% is achievable. [BB3 Ltd, Manor Farm Partnership, Private Individuals x 3]

	<ul style="list-style-type: none"> • Should make policy provision for 100% larger affordable sites outside the settlement boundaries, but adjacent to main and secondary settlements. [BB3, Manor Farm Partnership, Private Individuals x 3] • Commitment of WG to change its policy position on the use of Social Housing Grant funding is required to achieve affordable housing targets. [Private Individual, Cllr Louise Brown, Cllr Christopher Edwards]
LPA Response	<p>Comments noted, delivery of affordable housing continues to be a core priority of the RLDP and furthermore is a corporate priority. Viability testing has been undertaken on all of the site allocations in the Deposit RLDP. This assessment has been undertaken independently by a viability consultant on behalf of Monmouthshire County Council and provides the evidence for 50% affordable housing provision on all new site allocations. Different affordable housing thresholds are provided for other types of development and are set out in Strategic Policy S7. A definition of affordable housing is included in the Deposit RLDP.</p> <p>Policy H9 relates to affordable housing exception sites and lists different thresholds for proposals based on the settlement tiers identified in S2, this in turn allows for larger affordable housing exception sites adjacent to Primary Settlements than a site located adjacent a Minor Rural Settlement. Refer to Policy H9 for further detail.</p> <p>Issues in the way Social Housing Grant funding can be used to achieve affordable housing targets have been raised with Welsh Government, however this sits with Welsh Government and is not something within Monmouthshire’s control. As noted above viability assessments have been undertaken for all allocated sites and they can achieve the 50% affordable housing figure without additional funding.</p>
LPA Recommendation	<p>Additional detail has been added to Strategic Policy S7 (formally S6) to provide clarity on the Councils approach to the delivery of affordable housing.</p>
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1505</p> <p>Flexibility Allowance</p>	<ul style="list-style-type: none"> • Higher percentage of flexibility should be included. [HBF, Private Individuals x 2] • Support the inclusion of a flexibility allowance, but 10% should be viewed as a starting point. [Llanover Estates, Leathdunn Ltd, Johnsey Estates, Stantonbury Building & Development Company, Barwood Dev Securities Ltd, Vistry Group, Private Individual] • If growth level remains, the flexibility allowance should be increased to 25% to facilitate consumer choice and allow for allocations not being delivered, S106 agreements not being signed, and windfall and small site allowances not being achieved. [B&DW] • 20% flexibility allowance should be included to provide a contingency should some housing sites fail to deliver as per the trajectory. [Hallam Land Management, TW, Edenstone Homes, Persimmon Homes East Wales, Bellway Homes, Marston’s PLC, Edenstone] • 25% flexibility allowance should be considered to address shortfall in LDP shortfall and other constraints affecting delivery. [B&DW Homes, Candlestone Homes, Taylor Wimpey PLC] • Flexibility allowance is not needed and is likely to be exploited by developers. [Private Individual, Cllr Christopher Edwards]
LPA Response	<p>In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. An increase in the flexibility rate from 10% to 15% was one of the changes agreed. This increased the housing provision figure from 5,940 (10% flexibility) to 6,210 (15% flexibility). The change seeks to ensure that the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst also allowing for the allocation of a handful of smaller sites across the County to sustain and enhance existing communities. Increasing the flexibility ensures that the plan is more robust and resilient as there is delivery in the short-term term while the large strategic sites take time to be developed out. An increased flexibility will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery of larger strategic sites which are more complicated to develop. A range of smaller sites will ensure the delivery of much needed affordable housing after the adoption of the plan to start addressing this current unmet affordable housing need.</p>

<p>LPA Recommendation</p>	<p>Incorporate a 15% flexibility allowance in the Deposit Plan as agreed by Council in October 2023.</p>
<p>Existing Commitments</p>	<ul style="list-style-type: none"> • Removal of previous allocations which have either stalled or are not supported by sufficient evidence to demonstrate delivery is a prudent approach. [WG] • Viability of existing commitments and likelihood of delivery during the next plan period is questioned. [BB3 Ltd, Manor Farm Partnership, Tirion Homes, Sero Homes, Private Individuals x 3] • Impact on deliverability has not been adequately considered. Suggest applying a non-delivery allowance. [Persimmon Homes, Grove Farm Estates] • Welcome the decision to not rollover historic housing allocations. [Grove Farm Estates]
<p>LPA Response</p>	<p>In line with the Development Plans Manual (DPM) a non-delivery allowance has been applied to the existing commitments element of the housing supply components. The DPM allows for two approaches to this; either as a percentage across the overall land bank or sites can be discounted individually. Given the relatively small number of sites involved and based on Officer knowledge of sites, it has been decided to discount 4 sites which it is considered that there is insufficient information to demonstrate that they will come forward during the Plan period. Further details can be found in the Housing Background Paper.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>
<p>Windfall/ Small Sites Allowance</p>	<ul style="list-style-type: none"> • Windfall allowance is unrealistic and contrary to the AMR which argues a reduction in forecasted windfall sites completions. Suggest re-evaluating the windfall allowance. [Persimmon Homes East Wales] • Concerned by the windfall and small site allowance. Appreciate it is based on past trends, but this should be reviewed given phosphates and the current economic climate. [Grove Farm Estates] • Whilst it is reasonable to expect windfall sites to continue to contribute to supply, there is a risk that relying too heavily on past trends could lead to an overestimation of their contribution over the new plan period. Significant shift in national planning policy, placing stronger emphasis on the plan led approach making it more difficult to bring forward sites that are not existing allocations. [Richborough Estates]
<p>LPA Response</p>	<p>The Housing Background Paper sets out the approach taken to windfall allowances in the preparation of the Deposit Plan. As with the Preferred Strategy, the Deposit Plan includes a windfall allowance based on the findings of the Housing Potential Study. This contributes approximately 230 units to the housing figures, less than an allowance based on past trends, which would contribute 366 homes to the housing figures. In this respect, a conservative approach to windfall provision has been taken. Similarly, a reduced contribution has been factored in for infill developments. The past trend rate of infill developments has been reduced by 15% to reflect the plan-led system and infill opportunities reducing.</p>
<p>LPA Recommendation</p>	<p>In accordance with details set out in the Housing Background Paper, base windfall allowances on the findings of the Housing Potential Study and the infill allowance on a reduced past trend rate (15% reduction).</p>
<p>Strategic Sites</p>	<ul style="list-style-type: none"> • There should be less resilience on strategic sites and more smaller sites allocated throughout the County. [Private Individual] • PS does not provide a strategy that will increase the delivery of market and affordable housing due to its suppressed housing requirement and over reliance on a single large strategic site. [Vistry] • Provision should be made specifically for the older population. [Grove Farm Estates, Private Individual]

Page 1507	LPA Response	<p>The Deposit Plan allocates 18 residential/mixed use sites. Whilst it is recognised that two of the strategic sites (HA1 – Land to the East of Abergavenny and HA2 – Land to the East of Caldicot) account for 1,270 homes, there are a further 16 residential allocations ranging in size from 15 units to 270 units contributing to housing delivery in the County.</p> <p>Furthermore, in October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. An increase in the flexibility rate from 10% to 15% was one of the changes agreed. This increased the housing provision figure from 5,940 (10% flexibility) to 6,210 (15% flexibility). The change seeks to ensure that the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst also allowing for the allocation of a handful of smaller sites across the County to sustain and enhance existing communities. Increasing the flexibility ensures that the plan is more robust and resilient as there is delivery in the short-term term while the large strategic sites take time to be developed out. An increased flexibility will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery of larger strategic sites which are more complicated to develop. A range of smaller sites will ensure the delivery of much needed affordable housing after the adoption of the plan to start addressing this current unmet affordable housing need.</p> <p>A housing trajectory has been prepared as part of the Deposit Plan, which demonstrates housing delivery rates throughout the Plan period can be achieved.</p> <p>The level of growth set out in the Preferred Strategy (2022) was informed by a wide range of evidence and responded to a number of challenges that had arisen throughout the plan making process including the Welsh Government objection to the level of growth set out in the 2021 Preferred Strategy and phosphate water quality issues in the Rivers Wye and Usk. The Deposit Plan is considered to represent a sustainable level of growth that addresses our local issues and objectives including the delivery of affordable homes, sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency and having regard to Welsh Government’s concerns regarding alignment with Future Wales.</p> <p>The Deposit Plan provides the policy framework to allow for the consideration of specialist housing to come forward throughout the Plan period (Policy H7 – Specialist Housing), which includes the housing requirements of older people.</p>
	LPA Recommendation	No change required.
	Phosphates	<ul style="list-style-type: none"> • Uncertainty surrounding the timescales of resolving phosphate constraints which will have impacts on the allocation of candidate sites. [Abergavenny Town Council]
	LPA Response	Since the phosphate guidance was introduced by NRW, Monmouthshire County Council has been working collaboratively with a range of organisations including NRW, Dŵr Cymru Welsh Water (DCWW), Welsh Government, other Councils in Wales and England, environmental groups, developers, farmers and other stakeholders to establish solutions that will ensure that development proposals do not have an adverse impact on water quality within the SAC rivers.
LPA Recommendation	Continue to liaise with the relevant organisations on phosphate matters.	
Monmouth	<ul style="list-style-type: none"> • An early review of the Plan should be scheduled to take account of the potentially changing circumstances with the phosphate issue in Monmouth. [BB3, Richard Willett, Manor Farm Partnership, Private Individuals x 2] • Agree land should be safeguarded in Monmouth and treated as windfall sites. This would allow for development in Monmouth should the phosphates situation change. [BB3, Manor Farm Partnership, Private Individuals x 3] • Lack of housing in the north of the County results in the RLDP being unsound. [Hallam Land Management, TW, Edenstone Homes, Bellway Homes] 	

LPA Response	<p>The Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government’s response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW’s planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government’s confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.</p>
LPA Recommendation	<p>In accordance with the October 2023 Council, the Deposit Plan allows for growth in Monmouth.</p>
General	<ul style="list-style-type: none"> • Reference should be made to Objective 5 – Minerals and Waste and Objective 14 – Infrastructure in relation to Policy S1. [MPA] • Statements regarding net-zero ready homes do not go far enough. [Private Individual] • Working from home assumptions should not be relied upon. [Private Individual, Usk Civic Society] • Focus is on house building rather than creating places. [Private Individual] • Preservation of green belt sites should be top priority of the Council. [Private Individual]
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1508</p> LPA Response	<p>In the interest of brevity, the RLDP objectives listed in the Links to Wider Framework box are those that are considered to be most pertinent to the policy in question, however, most RLDP objectives are linked to every policy some way. It is not considered necessary to list all objectives in relation to each policy.</p> <p>Further clarification on the policy approach to net zero homes is set out in the Deposit Plan in Policy NZ1 – Monmouthshire Net Zero Carbon Homes and associated the supporting evidence.</p> <p>Working from home assumptions are not relied upon, but the Plan does recognise the change in working patterns.</p> <p>A key focus of the Deposit Plan is establishing placemaking principles to be implemented through development on the ground. There is an extensive policy framework setting out the Council’s policy approach including policies Strategic S3 – Sustainable Placemaking & High Quality Design, PM1 – Creating Well Designed Places, Strategic Policy S8 – Site Allocation Placemaking Principles and site specific allocation polices.</p> <p>The spatial strategy has regard to Policy 34 and the indicative Green Belt boundary. Monmouthshire’s primary settlements fall outside of the indicative Green Belt boundary. National planning policy allows for extensions to existing settlements within and adjoining the Green Belt of appropriate scale having regard to the identified and longer-term need for development land, the effects of development pressures in areas beyond Green Belt, the need to minimise demand travel, and the purpose of the overall greenbelt designation. It states that this may require land to be safeguarded and boundaries of proposed Green Belts must be carefully defined to achieve this.</p>
LPA Recommendation	<p>No change required.</p>
Cross Boundary Issues	<ul style="list-style-type: none"> • Torfaen CBC interested in continued collaboration in developing work. [Torfaen CBC] • PS does not reference any dialogue with other authorities regarding strategic housing sites, as required by FW2020. [Abergavenny & Crickhowell FoE] • While the PS is considered to be in general conformity with FW 2020, further technical work is required to demonstrate the plan has met the tests of soundness in terms of collaboration with neighbouring authorities and growth in terms of jobs and homes. [WG]

LPA Response	The Council has, and continues to work collaboratively with our neighbouring authorities and the wider South East Eales region and English border authorities in preparing our respective LDPs which enables consideration of cross border issues, including levels of growth and the spatial distribution of development. At the regional level, collaboration between the 10 LPAs in South East Wales takes place via various regional groups including South East Wales Strategic Planning Group (SEWSPG), South East Wales Planning Officer Society (SEWPOS) and South Wales Regional Aggregates Working Party (SWRARWP). Through SEWSPG the LPAs work collaboratively on the preparation of a joint evidence base to inform RLDPs and the emerging SDP.
LPA Recommendation	No change required.
Sites promoted in response to question 3	<ul style="list-style-type: none"> • BB3 Ltd – CS0278 – West of Raglan [BB3 Ltd] • Leathdunn Ltd – CS0036 – West of B4293, Devauden [Leathdunn Ltd] • Johnsey Estates – CS0247 – Cooper III [Johnsey Estates] • Manor Farm Partnership - CS0278 – West of Raglan [Manor Farm Partnership] • Johnsey Estates Ltd – CS0113 – Castle Oaks (Site D) [Johnsey Estates Ltd] • Johnsey Estates Ltd – CS0282 – NW Burrium Gate [Johnsey Estates Ltd] • Edenstone – CS0205 – Land at Usk Road, Raglan [Edenstone]
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in Candidate Site Assessment Report.
LPA Recommendation	See the Candidate Site Assessment Report for Candidate Site recommendations.

Question 4 – Do you have any comments on Strategic Policy S2 Spatial Distribution of Development – Settlement Hierarchy?

113 organisations or members of the public submitted a response to question 4.

Given the overlap with the Preferred Strategy and the policy content of S1 – Growth Strategy and S2 – Spatial Distribution, there are similarities in the answers given to consultation questions 2, 3 & 4. A range of comments have been made on the Preferred Strategy, with some representors in broad support, others suggesting the Strategy is not ambitious enough and other suggesting it is too high. There was a recognition on both sides that the Preferred Strategy represents a compromised approach to addressing the County's issues and challenges whilst also addressing Welsh Government's objections to the previous Preferred Strategy (2021).

General support given to the distribution of growth, focused on the Primary Settlements, however, more evenly dispersed growth across settlements, including Monmouth and lower tiers was raised. Concern was raised at the level of growth focussed in the south of the County.

In terms of the housing supply components, the consensus is that the flexibility allowance is too low with a 20% or 25% flexibility allowance suggested as more appropriate rates. An over-reliance on windfall/infills and existing commitments was expressed. Similarly, concerns were raised in relation to an over reliance on a small number of strategic sites and the potential impact on delivery homes and affordable homes within the plan period.

Comments relating to specific candidate sites have not been included here and are dealt with via the candidate site assessment process.

Key themes raised in relation to Question 4 on the Preferred Strategy are set out below:

Key Theme	Summary of Points Raised
Primary Settlements	<ul style="list-style-type: none"> Support proportionate distribution of growth and advise that larger infrastructure is generally located in the more urbanised Primary Settlements, and it is these locations where there tends to be fewer capacity restrictions. [Dwr Cymru] Support settlement hierarchy and focus of growth on the Primary settlements of either Abergavenny, Caldicot or Chepstow. [B&DW, Abergavenny & Crickhowell FoE, Johnsey Estates, Edenstone Homes, Grove Farm Estates & Development, Redrow Homes, Richborough Estates, Bellway Homes, Candleston Homes, Taylor Wimpey PLC, Private Individual] WG does not object to the settlement hierarchy and distribution of housing growth. [WG] Do not support growth of more than 20% for Abergavenny [SOUL, Private Individual]
LPA Response	Support for the distribution of growth is welcomed. The Deposit Plan identifies 22% of housing growth is to be accommodated in Abergavenny. As one of Monmouthshire’s Primary Settlements this is considered to be an acceptable proportion of growth.
LPA Recommendation	No changes to the Settlement Hierarchy required, however, update Policy S2 to include housing and employment monitoring data up to the 1st April 2024 base date; to reflect growth will now be allowed in the River Wye Catchment area following Dwr Cymru Welsh Water investment and Welsh Government advice and increases in the flexibility rate from 10% to 15%.
South of County	<ul style="list-style-type: none"> Recommend that a higher level of development is achievable in the south of the County. [Abergavenny Town Council] South is more likely to achieve balance of homes and jobs, with limited phosphate impacts. [Abergavenny & District Civic Society] Concerned that 44% of growth is focussed on the south of the County. More balanced and evenly distribution of new homes should be considered. [Melin Homes, MHA, Persimmon Homes, Frances Taylor, Llanarth Estates, Stantonbury Building and Development Company, Cllr Louise Brown, Tirion Homes, Sero Homes, Sero, Private Individuals x 12] Growth in Severnside – potential implications for not increasing proportionately private car trips or best and most versatile land will need to be demonstrated by deposit stage. [WG] Needs to be an integrated approach to the environment, the scale of development and the provision of infrastructure in Chepstow. Over development of Chepstow will destroy the “green” surroundings of Chepstow. Infrastructure is at capacity. [The Chepstow Society, Private Individuals x 13] Support further growth in Chepstow. Despite being identified as a primary settlement it has significantly less growth than Abergavenny and Severnside. [Barwood Development Securities Limited] Given 44% of housing growth in Caldicot there is a case to support employment growth commensurate to the housing growth in Caldicot. [F1 Real Estate] Support further proportionate growth in Magor. [Edenstone] Proposed level of growth around Portskewett will overwhelm the village. [Private Individual]
LPA Response	Support for spatial distribution of growth is welcomed. The Settlement Hierarchy set out in Policy S2 reflects the findings of the Sustainable Settlement Appraisal (SSA) which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. The SSA confirms the dominant role of the primary settlements of Abergavenny, Chepstow, Caldicot and Monmouth, with this reflected in 85% of the level of housing growth proposed in these settlements. Spatially, the growth is considered to be well distributed throughout the County to help address affordability issues across Monmouthshire. The southern settlements of Chepstow and Caldicot account for 48% of the housing growth proposed and the northern primary settlements of Abergavenny

	<p>and Monmouth account of 37%. It is recognised that Caldicot and the Severnside cluster account for 35% of housing growth, however, Welsh Government acknowledge the strong functional linkage with Newport, Cardiff and Bristol and “the concentration of new growth primarily in Caldicot and the Severnside area should reduce the potential to negatively impact on environmental assets and avoid consequences for climate and nature emergencies”.</p> <p>Overall, the spatial strategy and identification of suitable sites for allocation is considered appropriate and reflect the site search sequence outlined in national planning policy.</p>
<p>LPA Recommendation</p>	<p>No changes to the Settlement Hierarchy required, however, update Policy S2 to include housing and employment monitoring data up to the 1st April 2024 base date; to reflect growth will now be allowed in the River Wye Catchment area following Dwr Cymru Welsh Water investment and Welsh Government advice and increases in the flexibility rate from 10% to 15%.</p>
<p>Infrastructure</p>	<ul style="list-style-type: none"> • Dwr Cymru serve each of the Tier 1 – 4 settlements listed with a clean water supply, and all settlements listed aside from Llanvair Discoed and Penallt with a public sewerage system. Combination of reinforcement works through the Capital Investment Programme and developer contributions will ensure growth can be delivered. Further developments in Goytre and Usk and Dingestow, Little Mill, Tintern, Trellech and Pansy may need to be delayed until such time that there has been a future capital investment AMP scheme, or is developer funded. [Dwr Cymru] • Spatial distribution strategy is speculation without more information on viability and capacity for settlements’ infrastructure to absorb growth. [Abergavenny Town Council]
<p>LPA Response</p>	<p>Dwr Cymru Welsh Water comments are reflected in the site allocation policies and delivery trajectories. We welcome ongoing dialogue with Dwr Cymru as the plan progresses. Further details on infrastructure delivery arrangements are set out in the Infrastructure Delivery Plan.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>
<p>Phosphates</p>	<ul style="list-style-type: none"> • From a river quality perspective, only Raglan WwTW has phosphorous removal. Schemes to introduce phosphorus removal at Llanfoist and Monmouth WwTWs have been announced and are expected to be delivered before the end of 2025. Llanarth WwTW will also see a phosphate permit introduced by the end of AMP7. NRW are in the process of undertaking a review of existing WwTW permits, and once completed we will work with NRW to determine whether any further WwTWs require phosphorous removal to be introduced. [Dwr Cymru] • Question the proposed timescale for addressing the issues of phosphate treatment for Abergavenny and the impact it will have on delaying the delivery of the RLDP. [Abergavenny Town Council, Abergavenny & Crickhowell FoE] • On the basis that improvement to both the Monmouth and Llanfoist treatment works to remove phosphates are planned it is appropriate to identify new affordable housing led allocations in both Monmouth and Abergavenny. [WG] • Concerns over the lack of certainty regarding the improvement works at Llanfoist WwTW. Satisfied that the approach for the Upper River Wye catchment if sufficiently precautionary. [NRW]
<p>LPA Response</p>	<p>The Council has been working collaboratively with a range of organisations including NRW, Dŵr Cymru Welsh Water (DCWW), Welsh Government, other Councils in Wales and England, environmental groups, developers, farmers and other stakeholders to establish solutions that will ensure that development proposals do not have an adverse impact on water quality within the SAC rivers. The spatial strategy and site allocations have been prepared with regard to Dwr Cymru’s planned improvements to waste water treatment works and NRW’s review of permits. There is commitment from DCWW to provide phosphate mitigation at the Llanfoist and Monmouth WwTWs and NRW’s review of all permits and water quality to establish what capacity (if any) exists to enable development proposals to come forward while ensuring betterment or neutrality of phosphate levels has provided the necessary confidence to support the RLDP strategy.</p>

Page 1511

LPA Recommendation	Continue to liaise with the relevant organisations in relation to phosphate issues.
Cross Boundary Issues	<ul style="list-style-type: none"> Impact on PS on transport carbon emissions and capacity of development allocated at Chepstow to identify, fund, and mitigate development impacts on transport demand will need to be assessed in detail. Need to take account of the proposed development within the FoD Local Plan where it closely juxtaposes with Monmouthshire. [Gloucestershire CC, The Chepstow Society] Need to understand the regional picture and context in relation to housing growth [Torfaen CBC] No account appears to have been taken of the development and traffic from the continuing expansion of Gloucestershire. [Private Individual]
LPA Response	The Council has, and continues to work collaboratively with our neighbouring authorities and the wider South East Eales region and English border authorities in preparing our respective LDPs which enables consideration of cross border issues, including levels of growth and the spatial distribution of development. At the regional level, collaboration between the 10 LPAs in South East Wales takes place via various regional groups including South East Wales Strategic Planning Group (SEWSPG), South East Wales Planning Officer Society (SEWPOS) and South Wales Regional Aggregates Working Party (SWRARWP). Through SEWSPG the LPAs work collaboratively on the preparation of a joint evidence base to inform RLDPs and the emerging SDP.
LPA Recommendation	No change required.
Infill	<ul style="list-style-type: none"> S2 should be reworded from 'minor infilling between existing buildings' to 'filling in a small gap between existing dwellings. [Llanarth CC, Raglan CC, Private Individual]
LPA Response	There may instances where infilling between existing buildings that are not dwellings will be acceptable.
LPA Recommendation	No change required.
Secondary Settlements	<ul style="list-style-type: none"> Objection to the RSS figure being indicative with potential to accommodate growth from each of the settlements in either Raglan Penperlleni and Usk. [Raglan CC, Raglan Village Action Group, Usk Civic Society] There should be no significant expansion of RSS. [Private Individuals x 3] RLDP should look to maximise development at Raglan. [BB3 Ltd, Manor Farm Partnership, Richborough Estates, Edenstone, Private Individuals x 3] Usk is ranked 5th out of all the settlements in Monmouthshire and its proportion of growth should recognise this. [Private Individual, Johnsey Estates] Penperlleni can accommodate growth. [B&DW]
LPA Response	The Deposit Plan sets out the level of growth to be accommodated in the Secondary Settlements (Tier 2). Collectively the settlements of Penperlleni, Raglan and Usk will contribute 6% of housing growth and 8% employment growth. This is considered to be an acceptable and proportionate level of growth given the settlements position in the settlement hierarchy as tier 2 settlements, reflecting the findings of the Sustainable Settlement Appraisal (SSA). Further details of the methodology can be found in the Sustainable Settlement Appraisal.
LPA Recommendation	No change required.
SSA	<ul style="list-style-type: none"> Population figure given for Gwehelog appears implausible. [Raglan CC] SSA is flawed in its methodology as only says if infrastructure exists, not if there is capacity in the infrastructure. [Private Individuals x 3]

	<ul style="list-style-type: none"> • Question whether Caldicot and Severnside be grouped as a cluster. Term Severnside should not be used. [Private Individuals x 3] • SSA makes no reference to how proposed infrastructure could potentially enhance the sustainability of settlements. [Edenstone] • SSA is flawed in its assessment of Chepstow. [Cllr Christopher Edwards]
LPA Response	<p>The methodology used for the Sustainable Settlement Appraisal (SSA) is based on the approach set out in the draft South East Wales Strategic Planning (SEWSPG) Pathfinder Group Sustainable Settlement Appraisal Paper, with some amendments for local considerations. The methodology has regard to the Development Plans Manual and provides a basis for regional consistency and is therefore considered to be an acceptable basis for the RLDP settlement hierarchy. In accordance with Planning Policy Wales 12, the methodology allows for clusters of smaller settlements where a sustainable functional linkage can be demonstrated, to be designated as the preferred locations for most new development including housing and employment provision. The criteria used for identifying clusters is set out in section 4 and 10 of the SSA. The cluster analysis recognises that some of the lower tier settlements have a strong geographical and functional relationship with a Tier 1 (Primary Settlement). The settlements along the M4 corridor in particular exhibit strong geographical and functional relationships and have formed a cluster linked to the primary (tier 1) settlement of Caldicot. This approach is consistent with the methodology and PPW12.</p> <p>Infrastructure enhancements details are set out in the Infrastructure Delivery Plan.</p> <p>The population figures contained within the SSA are taken from the 2021 Census. Up to date official population figures for each settlement are not available at the lower geographical scale. For the purposes of the appraisal, population figures for the smaller settlements are derived from best possible estimates using counts of dwellings which fall within the development boundary of a settlement, as defined in the Adopted LDP, where this exists, or counts of dwellings which make up a nucleus of a settlement. The average household size figure from the 2021 Census for the output area in which the settlement is located has then been applied to the dwelling count.</p>
LPA Recommendation	No change required.
Monmouth	<ul style="list-style-type: none"> • HBF concerned at the approach taken to Monmouth and believe a solution will be available within the Plan period. [HBF] • Highly likely a phosphate solution will be provided to allow the release of development in Monmouth in the short term. Therefore, development should be allocated in Monmouth. Plan is unsound otherwise. [Hallam Land Management, Taylor Wimpey, Redrow Homes, Richborough Estates, SOUL, Cllr Louise Brown, Vistry Group, Edenstone] • Concerned if Monmouth ‘bonus sites’ come forward that will increase the overall housing provision. [Private Individual] • Approach to treat Monmouth sites as ‘bonus sites’ is sensible. [Taylor Wimpey, Private Individual]
LPA Response	<p>The Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government’s response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW’s planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government’s confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.</p>
LPA Recommendation	In accordance with the October 2023 Council Report, the Deposit Plan allows for growth in Monmouth.

<p>Main Rural Settlements</p>	<ul style="list-style-type: none"> • Question the level of growth attributed to Tier 3 settlements. Previous plan took a similar approach and failed to deliver. Requirement to deliver 50% affordable homes on these sites is likely to make delivery of these smaller sites less likely. [HBF, B&DW] • Support distribution of growth according to the settlement hierarchy, however greater value should be placed on the Main Rural Settlements to accommodate growth. [Llanover Estates, Leathdunn Ltd, Marston’s PLC, The Coldbrook Estate] • Little Mill should be higher placed in the hierarchy recognising its functional link to larger settlements and underscoring as part of the SSA. [MHA] • There should be no significant expansion of the rural settlements. [Private Individuals x 2] • Deposit plan should identify the number of new homes proposed in Tier 3. [WG] • Trellech – until or unless the WwTW is upgraded and capacity adequately increased, do not consider the area has the infrastructure necessary to accommodate further development. [NRW] • RLDP should maximise site allocations in Main Rural Settlements. [BB3 Ltd, Manor Farm Partnership, Private Individuals x 3] • Scale of growth in Main and Minor Rural Settlements conflicts with net-zero aims. [Llangybi Fawr CC, Private Individual] • Growth is focussed in the wrong locations and should be dispersed across a wider area to address affordability. [Private Individual] • Llangybi should not be categorised as a suitable rural settlement for future growth. [Private Individual, Llangybi Fawr CC] • Object to Llanvair Discoed being identified as a Main Village as the infrastructure and services are not sufficient to cope with new development. [Private Individual]
<p>LPA Response</p>	<p>The Settlement Hierarchy set out in Policy S2 reflects the findings of the Sustainable Settlement Appraisal (SSA) which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. Spatially, the growth is considered to be well distributed throughout the County to help address affordability issues across Monmouthshire. Collectively, Tier 3 (Main Rural Settlements) and Tier 4 (Minor Rural Settlements) account for 9% of the County’s housing growth including new allocations, windfall and infill allowances and completions between 2018 – 2024. New allocations are only proposed in Tier 3 settlements (Main Rural) reflecting their position in the settlement hierarchy and account for 113 homes over six new allocations and 15 homes within an LDP Rollover site. Any growth in Tier 4 settlements (Minor Rural Settlements) is from any completions that have taken place between 2018 – 2024 and estimated contribution to infill developments based on past trends. This is considered to be an acceptable level of growth in our most sustainable lower tier settlements to deliver much needed affordable homes and to address rural inequality and rural isolation in these areas. Site specific allocations and the tier they are situated in is set out in policies HA1 – HA18, along with a summary of the spatial distribution of housing provision in Table 2 of the Deposit Plan. Further details on the housing figures are also set out in the Housing Background Paper.</p> <p>There are no new allocations proposed in Trellech and any infill/windfall proposals that come forward would be subject to consideration of the RLDP policy framework and standard Development Management consultations.</p>
<p>LPA Recommendation</p>	<p>No changes to the Settlement Hierarchy required, however, update Policy S2 to include housing and employment monitoring data up to the 1st April 2024 base date, changes to reflect growth will now be allowed in the River Wye Catchment area following Dwr Cymru Welsh Water investment and Welsh Government advice and increases in the flexibility rate from 10% to 15%.</p>
<p>Minor Rural Settlements</p>	<ul style="list-style-type: none"> • Question the level of growth attributed to Tier 4 settlements. Previous plan took a similar approach and failed to deliver. Requirement to deliver 50% affordable homes on these sites is likely to make delivery of these smaller sites less likely. [HBF, B&DW] • There should be no significant expansion of the rural settlements. [Private Individuals x 2]. • Deposit plan should identify the number of new homes proposed in Tier 4. [WG] • RLDP should maximise site allocations in Minor Rural Settlements. [BB3 Ltd, Manor Farm Partnership, Private Individuals x 3]

LPA Response	The Settlement Hierarchy set out in Policy S2 reflects the findings of the Sustainable Settlement Appraisal (SSA) which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. Spatially, the growth is considered to be well distributed throughout the County to help address affordability issues across Monmouthshire. Collectively, Tier 3 (Main Rural Settlements) and Tier 4 (Minor Rural Settlements) account for 9% of the County’s housing growth including new allocations, windfall and infill allowances and completions between 2018 – 2024. New allocations are only proposed in Tier 3 settlements (Main Rural) reflecting their position in the settlement hierarchy and account for 113 homes over six new allocations and 15 homes within an LDP Rollover site. Any growth in Tier 4 settlements (Minor Rural Settlements) is from any completions that have taken place between 2018 – 2024 and estimated contribution to infill developments based on past trends. There are no new allocations proposed for Tier 4 settlements. This is considered to be an acceptable level of growth in our most sustainable lower tier settlements to deliver much needed affordable homes and to address rural inequality and rural isolation in these areas. Site specific allocations and the tier they are situated in is set out in policies HA1 – HA18, along with a summary of the spatial distribution of housing provision in Table 2 of the Deposit Plan. Further details on the housing figures are also set out in the Housing Background Paper.
LPA Recommendation	No changes to the Settlement Hierarchy required, however, update Policy S2 to include housing and employment monitoring data up to the 1st April 2024 base date, changes to reflect growth will now be allowed in the River Wye Catchment area following Dwr Cymru Welsh Water investment and Welsh Government advice and increases in the flexibility rate from 10% to 15%.
Uncertainties	<ul style="list-style-type: none"> • Decisions yet to be made on viability and need for candidate sites. Difficult to comment on spatial distribution without knowing where the sites will be and if they are suitable. [Abergavenny Transition Town]
LPA Response	The level of information contained in the Preferred Strategy was appropriate for that stage in the Plan process. The Deposit Plan sets out the detailed policies and site allocations.
LPA Recommendation	No change required.
Windfalls/Infill sites	<ul style="list-style-type: none"> • Too much reliance on windfall sites. This should be redistributed. [Llanover Estates, Richborough Estates, Vistry Group, The Coldbrook Estate] • Support the HPS approach to windfalls, however, this should be further reduced by 50%. [B&DW] • Rural small site reduction of 20% should be applied to the whole of the small site allowance. [B&DW, Candleston Homes] • Important to draw settlement boundaries to allow for flexible growth. [Tompkins Thomas Planning]
LPA Response	The Housing Background Paper sets out the approach taken to windfall allowances in the preparation of the Deposit Plan. As with the Preferred Strategy, the Deposit Plan includes a windfall allowance based on the findings of the Housing Potential Study. This contributes approximately 230 units to the housing figures, less than an allowance based on past trends, which would contribute 366 homes to the housing figures. In this respect, a conservative approach to windfall provision has been taken. Similarly, a reduced contribution has been factored in for infill developments. The past trend rate of infill developments has been reduced by 15% to reflect the plan-led system and infill opportunities reducing.
LPA Recommendation	In accordance with details set out in the Housing Background Paper, base windfall allowances on the findings of the Housing Potential Study and the infill allowance on a reduced past trend rate.
Existing Commitments	<ul style="list-style-type: none"> • Sites that cannot demonstrate deliverability should be removed from the process. [Melin Homes, Vistry, Llanarth Estates, Candleston Homes, Sero Homes, Sero, Private Individuals x 2] • Non-delivery allowance of 20% should be applied to existing commitments. [Redrow Homes, B&DW, Candleston Homes, Taylor Wimpey]

LPA Response	The ability to demonstrate deliverability and viability has formed an integral part of the candidate site assessment process, with sites removed from the process where insufficient evidence has been provided. In line with the Development Plans Manual (DPM) a non-delivery allowance has been applied to the existing commitments element of the housing supply components. The DPM allows for two approaches to this; either as a percentage across the overall land bank or sites can be discounted individually. Given the relatively small number of sites involved and based on Officer knowledge of sites, it has been decided to discount 4 sites which it is considered that there is insufficient information to demonstrate that they will come forward during the Plan period. Further details can be found in the Housing Background Paper.
LPA Recommendation	No change required.
Strategic Sites	<ul style="list-style-type: none"> • Delivery of Caldicot East site is ambitious within the remaining plan period. Additional allocations elsewhere would de-risk the plan. [Llanover Estates, Vistry, The Coldbrook Estate] • Concerns regarding the size and provision of Abergavenny East. Advise further consideration is given to allocating a smaller allocation to provide range and choice and deliverable allocations. [Edenstone Homes, Bellway Homes, Tompkins Thomas Planning] • Concentration of strategic sites is a high-risk strategy. Range of smaller sites to help mitigate against any delay associated with larger more complex strategic sites should be considered. [Redrow Homes, Private Individuals x 2]
Page 1516 LPA Response	<p>The Deposit Plan allocates 18 residential/mixed use sites. Whilst it is recognised that two of the strategic sites (HA1 – Land to the East of Abergavenny and HA2 – Land to the East of Caldicot) account for 1,270 homes, there are a further 16 residential allocations ranging in size from 15 units to 270 units contributing to housing delivery in the County.</p> <p>Furthermore, in October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. An increase in the flexibility rate from 10% to 15% was one of the changes agreed. This increased the housing provision figure from 5,940 (10% flexibility) to 6,210 (15% flexibility). The change seeks to ensure that the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst also allowing for the allocation of a handful of smaller sites across the County to sustain and enhance existing communities. Increasing the flexibility ensures that the plan is more robust and resilient as there is delivery in the short-term term while the large strategic sites take time to be developed out. An increased flexibility will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery of larger strategic sites which are more complicated to develop. A range of smaller sites will ensure the delivery of much needed affordable housing after the adoption of the plan to start addressing this current unmet affordable housing need.</p> <p>A housing trajectory has been prepared as part of the Deposit Plan, which demonstrates housing delivery rates throughout the Plan period can be achieved.</p>
LPA Recommendation	No change required.
New Settlement	<ul style="list-style-type: none"> • Disappointed that a new settlement solution has been deferred for consideration through the SDP. [Melin Homes, Redrow Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero, Private Individuals x 2]
LPA Response	Paragraph 3.53 of PPW12 states that “due to their strategic nature new settlements should only be proposed as part of a joint LDP, an SDP or Future Wales. This is due to their significance and impacts extending beyond a single local authority.”
LPA Recommendation	No change required.

General	<ul style="list-style-type: none"> • Specifically allowing Gypsy and Traveller sites outside of tiers 1 to 4 is illegal discrimination. All locations should be available. [Private Individual] • Provision of affordable housing should be influenced by the availability of local employment. [Private Individual] • How will Council ensure that the employment land allocated brings forward suitable jobs? [Private Individual] • Green wedge designations should be considered early in the process. [Private Individual] • FW2040 notes large scale projects should consider District Heat Networks. [Private Individual] • Need to recognise brownfield sites in non-rural isolated locations concerning rural economies. [Private Individual] • Sewerage infrastructure is inadequate and needs upgrading before more houses are built to avoid further deterioration of water quality in rivers. [Private Individual] • Providing a commensurate amount of employment land to housing does not ensure the creation/relocation of businesses. [Private Individual] • Too much focus on house building rather than creating nice places to live. [Private Individual] • Spatial relationship between settlements outside of Tier 4 and their purpose to food production should be discussed. [Our Food 1200]
LPA Response	<p>All locations included Tiers 1 – 4 and outside of the Settlement Tiers are available for consideration for Gypsy and Traveller sites subject to satisfying the detailed policy framework of the RLDP.</p> <p>In accordance with national guidance the provision of affordable housing is linked to the evidence base set out in the Local Housing Market Assessment. The RLDP does, however, seek to achieve a balance between the provision of homes and employment opportunities.</p> <p>The Green Wedge Assessment has informed the designation of green wedges throughout the County and has been considered as part of the site selection process.</p> <p>Consideration for District Heat Network opportunities has been undertaken as part of the Monmouthshire Renewable and Low Carbon Energy Assessment (October 2020), which identified limited potential for district heat networks. However, the Council has introduced policy requirements for dwellings to be built to net zero carbon standards, including the incorporation of renewable energy generation technologies and a specific requirement to not connect to the gas network (NZ1 – Monmouthshire Net Zero Carbon Homes and Strategic Policy S8 – Site Allocation Placemaking Principles).</p> <p>The RLDP seeks to support economic growth through the inclusion of an overarching strategy and potential jobs growth figure that could be supported by the population and housing growth planned over the Plan period. The RLDP will seek to achieve this through the allocation of a range of B use class employment sites and a supportive policy framework for jobs that will be delivered other sectors such as tourism, leisure food, retail and agriculture. It is recognised that the RLDP is only one mechanism for delivering on economic growth. The Economy, Employment and Skills Strategy (EESS) sets out the Council’s direction of travel and action plan for achieving economic growth.</p> <p>In accordance with national guidance, the RLDP allows for consideration of rural enterprise dwellings outside of Tier 1 – 4 settlements. Similarly, brownfield development opportunities outside of defined settlement boundaries would be considered on their merits and assessed against the RLDP policy framework.</p> <p>The RLDP has been prepared in consultation with Dwr Cymru Welsh Water, NRW and other relevant organisations to follow the relevant guidance and delivery programme to the phosphates issue.</p>
LPA Recommendation	No change required.
Sites Promoted in response to question 4	<ul style="list-style-type: none"> • Llanover Estates – CS0139 – Former petrol station, Llanover [Llanover Estates] • Llanover Estates – CS0140 - Land of Rhyd-y-Meirch [Llanover Estates] • MHA – CS0215 – Land at Llanellen [MHA] • MHA – CS0214 – Land at Churchfields, Devauden [MHA]

LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Site Assessment Report.
LPA Recommendation	See the Candidate Site Assessment Report for Candidate Site recommendations.

Question 5 – Do you have any comments on Strategic Policy S3 Sustainable Placemaking & High Quality Design?

37 organisations/private individuals submitted a response to question 5.

There was general support to Strategic Policy S3. Some changes to the existing policy wording were put forward and questions relating to the definition of some of the terms noted within the policy.

Green Infrastructure was referred to in a number of representations, with support for its inclusion but also whether the approach should always be led by Green Infrastructure.

Key Theme	Summary of Points Raised
Support policy	<ul style="list-style-type: none"> • The Canal & River Trust fully support policy noting it is in line with their own guidance [Canal & River Trust].

	<ul style="list-style-type: none"> • Support in so far that it aims to ensure development contributes towards creating high quality, attractive and sustainable places that support the well-being of the community [Melin Homes, Monmouthshire Housing Association, Richborough Estates, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero, Private Individuals x 4]. • Support the principle of the policy and recognise the importance of placemaking in good design [Redrow Homes]. • Support policy in principle and consider site promoted could be carried out with full regard to the aspiration of the policy [Grove Farm Estates & Development]. • Support policy, particularly criterion iv) [Cllr Louise Brown]. • Agree high quality design is essential [Tompkins Thomas Planning] • Broadly agree with the wording and thrust of policy, consider site promoted will achieve the aspirations of this policy [Marston's PLC]. • Site promoter prides itself on design excellence and providing high quality homes that would align with this policy [Edenstone].
LPA Response	Support for Strategic Policy S3 is welcomed.
LPA Recommendation	Minor updates have been made to Strategic Policy S3 one relates to update of some wording for consistency in relation to mix of uses, sustainable travel and the other to further emphasise priorities of the Deposit Plan with regard to responding to climate change, however none of the changes are considered to be significant.
Changes suggested to policy wording	<ul style="list-style-type: none"> • Additional wording should be included to recognise the way in which developments are required to meet this policy will in part depend on the scale of development. Reference to PPW11 noting placemaking should not add additional cost to a development [Home Builders Federation and Barratt & David Wilson Homes]. • Suggest part ii) is amended to 'incorporate a mix of uses where appropriate to minimise the need to travel and provide sustainable transport links to maximise opportunities for active travel and public transport use' [Vistry]. • Refer to criterion ii) noting this should be expanded to acknowledge the role promoting the ability working from home can play in terms of minimising the need to travel [Richborough Estates] • Supporting text should state criterion ii) could be achieved either through bringing forward mixed use developments, or through the appropriate location of new development alongside other existing uses [Richborough Estates]
LPA Response	Comments noted. It is recognised that an appropriate mix of uses would not be applicable to all sites and scenarios.
LPA Recommendation	Minor updates have been made to the wording of Strategic Policy S3. With respect of criterion ii) specifically it is recognised that an appropriate mix of uses would not be applicable to all sites and scenarios and therefore an element of flexibility has been added to account for this. Additional minor updates to wording have been made for consistency in relation to sustainable travel and to further emphasise priorities of the Deposit Plan with regard to responding to climate change, however none of the changes are considered to be significant.
Support prominence given to GI.	<ul style="list-style-type: none"> • Welcome proposals for placemaking and the prominence given to Green Infrastructure in design considerations [Abergavenny Town Council].
LPA Response	Support noted.
LPA Recommendation	No change required.

Development to be built to net zero carbon	<ul style="list-style-type: none"> Disappointed there is no commitment for future development to build to net zero carbon to meet the declared climate crisis objectives [Abergavenny Town Council].
LPA Response	Comment noted. One of the core purposes of the Council is to become a zero-carbon County. Policy NZ1 Monmouthshire Net Zero Carbon Homes has been included within the Deposit Plan to reflect this aspiration. Further detail of how this will be achieved is set out in the detailed policy framework of the Deposit Plan.
LPA Recommendation	Additional wording has been added to S3 to emphasise the need to respond to climate change.
Question whether approach to design should be led by GI	<ul style="list-style-type: none"> Question whether the approach to design should always be led by Green Infrastructure, good design responds to all aspects of the context, opportunities and needs of the site [Abergavenny & District Civic Society and Abergavenny Transition Town]. Note S3 is supplemented by S17 relating to GI, suggest a further strategic policy is equally needed covering the built environment and heritage [Abergavenny & District Civic Society].
LPA Response	Comments noted, policy S3 allows for flexibility, while a GI-led approach will be appropriate for most sites and proposals it is recognised in certain contexts it would not be relevant. With regard to the suggested need for an additional Strategic Policy for the built environment and heritage it is considered criterion iv) along with the detailed supporting policies are sufficient.
LPA Recommendation	No change required.
Terms used	<ul style="list-style-type: none"> Refer to terms such as 'high quality', 'high standard' and 'good design' noting these are difficult to pin down legally and precisely when applied to development. Suggest policy should include reference to insist such development should be reviewed and approved by the Design Commission for Wales [Abergavenny Transition Town]
LPA Response	Comments noted. The Design Commission for Wales have been and continue to be involved in helping to shape the Strategic Sites progression. It would not be practical, nor would there be resource available to insist that they review and approve all development in any given area.
LPA Recommendation	No change required.
Impact on viability	<ul style="list-style-type: none"> Concern that the driver to design will place overly onerous conditions on planning to the threat of viability. Any additional requirements that might impact further on development costs need to be highlighted at an early stage of the planning process so they can be taken into account in assessing land values and the viability process. Urge caution in respect of being overly prescriptive and ensuring any targets associated with S3 are considered alongside other policy objectives to ensure the plan does not affect deliverability [Redrow Homes].
LPA Response	Comment noted. Strategic S3 provides an overarching framework for sustainable placemaking and high quality design, agree that the deliverability and viability of sites is of importance.
LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> Comment noting new housing developments are being approved with inadequate road systems [Private individual x 1].

	<ul style="list-style-type: none"> • Questions relating to detailed biodiversity matters that would be dealt with at a planning application stage on a site by site basis [Private individual x 1] • Question relating to whether CADW, National Trust etc are consulted on applications [Private individual x 1]. • Nothing in policy to future design houses to incorporate home working or flexible living arrangements to allow for intergenerational living, 3 or 4 storey dwellings may be appropriate rather than a focus on 2 storey [Private individual x 1]. • Note development of greenfield sites is not sustainable, reference given to the Bayfield site [Private individual x 1]. • Suggestion the policy is a marketing ploy to gain agreement [Private individual x 1]. • Sustainable development cannot acceptably replace mature and biodiverse ecosystems [Private individuals x 2]. • Focus on building houses not actually making areas a nice place to live [Private individual x 1].
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">LPA Response</p>	<p>Infrastructure requirements are dealt with individually for each of the site allocations and are also included in an Infrastructure Delivery Plan. A specific Strategic Policy in relation to Infrastructure is also included, along with other detailed policies within the framework of the Deposit Plan in relation to sustainable transport.</p> <p>Ecology matters are dealt with both strategically from the outset of determining site allocations and at the site specific planning application stage. This approach ensures any sites included within the plan do not have any major constraints that could prevent development coming forward at a later date.</p> <p>A Housing Mix policy is included in the Deposit RLDP the supporting text of which recognises that homes should be designed so that they are flexible and responsive to the changing needs of the occupants over their lifetime.</p> <p>The Plan recognises that there are limited opportunities within Monmouthshire for brownfield development. The Bayfield site specifically referred to is no longer included as an allocation within the Plan.</p> <p>This strategic policy provides an overarching framework for sustainable placemaking and high quality design and will ensure development proposals reflect this aim.</p> <p>The Deposit RLDP reflects National Guidance set out in PPW ensuring that development does not cause any significant loss of habitats and populations of species and must provide a net benefit for biodiversity and improved ecosystem resilience.</p> <p>The aim of this strategic policy is to ensure new development incorporates the principles of sustainable placemaking and good design which will in turn deliver a wide range of social, economic, environmental and health and well-being benefits for local communities and the County as a whole.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>

Question 6 – Do you have any comments on Strategic Policy S4 Climate Change?

61 organisations or members of the public submitted a response to question 6. The overarching principles of the policy were generally well received, although the need for further guidance on the definition of net zero ready and the need to factor in

viability were highlighted. There were also concerns that the Preferred Strategy and its allocations are contrary to the principles of climate change.

Key Theme	Summary of Points Raised
Welcome Climate Change aims	<ul style="list-style-type: none"> • Welcome the PS's focus on active travel, sustainable transport, and the Plan's commitment to net zero carbon developments. [Chepstow Town Council, NRW, Tompkins Thomas Planning] • Welcome the promotion of water efficiency measures and minimising the impact on water resources and quality. [Dwr Cymru] • Welcome policy aims but they should be applied to new allocations on a site-by-site basis and with regard to viability. [Melin Homes, MHA, Hallam Land Management, Llanarth Estates, Edenstone Group, Marston's Plc, Edenstone, Tirion Homes, Candleston Homes, Sero Homes, Sero, Edenstone, Private Individuals x 2] • Welcome policy but reference to public transport via electric buses and protection of GI and open space should be added. [Cllr Louise Brown]
LPA Response	Support welcomed. Detailed viability assessments that take account of the Council's climate change aspirations have been undertaken on the proposed site allocations. The policy refers to maximising opportunities for public transport use and ensuring the provision of electric vehicle charger infrastructure. Strategic Policy S9 – Sustainable Transport also covers the promotion of all forms of sustainable transport methods. Criterion viii) of S4 sets out strategic requirements for the inclusion of green infrastructure.
LPA Recommendation	No significant changes required to the overarching policy principles; however, minor wording changes have been made.
Definition/viability	<ul style="list-style-type: none"> • Further guidance required on the definition of net zero developments and how they will be measured. [B&DW, Vistry, Bellway Homes] • Further guidance regarding the targets and measures is required to fully assess the viability impacts, allowing sites to be considered on a site-by-site basis. [Edenstone Homes, Redrow Homes, Grove Farm Estates & Developments, Redrow Homes, Richborough Estates, Barwood Development Securities Ltd, Edenstone, Private Individuals x 2,] • Concerned whether the policy requirement is supported by the relevant evidence base and appropriate viability assumptions to ensure it is justified and meets the test of soundness. [Taylor Wimpey]
LPA Response	Policy NZ1 – Monmouthshire Net Zero Carbon Homes of the Deposit RLDP and the associated evidence base set out the details of the Council's net zero requirements and how it will be measured. Detailed viability assessments that take account of the Council's climate change aspirations have been undertaken on the proposed site allocations.
LPA Recommendation	Refer to Policy NZ1 – Monmouthshire Net Zero Carbon Homes for further details.
Further details/evidence needed	<ul style="list-style-type: none"> • More rigorous policy on the energy efficiency of buildings and construction required. [Abergavenny & District Society, Private Individuals x 4] • Little reference to building design or recommendations for low energy solutions to facilitate the reduction in emissions for residential developments. [Abergavenny Town Council] • New development can only play a part in not adding to the causes of climate change. [HBF, B&DW] • Should include policies elsewhere aimed at reducing car use and commuting. [Private Individual] • Undertake further work on the contribution renewable energy can make to assist with climate change and decarbonisation. [WG] • Policy could go further and seek to improve, where possible, flood risk to existing communities. The SFCA could consider opportunities for these to be assessed at a local/site level. [NRW]

<p>LPA Response</p>	<p>The Deposit Plan introduces a policy NZ1 – Monmouthshire Net Zero Carbon Homes, which sets out details of the energy efficiency requirements of new homes.</p> <p>In addition, there are multiple policies seeking to reduce car usage including Policies HA1 – HA18 site allocation policies setting out site specific active travel requirements, Strategic Policy S3 Sustainable Placemaking & High Quality Design, Strategic Policy S13 – Sustainable Transport and ST1 – Sustainable Transport Proposals.</p> <p>Section 10 of the Deposit Plan sets out details of the contribution Monmouthshire can make to assist with climate change and decarbonisation including established renewable energy generation targets. This has been informed by the background evidence undertaken by the Carbon Trust on the Monmouthshire Renewable Energy and Low Carbon Assessment (October 2020) and Stakeholder Interviews and Workshops undertaken in 2024. The findings of this are set out in the Renewable Energy Background Paper and have been used to inform the policy approach taken in the Deposit Plan. Flood risk considerations are considered to be adequately covered by S4 and national policy.</p>
<p>LPA Recommendation</p>	<p>No significant changes required to the overarching policy principles, however, minor wording changes have been made.</p>
<p>Site Specific</p> <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1523</p>	<ul style="list-style-type: none"> • Ensure all development is compliant with TAN15. [WG] • To achieve climate change requires sustainable communities that do not require residents to have to travel excessively to access facilities. [Llangybi Fawr Community Council] • County Farms to the south of the County should be considered for solar farms. [SOUL] • Sifting out of candidate sites based on TAN 15 must be less didactical and more flexible. [F1 Real Estate Management Ltd] • Given the worsening climate emergency, associated investigations and appropriate flood risk management proposals need to be agreed before any allocations are made. [Private Individuals x 2] • SABs and SUDs need to be considered. [Private Individual] • Development in the south must take account of flood risk and the environmental impact of traffic. [Private Individual] • Increased traffic particularly the Hardwick Hill will affect health and the climate. [Private Individuals x 2] • Candidate sites need to be tested against policy principles. [Private Individual]
<p>LPA Response</p>	<p>The site selection process has had full regard to the current TAN15 and flood management. All allocations will be required to approved by the SuDs Approving Body. Traffic levels and active travel links have been considered in relation to the site allocations and within the Strategic Transport Assessment. The County’s potential solar resource has been considered as part of the Renewable and Low Carbon Energy Assessment. This concludes that while the County has a significant potential solar resource, this is dispersed throughout the County in small parcels of land. Therefore, a criteria-based policy has been included in the Deposit Plan to allow the consideration of solar farm applications on a site-by-site basis. A solar allocation has, however, been made in Raglan at Raglan Enterprise Park (Policy CC2 – Renewable Energy Allocation).</p>
<p>LPA Recommendation</p>	<p>No significant changes required to the overarching policy principles; however, minor wording changes have been made.</p>
<p>RLDP contrary to policy</p>	<ul style="list-style-type: none"> • Cumulative impact and failure to protect GI on the levels is inconsistent with the principles of nature conservation and declaration of climate and nature emergency. [Cllr Frances Taylor, Private Individuals x 3] • Building on greenfield sites goes against the policy to limit climate change and will increase the carbon footprint. [Private Individuals x 3] • Recent planning permissions, (e.g., Mabey Bridge) make no sense environmentally. [Private Individual]

LPA Response	Brownfield opportunities have been considered through the site selection and candidate site process however, given the limited brownfield opportunities in a Monmouthshire context, greenfield opportunities have had to be considered to meet the housing and employment requirements. Cumulative impact of development throughout the County, including the Gwent Levels is considered as part of the Integrated Sustainability Assessment. In addition, there is a suite of policies in the Deposit Plan seeking to protect international designations in the County such as the Gwent Levels SSSI. The Mabey Bridge planning permission made use of a brownfield site in close proximity to Chepstow town centre and good public transport links via the train station.
LPA Recommendation	No change required.
General	<ul style="list-style-type: none"> • Include reference to Objective 5 – Minerals and Waste in relation to Policy S4 Climate Change. [MPA] • Climate Change policy should be upfront. [Abergavenny Transition Town]
LPA Response	In the interest of brevity, the RLDP objectives listed in the Links to Wider Framework box are those that are considered to be most pertinent to the policy in question, however, most RLDP objectives are linked to every policy some way. It is not considered necessary to list all objectives in relation to each policy. Similarly, the Plan should be read as a whole with policies being applied as necessary and not ordered in terms of priority.
LPA Recommendation	No change required.

Page 15/24

Question 7 – Do you have any comments on Strategic Policy S5 Infrastructure Provision?

56 organisations/private individuals submitted a response to question 7.

There was some support for the policy. A number of wording changes were suggested, some suggesting the need to be dependent on viability, others wanted more assurance the policy requirements would be met.

The need for an infrastructure plan was noted in time for the Deposit Plan.

Concern was also raised by some in relation to the need for additional infrastructure in relation to proposed strategic sites.

Key Theme	Summary of Points Raised
Support policy	<ul style="list-style-type: none"> • Applaud provisions of policy – particularly the inclusion of ‘strategic utilities including; water and sewerage infrastructure’ [Dwr Cymru/Welsh Water]. • Fully supportive of policy [The Canal & River Trust (Gandwr Cymru)]. Suggest policy may be improved if there was a requirement to carry out an audit on the existing situation to better inform discussions on what impact there may be and whether remediation is necessary. • Support in principle, suggest it would be useful to explain the justification text in relation to sewage infrastructure in that new development should not result in exceedances in the consented discharge of a WwTW. Also note infrastructure includes all the pipework along the public sewer network [Natural Resources Wales].
LPA Response	Support for S5 welcomed.

LPA Recommendation	With regard to comments relating to wastewater treatment works, an additional section has been included in the Key Issues, Challenges and Opportunities section in relation to water quality in Riverine Special Areas of Conservation. It is also recognised and noted in the Infrastructure Delivery Plan in relation to specific sites.
Suggested changes to wording	<ul style="list-style-type: none"> • Suggest changing wording to 'remedy any proven future deficiencies'. Also suggest adding in after 'prior to occupation' the following 'or in an agreed phased approach'. Suggest adding in 'Planning conditions or' before 'Planning Obligations'. After 'acceptable in planning terms' suggest the following is added 'and other policy requirements' [Home Builders Federation]. • Final wording should ensure that requirements are both necessary and viable in accordance with the Development Plans Manual (edition 3) [Monmouthshire Housing Association, Private individual x 1]. • Concern the wording of the policy implies that proposed development will be required to remedy existing deficiencies, which are not directly related to the development or fairly or reasonably related in scale and kind to the development, contrary to Regulation 122 of the CIL regulations. Suggest addition of a number of amendments to the first paragraph [Vistry]. • Suggest a change to wording in paragraph 5.21 replacing 'should' with 'must', noting this surely should be an obligation [Private individual x 1].
LPA Response	Minor updates have been made to the wording in response to the comments made. These include the deletion of 'to remedy deficiencies' and addition of 'to mitigate any likely adverse impacts' to the first sentence. Additional wording has been added to the third para to note this refers to planning 'agreements and' obligations. After it is acceptable in planning terms 'Such obligations may include' has been replaced with 'The requirements for such agreements/obligations will include consideration and appropriate provision of:'.
LPA Recommendation	No significant changes are required to the overarching policy principles, however, minor wording changes have been made as a result of comments submitted.
Broadband and strategic utilities	<ul style="list-style-type: none"> • Provision of broadband connections and utilities is a matter for the developer to deal with on a site-by-site basis and it is not considered appropriate or necessary to provide a financial contribution to facilitate this provision [Monmouthshire Housing Association].
LPA Response	Comment noted, there is no reference to broadband connections within the strategic policy. Detailed policy considerations for telecommunications, broadband and other digital infrastructure are set out in Policy IN1. Reference in the supporting text is made to Future Wales which notes new developments should include the provision of high-speed broadband infrastructure from the outset.
LPA Recommendation	No change required.
Cultural facilities and strategic utilities	<ul style="list-style-type: none"> • Do not consider the likes of some cultural facilities and strategic utilities are necessary to ensure a development is acceptable in planning terms [Monmouthshire Housing Association, Private individuals x 2].
LPA Response	Comments noted. The infrastructure requirements of sites will be determined on a case-by-case basis. The strategic policy provides an overview of the types of infrastructure, facilities, services and related works that are necessary to make development acceptable.
LPA Recommendation	No change required.
Road infrastructure	<ul style="list-style-type: none"> • State there is no mention of road infrastructure in policy [Cllr Louise Brown].

	<ul style="list-style-type: none"> Suggest the section is low on actual specific interventions. Note the need to improve public transport is very important but requires significant investment given the rural nature of Monmouthshire. States investment in roads is key, refers to buses struggling to get in and around Chepstow as an example [Private individual x 1].
LPA Response	Comments noted. Transport infrastructure is included within the strategic policy. There are also other detailed policies within the Deposit Plan relating to sustainable transport and transport schemes. Policy ST5 identifies numerous transport schemes identified in the Local Transport Strategy the will be supported, including active travel, public transport improvements and road schemes.
LPA Recommendation	No change required.
Health infrastructure	<ul style="list-style-type: none"> Note this is at the bottom of the list, suggest it can take weeks to get a routine appointment in Caldicot and Chepstow and difficult to get a dentist appointment. Health centres need to be included in strategic sites [Cllr Louise Brown].
LPA Response	Comment noted. The list of requirements is not ranked in any way.
LPA Recommendation	No change required.
Education	<ul style="list-style-type: none"> Additional capacity in schools must be confidently delivered before or with any major new developments [Private individual x 1].
LPA Response	Comment noted. The use of trigger points for education contributions within S106 agreements will be considered with colleagues in the MCC Education Department.
LPA Recommendation	No change required.
Infrastructure Plan	<ul style="list-style-type: none"> Support policy aspirations but needs to be established as part of any allocation. Note no infrastructure plan in place, refer to Development Plans Manual which indicates this is an essential piece of evidence, particularly in Monmouthshire given significant constraints in existing main settlements and lack of provision in smaller villages [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. An infrastructure plan should be prepared to demonstrate how relevant infrastructure to support development will come forward (Development Plans Manual, paragraphs 5.125 -5.128) [Welsh Government].
LPA Response	Comment noted. An Infrastructure Delivery Plan has been produced and is included as an appendix to the Deposit Plan.
LPA Recommendation	No change required.
Management companies	<ul style="list-style-type: none"> Suggest greater flexibility should be allowed in the policy wording as it advances to Deposit stage. Current wording of S5 does not make provision for sites managed via a private management company which is often the preference for both the local authority and applicant [Monmouthshire Housing Association, Edenstone and Private individuals x 2].
LPA Response	Comment noted, it is considered that in some circumstances the use of management companies may be appropriate and therefore additional wording should be included. It should however be noted that it is the Councils preference for GI and open space to be adopted by MCC.

LPA Recommendation	Additional wording added to strategic policy to note this includes the use of management companies where appropriate.
Adoption of infrastructure	<ul style="list-style-type: none"> • Question whether wording in policy means that in no circumstance will the Council adopt any new infrastructure [Home Builders Federation].
LPA Response	Comment noted. This doesn't appear to be evident in the wording of the strategic policy. Council departments will liaise with site promoters at the relevant time in relation to adopting any new infrastructure.
LPA Recommendation	No change required.
Affordable Housing	<ul style="list-style-type: none"> • Concern over the final paragraph relating to affordable housing noting occupiers are often more reliant on the need for local facilities and infrastructure often required to be delivered by new housing development. Question whether such a development would be compliant with other policies in the plan relating to sustainability and placemaking [Home Builders Federation].
LPA Response	Comment noted. The delivery of affordable housing is a core priority of the Council and the RLDP, as such it is pertinent to ensure that affordable housing is brought forward at the appropriate percentage set out Strategic Policy S7. This should not be as a compromise to the overall site, other policies set out within the Plan and placemaking principles will still apply.
LPA Recommendation	No change required.
Viability	<ul style="list-style-type: none"> • Welcomes the commitment that due regard will be given to overall development viability and clarification that priority will be given to affordable housing [Vistry]. • Obligations associated with development are essential to ensure social infrastructure is in place to accommodate new residents, however overly rigid policies can fail to allow for the specifics of a site and its particular viability. Policy associated with S5 should be clear and easy to interpret but also have inherent flexibility to accept and allow for site-by-site viability [Redrow Homes]. • Suggest if developers make so much money they can contribute more to the necessary infrastructure [Private individual x 1]. • State no means by which to test proposed infrastructure requirements against the viability of potential candidate sites at this stage and as such the policy will require further refinement [Edenstone].
LPA Response	Comments noted. Viability testing has been undertaken on all of the proposed site allocations in the Deposit RLDP. Viability appraisals may also be requested for other proposals, detail is set out in the supporting text of the strategic policy.
LPA Recommendation	No change required.
Infrastructure should come first	<ul style="list-style-type: none"> • Infrastructure should always come first, suggest without it settlements will fail to thrive or fail completely [Llangybi Fawr Community Council]. • Suggests policy creates opportunity for developers to avoid paying required infrastructure contributions if viability assessment demonstrates they can't afford them. To avoid creating further infrastructure stress states the Council must commit to finding those required contributions from other sources before approving development that would create a detriment to infrastructure. Uses Chepstow as an example in relation to WelTAG study that further development would increase levels of traffic and pollution in the AQMA [Cllr Christopher Edwards and Private individual x 1].

	<ul style="list-style-type: none"> • Policy fails to mention the need to prevent any further development without the road and public transport infrastructure being in place [Cllr Louise Brown]. • No infrastructure in place currently/infrastructure is inadequate, additional housing will exacerbate these issues[Private individuals x 3].
LPA Response	Comments noted. An Infrastructure Delivery Plan has been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.
LPA Recommendation	No change required.
Area specific	<ul style="list-style-type: none"> • Refer to High Beech roundabout noting development should go hand in hand with measures to address these severe traffic problems. Also note childcare provision, school places and health services must be included in the plan [Chepstow Town Council]. • Refer to an additional junction on the M48 at Caldicot, suggest this would go some way towards relieving some of the pressure on the local road system [Chepstow Town Council]. • For some strategic development sites there is potential for cumulative trunk road capacity impacts, especially at Abergavenny, Caldicot and Chepstow. All strategic sites should be supported by Transport Assessments that are underpinned by the Welsh Transport Strategy and have regard to Active Travel and air quality [Welsh Government]. • Suggestion Severnside is poorly provided with infrastructure, promised in the LDP and not delivered. Services have not grown exponentially with development [Private individuals x 14]. • Reference to supporting text in paragraph 5.20 noting the statement relating to appropriate infrastructure will be scrupulously observed when reviewing suitable rural settlement candidate sites. Reference is made to existing community groups and facilities noting active community collaboration and enterprise play a part in ensuring rural settlements are resilient and sustainable [Private individual x 1]. • Suggestion infrastructure is inadequate in Chepstow, primarily a transport issue as the town is gridlocked most days. State Welsh Government do not currently support a Chepstow bypass. A concrete solution is needed before new houses can be built [Private individuals x 5]. • State Chepstow cannot cope with traffic created by new development in the wider region, traffic from outlying areas all comes through the 'Chepstow bottleneck' often exacerbated by bridge closures due to bad weather. A regional policy approach to traffic through Chepstow is needed [Private individual x 1]. • Note 3 preferred strategic sites have been well assessed against criteria, the smaller candidate sites need to be similarly assessed so as not to over burden existing communities and infrastructure or generate more journeys when the car is the only option [Private individual x 1]. • Refer to Usk noting there is insufficient infrastructure, suggest improvements need to be made to the town before housing [Private individual x 1]. • State the traffic is a problem and increasingly so, state there is no support/contingency of relief roads or affordable public transport. Suggest the walk between Undy and Rogiet is treacherous [Private individual x 1]. • Representor states they have grave concerns given that the current infrastructure cannot cope with the number of citizens in Caldicot at present [Private individual x 1].
LPA Response	An Infrastructure Delivery Plan has been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.
LPA Recommendation	No change required.

<p>Page 1529</p>	<p>Other</p> <ul style="list-style-type: none"> • Query why no reference to minerals and waste in S5, note infrastructure provision is reliant on the supply of aggregates and mineral products [Mineral Products Association] • Note developers may be required to fund improvements to water and sewerage infrastructure should they wish to bring forward a development site in advance of regulatory investment. Where insufficient capacity is available and no reinforcement works are programmed within the respective Capital Investment Programme, the requisition provisions (of the Water Industry Act 1991) can be entered into for water and sewerage infrastructure, these requisitions do not apply in the instance of WwTW and as such planning obligations may be necessary [Dwr Cymru/Welsh Water]. • The Library Authority part of Gloucestershire County Council suggest new housing developments will place additional pressure on these services, this in turn could require mitigation proportionate to the scale of growth proposed. They request the impact of new housing development on existing community infrastructure outside of the MCC administrative area, including libraries, is addressed in the RLDP [Gloucestershire County Council]. • Note where development may affect the operational railway developers should consider the impact on railway infrastructure such as need for better/increased parking at stations or improvements to rail services. It is appropriate to require developer contributions to fund improvements as Network Rail is a publicly funded organisation with a regulated remit [Network Rail]. • Refer to level crossings and safety measures. Note a full transport assessment should be submitted alongside proposed development in close proximity to a level crossing [Network Rail]. • Policy should make it clear that the cost of providing required infrastructure should not be at the expense of satisfying S3, S4 and relevant development management policies [Abergavenny & District Civic Society]. • Priorities such as Magor Station and improvements to Caldicot stations and Chepstow train station should be fully investigated and supported in respect of addressing climate change and supporting modal shift. Should be no development without limiting the reliance on road infrastructure and car ownership [Cllr Frances Taylor]. • Questions what is the provision/expectation for the developer to provide or support the cost of new infrastructure [Private individual x 1]. • Note there are terrible links to Bristol via rail and bus with infrequent services [Private individual x 1] • Suggest there is no evidence or planning for the obligations listed under the policy [Private individual x 1]. • State Infrastructure is at breaking point, suggest the Council should concentrate on building up commerce in the town centre benefitting those who already live in the County [Private individual x 1]. • Note while the policy appears to serve the needs of the local community, state they have little confidence the policy will be upheld [Private individual x 1].
<p>LPA Response</p>	<p>Planning agreements and obligations are not usually needed specifically to contribute to the supply of aggregates and minerals. Detailed policy considerations in relation to aggregates and minerals are considered elsewhere in the Deposit Plan in S16 along with supporting Development Management policies.</p> <p>Reference is given within the strategic policy to strategic utilities including water and sewerage infrastructure.</p> <p>Reference is given to community and cultural facilities within the strategic policy and will be considered on a site-by-site basis.</p> <p>Reference is given to sustainable transport measures in Strategic Policy S6 – Infrastructure which would include contributions to public transport as necessary.</p> <p>Proximity to level crossings and safety measures is of importance and will be assessed on a site-by-site basis.</p> <p>The provision of infrastructure should not be as a compromise to the overall site, other policies set out within the plan and placemaking principles will still apply.</p>

	An Infrastructure Delivery Plan has been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan. The list of infrastructure requirements is not exhaustive nor ranked in any way.
LPA Recommendation	No change required.

Question 8 – Do you have any comments on Strategic Policy S6 Affordable Homes?

56 organisations or members of the public submitted a response to question 8.

A number of representors responded positively to the provision of 50% affordable homes, however concern was raised by others on the viability and deliverability of such a high proportion noting the overall viability of this approach does not appear to have been tested at this stage. The resultant impact of sites with 50% affordable homes on the delivery of sustainable places was questioned.

It was suggested the housing requirement should be higher than currently planned in the Preferred Strategy, suggest this in turn will result in an increase in the affordable housing target.

The definition of affordable housing was questioned.

Key Theme	Summary of Points Raised
<p>Page 1530</p> <p>Support policy</p>	<ul style="list-style-type: none"> • Welcome commitment to provide up to 1850 affordable homes by 2033 [Abergavenny Town Council]. • Support innovative means of providing affordable homes, state due to the current adverse economic situation the starting point should be 50% of new homes. Note there are opportunities for both public and private sectors to commit to providing low cost homes for all age groups in a number of distinctly different ways. Refer to proven track record in partnering with developers to deliver such housing with examples given. [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2]. • Strongly supports affordable housing-led sites [Welsh Government]. • Welcome the target and the commitment, await further details [Abergavenny & District Civic Society]. • Note the commitment to provide 50% affordable housing is ambitious but welcome the commitment to work with the Welsh Government, Registered Social Landlords and house developers to ensure that thresholds for affordable housing are achieved. Note while there is some ambiguity on the mechanisms of how this will be achieved it is positive the revised PS provides further detail [Leathdunn Ltd, Johnsey Estates UK, Vistry Group & Private Individual x 1]. • While support the Council’s ambition to deliver affordable housing encourage the Council to ensure the policy isn’t overly prescriptive to still allow viable and deliverable schemes to come forward [Redrow Homes Limited]. • Aspiration is supported in principle subject to the ongoing viability process [Richborough Estates]. • Pleased that the latest RLDP Preferred Strategy intends to allow for up to 1,100 affordable homes, recognising there can never be enough affordable homes [Private individual x 1]. • Completely agree with the Council’s affordable housing targets, state it is imperative that site allocations demonstrate this can be achieved to avoid reduced delivery rates [Tompkins Thomas Planning]. • Support aspiration of the emerging Strategic Policy, comment that candidate sites that have demonstrated accordance with the requirements of the policy should be acknowledged sufficiently positively in the consideration process for the Deposit Plan [Marston’s PLC].

	<ul style="list-style-type: none"> • Agree that affordable homes are necessary, suggest the Council undertakes work to help residents understand what this means in a proactive way to reduce stigma [Private individual x 1]. • Support policy as makes sense given the significant increase in local house prices recently [Private individual x 1]. • Support policy noting if homes are to be built they should be affordable [Private individual x 1].
LPA Response	<p>Support for the Strategic Policy S6 (now S7) is welcomed. Delivery of affordable housing continues to be a core priority of the RLDP. Additional detail has been added to the policy setting out how affordable housing will be delivered including the appropriate thresholds to account for different scales of development.</p>
LPA Recommendation	<p>Additional detail has been added to Strategic Policy S7 (formally S6) to provide clarity on the Councils approach to the delivery of affordable housing.</p>
Provision of 50% Affordable Homes	<ul style="list-style-type: none"> • Raise concerns over the requirement of 50% affordable homes on all allocated sites. Question whether sites of 50% affordable housing will truly deliver sustainable places through design, layout and mix of uses that enhance the character and identity of Monmouthshire’s settlements [Home Builders Federation]. • Concern over 50% delivery of affordable housing as will likely result in complex partnerships between private developers and registered social landlords and a likely need for grant funding to allow for their delivery [Barratt & David Wilson Homes and Barratt and David Wilson Homes South Wales]. • Monmouthshire Housing Association promoted the sites previously as 50/50 so position has not altered [Monmouthshire Housing Association]. • Suggest 50% affordable housing risks creating social ghettos and considers this to be social engineering. States should let people choose where they want to live and who they want as neighbours [Private individual x 2]. • Suggest there should be over-provision of affordable housing to account for historic under-provision [Disability Advice Project]. • Delivery of 50% will need to be evidenced by testing in the Council’s viability appraisals at Deposit stage with effective control over land being a main consideration. Evidence should include resolution to use public land for this purpose and binding legal agreements where the land is in private ownership or resolution by Council for Compulsory Purchase powers [Welsh Government]. • Do not support a 50% housing target on all new site allocations as consider this could cause a number of viability issues for developers. Suggest a lower target of 35% for all allocated sites and note the 50% figure should be reassessed [Hallam Land Management, Taylor Wimpey & Bellway Homes] • Suggestion that increasing the housing requirement of both market and affordable housing would signify a better method of increasing affordable provision within the County. The 50% target would cause a number of viability issues for developers, which in turn would restrict sites coming forward. Happy to work with the Council to find a mutually beneficial solution to affordability issues [Edenstone Homes and Edenstone]. • Concern over 50% provision on all new allocated sites. Suggest a lack of evidence and analysis to demonstrate 50% affordable housing can be delivered [Persimmon Homes East Wales]. • Acknowledge the affordability issues that face the County and understand the rationale behind seeking a higher level of affordable homes, state must be flexibility on a site-by-site basis, especially in considering site specific constraints [Private individuals x 2]. • Need for flexibility in considering brownfield sites which typically have higher cost associated with demolition and site clearance [Private individual x 1]. • State no evidence to suggest the plan will deliver 50% on all new sites, note will not meet the test of soundness. Concern over viability and deliverability, suggest a sounder strategy would be to increase the overall housing requirement so the affordable housing requirement accounts for a lower proportion of housing to be delivered from allocated sites [Vistry].

	<ul style="list-style-type: none"> • Questions how the Council will deliver, measure and guarantee the number of affordable homes [Private individual x 1]. • Suggest 50% will not be achieved as the affordable homes targets have not been met at any of the other developments in recent years [Private individual x 1].
LPA Response	Comments noted. The delivery of affordable housing continues to be a core priority of the RLDP and furthermore is a corporate priority. Viability testing has been undertaken on all of the proposed site allocations in the Deposit RLDP. This assessment has been undertaken independently by a viability consultant on behalf of Monmouthshire County Council, viability assessments have demonstrated that the proposed site allocations are viable based on the provision of 50% affordable housing. Different affordable housing thresholds are provided for other types of development and are set out in Strategic Policy S7.
LPA Recommendation	Additional detail has been added to Strategic Policy S7 (formally S6) to provide clarity on the Council’s approach to the delivery of affordable housing.
Housing requirement	<ul style="list-style-type: none"> • Refer to comments in connection to Strategic Policy S1 suggesting the housing requirement should be higher than currently planned in the Preferred Strategy, suggest this in turn will result in an increase in the affordable housing target [Candleston Homes and Taylor Wimpey PLC].
LPA Response	Comment noted, the housing requirement is considered in relation to Policy S1 in the Initial Report of Consultation.
LPA Recommendation	No change required.
Local Housing Market Assessment (LHMA)	<ul style="list-style-type: none"> • Refer to the LHMA for 2020 – 2025, note it is of significant concern that the Council have not yet revised the LHMA using the new approved methodology but must do so by the time the RLDP is placed on Deposit [Welsh Government].
LPA Response	The LHMA Refresh 2022 – 2037 has been undertaken by officers in the Housing team using the approved methodology and included a number of informal meetings with officers in the Welsh Government Housing team to ensure the correct approach was being undertaken over the last few years. Monmouthshire County Council’s Cabinet approved the LHMA Refresh 2022 – 2037 prior to submission to Welsh Government in May 2024. A response was received from Welsh Government in August 2024 noting some additional actions needed to be undertaken to the LHMA before it can be signed off by Welsh Government. This work is on-going.
LPA Recommendation	No change required.
Land values and viability	<ul style="list-style-type: none"> • Note the relatively high land values in Monmouthshire will assist in supporting the 50% affordable housing target and ambition of exemplar zero carbon quality development. Wish to continue to work with Monmouthshire to understand details of the viability work that supports these ambitions [Torfaen County Borough Council]. • Raise concerns over 50% provision as the viability of this approach does not appear to have been tested, no certainty this can be delivered [Home Builders Federation]. • State this is an ambitious approach may require Welsh Government policy position changes on use of Social Housing Grant or other public sector funding which is very uncertain at this stage. Suggest this should be planned for through the incorporation of an increased flexibility allowance [Barratt & David Wilson Homes].

	<ul style="list-style-type: none"> • Viability in delivering the policy aspiration is key, 50% is an ambitious target and it may be that grant funding is needed to achieve it, final policy wording should allow flexibility to take account of site-specific conditions [Monmouthshire Housing Association]. • Note no viability evidence to accompany the revised plan at either a high level or site specific viability appraisals. This needs to be rectified by Deposit [Welsh Government]. • Acknowledge the affordable housing requirement and are more than willing to work collaboratively with the Council to meet this need but suggest the quantum of affordable housing for each site should be determined by the outcome of the accompanying viability assessments [Hallam Land Management, Taylor Wimpey, Edenstone Homes and Edenstone]. • Suggest the impact on acceptable land value has not been considered, noting there will be an inevitable reduction to land values with knock on implications on viability of sites and achieving landowner expectations. Note further viability work is imperative with the adoption of a statement of common ground to ensure all sites are being assessed with a fair and equal grounding [Persimmon Homes East Wales]. • Note as it stands the 50% target on all site allocations is untested in respect of its viability. State the next stage of Plan making must evidence this target as being reasonable and deliverable – without such evidence state the Plan will be unsound. Concern that it will not be possible to reasonably demonstrate that all allocations can deliver 50% affordable housing and suggest there is a very real risk of under delivery due to viability [Redrow Homes]. • Note affordable housing targets for open market schemes should not render those sites unviable, should be more flexibility in the final policy wording [Edenstone].
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1533</p> <p>LPA Response</p>	<p>Comments noted, delivery of affordable housing continues to be a core priority of the RLDP and furthermore is a corporate priority. Viability testing has been undertaken on all of the site allocations in the Deposit RLDP. This assessment has been undertaken independently by a viability consultant on behalf of Monmouthshire County Council, viability assessments have demonstrated that the proposed site allocations are viable based on the provision of 50% affordable housing. Different affordable housing thresholds are provided for other types of development and are set out in Strategic Policy S7.</p>
<p>LPA Recommendation</p>	<p>Additional detail has been added to Strategic Policy S7 (formally S6) to provide clarity on the Councils approach to the delivery of affordable housing.</p>
<p>Tenure neutral approach</p>	<ul style="list-style-type: none"> • The Council need to recognise the different impacts varying forms of affordable housing can have on site viability and move away from requiring tenure neutral affordable housing and ensuring that a proportion of affordable units are delivered as Low Cost Home Ownership homes to enhance the retention of younger working people within the LPA [Redrow Homes].
<p>LPA Response</p>	<p>Comment noted. It is recognised that homes for Social Rent and Low Cost Home Ownership provide for differing needs. The delivery option preferred by Monmouthshire County Council is not determined in the RLDP and will instead be set out in the Affordable Housing SPG.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>
<p>Lack of site in Monmouth/north of the County</p>	<ul style="list-style-type: none"> • Significant concern is raised on a moratorium of any new affordable housing provision in the northern settlements of Monmouthshire - Monmouth in particular. Suggest this is unsound against Tests 2 & 3 and creates significant concern for affordability in the future [Hallam Land Management & Taylor Wimpey]. • Note affordable homes are needed but are not spatially distributed throughout the County, not meeting the affordable housing needs in the north of the County [Cllr Louise Brown].

LPA Response	Comments noted. The spatial constraint in the Monmouth area relating to phosphates has been removed since consultation on the Preferred Strategy and as a consequence there are now proposed site allocations in Monmouth which will provide affordable homes in the town.
LPA Recommendation	No change required.
Site specific	<ul style="list-style-type: none"> Note sites being promoted CS0114 & CS0115 can make an appropriate contribution to the affordable housing need [Johnsey Estates 2020 Ltd]. Suggest Developer profit is the only way to bring forward affordable houses in Severnside, suggest development on this scale will impact on existing residents and the area in general [Private individual x 1].
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Site Assessment Report.
LPA Recommendation	No change required.
Bungalows	<ul style="list-style-type: none"> Notes in view of the demographics of Monmouthshire it would be beneficial to have sites that include 1 – 3 bedroom bungalows to allow the older population to downsize in the local area to free up larger properties for younger families. Will also allow larger properties to be converted to 1/2 bedroom accommodation for those in need of affordable housing [Cllr Louise Brown] Questions where the affordable bungalows for the elderly and affordable warden aided bungalows are proposed. Suggests getting elderly out of their family homes and into more suitable accommodation to free up larger family homes for families [Private individual x 1].
LPA Response	Comments noted. The mix and tenure of affordable homes will be agreed with the Council's Housing team at the planning application stage, this will include bungalows where there is an evidenced need.
LPA Recommendation	No change required, the supporting text sets out information in relation to mix and tenure of affordable homes.
Definition of affordable housing	<ul style="list-style-type: none"> No definition is provided on what an affordable home is [Private individuals x 2]. Question what affordable housing is noting what is affordable to one, won't be for another [Private individual x 1].
LPA Response	Definitions of affordable housing are provided in the supporting text to Strategic Policy S7 (formally S6).
LPA Recommendation	No change required, the supporting text provides detail on definitions of affordable housing.
Other	<ul style="list-style-type: none"> Note housing delivery is reliant on the supply of aggregates and mineral products. State it is imperative that new sites do not impact upon Minerals Safeguarding Areas [Mineral Products Association]. State references to net zero ready housing need to be included in this policy with a clear definition of the meaning of this commitment [Abergavenny & District Civic Society]. Refer to need for homes for the County's increasingly elderly population, especially affordable homes and the increasing provision of care homes. Concern the private care homes are attracting in-migration of the elderly. Note that those moving into general market housing cannot be controlled but question whether care homes could be brought within S106 affordable housing policy [Abergavenny & District Civic Society].

	<ul style="list-style-type: none"> • Suggest historically disabled people have been let down in types of historic affordable housing provided. Refer to detailed considerations relating to houses for disabled people [Disability Advice Project]. • Notes it is highly unlikely that the affordable housing targets will be met and that a more innovative approach is needed as relying on the offering of market developers will not work. Suggests a different model of providing affordable housing needs to be set up with social landlords obtaining bank loans to redevelop brownfield sites and putting in the investment needed [Cllr Louise Brown]. • Suggests brownfield sites could be compulsory purchased and used for affordable housing provided there is sufficient retail, employment and community facilities in a local community area [Cllr Louise Brown]. • No land allocations for self-build market and/or affordable housing in the Preferred Strategy [Cllr Louise Brown] • Suggest the Council is failing to meet demand because it cannot force developers to bring sites forward if the sums don't add up, questions how the Council intend on solving this problem [Llangybi Fawr Community Council]. • Questions how affordability will be managed vs the aspiration to build green, suggests while green builds cost more the overall cost of ownership will be less, questions why developers would do this for less financial return [Private individual x 1]. • Should insist social housing is built first to see how fast developers step forward [Private individual x 1]. • Suggest affordable houses are only being built for people on benefits or those moving over from Bristol [Private individual x 1]. • Generally supportive of approach although note open market and mixed tenure developments also play a key role in contributing to the overall objectives of the sustainable and resilient communities strategy by providing a wider range in housing choice [Edenstone].
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1535</p> <p>LPA Response</p>	<p>Detailed policy considerations in relation to aggregates and minerals are considered elsewhere in the Deposit Plan in S16 along with supporting Development Management policies.</p> <p>It is not considered appropriate or necessary to refer to net zero carbon homes in the affordable housing policy. A specific policy relating to Net Zero Carbon Homes (NZ1) is included elsewhere in the Deposit Plan as a Development Management.</p> <p>Affordable homes are available to different households with differing needs including older households. A specific Specialist Housing Policy (H7) is also included in the Deposit Plan as a detailed Development Management Policy.</p> <p>The CPO of brownfield sites is considered to be outside of the remit of the RLDP process. The Affordable Housing Policy framework however provides support for affordable housing in appropriate locations and any development proposals for affordable homes on brownfield sites would therefore be considered on a site-by-site basis.</p> <p>The Affordable Housing Policy framework however provides support for affordable housing in appropriate locations and any development proposals for self-build affordable homes would therefore be considered on a site-by-site basis. Self-build market homes would need to be considered against the Housing policy framework set out within the RLDP.</p> <p>Viability testing has been undertaken on all of the proposed site allocations in the Deposit RLDP. This assessment has been undertaken independently by a viability consultant on behalf of Monmouthshire County Council. This assessment has been undertaken independently by a viability consultant on behalf of Monmouthshire County Council, viability assessments have demonstrated that the proposed site allocations are viable based on the provision of 50% affordable housing. Different affordable housing thresholds are provided for other types of development and are set out in Strategic Policy S7.</p> <p>Viability appraisals may also be requested for other proposals, detail is set out in the supporting text of Strategic Policy S6 relating to Infrastructure. The viability testing of allocated sites includes consideration of the Council's net zero carbon requirements along with other necessary contributions and site-specific considerations. While these types of development may cost more from the outset developers can expect higher sale values.</p> <p>Details of the phasing of allocations including the timing of delivery of affordable housing to be agreed through trigger points in S106 agreements</p>

	<p>Affordable homes can be for Social Rent or Low Cost Home Ownership and provide for differing needs. Affordable Housing in Monmouthshire will only be allocated to people with a local connection to Monmouthshire. It should be noted that this is a policy approach outside of the remit of the RLDP which sits with Monmouthshire County Council’s Housing team.</p> <p>New housing developments in both urban and rural areas should incorporate a mix of market and affordable house types, tenures and sizes to cater for the range of identified housing needs and contribute to the development of balanced communities. This approach is reflected in a specific housing mix policy within the RLDP. The affordable housing requirements in S7 must, however, be adhered to.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>

Question 9 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site allocation?

A range of comments have been made on the preferred Strategic Sites with a total of 48 organisations or members of the public submitting a response to Question 9. Given the overlap, however, of this Preferred Strategic Sites question 9 and the site-specific allocations: Question 10 (Abergavenny East), Question 11 (Bayfield Chepstow) and Questions 12 (Caldicot East), as well as comments on these sites as part of the Candidate Sites Register Consultation (CS0213 Abergavenny East), (CS0098 Bayfield), and (CS0087 & CS0251 Caldicot East), these comments should be read in conjunction with these responses.

Main topics raised included over-reliance on the two larger strategic sites of Abergavenny East and Caldicot East and that the units proposed within these large sites would not be able to be delivered within the Plan period. It was also suggested that there is also over-reliance and over-development in the south of the County and concern that Monmouth does not have a strategic site.

The Key themes raised are set out below:

Key Theme	Summary of Points Raised
<p>Abergavenny East</p>	<ul style="list-style-type: none"> Over reliance on a large site. Should site struggle to deliver or be delayed there will be significant implications for plan delivery [Leathdunn, UK Johnsey Estates]. Timescale for delivery likely to be greater than anticipated as: site is under fragmented ownership; being promoted by a housing association which appears not to have secured planning permission for a site greater than 57 homes; significant infrastructure to be delivered in advance of housing [Barratt, David Wilson Homes]. The Preferred Strategic site for Abergavenny would breach the existing defined Railway line and A465. The precise numbers that the strategic sites need to provide should be considered in relation to the number of homes that could be secured through appropriate ‘additional sites’ rather than the other way around. This would limit the area required beyond the A465 and ensure that smaller deliverable well-located sites which fit with the existing pattern of development of Abergavenny are allocated. This would be more in keeping with the historic development of the settlement [The Stantonbury Building and Development Company]. The ISA acknowledges constraints to the deliverability of the proposed Strategic allocation at Abergavenny East stating that ‘development will need to demonstrate phosphate neutrality and also identifies significant infrastructure to enable the delivery of the site, namely a cycle footway bridge over the A465 and railway [Marstons PLC].
<p>LPA Response</p>	<p>The allocation on Land to the East of Abergavenny offers a significant opportunity for the future growth of Abergavenny through the provision of approximately 500 net zero carbon homes, 50% of which will be affordable, open space and community and commercial development. It also offers a</p>

	<p>significant opportunity for a park and ride facility to provide much needed parking provision for Abergavenny Railway Station as well as potential to open up opportunities to enhance the area around the railway station more generally.</p> <p>The integration of the site with the existing settlement is a key principle of the site’s development and identifying connection links that provide crossings across the railway line and the A465 is a key focus of the site. A multi-agency approach has been taken to addressing this issue with in-principle support given from the key stakeholders including Welsh Government Highways Department, Transport for Wales and Network Rail details of which will be set out in a Statement of Common Ground between the Council and relevant parties.</p> <p>To ensure the site delivers on the key priorities of the RLDP, site specific policy requirements are set out in Policy HA1 – Land East of Abergavenny East. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan. Anticipated delivery rates have been set out in the Housing Trajectory contained in Appendix 9 of the Deposit Plan. This demonstrates that the site can be delivered within the Plan period.</p>
<p>LPA Recommendation</p>	<p>Retain Land to the East of Abergavenny East as a Strategic Allocation, with site specific policy requirements set out in Policy HA1 – Land to the East of Abergavenny.</p>
<p>Caldicot East</p> <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1537</p>	<ul style="list-style-type: none"> • We note that the site in Caldicot is partially within areas of risk for flooding [NRW]. • We note multiple potential sites in Caldicot. Here the objective should be to provide for robust ecological corridors and habitat provision for biodiversity. We advise that in considering green infrastructure provision these sites are not considered in isolation but considered together to create robust, resilient, ecological networks [NRW]. • Over reliance on a large site. Should site struggle to deliver or be delayed there will be significant implications for plan delivery [Leathdunn, UK Johnsey Estates, Manor Farm Partnership, Private Individual x 3]. • Timescale likely to be greater than anticipated as: site is under fragmented ownership; promoted by a land promoter and local authority rather than a developer; significant infrastructure to be delivered in advance of housing [Barratt & David Wilson Homes]. • Caldicot East together with the Redwood building site in Portskewett and the proposal to build 60 on the old Depot Crick means the area will be subjected to fundamental change [Private Individual x1]. • Less homes should be expected to be delivered at Caldicot East. From adoption there would be 8 years to deliver 925 homes [Private Individual x1].
<p>LPA Response</p>	<p>Comments noted. At the time of the Preferred Strategy consultation Land to the east of Caldicot site (previously known as Caldicot East) was proposed for 925 homes within the plan period. This number has been reduced in the Deposit Plan to approximately 770 homes. Land to the east of Caldicot provides the opportunity for a new neighbourhood of Caldicot with links to Portskewett to the east. The site is allocated as a residential-led mixed-use development delivering net zero carbon homes, of which 50% will be affordable, along with a primary school, a local centre, public open space, community facilities and B1 employment uses. The primary school will bring benefits for the wider community serving both the new development and nearby homes in both Caldicot and Portskewett.</p> <p>Infrastructure requirements are set out within the site allocation policy. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.</p> <p>The consideration of any designations (including ecological and heritage designations) and other constraints have been considered through the masterplanning process to date and referred to in the site allocation policy wording and supporting text.</p>
<p>LPA Recommendation</p>	<p>Retain Land to the East of Caldicot as a Strategic Allocation, with site specific policy requirements set out in Policy HA2 - Land to the east of Caldicot.</p>

<p>Bayfield /Chepstow</p>	<ul style="list-style-type: none"> • Chepstow will have enhanced pressure from Forest of Dean developments [Cllr Louise Brown]. • Development on the edge of the town will have detrimental effects on local traffic and will not help generate significant town centre regeneration [The Chepstow Society]. • We are opposed to development west of the A466 particularly any development which would impact on the open land between Chepstow, Mathern and Pwllmeyric which has particular importance as a Gateway to Wales [The Chepstow Society]. • Traffic congestion in Chepstow will affect the viability of developments in SE Wales. Chepstow requires significant improvement to road infrastructure [Private Individual x1]. • Already pressure on Chepstow adding more homes would be irresponsible and not representative of the wishes of the local people of Chepstow [Private Individual x1]. • Land south of Mounton Road is Preferred Site [Private Individual x1]. • A466/Mounton Road - The area is known for its high-quality landscape and is the setting for Grade II listed St Lawrence House. It is important that St Lawrence House and its setting is preserved and that its views from the public vantage points are retained [Private Individual x1].
<p>LPA Response</p> <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1538</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes were agreed by Council. This included amending the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed use had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.</p> <p>A Green Wedge Assessment has been undertaken which includes an assessment of the appropriateness of existing Green Wedges, including that at Chepstow. The review concluded that on the land for Mounton Road the tree belt along St Lawrence Lane forms a strong boundary to land to the south-west, and the A48 forms a boundary to the south-east, limiting the impact that development at Mounton Road would have on adjacent land and on the remaining gap between Chepstow and Pwllmeyric.</p> <p>A Strategic Transport Assessment (STA) has been undertaken by TfW in order to understand the cumulative impact the proposed housing growth will have on Monmouthshire’s transport network. The STA concludes a slight increase in traffic flows with the proposed Chepstow/ Severnside developments. Transport Assessments will be required to identify localised issues, set out specific mitigation and highway improvements to ensure traffic safety and capacity on the roads and that proposed development accords with the ‘Sustainable Transport Hierarchy’. An infrastructure Delivery Plan (IDP) has also been prepared which sets out the highway infrastructure requirements for the site.</p> <p>To ensure the Mounton Road site delivers on key priorities such as preservation of its grade II listed setting parkland and transport and traffic mitigation solutions, placemaking requirements will be set out in Strategic Policy S8 and Policy HA3.</p>
<p>LPA Recommendation</p>	<p>A strategic site in Chepstow is considered necessary to the Council’s growth and spatial strategy - Chepstow is one of Monmouthshire’s Primary settlements and our spatial strategy is to direct growth towards Monmouthshire’s most sustainable settlements. New housing will deliver the Council’s objectives of providing affordable net zero carbon homes in the locality. Policy HA3 – Land at Mounton Road – of the Deposit Plan sets out placemaking and infrastructure requirements associated with this site. The Infrastructure Delivery Plan (IDP) will set out how this will be delivered.</p>
<p>Over reliance on Strategic sites</p>	<ul style="list-style-type: none"> • Concerns with the over reliance on 2 large sites. More proportionate distribution should be planned for considering appropriate sites in the Secondary and Main Rural Settlements [Johnsey Estates 2020 Ltd]. • The three Strategic sites would account for almost 72% of the total RLDP new housing allocations and consider this puts the Council into considerable over-reliance [Marstons PLC]. • A greater diversity of sites should be put forward across a range of main settlements and sustainable rural settlements so as to best protect the agility of housing growth and avoid infrastructure delays and viability issues. This approach is consistent with the aspirations of FW2040 to support

	<p>growth, rural communities, and the rural economy as well as ensure ambitious affordable housing and net zero objectives are achieved [Marstons PLC].</p>
<p>LPA Response</p>	<p>The Deposit Plan allocates 18 residential/mixed use sites. Whilst it is recognised that two of the strategic sites (HA1 – Land to the East of Abergavenny and HA2 – Land to the East of Caldicot) account for 1,270 homes, there are a further 16 residential allocations ranging in size from 15 units to 270 units contributing to housing delivery in the County.</p> <p>Furthermore, in October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. An increase in the flexibility rate from 10% to 15% was one of the changes agreed. This increased the housing provision figure from 5,940 (10% flexibility) to 6,210 (15% flexibility). The change seeks to ensure that the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst also allowing for the allocation of a handful of smaller sites across the County to sustain and enhance existing communities. Increasing the flexibility ensures that the plan is more robust and resilient as there is delivery in the short-term term while the large strategic sites take time to be developed out. An increased flexibility will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery of larger strategic sites which are more complicated to develop. A range of smaller sites will ensure the delivery of much needed affordable housing after the adoption of the plan to start addressing this current unmet affordable housing need.</p> <p>A housing trajectory has been prepared as part of the Deposit Plan, which demonstrates housing delivery rates throughout the Plan period can be achieved.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>
<p>Deliverability</p>	<ul style="list-style-type: none"> • Impractical that undeliverable Strategic housing allocations within Abergavenny, Chepstow and Caldicot represent 81% of new housing allocations. To ensure the policy meets the test of soundness smaller developer led allocated sites should be brought forward. This would provide a range and choice as well as greater flexibility over the housing trajectory [Edenstone, Grove Farm Estates, The Stantonbury Building and Development Company (1694), Vistry, Private Individual x2]. • It is well evidenced in Lichfields ‘Start to Finish: What factors affect the Build Out Rates of Large-Scale Housing Sites?’ paper that sites of more than 500 dwellings can take between 5-8.4 years for the first home to be delivered. Considering this, it would hugely affect the deliverability of unit numbers stated throughout the plan period. The need for smaller additional allocations is therefore imperative to achieve growth targets [Persimmon Homes, Barratt & David Wilson Homes]. • The current under delivery of dwellings against the annual requirement in the current adopted LDP is largely attributed to slower progress on larger strategic sites than anticipated (MCC AMR 2014-2019). This is due to long lead times to implement infrastructure prior to delivery of units [Edenstone].
<p>LPA Response</p>	<p>The Deposit Plan allocates 18 residential/mixed use sites. Whilst it is recognised that two of the strategic sites (HA1 – Land to the East of Abergavenny and HA2 – Land to the East of Caldicot) account for 1,270 homes, there are a further 16 residential allocations ranging in size from 15 units to 270 units contributing to housing delivery in the County.</p> <p>Furthermore, in October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. An increase in the flexibility rate from 10% to 15% was one of the changes agreed. This increased the housing provision figure from 5,940 (10% flexibility) to 6,210 (15% flexibility). The change seeks to ensure that the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst also allowing for the allocation of a handful of smaller sites across the County to sustain and enhance existing communities. Increasing the flexibility ensures that the plan is more robust and resilient as there is delivery in the short-term term while the large strategic sites take time to be developed out. An increased flexibility will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery</p>

	<p>of larger strategic sites which are more complicated to develop. A range of smaller sites will ensure the delivery of much needed affordable housing after the adoption of the plan to start addressing this current unmet affordable housing need.</p> <p>A housing trajectory has been prepared as part of the Deposit Plan, which demonstrates housing delivery rates throughout the Plan period can be achieved.</p>
LPA Recommendation	No change required.
Infrastructure	<ul style="list-style-type: none"> • There is no spare infrastructure capacity in the south of the County to support the proposed developments. Any reinforcement of infrastructure will demand significant expenditure [Matherm Community Council, Cllr Louise Brown], Private Individual x1]. • Preferred Strategic sites in Caldicot and Chepstow are unworkable and cannot be accommodated due to infrastructure constraints, particularly High Beech roundabout [Cllr Louise Brown, Private Individual x1]. • Train worker strikes and unreliable Bus services make commuting by car much more likely [Cllr Louise Brown]. • Development should be largely in the North of the County as the Heads of the Valleys Road infrastructure has been improved [Cllr Louise Brown].
LPA Response	An Infrastructure Delivery Plan has been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the proposed allocated sites. Site specific considerations are included as an appendix to the Deposit Plan. Strategic Policy S6 sets out the Councils approach to Infrastructure requirements for development proposals. There are also other detailed policies within the Deposit Plan relating to sustainable transport and transport schemes. Policy ST5 identifies numerous transport schemes identified in the Local Transport Strategy that will be supported, including active travel, public transport improvements and road schemes.
LPA Recommendation	No change required.
Overdevelopment/growth too high	<ul style="list-style-type: none"> • The Southern area of the County already has 80% of the development and this plan combined with the candidate sites and development from the previous LDP will lead to overdevelopment of this area of Monmouthshire [Cllr Louise Brown, Private Individual x1]. • The RLDP should look to the brownfield sites to develop more affordable housing and just continue with the site already approved in the existing LDP which of their own will create additional traffic problems [Cllr Louise Brown]. • The overall scale of development around identified areas will destroy the very character that makes these locations desirable and increase the problems of traffic and lack of access to services [Private Individual x3].
LPA Response	<p>Spatially, the Plan’s growth is considered to be well distributed throughout the County to help address affordability issues across Monmouthshire. The southern settlements of Chepstow and Caldicot (including the Severnside area) account for 48% of the housing growth proposed and the northern primary settlements of Abergavenny and Monmouth account of 37%. It is recognised that Caldicot and the Severnside cluster account for 35% of housing growth, however, Welsh Government acknowledge the strong functional linkage with Newport, Cardiff and Bristol and “the concentration of new growth primarily in Caldicot and the Severnside area should reduce the potential to negatively impact on environmental assets and avoid consequences for climate and nature emergencies”.</p> <p>Overall, the spatial strategy and identification of suitable sites for allocation is considered appropriate and reflect the site search sequence outlined in national planning policy.</p> <p>Brownfield opportunities have been considered through the site selection and candidate site process however, given the limited brownfield opportunities in a Monmouthshire context, greenfield opportunities have had to be considered to meet the housing and employment requirements.</p>

LPA Recommendation	No change required.
Spatial Distribution	<ul style="list-style-type: none"> • Support the focussing of housing development on the primary settlements as better access to services and sustainable transport. Secondary and rural settlement dependent on the car [Usk Civic Society]. • Sites closed to existing shops and amenities should be supported [Private Individual x1]. • Growth is focussed on the wrong location to tackle the affordability crisis [Private Individual x1].
LPA Response	<p>Support for spatial distribution of growth is welcomed. The Settlement Hierarchy set out in Policy S2 reflects the findings of the Sustainable Settlement Appraisal (SSA) which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. The SSA confirms the dominant role of the primary settlements of Abergavenny, Chepstow, Caldicot and Monmouth, with this reflected in 85% of the level of housing growth proposed in these settlements.</p> <p>Spatially, the growth is considered to be well distributed throughout the County to help address affordability issues across Monmouthshire. Overall, the spatial strategy and identification of suitable sites for allocation is considered appropriate and reflect the site search sequence outlined in national planning policy.</p>
LPA Recommendation	No change required.
Urban Sprawl	<ul style="list-style-type: none"> • Candidate Sites are grouped too closely together so current outlying villages identities and sense of community lost [Private Individual x1].
LPA Response	The grouping of the Candidate Site submissions as shown in the Candidate Site Register is a record of where candidate sites have been received by the Council for consideration for allocation in the RLDP. The Council received over 150 candidate site submissions as part of the Second Call for Candidate Sites during July and August 2021, most of which have not been allocated in the Deposit Plan. Details of the recommendation for each candidate site are set out in the Candidate Site Assessment Report.
LPA Recommendation	No change required. Refer to the Candidate Site Assessment Report for site specific candidate site recommendations.
Limited Information	Limited information has been provided at this stage in relation to these sites. Further evidence is required to justify the deliverability and suitability of the strategic sites and the number of homes that can be attributed to them having regard to site capacity and the delivery timescales. Question the decision to include specific sites within the Preferred Strategy before detailed assessments have been carried out [Vistry, Marstons PLC].
LPA Response	The information set out in the Preferred Strategy was appropriate for that stage in the development plan process. Preferred Strategic Site Allocations were identified for the Primary Settlements, informed by a high-level assessment. The level and detail of evidence has increased as the Plan has progressed, with the Deposit Plan being supported by a robust and comprehensive evidence base including viability assessments.
LPA Recommendation	No change required. Reader is directed to the RLDP evidence base for further details.
Monmouth	<ul style="list-style-type: none"> • Object to the failure to provide for a strategic allocation within Monmouth [Redrow Homes, Hallam Land Management Ltd]. • Council should programme an early review of the RLDP and safeguard land at Monmouth earmarking for development. It is not considered the RLDP addresses the shortfall in affordable housing in Monmouth itself which will have social issues beyond homelessness [Manor Farm Partnership, Private Individual x3].

	<ul style="list-style-type: none"> Request that MCC continue to prioritise the finding of a solution to the phosphate issue in Monmouth and continue to engage with site promoters on land in Monmouth [Edenstone, Richborough Estates].
LPA Response	The Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government's response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government's confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.
LPA Recommendation	In accordance with the October 2023 Council decision, the Deposit Plan allows for growth in Monmouth.
Brownfield Sites	<ul style="list-style-type: none"> Role of brownfield sites in non-isolated rural locations should play an important role in the delivery of the growth strategy [Private Individual x1]. Seems no real attempt has been made to identify brownfield sites in the area. Caldicot East is currently farmland or showground [Private Individual x1].
LPA Response	Brownfield opportunities have been considered through the site selection and candidate site process however, given the limited brownfield opportunities in a Monmouthshire context, greenfield opportunities have had to be considered to meet the housing and employment requirements.
LPA Recommendation	No change required.
Phosphates	<ul style="list-style-type: none"> Strict approach to exclude development in Monmouth could be extended to other areas, including Usk because while a solution to the phosphorus problem may have been found at the Llanfoist sewage works it cannot address pollution including raw sewage which arises below Llanfoist [Usk Civic Society].
LPA Response	<p>Welsh Government's response letter to the Preferred Strategy (2022) advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. The Welsh Government's confidence in the removal of this spatial and environmental constraint means the RLDP now allocates new affordable housing-led development within Monmouth.</p> <p>Since the phosphate guidance was introduced by NRW, Monmouthshire County Council has been working collaboratively with a range of organisations including NRW, Dŵr Cymru Welsh Water (DCWW), Welsh Government, other Councils in Wales and England, environmental groups, developers and other stakeholders to try to establish solutions that will ensure that development proposals do not have an adverse impact on water quality within the SAC rivers. Planning applications are required to satisfy NRW's requirements to receive a favourable decision. However, some agricultural activities such as fertiliser spreading and muck spreading fall outside of the Council's control and are in part regulated by Natural Resources Wales (or the Environment Agency in England) and are in part unregulated. The Welsh Government is currently considering the introduction of additional controls over such activities.</p>
LPA Recommendation	In accordance with the October 2023 Council decision, the Deposit Plan allows for growth in Monmouth. More generally, the Council will continue to work collaboratively with NRW, Dwr Cymru and other relevant organisations to ensure the RLDP satisfies the relevant water quality requirements.

Green Infrastructure	<ul style="list-style-type: none"> Essential that site selection and development design are informed by GI considerations [NRW]. 	
LPA Response	Agreed. GI considerations have played an important part in site selection and design with GI masterplan/GI assets and opportunities plan required as part of the ongoing site allocation masterplans. Furthermore, the Deposit Plan includes Policy GI1 – Green Infrastructure which requires development proposals to maintain, protect and enhance the integrity and connectivity of Monmouthshire GI network, as well as site specific GI requirements set out in Policies HA1 – HA18.	
LPA Recommendation	Continue to make GI considerations a critical element of the ongoing site masterplanning process.	
Landscape	<ul style="list-style-type: none"> Given the high quality of Monmouthshire’s landscapes, detailed landscape assessment should be included in site assessments [NRW]. Where strategic growth areas either include or adjoin areas of ancient woodland we refer you to our standing Natural Resource Wales Advice Note proposals affecting Ancient Woodland [NRW]. 	
LPA Response	Comments noted. Landscape assessments have informed the site selection process.	
LPA Recommendation	Agree that landscape assessments should be included in site assessments and regard is given to NRW’s Ancient Woodland Guidance Note, where relevant.	
Page 1543	Protected Species/Sites	<ul style="list-style-type: none"> Strategic allocations must have regard to protected species – happy to assist internal ecologists. Monmouthshire has a number of internationally and nationally protected sites. Development must not have a likely a significant effect on the designated features of these sites, directly or indirectly or cumulatively. A Habitats Regulations Assessment may need to be undertaken [NRW] Proposals disruptive to local wildlife [Private Individual x1].
	LPA Response	Site allocations have been made in consultation with our Ecologist and an Ecological Assessment is a requirement of the candidate site submission process. A Habitats Regulations Assessment has been undertaken on the Deposit Plan.
	LPA Recommendation	Continue to liaise with MCC’s Ecologist and NRW.
SPZs	<ul style="list-style-type: none"> Any development sites in SPZs need to connect to the public sewer network [Usk Civic Society]. 	
LPA Response	Comments noted. The Deposit Plan notes this at paragraph 11.13.8 and 11.13.9.	
LPA Recommendation	No change required.	
Foul Drainage	<ul style="list-style-type: none"> Important that areas for growth do not put unsustainable pressure on other foul drainage networks and this needs to be considered in liaison with Welsh Water [NRW]. Around the County, sewers discharge directly into the Wye and River Usk due to inadequate connections to sewage works or from storm overflows. These contribute to phosphate pollution. How will this problem be resolved for the new housing developments [NRW]. 	
LPA Response	The Council has been working collaboratively with a range of organisations including NRW, Dŵr Cymru Welsh Water (DCWW), Welsh Government, other Councils in Wales and England, environmental groups, developers and other stakeholders to establish solutions that will ensure that development proposals do not have an adverse impact on water quality within the SAC rivers. The areas for growth and site allocations have been prepared with regard to Dwr Cymru’s planned improvements to waste water treatment works and NRW’s review of permits.	

	Commitment from DCWW to establish what capacity (if any) exists to enable development proposals to come forward while ensuring betterment or neutrality of phosphate levels has provided the necessary confidence to support the RLDP strategy.
LPA Recommendation	The Deposit Plan has been updated to reflect the updated position that DCWW are committed to implement sewerage waste water treatment improvements. The Deposit Plan has been updated to reflect the updated position that DCWW are committed to implement sewerage waste water treatment improvements.
Health & Wellbeing	<ul style="list-style-type: none"> • Strategic sites in the south will be detrimental to the tourist industry and lead to increased air pollution contrary to the council declaring a climate emergency and detrimental to the health and well-being of existing residents [Cllr Louise Brown]. • Consuming all the open green spaces that are essential for mental health. Places need to be nice to live and not built upon every square inch [Private Individual x1].
LPA Response	The Deposit Plan and its allocations have been subject to Habitats Regulations Assessment which involved high-level traffic modelling to assess atmospheric pressures on the environmental designations in the County. This process did not raise any concerns in relation to the strategic sites in the south and in impacts of air pollution on the environmental designations in the south of the County. In addition, site specific air quality assessments will be required as part of the planning application process. Brownfield opportunities have been considered through the site selection and candidate site process however, given the limited brownfield opportunities in a Monmouthshire context, greenfield opportunities have had to be considered to meet the housing and employment requirements.
LPA Recommendation	No change required.
Minerals & Waste	<ul style="list-style-type: none"> • Delivery of strategic sites is reliant on the supply of aggregates and mineral products [Mineral Products Association]. • Is imperative that new sites do not impact upon Mineral Safeguarding Areas [Mineral Products Association].
LPA Response	Comments noted. Given the extensive mineral reserves identified in the County, it is extremely challenging to identify edge of settlement locations that do not correspond with either Category 1 or Category 2 reserves. In this respect, allocations have been made within Mineral Safeguarding Areas. However, in doing so the following factors have been balanced: the overriding need for the development meet housing and employment needs, edge of settlement location, within 200m of sensitive development or the site has an extant planning permission or forms part of an existing Adopted LDP allocation.
LPA Recommendation	No change required.
National Grid Capacity	<ul style="list-style-type: none"> • We have first-hand experience of working with solar developers in undertaking grid capacity assessments and there is no grid capacity for renewable project in the Severnside Region. There will need to be significant investment in power infrastructure to meet the carbon zero aspirations. This is also the same for general capacity upgrades to handle EV fast charging points and air source heat pumps [BB3 Limited, Private Individual x1]. • Grid capacity will restrict renewable energy developments [Manor Farm Partnership, [Private Individual x2].
LPA Response	Comments noted. We recognise the grid capacity challenges and have liaised with National Grid in preparing the Plan and alongside site promoters consulting National Grid directly with regards to site specific requirements.
LPA Recommendation	Continue to liaise with National Grid.

Net Zero Carbon Ready	<ul style="list-style-type: none"> Should be built to the highest environmental standards and not the minimum standards to achieve 'net carbon ready' [Private Individual x1].
LPA Response	<p>In October 2023 a report of post consultation Preferred Strategy changes agreed to enhance the sustainability credentials and energy efficiency of the homes that are to be constructed to be net zero carbon homes rather than net zero ready homes. Further details are set out in Policy NZ1 – Monmouthshire Net Zero Carbon Homes and the associated supporting evidence.</p>
LPA Recommendation	<p>As agreed by Council in October 2023, incorporate a policy requirement for new homes to be net zero carbon homes.</p>
Collaborative working	<ul style="list-style-type: none"> Welcome collaboration that considers the cumulative impact of development [Torfaen Council].
LPA Response	<p>Comments welcomed.</p>
LPA Recommendation	<p>Continue to work collaboratively with Torfaen County Council.</p>
General /other	<ul style="list-style-type: none"> Land at St Lawrence Lane should be included within the RLDP as a strategic site allocation [Vistry]. South west of Llanfoist is not as constrained and should be included as a Preferred Strategic Site allocation. It is of a similar size to the proposed strategic site in Chepstow [Grove Farm Estates]. Strongly consider that the RLDP should include sites that cater specifically for the older population [Grove Farm Estates]. Notwithstanding Strategic allocation it is contended that the employment land provision would appear secondary to these allocations and might likely be incapable of making significant contribution to the target of 6240 additional jobs in Monmouthshire [Private Individual x1]. Usk is not on this register [Private Individual x1]. Magor/Undy has constant development. New settlement at St Brides absurd [Private Individual x1]. Comments in relation to Land west of Rockfield Road being filtered out at this stage [Hallam Land Management Ltd].
LPA Response	<p>Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Sites Assessment Report.</p> <p>The Deposit Plan provides the policy framework to allow for the consideration of specialist housing to come forward throughout the Plan period (Policy H7 – Specialist Housing), which includes the housing requirements of older people.</p> <p>The level of employment land (B Use Class) allocated is based on the findings of the Employment Land Review which recommended that a minimum of 38ha of B Use Class employment land is identified in the Deposit Plan, based on past take up rates rather than the projected job figure.</p> <p>The Preferred Strategy only identified Preferred Strategic Site Allocations. Allocations in the lower tier settlements such as Usk were not included at that stage. The Deposit Plan includes details of the site-specific allocations at all levels of the settlement hierarchy, with policy HA11 – Land East of Burrium Gate allocated in Usk.</p> <p>There are no new allocations identified for the Magor/Undy area, however, the developments at Vinegar Hill and Rockfield Farm, Undy to contribute to the existing commitments element of the housing supply.</p> <p>The RLDP does not propose a new settlement at St Brides as paragraph 3.53 of PPW12 states that “due to their strategic nature new settlements should only be proposed as part of a joint LDP, an SDP or Future Wales. This is due to their significance and impacts extending beyond a single local authority.”</p>

LPA Recommendation	No change required.
Question 10 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site Allocation: a) Abergavenny East?	
<p>34 organisations or members of the public submitted a response to question 10 relating to Strategic Site Allocation S7a: Abergavenny East. Comments ranged from recognising the significant role the Abergavenny East site could play in contributing to the county’s housing needs to raising concerns regarding the likely timescales in bringing a strategic site of this nature forward and potential impact on the RLDP’s delivery trajectory. The importance of including a crossing over the A645 to the site’s overall accessibility and placemaking credentials were noted along with the impact this could have on deliverability, viability, and timescales. Master planning the site to ensure it forms part of Abergavenny rather than a satellite settlement were also noted.</p>	
Key Theme	Summary of Points Raised
Supportive Comments Page 1546	<ul style="list-style-type: none"> • Accept site has potential to provide a mixed development subject to guarantees that the considerable infrastructure challenges are fully costed and delivered and site is integrated with the rest of the town. [Abergavenny Town Council, SOUL, Abergavenny & District Civic Society] • Support the allocation which will make a significant contribution to achieving and realising the housing and economic development needs of Abergavenny and the County. [MHA, Private Individual] • Site can play a significant role in contributing to affordable housing targets, particularly given the site promoter is MHA. [MHA] • Support the allocation which can be enhanced through the allocation of additional land to better connect the site to the existing settlement. [The Coldbrook Estate]
LPA Response	<p>Support for the Abergavenny East Strategic Site Allocation welcomed. The allocation offers a significant opportunity for the future growth of Abergavenny through the provision of approximately 500 net zero carbon homes, 50% of which will be affordable, open space and community and commercial development. It also offers a significant opportunity for a park and ride facility to provide much needed parking provision for Abergavenny Railway Station as well as potential to open up opportunities to enhance the area around the railway station more generally.</p> <p>To ensure the site delivers on the key priorities of the RLDP, site specific policy requirements are set out in Policy HA1 – Land East of Abergavenny East.</p>
LPA Recommendation	Retain Land to the East of Abergavenny East as a Strategic Allocation, with site specific policy requirements set out in Policy HA1 – Land to the East of Abergavenny.
Objection Comments	<ul style="list-style-type: none"> • No certainty that the site will be able to deliver the quantum of homes that the RDLDP estimates over the RLDP plan period as there is no site developer interest and also significant infrastructure costs associated with bringing the site forward which would impact on delivery rates and timescales. Based on Lichfield’s Start to Finish (2nd Ed, Feb 2020) research, the most the site can estimate to deliver is 340 units. Under delivery at Abergavenny East would raise concerns in relation to the soundness of the plan. [B & DW, Hallam Land Management Ltd, Taylor Wimpey, Edenstone Homes, Edenstone Group, Bellway Homes, Tompkins Thomas Planning, Candleston Homes, Edenstone] • Delayed delivery of Abergavenny East would impact on the delivery of affordable homes. [Hallam Land Management Ltd] • Surprised site has been identified as a longer-term direction of growth given initial infrastructure requirements and sensitive location of the site. [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero, Private Individuals x 2] • Alternative Abergavenny strategic site options perform better in the ISA than Abergavenny East. [Hallam Land Management Ltd]

	<ul style="list-style-type: none"> Site has not been correctly assessed from a landscape perspective. Site would impact on the landscape setting. [Tompkins Thomas Planning, Private Individuals x 3]
LPA Response	<p>The allocation on Land to the East of Abergavenny offers a significant opportunity for the future growth of Abergavenny through the provision of approximately 500 net zero carbon homes, 50% of which will be affordable, open space and community and commercial development. It also offers a significant opportunity for a park and ride facility to provide much needed parking provision for Abergavenny Railway Station as well as potential to open up opportunities to enhance the area around the railway station more generally.</p> <p>The integration of the site with the existing settlement is a key principle of the site's development and identifying connection links that provide crossings across the railway line and the A465 is a key focus of the site. A multi-agency approach has been taken to addressing this issue with in-principle support given from the key stakeholders including Welsh Government Highways Department, Transport for Wales and Network Rail, details of which will be set out in a Statement of Common Ground between the Council and relevant parties.</p> <p>To ensure the site delivers on the key priorities of the RLDP, site specific policy requirements are set out in Policy HA1 – Land East of Abergavenny East. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.</p> <p>Anticipated delivery rates have been set out in the Housing Trajectory contained in Appendix 9 of the Deposit Plan. This demonstrates that the site can be delivered within the Plan period.</p> <p>Landscape assessments have informed the site allocation process.</p>
LPA Recommendation	Retain Land to the East of Abergavenny East as a Strategic Allocation, with site specific policy requirements set out in Policy HA1 – Land to the East of Abergavenny.
Infrastructure	<ul style="list-style-type: none"> Hydraulic Modelling Assessment (HMA) of both the water supply and public sewerage networks will be required to determine the level of reinforcement works required to accommodate the proposed development. There are no issues in the foul flows from this site being accommodated at the Llanfoist WwTW. Subject to regulatory approval, intend to introduce phosphorous removal at the Llanfoist WwTW by the end of 2025. [Dwr Cymru] Site would impact on highway capacity and flood risk. [Private Individuals x 2]
LPA Response	<p>The site promoters are aware of the need to undertake a Hydraulic Modelling Assessment as part of the planning application process. The site is not within a flood risk area as identified by Welsh Government's Development Advice Maps or the Flood Map for Planning.</p> <p>A Strategic Transport Assessment has been undertaken to inform the RLDP, and site specific Transport Assessments will be required to identify localised issues and set out specific mitigation and highway improvements.</p>
LPA Recommendation	Continue to liaise with the site promoters and infrastructure providers.
Foot bridge/A465 crossing	<ul style="list-style-type: none"> Firm commitment to the early provision of a suitable active travel crossing of the A465 is required to ensure support for the proposal. [Abergavenny & District Civic Society, Abergavenny Transition Town] Introduction of a bridge over the A465 would result in significant viability and deliverability issues – estimated costs of up to £7m. Will require extensive design and land ownership negotiations which will impact on delivery timescales. [Hallam Land Management Ltd, Taylor Wimpey], Edenstone Homes, Bellway Homes]

	<ul style="list-style-type: none"> • Abergavenny East does not offer any form of sustainable access and there will need to be significant infrastructure improvements to enable the site to be considered to be sustainably located. [Taylor Wimpey] • A new Station Interchange for Abergavenny Rail Station would be created. This would include the provision of a footbridge across the A465 and a Rail Park & Ride site (which is being promoted by WG/TfW). A new accessible footbridge is proposed following the Department for Transport funding secured via the Access for All announcement in April 2019. [MHA]
Page 1548	<p>LPA Response</p> <p>The allocation on Land to the East of Abergavenny offers a significant opportunity for the future growth of Abergavenny through the provision of approximately 500 net zero carbon homes, 50% of which will be affordable, open space and community and commercial development. It also offers a significant opportunity for a park and ride facility to provide much needed parking provision for Abergavenny Railway Station as well as potential to open up opportunities to enhance the area around the railway station more generally.</p> <p>The integration of the site with the existing settlement is a key principle of the site's development and identifying connection links that provide crossings across the railway line and the A465 is a key focus of the site. A multi-agency approach has been taken to addressing this issue with in-principle support given from the key stakeholders including Welsh Government Highways Department, Transport for Wales and Network Rail details of which will be set out in a Statement of Common Ground between the Council and relevant parties.</p> <p>To ensure the site delivers on the key priorities of the RLDP, site specific policy requirements are set out in Policy HA1 – Land East of Abergavenny East. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.</p>
	<p>LPA Recommendation</p> <p>Retain Land to the East of Abergavenny East as a Strategic Allocation, with site specific policy requirements set out in Policy HA1 – Land to the East of Abergavenny. Continue to liaise with the relevant agencies to progress the connection links across the A465 and the railway line.</p>
	<p>Masterplanning/ Assessments</p> <ul style="list-style-type: none"> • Masterplan for the development is essential and required as part of the RLDP to avoid the site becoming a satellite settlement. [Abergavenny Town Council, Abergavenny & District Civic Society, SOUL, Tompkins Thomas Planning, Private Individuals x 2] • NRW set out detailed assessments and factors that may need to be considered as part of the allocation including landscape, biodiversity, and drainage. [NRW] • Significant site assessment and master planning works have been undertaken to date by the site owners and promoters. This has been prepared based on high level site, context, and transport analysis. The site presents an opportunity to create a high-quality new neighbourhood. [MHA]
<p>LPA Response</p> <p>Land to the East of Abergavenny offers an excellent opportunity to create a sustainable, vibrant mixed-use neighbourhood destination. A masterplan, establishing a design code and land use parameters is key to the progression of the site. In this respect, input from the Design Commission for Wales has helped shaped the site's progression to date and we will continue to liaise with DCfW as the site progresses through the development plan process and planning application process. A masterplan establishing key design and placemaking principles is being prepared and will be agreed with the Local Planning Authority prior to the determination of any planning application.</p> <p>As noted by Monmouthshire Housing Association (the site promoters) significant site evidence assessments have been undertaken and are ongoing as dialogue continues with the relevant agencies as part of the development plan preparation process.</p>	
<p>LPA Recommendation</p> <p>Retain Land to the East of Abergavenny East as a Strategic Allocation, with site specific policy requirements set out in Policy HA1 – Land to the East of Abergavenny. Continue to liaise with the relevant agencies to progress the masterplanning and evidence base for the site.</p>	
<p>Sites promoted in response to question 20</p> <ul style="list-style-type: none"> • Edenstone Homes – consider CS0094 Penlanlas Farm would be more appropriate [Edenstone]. • Bellway Homes – CS0250 – Evesham Nurseries – [Bellway] • Tompkins Thomas Planning – CS00056 – South of Brecon Road [Tompkins Thomas Planning] 	

LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Sites Assessment Report.
LPA Recommendation	See the Candidate Sites Assessment Report for candidate site recommendations.

Question 11 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site allocation b) Bayfield Chepstow?

48 organisations or members of the public submitted a response direct to S7 (b) regarding the Preferred Strategic Site at Bayfield Chepstow. (These comments should also be read in conjunction with Question 9 - S7 'Strategic Sites' and comments received under 'CS0098' on the accompanying Candidate Site Register consultation responses.

Overall key concerns were that prior to any development in Chepstow, infrastructure improvements are needed in relation to improvements of services, such as GP, schools and community services, as well as improvements to highway infrastructure. Many responses indicated that Chepstow already experiences problems with congestion and traffic, particularly at Highbeech Roundabout and there is also the concern and consideration of cumulative impact with proposed development of circa 1,000 homes at Severnside (CS0087& CS0251), as well as proposed new development in bordering English counties, such as 2,460 homes in Lydney, Forest of Dean. There is concern that further development will worsen air pollution already experienced at Hardwick Hill, which is within an Air Quality Management Area (AQMA).

In terms of the Bayfield site, there was an overarching concern in relation to impact the proposal would have upon the setting of the adjacent Wye Valley National Landscape (AONB), particularly as previous planning applications have been refused on this land, and part of the reason was the harm development had on the setting of the AONB.

Comments received have queried whether the Mounton Road site (CS00165) was more sustainable as this site proposes a 'mixed use' including employment uses and is perceived to be closer for walking and active travel links to Chepstow's town facilities and will not impact upon the AONB.

Other comments relate to it being positive that the Bayfield site is able to deliver affordable net zero ready housing with the placemaking and master-planning process to be undertaken prior to allocation. However, comments have challenged whether this will be viable, and actually be delivered, for example 'Fairfield Mabey only delivered 22 affordable housing units'. There were also concerns in relation to out-commuting and that the development is to serve the populations of Bristol and the south west England, rather than local people.

Other concerns relate to development on greenfield land which has implications for Best Most Versatile (BMV) agricultural land, impacts upon ecology and heritage and whether identification of this this greenfield site is appropriate ahead of the green belt review as set out in Future Wales 2040.

The key themes raised are set out below:

Key Theme	Summary of Points Raised
Housing delivery	<ul style="list-style-type: none"> • Can make a meaningful contribution to the delivery of the housing and job growth rates set out in the Plan. The site could deliver a range of home over the plan period and is in one ownership and direct control of BDW. The site is deliverable early after the plan adoption [BDW]. • Considered the allocation would fail Test 3 of the Council's own Test of Soundness which are reflected in Section 64(2) of the 2004 Act and the Development Plans Manual. The proposed allocation will not deliver and it's not realistic or appropriate and is not founded on a robust and credible evidence base [Hallam Land Management Ltd, Taylor Wimpey, Edenstone Homes, Bellway Homes, Bellway Homes]. • Any large areas of house building in Chepstow would require both affordable housing and major infrastructure improvements. Housing developments will claim that schemes are not viable due to affordable housing provision and infrastructure requirements [Private Individual x1].
LPA Response	The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included amending the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed use development had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.

	<p>In terms of delivering the affordable housing, the sites have been through viability assessments prior to the allocation process. A statement of common ground and Site Placemaking Policy HA3 will also tie the developers of the Chepstow site to delivering the 50% affordable housing requirement. Similarly, infrastructure requirements have been considered as part of demonstrating viability for proposed allocations and the Infrastructure Delivery Plan (IDP) will set out how this Infrastructure will be delivered.</p>
<p>LPA Recommendation</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p> <p>Refer to the Infrastructure Delivery Plan –for further details on the Infrastructure requirements as a result of the proposed allocation at Land at Mounton Road.</p>
<p>Housing growth</p>	<ul style="list-style-type: none"> • Growth is justified in the town in order to address current shortfall [Barwood]. • 145 houses is modest and will have little impact on already the disastrous levels of congestion and pollution however would be prudent to delay development until solved [Mr Martin Andrews]. • How can you be certain there is demand for the quantity of new houses within the County? Development in Chepstow is for the residents of Bristol. The Fairfield Mabey site was marketed to mostly Bristol residents [Private Individual x3]. • Welsh Government Policy is to focus housing to Cardiff, Newport and Valley area. MCC should be respectful of this and adopt a policy of very limited new house development to preserve the rural nature of the County and not add infrastructure issues [Private Individual x1]. • To build in areas outside recommendation from the Welsh Government means Monmouthshire and towns like Chepstow are unlikely to get much attention in any budget allocation [Private Individual x1].
<p>LPA Response</p>	<p>The level of growth set out in the Preferred Strategy (2022) was informed by a wide range of evidence and responded to a number of challenges that had arisen throughout the plan making process. It is considered that the level of growth proposed in Chepstow is sustainable and proportionate to address local issues and objectives including the delivery of affordable homes, sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency and having regard to Welsh Government’s concerns regarding alignment with Future Wales. In the Preferred Strategy (2022) consultation Welsh Government did not object to our level of growth in that it reflects the urgent need to increase the supply of affordable housing in Monmouthshire. Welsh Government agreed the Strategy’s conformity with Future Wales. In October 2023, a number of post-consultation updates to the Preferred Strategy (2022) were endorsed by Council forming the basis for the level of growth set out in the Deposit Plan. These included allowing for growth in Monmouth which was previously avoided due to no phosphates solution being identified for the River Wye Catchment area and an increase in the flexibility rate from 10% to 15%. This has resulted in the housing provision figure increasing from 5,940 homes (10% flexibility) to 6,210 homes (15% flexibility). In relation to housing growth in Chepstow it was also agreed to amend the site from Bayfield to Mounton Road on the basis that a mixed-use development that had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.</p>
<p>LPA Recommendation</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p>

Page 1550

Commitments	267 homes within Chepstow are included in the proposed commitments benefitting from planning permission as of 1st April 2022. When compared to the other commitments made Chepstow accounts for the second largest contribution of the total 1,261 sites (over 20%) [Taylor Wimpey, Edenstone Homes, Bellway Homes].
LPA Response	Comments noted. This was one of the considerations in relation to allocations and part of the reason why Chepstow has a smaller % of new allocation growth compared to the other Primary Settlements of Abergavenny, Monmouth and Caldicot. See the Housing Background Paper for further explanation.
LPA Recommendation	The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.
Place-making	<ul style="list-style-type: none"> • Well integrated with the existing community and has strong placemaking credentials to contribute towards the vibrancy of Chepstow. It will deliver: • 50% affordable homes; Net Zero carbon ready homes; Necessary supporting infrastructure; A masterplanning process; A financial viability assessment to ensure site are deliverable within the plan period [BDW]. • Chepstow is within the Gwent Levels Landscape Profiles (GLLP) Gwent Wildlife Trust. We advise the GLLP opportunities for urban areas (p9) should inform allocations in Chepstow. These include: • Embracing the opportunity to design and work with natural resources (nature-based solutions) to provide healthy, resilient and stable new development – sustainable drainage, increasing green infrastructure and open space, carbon sequestration, reduction of air pollution, wildlife friendly gardening and community orchards. • Embracing ecological and design expertise to integrate the various components of urban environments innovatively – sustainable travel (vital for reducing carbon and improving resilience) with G.I, open space, sustainable drainage, habitat retention and enhancement and development and regeneration objectives [NRW]. • Concern that housing developers will not fulfil their promises to green the site by not planting the proposed trees/ maintaining the site [Private Individual x1].
LPA Response	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.</p> <p>GI, landscape and Nature Recovery considerations have played an important part in site selection and design with landscape assessments and GI assessments as part of the Candidate Site assessment process. GI assets and opportunities plans are required as part of the ongoing site allocation masterplans. Furthermore, the Deposit Plan includes Policy S5 – Green Infrastructure which requires development proposals to maintain, protect and enhance these resources, as well as other detailed Development Management policies for protecting Monmouthshire’s natural environment and the site specific placemaking policy HA3 relating to the Chepstow allocation. Statements of Common Ground will be agreed with developers to ensure these promises to deliver GI and nature recovery requirements are delivered.</p>
LPA Recommendation	The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.

<p>Highway safety /Active Travel</p>	<ul style="list-style-type: none"> • The site is at a dangerous location for pedestrians and active travel routes are not viable across or along the A466. No safe crossing of the A466 is conveniently available for a trip into town so pedestrians are more likely to take a chance on main road. Given this is a route to school, this must be avoided [Private Individual x1, Cllr Christopher Edwards]. • There isn't a footpath or cycle path that safely connects this area with key amenities and transport [Private Individual x1]. • High speed vehicles along the B4235 Usk Road would significantly reduce safety at the entrance to the site [Private Individual x1], [Cllr Christopher Edwards]. • If Bayfield is developed further there will need to be traffic control measures at the High Beech Roundabout [Private Individual x1]. • Site is too far a walk into Chepstow and is unrealistic to think that people will walk in the town as opposed to using the car, particularly due to hilly topography and polluted main roads [Private Individual x3]. • Only one access road off the development which will further exacerbate the difficulties of the site [Private Individual x1].
<p>LPA Response</p> <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1552</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included amending the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.</p> <p>The integration of an edge of settlement site with Chepstow's existing settlement is a key principle of the site's development and identifying connection links that provide safe pedestrian crossings and footpaths across the A466 is a key focus of the site. The site will be masterplanned in accordance with Sustainable Transport Policy S13 and Development Management policy ST1. There will also be a site specific placemaking policy HA3 for our Chepstow allocation which will set out expectations for Active Travel and the Transport Assessment for the site. The Infrastructure Delivery Plan sets out further detail on how the required highway infrastructure is to be delivered.</p> <p>It is acknowledged that Chepstow is hilly, however the site search sequence identifies the most sustainable sites in terms of walking distances to key services.</p>
<p>LPA Recommendation</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p>
<p>Public water supply and sewerage network / treatment works</p>	<ul style="list-style-type: none"> • There are no issues in providing this site with a supply of clean water. There are no issues in the public sewerage network accommodating the foul flows and being accommodated at our Nash Welsh water Treatment Works [Dwr Cymru/Welsh Water]. • Chepstow does not have a wastewater treatment works, but that combined sewer overflows discharge to the River Wye [NRW].
<p>LPA Response</p>	<p>Comments noted. Further detail on water supply /sewerage arrangements for the site will be set out in the Infrastructure Delivery Plan (IDP).</p>
<p>LPA Recommendation</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p>
<p>'Net Zero Carbon Ready Homes'</p>	<ul style="list-style-type: none"> • Request that further guidance is issued to assist developers in this regard [BDW]. • 'Net Zero Carbon Ready Homes' should be properly defined to reduce uncertainty for developers and to ensure delivery [BDW]. • No reason why home can't be built with top rate insulation to passive house standards [Private Individual x1].

LPA Response	<p>In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included a change to the policy requirement for the environmental credentials of the new homes to be ‘net zero carbon’ rather than ‘net zero carbon ready’. This would result in the new homes achieving a balance between the carbon emitted into the atmosphere, and the carbon removed from it. The objective is to ensure that the new homes constructed within Monmouthshire do not increase carbon emissions in the long term.</p> <p>The Deposit Plan includes policy NZ1 which sets out the definition and standards for ‘Net Zero Carbon Homes’</p>
LPA Recommendation	<p>Refer to Policy NZ1 – Monmouthshire Net Zero Carbon Homes for further details.</p>
50% affordable homes	<ul style="list-style-type: none"> • Challenging due to development viability and delivery concerns and should be thoroughly evaluated. Social Housing Grant is very uncertain at this stage [BDW]. • Positive proposals in the application in particular addressing the need for affordable housing and rentals [Private Individual x1]. • 50% affordable housing will help attract younger families, if only a little, to Chepstow [Private Individual x1]. • Concern affordable housing won’t be delivered – Mabey Bridge only 22 houses affordable [Private Individual x1]. • Most houses will not be what I would consider truly affordable [Private Individual x1].
LPA Response	<p>Viability assessments have demonstrated that the proposed site allocations are viable based on the provision of 50% affordable housing. The level of growth proposed in Chepstow is sustainable and proportionate to address local issues and objectives including the delivery of affordable homes and rebalancing our demography.</p>
LPA Recommendation	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p>
Infrastructure (Services)	<ul style="list-style-type: none"> • Development of any site in Chepstow would cause detriment to town without significant investment in supporting infrastructure [Cllr Christopher Edwards, [Private Individual x7] • Examples of families who have moved to Chepstow who cannot find a dentist [Private Individual x2]. • The existing community are under-served for primary health care – only 3 GP Surgeries and one community hospital. A further increase in population will make this worse/put a strain on these services [Taylor Wimpey, Edenstone Homes, Private Individual x4]. • Chepstow has lack of funding for improvement to Schools/leisure/community facilities/ wellbeing & cultural activities [Private Individual x5]. • Chepstow is behind other Monmouthshire town in terms of funding and amenities. Chepstow school’s redevelopment is low on the list why is it high on the list for more housing? [Private Individual x1]. • Public transport services in Chepstow are not fit for purpose. Lack frequency to key commuter destinations [Private Individual x1]. • Requires a realistic public transport action plan [Private Individual x1]. • If Bayfield is built Chepstow will require at least one more primary school [Private Individual x1].
LPA Response	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development that includes a care home and proposed hotel had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.</p>

	<p>An Infrastructure Delivery Plan (IDP) has been prepared to assess the key issues and constraints and what the infrastructure requirements for each of the residential allocations within the RLDP. Site placemaking masterplanning policies have also been set out within the Plan to set out clearly the key placemaking requirements for each site. See Policies S8 and HA3 for Land at Mounton Road Chepstow.</p>
LPA Recommendation	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p> <p>Refer to the Infrastructure Delivery Plan –for further details on the infrastructure requirements as a result of the proposed allocation at Land at Mounton Road. Policies S8 and HA3 also sets out key master planning parameters.</p>
Infrastructure (Highways)	<ul style="list-style-type: none"> • Transport Infrastructure improvements required before housing is built [Cllr Christopher Edwards, Private Individual x9]. • Current transport infrastructure cannot cope with current demands and there is significant traffic in Chepstow [Cllr Christopher Edwards, Private Individual x12]. • Highbeech roundabout already under severe congestion and pressure with traffic [Private Individual x4]. • Congestion at M48 Severn Bridge and Newhouse Roundabout [Private Individual x1]. • Road conditions are appalling. We cannot look after the roads we have now [Private Individual x1]. • One accident or roadworks and the whole town goes into gridlock [Private Individual x1]. • Large number of new residents are using Chepstow as a dormitory town. Traffic has built up at busy times and can take an hour to get from Bayfield site to M48 [Private Individual x1]. • There does not appear to be any hope for a Chepstow bypass [Private Individual x1]. • A bypass for traffic between Beechly and the M48 is needed urgently to address the well documented traffic and pollution problem [Private Individual x4]. • Increase of traffic also from the Forest of Dean [Private Individual x1.] • Chepstow has not yet felt the full impact of Fairfield Mabey development as it is not yet completed and hence traffic county understated [Private Individual x1]. • Decision to include Bayfield must take into account the demonstrated Chepstow WelTAG Stage 1) inability of existing road infrastructure to cope with traffic growth [Private Individual x2].
LPA Response	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development had associated job creation and tourism benefits. See Candidate Site Assessment for further information.</p> <p>A Strategic Transport Assessment (STA) has been undertaken by TfW in order to understand the cumulative impact the proposed housing growth will have on Monmouthshire’s transport network. The STA concludes a slight increase in traffic flows with the proposed Chepstow/ Severnside developments. Transport Assessments will be required to identify localised issues, set out specific mitigation and highway improvements to ensure traffic safety and capacity on the roads and that proposed development accords with the ‘Sustainable Transport Hierarchy’. This is also set out in Policies S13 and ST1 ‘Sustainable Transport Proposals ’ and Place-making Policies S8 and HA3.</p>
LPA Recommendation	<p>Refer to the Infrastructure Delivery Plan –for further details on the Infrastructure requirements as a result of the proposed allocation at Land at Mounton Road. Policies S8 and HA3 also sets out key master planning parameters.</p>

Cumulative impact	<ul style="list-style-type: none"> Strategic allocations focus 1,070 homes within the south eastern corner of the county where both Chepstow and Caldicot are location less than 7km apart. Significant concerns remain for the current infrastructure of the town and the cumulative pressure each of these development proposals will place on the current services and facilities [Hallam Land Management Ltd, Taylor Wimpey, Edenstone Homes, Bellway Homes, Private Individual x1].
LPA Response	<p>An Infrastructure Delivery Plan (IDP) has been prepared to assess the key issues and constraints and what the infrastructure requirements for each of the residential allocations within the RLDP.</p> <p>The cumulative impacts of site allocations are considered as part of the Integrated Sustainability Assessment (ISA) and the Habitats Regulations Assessment (HRA).</p>
LPA Recommendation	<p>Refer to the Infrastructure Delivery Plan –for further details on the Infrastructure requirements as a result of the proposed allocations in the south of the county. See also the IDP and HRA which looks at the cumulative impact of the proposed development</p>
Air Quality/ Pollution	<ul style="list-style-type: none"> With the additional traffic comes increased vehicle emissions and pollution [Hallam Land Management Ltd, Cllr Christopher Edwards, Private Individual x10]. There is a localised problem of air pollution within Chepstow and the associated Air Quality Management Area (AQMA) implemented due to health impacts caused by the vehicle emissions from congestion along the A48. The cumulative impact of any development on the A466, A48 and Highbeech roundabout must be appropriately assessed and carefully considered to ensure potential air pollution impacts are limited [Hallam Land Management Ltd, Taylor Wimpey, Edenstone Homes, Bellway Homes]. No solution or even progress towards a solution is being advanced by either the Welsh Government or the Council [Cllr Christopher Edwards, Private Individual x2].
LPA Response	<p>Although it is acknowledged there is a localised problem within Chepstow with regard to air pollution and there is an existing AQMA within Chepstow, latest evidence is indicating that air quality is improving within the area. The latest Air Quality Management Progress Report 2023 on the Council's website indicates that there have been improvements to air quality in the area since 2017. The Council also has an Air Quality Action Plan which is continuously reviewed. Additional impact, including cumulative of proposed development will be appropriately assessed with localised air quality assessments and reviewed by MCC Environmental Health Officers.</p> <p>The impact of development upon air quality is also set out placemaking Policies S8 and site specific HA3 – Land at Mounton Road Chepstow. The cumulative impacts of site allocations upon air quality are also considered as part of the Integrated Sustainability Assessment (ISA) and the Habitats Regulations Assessment (HRA).</p>
LPA Recommendation	<p>Refer to ISA and HRA and Policies S8 and HA3. Continue to liaise with MCC Environmental Health Officers.</p>
Green Belt	<ul style="list-style-type: none"> Surprising that a strategic site is identified at Chepstow ahead of the Green Belt review. This large constraint has been dismissed and not appropriately considered [Melin Homes, Persimmon Homes East Wales, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Private Individual x2]. Chepstow's constraints were reflected upon the by Inspector examining the existing LDP where a Green Belt was initially proposed and subsequently deleted. The Inspector identified that land to the west of Chepstow presents the 'least harmful location' for future development [Barwood].
LPA Response	<p>The South East Wales Regional Strategic Diagram (page 163 of Future Wales) provides an indicative plan of the area for consideration with the detailed boundary to be defined through the preparation of the SDP. While the County's main towns are situated outside of Future Wales' indicative green belt, in assessing candidate sites and their relationship to Policy 34 of Future Wales, consideration has been given to PPW12 which states that when</p>

	<p>considering a Green Belt designation, a sufficient range of development land which is suitably located in relation to the existing urban edge should be made available, having regard to the longer term need for development land, the effects of development pressures in areas beyond the Green Belt and the need to minimise demand for travel. This may require land to be safeguarded, and boundaries of proposed Green Belts must be carefully defined to achieve this. Potential Green Belt land is to be assessed and designated as part of a Strategic Development Plan (SDP) for the South East Wales Region.</p>
LPA Recommendation	<p>A strategic site is to be identified in Chepstow. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p>
Agricultural land	<ul style="list-style-type: none"> • The erosion of agricultural land is only a problem because of the Council’s preference to drive high growth. National Policy responds to Monmouthshire’s landscape by directing growth elsewhere [Cllr Christopher Edwards, Private Individual x3]. • There is a need to protect Monmouthshire’s Best and Most Versatile land as set out in National Planning Policy. MCC is promoting ambitious high growth agenda heavily dependent on job creation both are which beyond the Welsh Government’s growth projections. The land north of Bayfield is grade 2 BMV land and in considering what weight to give the BMV constraint MCC is under duty to address the difference between these projections [Private Individual x1].
LPA Response	<p>Welsh Government formally responded to the 2022 Preferred Strategy consultation in January 2023 with a ‘green’ rating and noting that “Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region, but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government.</p> <p>Brownfield opportunities have been considered through the site selection and candidate site process however, given the limited brownfield opportunities in a Monmouthshire context, greenfield opportunities, including BMV land, have had to be considered to meet the housing and employment requirements. The widespread distribution of BMV agricultural land throughout Monmouthshire means that it does not affect the spatial strategy: all four of our primary settlements including Chepstow, are surrounded by BMV agricultural land, so it is not possible to avoid the development of such land via a different spatial strategy. The site allocation process has gone through a ‘Site Search Sequence’ which has sequentially assessed sites in relation to the proportion of BMV land.</p>
LPA Recommendation	<p>No changes to the level of growth and spatial strategy area required (a housing providing figure of 6,210 homes was agreed in the October 2023 Council decision).</p>
Landscape /AONB	<ul style="list-style-type: none"> • Within close proximity to Wye Valley National Landscape (AONB). A Landscape Sensitivity Assessment (LSA) would help inform your Authority’s decision on whether to progress this site. If progressed please consider informing the decision with Landscape Visual Impact Assessments (LVIAs) [NRW]. • Site has the potential to significantly impact the surrounding landscape and heritage where part of the site falls within the Wye Valley National Landscape (AONB) [Hallam Land Management Ltd, [Taylor Wimpey, Edenstone Homes, [Bellway Homes, [Cllr Christopher Edwards, Private Individual x10].

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1557</p>	<ul style="list-style-type: none"> • Current planning application has significant landscape objections. Whilst proposed allocation is for a smaller scale of development it has not been demonstrated how a reduction in scale will avoid these impacts given its location. The Council should seek to first avoid harm to the special AONB landscape, and the allocation would conflict with Strategic policies S3 and S7 [Vistry]. • Houses on the hillside will break the skyline and negatively impact on important view from the AONB, Lion Gates and other valuable locations from the enjoyment of the AONB, thus eroding the high value natural landscape the RLDP claims wants to protect [Cllr Christopher Edwards, Private Individual x1]. • The reappraisal of the LSA was done by the developer promoting the site to serve its own ends [Cllr Christopher Edwards, Private Individual x1]. • The High-Level Assessment of Candidate Sites asks whether a site is subject to fundamental constraints and cannot be mitigated. No such assessment has been undertaken in relation to the proposed allocation with the box in the matrix left blank with no affirmative or negative and no reference to the fact that the site shares a boundary with the AONB [Vistry]. • The Integrated Sustainability Appraisal (ISA) assessment of growth areas is categorised as uncertain, whilst other locations are categorised as having a significant negative effect. The respondent considers there to be a high degree of certainty that development directly adjacent to the AONB will have a significant effect on landscape and this is supported by the Council’s landscape officers in assessment of the current planning application [Vistry]. • Mounton Road (Option E) performs better in the ISA in landscape terms, as endorsed by the previous LDP Inspector’s comments confirming that out client’s site is that least harmful location for future growth of the town [Barwood]. • Growth in this area would have a detrimental impact on the outstanding views into and out of the AONB. A large development of houses at this location will destroy the beautiful sweep of fields leading up to the wooded boundary of the AONB [Private Individual x1]. • More development close to the AONB boundary will have a detrimental impact on dark night skies within the AONB [Private Individual x1]. • More than ever people are recognising the importance of the distinctive character of these diminishing landscapes and action must be taken to ensure the preservation for generations to come [Private Individual x1].
<p>LPA Response</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.</p> <p>All site proposals will be required to accord with landscape Policies within the RLDP, LC1-LC5 to ensure development would not have an unacceptable adverse effect on the special quality of Monmouthshire’s landscape.</p>
<p>LPA Recommendation</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p> <p>All site proposals will be required to accord with landscape Policies within the RLDP, LC1-LC5 to ensure development would not have an unacceptable adverse effect on the special quality of Monmouthshire’s landscape</p>
<p>Heritage</p>	<ul style="list-style-type: none"> • Adjacent to the site is the Bishop Barnet’s Wood Camp Scheduled Ancient Monument (SAM) which is of national importance and likely to be of later prehistoric period and noted as being important element within the surrounding landscape [Hallam Land Management Ltd, Taylor Wimpey, Edenstone Homes, Bellway Homes].
<p>LPA Response</p>	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.</p>

LPA Recommendation	The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow.
Ecology	<ul style="list-style-type: none"> • Development on greenfield sites will damage the habitat of birds, bats, badgers, butterflies [Private Individual x5]. • Dormice are present in the west of this site. The Chepstow area is important for horseshoe bats and constituent part of the Forest of Dean bat sites SAC are located just north of the town. Development proposals for land surrounding Chepstow will need to have regard to the SAC conservation objectives [NRW]. • A significant buffer of at least 15m to the adjacent woodland will be needed and a sensitive lighting scheme necessary [NRW].
LPA Response	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development had associated job creation and tourism benefits. See and Candidate Sites Assessment Report for further information.</p> <p>All site proposals will be required to meet GI, landscape and Nature Recovery considerations. National Policy PPW chapter 6 as well as our Policies within the RLDP, S5, GI1, LC1-LC5, NR1-NR3 ensure all biodiversity is maintained and enhanced and ecosystem resilience will be improved as a result of proposed development.</p>
LPA Recommendation	<p>The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.</p> <p>All site proposals will be required to meet GI, landscape and Nature Recovery considerations. National Policy PPW chapter 6 as well as our Policies within the RLDP, S5, GI1, LC1-LC5, NR1-NR3 ensure all biodiversity is maintained and enhanced and ecosystem resilience will be improved as a result of proposed development.</p>
Self – containment /commuting	<ul style="list-style-type: none"> • Chepstow has a poor level of self- containment [Melin Homes, [Llanarth Estates, [Tirion Homes, Candleston Homes, Sero Homes, Sero, Private Individual x1]. • High percentage of population that commute outside of Chepstow for work. By focusing strategic growth within Chepstow, the development could encourage commuters and therefore promote business growth and employment outside the County. The high commuter population is also linked to the ongoing issues of congestion, which the proposed strategic development would arguable exacerbate [Hallam Land Management Ltd, [Taylor Wimpey, Bellway Homes]. • Where are the local jobs? Commuting to work is the only way for working-aged people to earn a living in Chepstow [Private Individual x1].
LPA Response	<p>The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development had associated job creation and tourism benefits. Supporting a mixed use site in Chepstow could reduce the need to travel to work as gives the opportunity to work and live together and gives the opportunity to increase the level of self containment within Chepstow.</p> <p>Proposed development will be required to accord with the Sustainable Transport Hierarchy as set out in National Policy and the RLDP Policy S13 and ST1 which requires new development to reduce the need to travel and promote active travel and public transport connections above the private car.</p>
LPA Recommendation	In accordance with the October 2023 Council decision, a mixed use residential and employment allocation with opportunities for self containment and reduced commuting is to be allocated at Land at Mounton Road, Chepstow.

Forest of Dean (FOD) /South Gloucester	<ul style="list-style-type: none"> 2,460 homes in the neighbouring town of Lydney are currently proposed. A48 road that passes through Chepstow is the main link between the FOD and motorway network, which will put added strain on the highway capacity of Chepstow and Air Quality Management Area (AQMA) [Taylor Wimpey, Edenstone Homes, Bellway Homes, Private Individual x3]. Over 5000 new houses have already been approved to built in nearby towns and villages e.g. Lydney, Sedbury, Beachley, Tutshill [Private Individual x1]. Demand from nearby settlements in England ignored in the Council’s assessment of the capacity for Chepstow to grow [Private Individual x1].
LPA Response	<p>Comments noted, the Council are working collaboratively with the Forest of Dean and South Gloucestershire on issues affecting Chepstow in relation to the A48.</p> <p>A Strategic Transport Assessment (STA) has been undertaken by TfW in order to understand the cumulative impact the propose housing growth will have on Monmouthshire’s transport network. The STA concludes a slight increase in traffic flows with the proposed Chepstow/ Severnside developments. Transport Assessments will be required to identify localised issues, set out specific mitigation and highway improvements to ensure traffic safety and capacity on the roads and that proposed development accords with the ‘Sustainable Transport Hierarchy’. This is also set out in Policies S13 and ST1 ‘Sustainable Transport Proposals’ and Place-making Policies S8 and HA3.</p> <p>An infrastructure Delivery Plan (IDP) has also been prepared which sets out the highway infrastructure requirements for the proposed site in Chepstow.</p>
LPA Recommendation	<p>Continue to liaise with Forest of Dean Council, South Gloucestershire Council and other neighbouring authorities in England on issues that affect the Chepstow area in particular.</p>
Public consultation	<ul style="list-style-type: none"> Site selected without any formal public consultation. At the time of the production of the Preferred Strategy no assessment and no consultation has been done of the site. The site selection pre-determines the outcome of the consultation which is contrary to the required process [Cllr Christopher Edwards, Private Individual x1].
LPA Response	<p>Prior to formal public consultation of the Preferred Strategy 2022 several public consultation events had taken place in relation the RLDP 2018-2033. This included non statutory growth and spatial options public consultation 8th July 2019- 5th August 2019 and 4th January 2021- 1ST February 2021. Statutory public consultation for the Preferred Strategy 2021 (which included an event in Chepstow Drill Hall) and the current Preferred Strategy 2022 December 2022- January 2023 (in person event in Chepstow Board School). The feedback from the growth and spatial options consultations helped to form the decisions and strategic site selection for the 2022 Preferred Strategy Consultation.</p> <p>As such, as a result of the feedback from the Preferred Strategy 2022 consultation, the Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use had associated job creation and tourism benefits.</p> <p>For further information on the Plan’s consultation process see our Delivery Agreement and in particular section 3 Community Involvement Scheme which sets out how the Council has proactively involved the community and stakeholders in the preparation on the RLDP.</p>
LPA Recommendation	<p>Continue to carry out necessary public consultations as set out in the Delivery Agreement and Community Involvement Scheme.</p>
Mounton Road (CS0165)	<ul style="list-style-type: none"> The Integrated Sustainability Appraisal (ISA) assesses the three proposed areas for development in Chepstow. Option E (CS0165) was demonstrated as the most sustainable choice primarily for its closer proximity to the town centre creating a more connected and inclusive space [Cllr Christopher Edwards, Private Individual x1]. CS0165 does not impact on the Wye Valley National Landscape (AONB) in the way that CS0098 does [Cllr Christopher Edwards, Private Individual x1].

	<ul style="list-style-type: none"> • Mounton Road is the optimum location for growth in Chepstow on the basis that it would accommodate a mix of uses (residential/hotel/commercial), is sensitively and discretely located in response of the AONB, and is well located in relation to the town centre and train station (including the various improvements to the town's public transport services emerging through the Council's Masterplan). It is unclear why Bayfield has been chosen [Barwood (1989)]. • Quicker pedestrian and cycle routes to the town centre in comparison with Bayfield. It takes 6-8 less minutes in walking time to the transport hubs in Chepstow [Barwood]. • Based on the ISA Option E is the most suitable, viable and sustainable location for the town's strategic allocation [Barwood].
LPA Response	The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use development had associated job creation and tourism benefits. See Candidate Site Assessment Report for further information.
LPA Recommendation	The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.
Page 1560 Planning History	<ul style="list-style-type: none"> • Given the history of site CS0098 with previous refusals for development on account of the detriment caused to the Wye Valley National Landscape (AONB) there is no objective justification. It must therefore be assumed that either political preferences or developer lobbying is behind the proposal. Either of which is unacceptable and undermines the confidence of the public in the planning system [Cllr Christopher Edwards, Private Individual x1]. • Objections (over 800) to the current DM/2019/00013 planning application must be taken into account as an indication of the sentiment for development on this site [Cllr Christopher Edwards, Private Individual x2]. • It's been accepted by a Planning Inspector in a previous appeal decision on the site that the potential for development to impact on the setting of the AONB is a material consideration [APP/P1235/A06/2012807,2007] [Private Individual x2].
LPA Response	The Bayfield Site has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included swapping the strategic site in Chepstow from Bayfield to Land at Mounton Road on the basis that a mixed-use proposal had associated job creation and tourism benefits. See Candidate Sites Assessment Report for further information.
LPA Recommendation	The Bayfield Site has not progressed to the Deposit Plan. In accordance with the October 2023 Council decision, a mixed use residential and employment allocation of approximately 146 homes is to be allocated at Land at Mounton Road, Chepstow. Site specific policy requirements are set out in Policy HA3 – Land at Mounton Road Chepstow.
Insufficient Information	<ul style="list-style-type: none"> • Insufficient detail about planned improvements for Chepstow's infrastructure to be able to have confidence on the decisions of the Preferred Strategy [Private Individual x1]. • Expected more information showing results of transport assessment with due diligence to active travel and air quality [Private Individual x1].
LPA Response	The Infrastructure Delivery Plan (IDP) will set out the level of Infrastructure required for the proposed allocation in Chepstow and how this will be delivered. Policies S8 and HA3 – Land at Mounton Road – also sets out key master planning parameters for the proposed site allocation in Chestow. Prior to progressing with a planning application a Transport Assessment and air quality assessment will be required.

LPA Recommendation	Refer to the Infrastructure Delivery Plan –for further details on the Infrastructure requirements as a result of the proposed allocation at Land at Mounton Road. Policies S8 and HA3 also sets out key master planning parameters.
General/ Other	<ul style="list-style-type: none"> • Flooding impact [Private Individual x1]. • Why does the town of Usk never appear in your development plans? Spreading new housing across the County will reduce the impact on the major towns and have a positive impact on Usk itself [Private Individual x1]. • An incentive for minimal suitable located Chepstow housing for Chepstow job holders really ought to be the priority. The obvious implications being reduced commuting distances and fewer subsidised council tax payment [Private Individual x1].
LPA Response	<p>High level Candidate Site Assessment sifted out sites on flood plains. Furthermore National Flooding policies (TAN15) and policies within the RLDP will ensure there is no flood risk to development.</p> <p>Usk has a proposed housing allocation. See site allocation Policy HA11 of the Deposit RLDP.</p> <p>Affordable housing in Monmouthshire will only be allocated to people with a local connection to Monmouthshire. It should be noted that this is a policy approach outside of the remit of the RLDP which sits with Monmouthshire County Council’s Housing team. It is beyond scope of RLDP to control market homes occupation, however the Plan does contain Policy H8 – Housing Mix to ensure that development proposals contain a range and mix of house types, tenure and size.</p>
LPA Recommendation	

Question 12 – Do you have any comments on Strategic Policy S7 Preferred Strategic Site Allocations: c) Caldicot East?

46 Organisations or members of the public submitted a response to question 12.

The comments raised concern over delivery of the site within the Plan period suggesting the quantum of development was too large to be delivered in the timeframe. There were concerns over the infrastructure necessary to bring the site forward and impact on the existing highway network. Concerns from residents in the area related to wider impact on existing facilities and services, noting these are already stretched. There were also concerns raised on how the site would change the nature and character of the area particularly the villages of Portskewett and Crick. Statutory consultees did not raise concern over the level of development but suggested additional assessments and modelling would be necessary prior to allocation in the Deposit RLDP.

Key Theme	Summary of Points Raised
Support policy/site	<ul style="list-style-type: none"> • Strongly support the allocation of Caldicot East and the contribution it can make to the RLDP. Provided detailed representations in support of the site as one of the site promoters. Note development will be brought forward on a phased basis and provides an opportunity to progress multiple outlets due to its size which will result in an increased rate of delivery per annum [Richborough Estates].
LPA Response	Support noted.
LPA Recommendation	No change required.
Object to policy/site	<ul style="list-style-type: none"> • Do not support site due to significant concerns regarding sustainability, access and infrastructure, with a key concern of concentrated delivery of development [Hallam Land Management Ltd., Taylor Wimpey, Edenstone Homes & Bellway Homes].

	<ul style="list-style-type: none"> • State site is too large and will fundamentally change the nature and character of the villages of Portskewett and Crick, bringing both into Caldicot [Private individuals x 3]. • A number of private individuals object to the site due to one or more of the following reasons; impact on village of Portskewett, risk of flooding in wider Caldicot area due to surface water run-off, ecological impact, no NHS dentist, lack of school spaces, difficulty getting doctors appointments, pharmacy queues, lack of shops in centre, antisocial behaviour, lack of employment opportunities, lack of public transport and increase in traffic on roads. [Private individuals x 21]. • Object to site as it goes against placemaking themes in Planning Policy Wales relating to Strategic and Spatial Choices, Active and Social Places, Productive and Enterprising Places and Distinctive and Natural Places [Private individuals x 2]. • Proposed development would substantially alter the demographic of the area leading to a big difference in local needs which would need to be properly assessed [Private individual x 1]. • Concern on impact of SSSI, wildlife and habitats. Suggest development should only be focused on the Showground part of the site [Private individual x 1].
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1562</p> <p>LPA Response</p>	<p>Comments noted. At the time of the Preferred Strategy consultation Land to the east of Caldicot site (previously known as Caldicot East) was proposed for 925 homes within the plan period. This has been reduced in the Deposit Plan to approximately 770 homes.</p> <p>Land to the east of Caldicot provides the opportunity for a new neighbourhood of Caldicot with links to Portskewett to the east. The site is allocated as a residential-led mixed-use development delivering net zero carbon homes, of which 50% will be affordable, along with a primary school, a local centre, public open space, community facilities and B1 employment uses. The primary school will bring benefits for the wider community serving both the new development and nearby homes in both Caldicot and Portskewett.</p> <p>Infrastructure requirements are set out within the site allocation policy. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.</p> <p>The consideration of any designations (including ecological and heritage designations) and other constraints have been considered through the masterplanning process to date and referred to in the site allocation policy wording and supporting text.</p>
<p>LPA Recommendation</p>	<p>No change required.</p>
<p>Number of dwellings proposed/deliverability</p>	<ul style="list-style-type: none"> • No certainty the site will be able to deliver the quantum of homes over the plan period as neither site has developer interest [Barratt & David Wilson Homes]. • Suggest to meet the tests of soundness the quantum of development allocated through this policy should be reduced and additional sites allocated for development to ensure consistent delivery of homes throughout the County [Hallam Land Management Ltd., Taylor Wimpey, Edenstone Homes & Bellway Homes]. • Consider the Preferred Strategy is overly reliant on this strategic site presenting significant risk to the delivery of housing over the plan period [Vistry]. • Given the site represents such a significant allocation for the County state it is important that it is found to be the most appropriate site and that deliverability is certain. Note it is challenging to ascertain at this stage as only a high-level candidate site assessment together with a comparative analysis of options included in the Integrated Sustainability Appraisal. Full response provides a detailed comparison between their own site and the Caldicot East site [Redrow Homes].

	<ul style="list-style-type: none"> Refer to research undertaken by Lichfields 'Start to Finish' (2nd Edition, Feb 2020). States if it is assumed a build out rate of 107 homes per annum from first completion and an allowance of time to secure necessary permissions, consents and infrastructure delivery, the sites contribution to housing supply within the plan period will fall significantly below the 925 homes assumed in the Preferred Strategy [Edenstone Group & Edenstone].
LPA Response	<p>Comments noted. At the time of the Preferred Strategy consultation the Land to the east of Caldicot site was proposed for 925 homes within the plan period. This has been reduced in the Deposit Plan to approximately 770 homes.</p> <p>Anticipated delivery rates have been set out in the Housing Trajectory contained in Appendix 9 of the Deposit Plan. This demonstrates that the site can be delivered within the Plan period.</p>
LPA Recommendation	No change required.
Strategic Infrastructure	<ul style="list-style-type: none"> Likely a Hydraulic Modelling Assessment (HMA) of both water supply and public sewerage networks will be required to determine the level of reinforcement works required to accommodate the proposed development. Also note a 2" distribution water main (including an abandoned stretch) traverse the site for which protection measures will be required in the form of an easement width or diversion [Dwr Cymru/Welsh Water]. Significant infrastructure costs associated with bringing this site forward which could impact on delivery rates and timescales [Barratt & David Wilson Homes]. No problem with the housing as it is much needed but concerned about supporting infrastructure, lack of public transport and traffic impact, particularly on Magor, Caldicot and Chepstow [Private individuals x 3].
LPA Response	<p>Comments noted. Infrastructure requirements are set out within the site allocation policy. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.</p>
LPA Recommendation	No change required.
Green Belt	<ul style="list-style-type: none"> Surprised a significant site is identified at Caldicot ahead of the Green Belt review [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2].
LPA Response	<p>The boundary of the Green Belt will be informed by the SDP. The indicative Green Belt (as set out in Future Wales), is located to the north of the M48 which is outside the boundary of Land to the east of Caldicot.</p>
LPA Recommendation	No change required.
Proximity to M4	<ul style="list-style-type: none"> Suggest it seems illogical to locate a housing estate close to the M4 junction if it is the intention of Welsh Government to alleviate the growth of traffic along the M4 in Wales particularly as Caldicot has one of the poorest levels of self-containment within the County, with just 20% of residents working locally. Concern it will attract commuters from the South West at the expense of local residents who will continue to be priced out of the area [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes, Sero & Private individuals x 2].
LPA Response	<p>Comments noted. Land to the east of Caldicot provides the opportunity for a new neighbourhood of Caldicot with links to Portskewett to the east. The site is allocated as a residential-led mixed-use development delivering net zero carbon homes, of which 50% will be affordable, along with a primary school, a local centre, public open space, community facilities and B1 employment uses. The primary school will bring benefits for the wider community</p>

	<p>serving both the new development and nearby homes in both Caldicot and Portskewett. While there is no control over where the purchasers of market homes currently live, the affordable housing on the site will only be allocated to people with a local connection to Monmouthshire (note that this is a policy approach outside of the remit of the RLDP which sits with the Monmouthshire Housing team). A housing mix policy is also included in the plan to encourage a better mix of house types, tenure and size to help address demographic and affordability challenges facing the County. This policy applies to all residential sites including the allocated housing sites.</p>
LPA Recommendation	No change required.
20-minute neighbourhood	<ul style="list-style-type: none"> Suggest majority of site is located outside the 20-minute neighbourhood [Hallam Land Management Ltd., Taylor Wimpey, Edenstone Homes & Bellway Homes].
LPA Response	<p>Comments noted. It is recognised that the northernmost part of the site will be located further than a 20-minute walking distance to Caldicot Town Centre and other community facilities including the Secondary School. The site will, however, provide a number of facilities on-site including a primary school, local centre, public open space, appropriate community facilities and B1 employment. The policy also includes reference to the provision of a public transport link throughout the site to enable connections to Caldicot Town Centre and beyond.</p>
LPA Recommendation	No change required.
Masterplanning/ Assessments	<ul style="list-style-type: none"> Provide detail on proximity to designations that need to be considered as part of the development. Recommendation that opportunities in relation to design, ecology, drainage and natural resources are also provided to inform masterplanning of the site [Natural Resources Wales].
LPA Response	<p>Comment noted. The site allocation policy wording and supporting text provide reference to nature conservation designations including the Nedern Brook wetlands SSSI and Severn Estuary European Marine Site. The policy wording ensures any impact is recognised and that careful design is required to avoid increased disturbance to qualifying features. Masterplanning has considered these designations to date and will continue to as it evolves further through to the planning application stage. An Infrastructure Delivery Plan has been produced with site specific considerations relating to Land east of Caldicot which is an appendix to the Deposit Plan.</p>
LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> Development Plan Manual requires the site to be identified within a published disposal strategy indicating a clear commitment to bringing the site forward at a point in time during the Plan period as it is partly within Council ownership [Redrow Homes].
LPA Response	<p>Comment noted. Assets proposed for disposal are not publicly listed and require Council consent prior to disposal, at which time assets are advertised on the open market. The Council has given support for this site to progress as an allocation through endorsement of the Preferred Strategy, as such this shows commitment for the site to be disposed of and brought forward within the plan period. Refer to the housing trajectory which sets out anticipated timescales for the development of the site.</p>
LPA Recommendation	No change required.

Question 13 – Do you have any comments on Strategic Policy S8 Gypsy and Travellers?

6 organisations or members of the public submitted a response to question 13.

Welsh Government highlighted the need to ensure an agreed GTAA is in place before the Deposit and failure to meet the identified need in the Plan could result in the plan being found unsound. It was noted that the sites should incorporate usual GI, highways, and planning considerations, with some noting the plan should not allocate site(s).

Key Theme	Summary of Points Raised
G&T need should be addressed in the RLDP.	<ul style="list-style-type: none"> A GTAA should be agreed by Welsh Ministers by Deposit stage and cover the full plan period 2018 to 2033. Provision must be made in the Deposit plan for appropriate and deliverable site allocations to meet the identified need in the timescales set out. Failure to agree the GTAA and meet the identified need, specifically in the short to medium term, could result in the plan being considered 'unsound'. Therefore, encourage MCC to work with WG's Communities Division to ensure an agreed GTAA is in place by Plan Deposit. [WG] Needs of Gypsy and Traveller community should be catered for in the Plan. [Private Individual]
LPA Response	An updated GTAA has been prepared and was agreed by Welsh Government in June 2024. A site allocation to address outstanding Gypsy and Traveller need to 2033 is made under Policy S9 – Gypsy and Travellers (formally S8 in the Preferred Strategy).
LPA Recommendation	Update Strategic Policy S8 (now S9 in the Deposit Plan) to include a site-specific allocation to meet the outstanding GTAA need.
Sites should consider planning considerations	<ul style="list-style-type: none"> Land should not be made available without the usual GI, public open space and amenity land protections, highway, and planning considerations. [Cllr Louise Brown]
LPA Response	Comments noted. In addition to Planning Policy Wales, the RLDP Gypsy and Traveller Allocation and any proposals that come forward during the Plan period will also be considered against Welsh Government Guidance: Designing Gypsy, Traveller and Travelling Showpeople Sites.
LPA Recommendation	No change required.
Object to G&T provision	<ul style="list-style-type: none"> Object to policy and allocating Gypsy and Traveller site(s). [Private Individuals x 3]
LPA Response	Planning Policy Wales requires Local Authorities to allocate sites to meet the need identified in the Gypsy Travellers Accommodation Assessment and provide a criteria-based policy for sites that may come forward throughout the life of the Plan.
LPA Recommendation	No change required.

Question 14 – Do you have any comments on Strategic Policy S9 Sustainable Transport?

50 organisations or members of the public submitted a response to Question 14 – Sustainable Transport.

Comments generally supported the concept and objectives of sustainable transport and active travel provision, such as improved cycleways, walkway and siting development along public transport routes as well as acknowledging the propensity in home working reducing the need to travel in the first place. Comments also recognised however that within a rural county, such as Monmouthshire, it is often difficult and unpractical to implement alternatives to the car and there is still a heavy reliance on the car and road infrastructure and not possible to walk to services/facilities within 20 minutes. There is also ambiguity over parking standards, with national policy requiring reduced parking levels, however, in a Monmouthshire/rural context the car remains the dominant mode of transport and only realistic mode within Monmouthshire.

Comments also reflected repeated frustration that public transport improvements are slow to progress - for example, planned improvement to Magor Walkway, Caldicot and Chepstow railway stations, and that bus services are too infrequent and unreliable for people to use.

The Council needs to consider collaboration with bordering authorities when considering strategic transport improvements.

The key themes raised are set out below:

Key Theme	Summary of Points Raised
Page 1566 Support Sustainable transport	<ul style="list-style-type: none"> • Support sustainable transport which reduces need to travel by car and places development near public transport links [Abergavenny & Crickhowell Friends of the Earth, Vistry, Edenstone, Private Individual x2]. • Support the concept of the ‘20-minute neighbourhood’ [Private Individual x1]. • Siting development alongside main transport corridors and increasing the frequency of public transport along those essential links is critical to ensure sustainable transport practices [Melin Homes, Sero, Tirion Homes, Candlestone Homes, [Private Individual x2]. • Respectfully suggest that the phrasing ‘must’ is substituted with ‘should provide appropriate measures subject to site-specific considerations’ [Redrow Homes Limited]. • The use of electric vehicles will change the way we travel - sections of the sustainable transport policy should change to reflect the increase in zero emission cars. WG policies driven by the need to cut car emissions will no longer be necessary [Private Individual x1].
LPA Response	<p>Support welcomed.</p> <p>With regards to changing the word from ‘must’ to ‘should,’ the policy requirement for development proposals to ensure the sustainable transport hierarchy reflects national policy set out in PPW12 and Llwybr Newydd Wales Transport Strategy and is, therefore, considered appropriate and necessary. It is however recognised that Monmouthshire is a rural county and the RLDP in other policy areas supports development in rural locations. Strategic policy S13 and supporting development management policy ST1 will therefore recognise that Monmouthshire is a rural county and allows for site -specific considerations in rural locations. Policy ST1 will require Transport Assessments to be submitted and a proportionate approach taken in assessing developments in rural areas in accordance with the Sustainable Transport Hierarchy.</p> <p>In relation to the comment that cars will not produce emissions this is not the purpose of the policy, the purpose of the policy is to influence the way people travel and change behaviours by providing facilities and enabling the use of public transport and active travel and reduce the reliance on the private car. Policy S13 does require necessary infrastructure for Ultra Low Emission Vehicles (ULEVs)</p>
LPA Recommendation	<p>No changes required. Policy reference has changed to S13. Development Management Policy ST1 will also address rural transport issues and take a proportionate approach to assessing rural transport issues.</p>
Transport issues wider than the proposed development	<ul style="list-style-type: none"> • The whole system needs to be considered – it must not be regarded as sufficient for a site to be developed only to connect to footpaths outside that site when in the wider networks have active travel shortcomings [Cllr Christopher Edwards, Private Individual x2].

LPA Response	Master planning of the proposed allocated sites will explore active travel connections. Strategic Policy S13 Sustainable Transport requires development proposals to maximise active travel opportunities and for developments to link to the Active Travel Network Maps (ATNM).
LPA Recommendation	No change required. The policy reference has been changed to S13.
Active travel	<ul style="list-style-type: none"> • Support the objective, however, how will investment in low carbon transport infrastructure enable more people to walk and cycle [Private Individual x1]. • The 20-minute neighbourhood concept must take into account topography and the feasibility for all the community to utilise the proposed walking/cycling routes. The reality of accessing local service in Chepstow particularly from the preferred site is that it is too distant to walk to local services [Cllr Christopher Edwards, Private Individual x1]. • Policy does not take account of the lack of active travel measures between the whole of the narrow southern band of development [Cllr Louise Brown]. • No cycle paths joining up Severnside (many cyclists killed/injured on the B4245) [Private Individual x1] • Active travel networks are concentrated in urban areas and do not cover links between towns and villages [Cllr Louise Brown]. • Encouragement of cycleways and separation of cycleways from roads and from footpaths to ensure separation of pedestrians from electric bikes and scooters [Private Individual x1].
LPA Response Page 1567	<p>The objective of the Policy is to support and facilitate active travel provision and active travel infrastructure where possible, such as signage and bike parking and charging facilities. We cannot control people's behaviour, but we can try to influence it.</p> <p>Detailed Transport Assessments (TAs) will be required to assess active travel routes and facilities and provide a Travel Plan, which would take into account topography of sites and surrounding areas to ensure practicability of such provision.</p> <p>The Policy makes reference to need for developments to take account of Active Travel Network Maps (ATMNs). These are maps that set out the existing active travel routes within the county and therefore will highlight where links are required for improvements to connectivity between settlements.</p> <p>The proposed strategic sites are all located within active travel localities and the main proportion of the RLDP spatial strategy's growth is located in active travel localities. While it is recognised that some of the proposed allocations in rural areas are not active travel locations, an appropriate amount of growth is identified in such areas in order to sustain our rural communities by providing affordable homes and development opportunities of an appropriate scale.</p> <p>Development proposals in Main Rural Settlements will still be required to connect to public transport facilities and PROW. The RLDP also supports the rural economy and tourism in rural locations</p> <p>This policy supports cycleways, which are also supported in DM Policy ST1 Sustainable Transport Proposals.</p> <p>Development Management Policy ST1 sets out further guidance in relation to the how to address active travel considerations in TAs specific to Monmouthshire. Guidance on Active Travel provision is also set out in National Policy PPW, Active Travel Act Guidance and the WTS.</p>
LPA Recommendation	No significant changes required to the Strategic Policy. The reference of the Policy is now S13.
National Development Framework	<ul style="list-style-type: none"> • Strategic Policy S9 is intended to provide assistance to the authority and ensure the plan and supporting evidence better aligns with the requirements in the National Development Framework (NDF) [Welsh Government].
LPA Response	Comments noted.

<p>LPA Recommendation</p>	<p>No change required. The Policy reference has changed to S13.</p>
<p>Rural nature of Monmouthshire</p> <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1568</p>	<ul style="list-style-type: none"> • The policies here work for city areas but not for rural Monmouthshire with its market towns and rural villages. Car transport may be the only realistic form of travel in town and between villages [Cllr Louise Brown]. • If you cannot reduce the requirement for all residents of all ages to travel and access facilities, then this policy is a non-starter. Residents of most rural settlements' do not have the local facilities so have to travel and 'active travel' is often not achievable [Llangybi Fawr Community Council]. • Difficult to "retrofit" sustainable transportation patterns [Melin Homes, Llanarth Estates, Tirion Homes, Candlestone Homes, Sero, Private Individual x2] • Should be recognised in rural areas that it is inevitable that there will be reliance on travel by car [Private Individual x2]. • The RLDP could employ a range of interventions to maximise sustainability. This could include linking residential, community and employment allocations to ensure delivery and co-location of facilities - we note this in regard of benefits of large allocations [Melin Homes, Llanarth Estates, Tirion Homes, Candlestone Homes, Sero, Private Individual x2], • Proportionate growth in smaller settlements can help provide a mass of population which will help support both existing and new facilities, including transport provision, education, employment. This in turn supports sustainable transport principles and the '20-minute neighbourhood' as well as discouraging car use [Monmouthshire Housing Association, Llanarth Estates, Private Individual x2]. • The concept of '20-minute neighbourhoods is not possible in several Severnside settlements. Walking from Crick for example for 20 minutes gets you to the outskirts of Caerwent. Planners cannot hide behind the get out clause that this part of Monmouthshire is exempted by the Rural Transport Clause 5.43 because by building such a large-scale development it will be made into a defacto urban area [Private Individual x1]. • Little public transport in Usk [Private Individual x1]. • Usk candidate sites will not be within 20-minute walking distance of everyday services [Private Individual x1]. • Car is king and the Welsh Government won't change that in their fantasy land [Private Individual x1]. • The final bullet point and the accompanying text is unclear. 'Demonstrating how proposed development in rural areas enables solutions to rural transport problems, such as improvement of links to public transport, digital infrastructure, and innovative solutions, such as car sharing schemes.' We would not have thought that the scale of rural development envisaged by the plan is likely to be enough to justify such improvements; they will mainly arrive from other initiatives aiming to sustain or improve rural transport services for the existing population, especially those lacking access to car [Abergavenny & District Civic Society].
<p>LPA Response</p>	<p>It is recognised that sustainable transport policies are more readily applicable in an urban context, however in accordance with PPW, Future Wales and the WTS there is a need for local authorities to provide a supportive planning policy framework to enable new opportunities for sustainable rural travel and rural travel improvements. The RLDP includes localised sustainable transport policies under Strategic Policy S13 and Development Management Policy ST1 which recognises the challenges of implementing sustainable transport policies in rural locations. The Plan recognises the need for Transport Assessments to be assessed proportionally in rural locations (where the car is likely to be the dominant mode of transport) and balance the need/requirement for development in rural areas, where appropriate, and in accordance with other plan policies (rural enterprise, tourism, affordable housing) to support the rural economy. The strategic sustainable transport policy S13 also requires proposals to demonstrate innovative solutions to rural sustainable transport problems where appropriate to do so, such as car sharing schemes.</p>
<p>LPA Recommendation</p>	<p>No significant changes required, however, some changes have been made to the wording to allow some flexibility in relation to development in rural locations and recognising Monmouthshire's rural context. Policy reference has changed to S13. Development Management Policy ST1 will also address rural transport issues and take a proportionate approach to assessing rural transport issues.</p>

Cross-boundary impacts	<ul style="list-style-type: none"> • Need to work with neighbouring authorities where there are cross boundary impacts and opportunities associated with development [Gloucestershire County Council]. • Many solutions to transport demand arising through new development in both Monmouthshire and Forest of Dean in Gloucestershire will centre on settlements, routes and hubs that are close to the borders of Monmouthshire and Gloucestershire. They stand to benefit from joined up working between the relevant authorities [Gloucestershire County Council]. • The Council needs to appreciate cross boundary opportunities as this is the case in terms of Little Mill and its relationship with Mamhilad [Monmouthshire Housing Association].
LPA Response	<p>Comments noted.</p> <p>The Council has undertaken a Strategic Transport Assessment that has assessed the demand on the transport network and takes into consideration the impact to and from neighbouring regions.</p> <p>The Council will continue to work with our neighbouring local authorities on a range of cross boundary issues, including our respective growth levels, spatial strategies and transport demand and potential solutions</p>
LPA Recommendation	<p>The Council will continue to work with neighbouring local authorities on cross boundary impacts, such as travel.</p>
Parking standards	<ul style="list-style-type: none"> • The policy should address reducing parking levels [Welsh Government]. • The wording on car-parking seems curiously old fashioned “an appropriate level of parking provision depending on the nature and location of the proposal” In a world moving toward what the document mentioned elsewhere as car-sharing, active travel, public transport improvements, everything aimed at reducing the need to use the private car then this may need re-thinking in a more imaginative set of wording [Abergavenny Transition Town]. • Parking provision must be appropriate to the levels of car ownership in the County. Currently 75% of homes in Monmouthshire have at least 2 cars and almost 50% 3 or more. For a poor example of car parking provision in a development, Bayfield estate (Woolpitch Wood) is a like a car park [Cllr Christopher Edwards, Private Individual x1].
LPA Response	<p>Comments noted. Policy has been updated to address reducing parking requirements where deemed appropriate in Monmouthshire. It is recognised, however, that Monmouthshire is a rural county and the car is a key mode of transport in some rural areas. Monmouthshire Parking SPG is due to be reviewed by the Council’s highway team following the adoption of the RLDP. The parking policy will make reference to guidance to be taken from this SPG as well as other relevant national guidance, such as Active Travel Act guidance (ATAG).</p> <p>Parking provision from proposed developments will also be required to be addressed in proposals’ Transport Assessments/statements as set out in Development Management Policy ST1. Development Management Policy ST1 supports reduced parking levels/ car free development in town centres (sustainable locations where the car is less reliant).</p>
LPA Recommendation	<p>Strategic Policy S13 updated to include that cycle parking will be given ‘competitive advantage’ in accordance with Active Travel Act guidance. Included reference to “Appropriate level of car-parking”, which will be based on Monmouthshire’s adopted parking SPG. The Council’s parking SPG to be updated by the Council’s highway team to support the RLDP. Strategic Policy reference has changed to S13.</p>
Public Transport	<ul style="list-style-type: none"> • Public Transport provision is poor in Monmouthshire [Private Individual x2]. • Public Transport alternatives are inadequate and doomed for failure under current ‘commercial’ service approach whereby the service providers are driven by profitability [Private Individual x2].

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1570</p>	<ul style="list-style-type: none"> • There are estates in this part of Wales where bus provision through the estate has not been considered during development. Will the RLDP state that developers must indicate where bus routes will run? [Disability Advice Project]. • Disparity between public transport provision across the county should be recognised in the Policy wording as well as the supporting text [Richborough Estates]. • Opportunities to offer an alternative to the car have been poorly progressed for a variety of factors. Priorities such as Magor Station, improvement to Caldicot and Chepstow, STJ train station ought to be fully investigated and supported addressing modal shift. There can be no further development without limiting the reliance on the road infrastructure and car ownership [Cllr Frances Taylor, Private Individual x1]. • Poor bus service in Magor/Undy – one per hour in week [Private Individual x1]. • More buses will not solve the problem if traffic congestion results in unreliable delayed journeys [Cllr Louise Brown]. • Congestion in and out of Chepstow has a very serious adverse effect on the local and regional bus service [Private Individual x1]. • Supports enhancements of Severn Tunnel Junctions and development walkway station at Magor [Private Individual x2]. • Para 5.47 should more strongly commit to the Council to provide transport measures necessary to support growth. Stating that “Monmouthshire will hope to undertake” some improvements is effectively meaningless in practical terms. The wording exposes the reality that the Council will not be able to deliver sufficient transport improvements to attract people out of their cars. [Private Individual x1] • Frequency of trains between Gloucester and Cardiff needs to be greatly improved - should be minimum every 30 minutes. User confidence will drive an increase in passenger numbers [Private Individual x1]. • Require a commuter train service directly between Chepstow and Bristol. Currently only available via STJ and travel to STJ this discourages the number of Bristol workers who live in Chepstow using train travel to commute [Private Individual x1]. • People will never be persuaded to use public transport until it is cheap, efficient, reliable and accessible to all [Private Individual x1].
	<p>LPA Response</p>
<p>LPA Recommendation</p>	<p>No significant changes required to Strategic Policy. Reference has changed to S13.</p>
<p>Home working</p>	<ul style="list-style-type: none"> • Support measures aimed at encouraging remote working and the role this can play in reducing the need to travel. Achieving at high propensity of home working will reduce the need to travel in the first instance which accords with the initial aim of the sustainable transport hierarchy [Richborough Estates, Tirion Homes, [Candlestone Homes, Sero, Private Individual x2]. • Increased homeworking benefitting from improved broadband connectivity will allow workers to relocate to areas not possible previously where they can enjoy more active lifestyles and live close to family members for support and well-being [Melin Homes].
<p>LPA Response</p>	<p>Comments noted and support welcomed.</p>

LPA Recommendation	No changes required. Policy reference has changed to S13.
Local Transport Plan (LTP)	<ul style="list-style-type: none"> The LTP is not yet available to comment [Abergavenny & Crickhowell Friends of the Earth, Usk Civic Society]
LPA Response	The updated LTP, now known as Local Transport Strategy (LTS) was subject to public consultation November/December 2023 and will be available to view during the RLDP Deposit consultation. The LTS will identify the key transport issues relevant to Monmouthshire and what high level interventions are needed to address these transport issues. The draft version of the LTS has been considered as part of the RLDP policy framework. Development Management Policy ST5 supports and safeguards the schemes identified in the LTS.
LPA Recommendation	No change required.
Electric Vehicle Charging (ULEVs)	<ul style="list-style-type: none"> Support the principle of ULEVs, however, viability of smaller schemes will be an important consideration to the implementation of this policy [Monmouthshire Housing Association, Edenstone, Private Individual x2].
LPA Response	Support welcomed. Development proposals will be expected to meet the Council's key climate change aspirations and part of this is providing supportive policy framework for ULEV infrastructure for new proposed developments. This approach accords with the Plan's climate change policy (S4).
LPA Recommendation	No changes required. Policy reference has changed to S13.
Grid capacity	<ul style="list-style-type: none"> The capacity of existing energy networks to support vehicle charging will need to be considered by national energy providers to ensure there is sufficient capacity to serve local networks [Monmouthshire Housing Association, Edenstone, Private Individual x2].
LPA Response	Comment noted. The Council has and continues to engage with National Grid regarding grid capacity. National Grid feasibility studies have been requested to inform the site allocations, to ensure grid capacity is appropriately considered and at an early stage to enable the deliverability of our policy approach including in relation to net zero carbon homes and supporting necessary infrastructure such as vehicle charging.
LPA Recommendation	No changes required. Policy reference has changed to S13.
Minerals & Waste	<ul style="list-style-type: none"> Query why there is no reference to Objective 5 Minerals and Waste. Transport Infrastructure is reliant on the supply of aggregates and mineral products. Also, it is imperative that new sites do not impact upon Mineral Safeguarding Areas [Mineral Products Association].
LPA Response	In the interest of brevity, the RLDP objectives listed in the Links to Wider Framework box are those that are considered to be most pertinent to the policy in question, however, most RLDP objectives are linked to every policy in some way. It is not considered necessary to list all objectives in relation to each policy. Similarly, the Plan should be read as a whole with policies being applied as necessary and not ordered in terms of priority. It is considered Objective 5 is addressed within Policy S16 Sustainable Minerals Management and not required to be repeated within S13.
LPA Recommendation	No changes required. Policy reference has changed to S13.
Strategic Sites	<ul style="list-style-type: none"> Abergavenny East will provide affordable homes in sustainable location serving the communities they are located in [Monmouthshire Housing Association].

	<ul style="list-style-type: none"> • P66 para 5.46 referring to rail investment and the SE Wales metro scheme it says, “the identified preferred strategic growth areas of Abergavenny East (Bayfield and Chepstow) will be limited to the town centre and railway stations via active travel connections.” In the current configuration of site boundaries on Abergavenny East this looks extremely unattainable [Abergavenny Transition Town]. • Mounton Road is the most accessible option for strategic future growth in Chepstow in proximity to the town centre and train station [Barwood]. • Transport Infrastructure /additional capacity must be confidently delivered before any major new development [Private Individual x1]. • Proposed Severnside development gross overdevelopment without the transport infrastructure to support [Private Individual x1].
LPA Response	The spatial strategy of the RLDP focuses development in the most sustainable settlements. The proposed strategic sites are sustainably located edge of settlement sites and will be well connected to local services and facilities via sustainable travel options. Further detail on the sustainable travel infrastructure needed to support the delivery of site allocations is set out in the site allocation policies S8 HA1 – HA18 and the supporting Infrastructure Delivery Plan.
LPA Recommendation	No change required. Policy reference has changed to S13.
Highway design	<ul style="list-style-type: none"> • Require raised kerbs at bus stops [Disability Advice Project].
LPA Response	Comments Noted. Development Management Policy ST1 will require all new highway design to be inclusive to all users.
LPA Recommendation	No change required.
General/Other	<ul style="list-style-type: none"> • Grove Farm Care village - co-locating living, care, medical and social facilities together provides an opportunity to deliver a sustainable development with less need for vehicle trips. The care village will offer transport minibus service for residents to move to Abergavenny town and transport noes and support employees travelling to work [Grove Farm Estates & Development]. • There has been no provision to provide greater transport links in the Chepstow Plan [Private Individual x1].]
LPA Response	Site has not been progressed within the Deposit Plan.
LPA Recommendation	No change required.

Question 15 – Do you have any comments on Strategic Policy S10 Town, Local and Neighbourhood Centres?

18 organisations/private individuals submitted a response to question 15.

There was some support to the policy, including the classification of Abergavenny, Monmouth and Usk. Concern was however noted on the current performance of some of the centres, particularly Chepstow and Caldicot.

Others questioned the wording and context of the policy.

Key Theme	Summary of Points Raised
Support policy	<ul style="list-style-type: none"> • Welcome policy [Abergavenny Town Council and Abergavenny & District Civic Society].

	<ul style="list-style-type: none"> Agree town centres should be put first as a place for people to congregate and visit [Private individual x 1].
LPA Response	Support welcomed.
LPA Recommendation	No change required.
Area specific comments in relation to town, local and neighbourhood centres	<ul style="list-style-type: none"> Failure to allow for growth in Monmouth will threaten the ongoing vibrancy and vitality of the Town Centre [Redrow Homes]. Support classification of Abergavenny as a Town Centre at the top of the retail hierarchy but should also refer to Llanfoist as it does in the settlement hierarchy [Grove Farm Estates & Development]. Support recognition of Usk as a local centre. Believe allocating sites would support the role of Usk as a local centre [Johnsey Estates 2020 Ltd]. Concern Chepstow Town Centre is failing and is in decline [Private individual x 1] Concern Caldicot Town Centre is a dead town centre both commercially and as a community hub, in order for Caldicot East to be an attractive proposition to newcomers would need it to already be a thriving and active place [Private individual x 1].
LPA Response	<p>The spatial constraint in the Monmouth area relating to phosphates has been removed since the consultation on the Preferred Strategy and as a consequence has site allocations within the Plan which will provide additional support for the Town Centre of Monmouth.</p> <p>Disagree that Llanfoist should be included within the retail hierarchy as both the Central Shopping and Commercial Area and Primary Shopping Frontages are located within the Town Centre of Abergavenny.</p> <p>Usk has been redesignated as a Minor County Town Centre and as a result has a Central Shopping and Commercial Area designation which provides a level of protection to the area.</p> <p>The detailed policies within the RLDP provide protection to the existing Town Centres in Monmouthshire. It is recognised that in some instances regeneration initiatives and environmental improvements may be necessary and these are supported through the policy framework of the RLDP.</p>
LPA Recommendation	No change required.
Town centre first approach	<ul style="list-style-type: none"> Note Town centre should come first, reference made to petrol station near High Beech roundabout, Chepstow suggesting this policy has not been applied [Cllr Louise Brown].
LPA Response	Comment noted. The Town Centre first approach is reflected within the Plan's policy framework in accordance with national planning policy.
LPA Recommendation	No change required.
Policy wording and context	<ul style="list-style-type: none"> Not clear in how the aim of enhancing the role and function of town centres will be achieved in the future. Suggests this is aspirational and ignores the current decline in achieving those objectives for either Caldicot or Chepstow [Private individual x 1]. Proposed solutions in policy do not instil confidence in a quick and robust improvement to the quality and diversity of facilities [Private individual x 1].
LPA Response	Comment noted, the detailed policies within the RLDP provide protection to the existing Town Centres, Local Centres and Neighbourhood Centres in Monmouthshire. It is recognised that in some instances regeneration initiatives and environmental improvements may be necessary and these are supported through the policy framework of the RLDP.

LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> • Would like to work with Monmouthshire on all issues concerning town centre planning, placemaking under the transforming towns programme and Place Plans [Abergavenny Town Council and Abergavenny & District Civic Society]. • Questions whether the RLDP will force developers to provide essential elements of the community such as community halls, shops and affordable housing at an early stage [Disability Advice Project]. • Usk is mentioned as somewhere that would benefit from more opportunity to walk and cycle but understand has not been allocated any of the active travel budget [Private individual x 1]. • Reference is made to specific properties in Abergavenny requesting a review of uses of vacant properties/sites [SOUL]. • State Caldicot should be regenerated as it has an anti-social behaviour problem [Private individual x 1]. • Desperate need to review the business rates system at a national level. Will help address vacancies in centres [Private individuals x 3] • Traffic congestion in south-east Monmouthshire is impacting on Chepstow Town Centre [Private individual x 1]. • Suggestion that Chepstow does not fulfil role effectively as Gateway to Wales due to lack of amenities and lack of effective planning for increased levels of traffic. Essential to ensure large scale developments are put into this context to ensure present and future residents are given opportunity to live close to viable towns and able to travel easily in and out of towns for additional needs that cannot be met by those towns such as access to A&E [Private individual x 1] • Caldicot East will increase the numbers of people using the town, the number of parking spaces will need to be increased to allow for this, particularly disabled spaces [Private individual x 1]. • Suggestion one of the main reasons for the decline of Caldicot and Chepstow is the removal of the bridge tolls which makes shopping centres in Bristol more accessible [Private individual x 1]. • More needs to be done to entice exciting new businesses to open, not just hair salons, barbers and coffee shops [Private individual x 1].
LPA Response	<p>Comments noted. The RLDP process allows for consultees to be involved at key stages of the plan preparation process. Infrastructure requirements will be assessed on a site-by-site basis. All of the allocated housing sites must deliver 50% affordable housing, details of the phasing to be agreed through trigger points in S106 agreements. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.</p> <p>Details of active travel funding streams are outside of the RLDP remit. Contributions towards active travel, walking and cycling routes can, however, be provided as part of developments and will be considered on a site-by-site basis based on evidence in Transport Assessments and Masterplans of proposals. An Infrastructure Delivery Plan has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Site specific considerations are included as an appendix to the Deposit Plan.</p> <p>The Urban Housing Potential study considers vacant sites and is included as part of the evidence base for the RLDP process. Vacant properties is a separate issue that is being considered in other departments of the Council, this is beyond the remit of the RLDP.</p> <p>It is recognised that in some instances regeneration initiatives and environmental improvements may be necessary for the County's Town Centres and these are supported through the policy framework of the RLDP.</p> <p>Business rates are set by national government and are outside of the remit of the RLDP process.</p> <p>Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Sites Assessment Report.</p>

LPA Recommendation	No change required.
Question 16 – Do you have any comments on Strategic Policy S11 Community and Recreation Facilities?	
<p>17 organisations or members of the public submitted a response to Question 16 – Community and Recreation facilities. Comments generally related to support for the policy, however, with suggestions for improvements. It was also noted that the policy was written for town/local centres (within/adjoining boundaries) and rural settlements/ areas outside of boundaries would benefit from the provision of some appropriate facilities.</p> <p>The key themes raised are set out below:</p>	
Key Theme	Summary of Points Raised
Support policy	<ul style="list-style-type: none"> Support this policy and the emphasis it places on protecting and retaining value facilities. Para 5.57 confirms to include buildings used for cultural purposes we suggest minor addition to include theatres on list of examples [Theatres Trust].
LPA Response	Support welcomed and comments noted. It is agreed theatres are important cultural facilities for communities.
LPA Recommendation	No significant changes required, however, minor wording changes have been made, including reference to theatres. The policy reference has changed to S15.
Provision Integral to new proposals	<ul style="list-style-type: none"> Such elements should be integral to all new proposals. The Well-Being Act directs us to consider an active lifestyle and wellbeing as important aspects of daily life. This is not going to be achieved by adding development to existing communities that are already lacking in provision and where the new development lies further away from facilities and the size of the development doesn't warrant increasing the provision [Melin Homes, Llanarth Estates, Tirion Homes, Candlestone Homes, Sero, Private Individual x2].
LPA Response	Comment noted. The Settlement Hierarchy set out in Policy S2 reflects the findings of the Sustainable Settlement Appraisal (SSA) which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. New allocations proposed in main rural (Tier 3) settlements reflect their position in the settlement hierarchy as our most sustainable rural settlements, and the spatial strategy is to direct growth to rural areas/communities that already have existing facilities on the basis that new growth will help maintain patronage and viability to existing community facilities in main rural settlements, rather than direct growth to smaller minor villages that do not have such provision.
LPA Recommendation	No significant changes required. The policy reference has changed to S15.
Suggested changes to policy/wording	<ul style="list-style-type: none"> This policy should go further, acknowledging the viability issues often associated with delivering such uses in isolation and therefore to allow for enabling residential development [Redrow Homes]. “Development proposals that result in the ‘unjustified’ loss of community and recreation facilities will not be permitted.” Need to remove the word “unjustified” as provides better protection to community facilities [Cllr Louise Brown]. “Where a town or local centre location is not available or appropriate, development proposals that provide and/or enhance community and recreation facilities will be permitted within or adjoining settlement boundaries subject to detailed planning considerations – suggest the following is

	added “ but not permitting such development adjoining settlement boundaries when this results in not protecting the green gaps between villages an between villages and towns to protect their distinct character and identity” [Cllr Louise Brown].
LPA Response	Although it is appreciated that viability of delivering community facilities in isolation is challenging, the plan led system in Wales requires residential allocations to come through the RLDP process. It is therefore not considered appropriate to include an enabling development exception policy within the RLDP for provision of community facilities. Enabling development circumstances are set out in National Policy. Justifications for the removal of community facilities are set out in Policy CI1 ‘Retention of Existing Community Facilities’. This policy sets out the justification tests and evidence required, such as viability evidence and marketing of a community facility, in order to justify the loss of change of use. It is considered that these tests are robust and fair because in some instances a loss of a community facility may be appropriate and, therefore, it is not considered necessary to remove the word ‘unjustified’. Policy CI3 sets out the justification tests for loss of recreational facilities and public open space, and similarly these tests are considered to be robust and balanced This Policy allows for development adjoining settlement boundaries where appropriate and subject to detailed planning considerations. In terms of protecting green gaps/coalescence between villages proposals green wedge national policy will apply in the assessment. National Policy does allow for some community facilities if it maintains the openness of the green wedge land. Policy CI3 safeguards open space designations.
LPA Recommendation	No significant changes required, policy reference has changed to S15.
Public Open Space	<ul style="list-style-type: none"> Public open space and amenity and are essential for the health and well-being of residents and there needs to be a separate policy on this topic or incorporated into Policy S11. New Policy suggested as follows “Where there is a new development the provision of open space and amenity land must always be included. Development will not result in any loss of public open space and amenity lands which must be protected, maintained and enhanced in its current location to continue and protect the green infrastructure already included within previous developments.” [Cllr Louise Brown].
LPA Response	Comments noted. Development Management Policies CI2, CI3 and CI4 provide set out the detailed policy framework relating to the provision of open space and the protection of open space and amenity land.
LPA Recommendation	No significant changes required, however minor wording changes have been made and the policy reference has changed to S15.
Allotments	<ul style="list-style-type: none"> Allocation for allotments and community growing projects in Abergavenny would be welcomed. [Abergavenny Town Council, Abergavenny & District Civic Society].
LPA Response	Comments noted. The policy provides support for allotment and community growing areas.
LPA Recommendation	No significant changes required, the policy reference has changed to S15.
Rural facilities	<ul style="list-style-type: none"> Many rural settlements have no community or recreational facilities. It is not clear how this policy will be able to change this[Llangybi Fawr Community Council]. Policy is written in such a way that there is assumption that community facilities will be located within a town or local centre. Some facilities listed are more likely to be better suited to areas outside of defined centres (e.g., cemeteries, allotments). The range of recreation facilities referred to in Para 5.59 are in most cases likely to be suited to areas outside of defined centres [Richborough Estates].

LPA Response	<p>Note that it can be difficult for new community and recreational facilities to come forward in rural settlements for various reasons, including viability. The policy, however, does support their provision. Furthermore, supporting Development Management policies protect existing community facilities within rural settlements (policy CI1) and protect recreation and open space (policies CI3 and CI4).</p> <p>The Policy does refer to community facilities being permitted adjoining settlement boundaries, this may be appropriate in some instances for cemeteries and allotments.</p>
LPA Recommendation	<p>No significant changes required, policy reference has changed to S15.</p>
Other	<ul style="list-style-type: none"> • There are no community facilities on large strategic sites so car travel to facilities is essential [Private Individual x1]. • What facilities? A new community hall in Magor and Undy where there are already several more that are barely used [Private Individual x1]. • Proposed solutions do not instil confidence in a quick and robust improvement to the quality and diversity of the facilities [Private Individual x1]. • Insufficient now [Private Individual x1].
LPA Response	<p>The larger strategic developments allocated within the plan - Land at Abergavenny East (policy HA1) and Land to the east of Caldicot (policy HA2) - are being masterplanned and it has been demonstrated that it is viable and feasible to include community facilities as integral elements of the schemes, such as local centres and playing fields. Active travel and footpath links within the sites will enable travel to these community facilities by other means than car and active travel and footpath links from/to the site will link these strategic sites to existing community facilities.</p> <p>Magor Community Hub is a modern multi-functional facility that is considered positive asset to the community by many. If community facilities in the area are no longer fit for purpose then policy CI1 'Retention of Community Facilities' allows tests for their re-purpose.</p> <p>Policy is there to provide the supportive framework for community facilities and for their protection, however, as recognised it is not the only mechanism to bring them forward.</p>
LPA Recommendation	<p>No significant changes required, policy reference has changed to S15.</p>

Page 157

Question 17 – Do you have any comments on Strategic Policy S12 – Employment Sites Provision

26 organisations or members of the public submitted a response to question 17.

Comments noted the importance of allocating suitable employment allocations alongside residential allocations. The need to provide further clarity on the Preferred Strategy proposal to increase job growth above past trends was also highlighted.

Key Theme	Summary of Points Raised
Allocations	<ul style="list-style-type: none"> • Concerned at the low level of candidate sites in Abergavenny/Llanfoist – suitable allocations should be made. [Abergavenny Town Council, Abergavenny & District Civic Society] • Residential development must take place in parallel with economic development. [Abergavenny Town Council, Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero, Private Individuals x 2] • Important a range of sizes and types of employment allocations are made across the settlement hierarchy. [Llanover Estates, Tirion Homes, Candleston Homes, Sero, Private Individuals x 2] • Important that land allocated for B uses are not released for other uses. [Abergavenny & District Civic Society]

	<ul style="list-style-type: none"> • Cumulative impact on the Gwent Levels should be considered when assessing candidate sites in Magor/Undy. [Cllr Frances Taylor] • Only two candidate sites for employment use in the countryside have been accepted for further assessment. It is evident that there will be a shortage of employment land to meet the targets. Further consideration should be given to the role of brownfield sites in non-isolated rural locations. [Private Individual]
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">LPA Response</p>	<p>It is acknowledged that limited candidate site options for employment use were received for the Abergavenny area and consequently, this has resulted in Abergavenny accommodating 3% of the employment land allocations. The Council will, however, continue to explore opportunities to bring forward vacant premises in Abergavenny for employment use, in conjunction with the Cardiff Capital Region (CCR) and relevant partners.</p> <p>The RLDP aims to broadly align the spatial distribution of housing and employment growth through-out the County and provide a range and choice of sites. Detailed site allocations are set out in the Employment and Economy section of the Plan under Policies EA1a-EA1m.</p> <p>Policy E1 – Protection of Existing Employment Land seeks to ensure land identified for employment uses is not lost to alternative uses.</p> <p>The cumulative impacts of site allocations are considered as part of the Integrated Sustainability Assessment and the Habitats Regulations Assessment.</p> <p>A key requirement of the High-Level Candidate Site Assessment was the compatibility of the site with the RLDP Preferred Strategy, part of which was the requirement to be within or adjoining the settlement boundary or the ruling out of sites in the open countryside unrelated to any settlement identified in the Settlement Hierarchy. This approach is consistent with national guidance which aims to locate development in the most sustainable and well-linked settlements. The RLDP does, however, include a policy framework to consider rural enterprise and rural diversification proposals, which will be considered on the site-specific merits.</p>
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">LPA Recommendation</p>	<p>Policy S12 of the Preferred Strategy is now titled Policy S10 – Employment Site Provision as a result of policy numbering being amended earlier in the Plan. The Deposit Plan makes provision for 57ha of employment land to meet the minimum requirement of 38ha identified in the Employment Land Review. The overarching principles of the policy remain the same, however, some wording changes have been made following a review of the whole Plan to better reflect the policy intention.</p>
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Job Provision</p>	<ul style="list-style-type: none"> • Council’s strategy to increase job growth above past trends will require greater clarity in the Deposit plan to evidence how the Council’s economic ambitions will be achieved. [WG, SOUL, Private Individual] • Need to rethink use of the phrase ‘economic growth and resilience’ – some parts of economic growth are un-resilient when put under a contemporary perspective of climate and nature emergency considerations. [Abergavenny Transition Town] • Policy should recognise the employment opportunities can come from various sources not just B use classes. [Grove Farm Estates & Development] • Policy does not seek to enhance the employment opportunities for internal workers for the need and demands of the demographics of Monmouthshire. [Cllr Louise Brown] • Create jobs first and improve infrastructure, then look at the requirement for housing. [Private Individual] • Most people travel out of the area to major cities for employment. Don’t need employment here due to proximity to major towns and cities and level of working from home. [Private Individuals x 2]
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">LPA Response</p>	<p>The jobs figure contained in the RLPD is based on demographic-led modelling which is considered to be robust and includes reasonable assumptions. The associated jobs figure represents the number of jobs that could be supported by the population and housing growth planned for over the Plan period. It is recognised that it is above the baseline forecasts, however, a policy-on approach provides an appropriate basis for the RLDP to ensure that the Plan can be sufficiently flexible in respect of changing circumstances and that the County can support long term growth in accordance with Welsh Government policy, which encourages the adoption of a long term and positive strategy, and the ambitions of the CCR. Whilst it is recognised the jobs target of 416 jobs per annum is higher than some past trends, it is within the range of past performance in the County.</p>

	<p>The proposed level of growth aims to provide a balance of housing and employment growth, as required by national planning policy. This alignment means that economic growth will not be undermined by inadequate housing or be reliant on unjustified levels of in-commuting. Similarly, the level of housing will not give rise to high levels of out-commuting. Supporting this level of growth will reduce the need to travel and travel to work distances, which will assist in addressing our challenges in relation to the climate and nature emergency and contribute towards a more balanced demographic profile in Monmouthshire</p> <p>The RLDP recognises that not all job growth will come from B Use Class uses and includes a policy framework to assess employment proposals in a range of sectors including retail, tourism and commercial uses.</p>
LPA Recommendation	No change required.
Site Specific	<ul style="list-style-type: none"> • Glascoed site is a major employer and should be covered by a suitable policy to support its future, ongoing use and/or allocate the Glascoed site as a 'Protected Employment Site'. [BAE Systems] • SAE1h – Land at Pill Row should be retained as an employment allocation. [F1 Real Estate Management Ltd]
LPA Response	<p>The contribution the BAE Systems Glascoed site makes to the Monmouthshire economy is recognised, however, given the scale and location of the site in the open countryside, it is not considered appropriate or necessary to allocate it for an employment use. Any enhancement proposals that come forward would be considered on their planning merits within the context of the existing use of the site.</p> <p>Candidate Site CS0007 – Land adjacent to Pill Row has been considered as part of the High-Level Candidate Site Assessment. This concluded that the site should not progress to Level 3a of the Candidate Site Assessment due to it being contrary to national planning policy in relation to flooding.</p>
LPA Recommendation	No change required.
General	<ul style="list-style-type: none"> • Reference to objection 5 – Minerals and Waste should be made in relation to Policy S12. [MPA] • Dwr Cymru will support economic development, however, obligations as a water and sewerage undertaker extends to 'domestic' supplies only. Where an employment allocation results in higher demands of water supply and/or trade effluent discharges we recommend early consultation. [Dwr Cymru] • No more out of town sites that make the population healthier – no fast-food places needed. [Private Individual]
LPA Response	<p>In the interest of brevity, the RLDP objectives listed in the Links to Wider Framework box are those that are considered to be most pertinent to the policy in question, however, most RLDP objectives are linked to every policy some way. It is not considered necessary to list all objectives in relation to each policy. Consultation and dialogue with Dwr Cymru have been ongoing throughout the preparation of the plan and identification of site allocations.</p> <p>In accordance with national policy, the Plan has a town centre first approach to uses such as restaurants and take aways including fast food premises. Any proposals that come forward will be assessed against the RLDP policy framework on a site-by-site basis.</p>
LPA Recommendation	No change required.
Site promoted in response to question 17	<ul style="list-style-type: none"> • BAE Systems – reference to Glascoed site not being in the CS register and that it should be allocated as a unique employment allocation. [BAE Systems] • F1 Real Estate Management Ltd – SAE1h Pill Row [F1 Real Estate Management Ltd] • Private Individual – CS0016 – East of little Mill; CS0139 – Land at Former Petrol Station, Llanover [Private Individual]

LPA Response	The BAE Systems site has been considered for its appropriateness to be allocated as a Protected Employment Allocation under policy EA2. However given the scale and its location of the site in the open countryside, it is not considered appropriate or necessary to allocate it for an employment use. Any enhancement proposals that come forward would be considered on their planning merits within the context of the existing use of the site. Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Sites Assessment Report.
LPA Recommendation	See the Candidate Sites Assessment Report for Candidate Site recommendations.

Question 18 – Do you have any comments on Strategic Policy S13 Rural Enterprise?

17 organisations or members of the public submitted a response to Question 18 – Rural Enterprise. Comments were supportive of the policy with some comments requesting that the policy wording be tighter to protect open countryside and Monmouthshire’s valuable farmland. Other comments were supportive of rural enterprise and would like to see supportive policy framework in relation to local food production and re-generate small holdings and vacant brownfield land outside settlement boundaries.

The key themes raised are set out below:

Key Theme	Summary of Points Raised
Supportive of diversification where there is clear link to local communities	<ul style="list-style-type: none"> Supportive of diversification of the rural economy where there is a clear link to local communities. Supportive of encouraging tourism uses within proximity to transport corridors giving access to key local facilities and services. This can positively support the rural economy and ensure local provisions remain viable and available to the community as a whole [Melin Homes, Llanarth Estates Tirion Homes, Candlestone Homes, Sero Homes, Sero, Private Individual x2].
LPA Response	Comments noted.
LPA Recommendation	No change required. However, due to changes earlier on the Deposit Plan the Strategic Rural Enterprise Policy is now numbered S11.
Disagree for new build	<ul style="list-style-type: none"> Agree to the re-use of existing buildings but disagree to new buildings/sites [Private Individual x1].
LPA Response	The policy objectives of S13 are consistent with policy guidance set out in PPW, particularly paragraph 5.6.3.
LPA Recommendation	No change required. However, due to changes earlier on the Deposit Plan the Strategic Rural Enterprise Policy is now numbered S11.
Term definitions	<ul style="list-style-type: none"> This policy area uses terms such as ‘rural’ ‘agricultural’ and ‘farm diversification’ without being clear of the meaning which are quite different [Abergavenny & District Civic Society].
LPA Response	The terms used are consistent with PPW, TAN 6 and Future Wales, Policies 4 – Supporting Rural Communities and Policy 5 Supporting the Rural Economy. The supporting text to Policy S13 also provides further clarification on the terms rural enterprise and agricultural diversification, consistent with TAN 6.

LPA Recommendation	No change required. However, due to changes earlier on the Deposit Plan the Strategic Rural Enterprise Policy is now numbered S11.
Need for local policy for small holdings/ local production/ housing to support small holding food production	<ul style="list-style-type: none"> • Supportive to see produce grown and distributed locally and the range of products and rural innovations extended to reduce the resilience on imported goods, so people are aware of the value of the countryside and locally grown produce [Melin Homes, Llanarth Estates, Tirion Homes, Candlestone Homes, Sero Homes, Sero 2954, [Private Individual x2]. • Suggest there is a need for a policy that responds to changes in farming and horticulture that are increasing the demand for small new holdings accompanied by an appropriately sized tied dwelling. The present LDP makes no reference to One Planet developments and recent applications assessed against rigorous Welsh Government guidance. There should be a wider enabling policy. As part of response to climate change emergency planning policy now needs to contribute to the enabling a return to smaller holdings serving local communities [Abergavenny & District Civic Society]. • This policy (alongside Policy S2 outside Tier1-Tier 4 settlements) suggests that a re-population of the countryside might be possible for smaller holders and small farmers and maybe it is other factors currently outside planning that make the achievement of this goal seem unattainable [Abergavenny Transition Town]. • There is a strong emphasis on the need to regenerate the County’s rural economy and rural settlements. The policy specifically refers to local food production (5.107) though the list of examples does not include efficient commercial regenerative agriculture on small farms. This is also recognised in Monmouthshire 2040: Our Economic Growth and Ambition Statement – this draft plan envisages rural development outside settlement development boundaries it of a scale and type compatible with the surrounding areas. Sometimes it will be possible to adapt existing buildings but building assets of much agricultural land have already been stripped and the land can only be brought back to efficient use by building small farmhouses. This process needs to be set out in the Deposit RLDP [Our Foods].
LPA Response	Strategic Policy S2 establishes the principle of rural enterprise dwellings and one planet development in locations outside of the settlement boundaries. Detailed guidance on the criteria applicable to each type of development is set out in TAN 6: Planning for Sustainable Rural Communities and One Planet Development Practice Guide and in accordance with WG guidance are therefore not repeated in the RLDP.
LPA Recommendation	No change required. However, due to changes earlier on the Deposit Plan the Strategic Rural Enterprise Policy is now numbered S11.
Employment uses limited to rural diversification	<ul style="list-style-type: none"> • Whilst appreciated that this policy is the only one addressing new development for employment use in the countryside, the scope is significantly limited to proposals for rural diversification. The policy fails to acknowledge the diversity of the countryside and consequently brownfield sites for employment in non-isolated locations are not taken in account for the purposes of the Growth Strategy [Private Individual x1].
LPA Response	Policy S13 of the Preferred Strategy addresses both rural diversification and rural enterprises. The Deposit RLDP also supplements this with detailed criteria-based policies to assess any proposals that come in on their merits. This is sufficient to consider a range of proposals.
LPA Recommendation	No change required. However, due to changes earlier on the Deposit Plan the Strategic Rural Enterprise Policy is now numbered S11.
Rewording suggestions	<ul style="list-style-type: none"> • Policy to be reworded to take account of highway impact of rural diversification proposals. It is important to add because a few developments along a rural agricultural lane between Pwllmeyric and Shirenewton which is single track have been approved, however, intensification is making the road impassable and damaging hedges and verges. This road network is a very important consideration for residents who live on farms and undertake farming activities [Cllr Louise Brown].

LPA Response	Highway considerations are covered by Strategic Policy S9 – Sustainable Transport and other detailed Development Management policies set out in the Deposit Plan, particularly MV1. Planning applications need to satisfy all relevant policies of the RLDP and therefore do not need to be repeated in S13 (now S11 in the Deposit Plan).
LPA Recommendation	No change required. However, due to changes earlier on the Deposit Plan the Strategic Rural Enterprise Policy is now numbered S11.
Farmland to be protected	<ul style="list-style-type: none"> Value farmland [Private Individual x1]. Our rural economy must be protected, and the development of agricultural land must not be allowed [Private Individual x1].
LPA Response	The RLDP seeks to protect best and most versatile agricultural land, however, this is not always possible in a Monmouthshire context given the high prevalence of high-quality agriculture land in the County. All four of the County's most sustainable settlements are surrounded by BMV agricultural land and it is therefore not possible to avoid development of such land via a different spatial strategy.
LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> The housing development in Usk runs contrary to all factors mentioned [Private Individual x1].
LPA Response	The level and distribution of growth throughout the County reflects the findings of the Sustainable Settlement Appraisal which has grouped settlements into tiers based on their role and function and has informed where development should be spatially located to achieve a sustainable pattern of growth. The level of growth proposed for Usk is considered to be appropriate for its position in the spatial hierarchy.
LPA Recommendation	No change required.

Question 19– Do you have any comments on Strategic Policy S14 Visitor Economy?

13 organisations or members of the public submitted a response to Question 18 –Visitor Economy. Comments were in general support for the policy supporting to boost Monmouthshire's economy and improve people's health and well-being, however concerns were raised into managing resulting impact, such as increased car movements and potential effect upon Monmouthshire's natural beauty.

The key themes raised are set out below:

Key Theme	Summary of Points Raised
Supportive of policy	<ul style="list-style-type: none"> Understand the importance of tourism to the economy of Abergavenny and the wider hinterland. Support the policy and look forward to developing our Placemaking plans in partnership with the County Council [Abergavenny Town Council]. Supportive of measures that actively encourage sustainable economic growth in the heart of the authority as opposed to M4 corridor. The 'stay local' advice that arose during Covid19 has encourage people to re-discover their local area and wider countryside [Llanarth Estates, Tirion Homes, Candlestone Homes, Sero Homes, Sero, Private Individual x2].
LPA Response	Support welcomed.

LPA Recommendation	No significant changes required, the policy reference has changed to S12.
Suggests rewording to policy	<ul style="list-style-type: none"> • Reword to ensure tourist facilities are located in areas that have the necessary facilities include toilets, parking and highway capacity [Cllr Louise Brown].
LPA Response	Comment noted. Development Management Policy 'T1 New of Extended Tourism Accommodation and Facilities in the Open Countryside' sets out specific tests and criteria to ensure that tourism proposals are sustainable and are demonstrated to provide positive benefits. A Sustainable Tourism Need and Impact Assessment will be required to support tourism proposals.
LPA Recommendation	No significant changes required, the policy reference has changed to S12.
Opportunity for marketing of tourist sites	<ul style="list-style-type: none"> • The LDP process is allowing identification of smaller candidate sites for protection, most of which have unique features such as SSSI, SINC status and other attributes. Some of these have more than one of these attributes and when taken together offer an opportunity for new tourism marketing to enhance the visitor economy even further [Private Individual x1].
LPA Response	Comment noted. Monmouthshire benefits from extensive natural assets, some which act as a tourist attractor, such as BBNP, Wye Valley National Landscape (AONB) and Gwent Levels. It is important however that these natural assets are protected and Policy T1 sets out criteria to protect our natural environment, as well as other policies within the plan including S5 and NR1.
LPA Recommendation	No significant changes required, the policy reference has changed to S12.
Adverse impact on landscape	<ul style="list-style-type: none"> • Monmouthshire is outstanding area of beauty and would be attractive to visitors but not if congestion problems continue [Private Individual x1]. • By allowing green spaces and historical landscapes to be developed would result in the decline of visitors to the area [Private Individual x1].
LPA Response	Comment noted. Development Management Policy T1 provides further guidance and policy tests for tourism proposals within Monmouthshire. One of the test criteria (g) is that the proposal must 'protect, maintain, and enhance landscape character, biodiversity, the resilience of ecosystems and the historic environment', criteria (i) requires 'necessary infrastructure capacity' and (j) requires proposals to 'prioritise, promote and facilitate sustainable travel and have safe and efficient highway design.' Tourism proposals will therefore be required to meet these criteria set out in the policy (as well as other criteria) and also demonstrate the need and impact of a proposal with a 'Sustainable Tourism Needs Impact Assessment.' Other policies within the plan will also be relevant and applicable to assessing tourism proposals.
LPA Recommendation	No significant changes required, the policy reference has changed to S12. Policy T1 provides further guidance and tests for sustainable tourism proposals within Monmouthshire.
Other	<ul style="list-style-type: none"> • Visitor economy is minimal in Chepstow bar the races. Chepstow has lost its attraction and the points raised here are vague [Private Individual x1].
LPA Response	Comment noted. S12 and accompanying Development Management Policy T1 provides supportive framework for tourism proposals within Monmouthshire.
LPA Recommendation	No significant changes required, the policy reference has changed to S12.

Question 20 – Do you have any comments on Strategic Policy S15 – Sustainable Waste Management?

13 organisations or members of the public submitted a response to question 20.

Comments were generally supportive of the policy but noted that waste is not restricted to household and commercial waste.

Key Theme	Summary of Points Raised
Support Policy Aims with amendments	<ul style="list-style-type: none"> Supportive of policy, however, waste is not restricted to household and commercial waste. Significant amount of agricultural waste – innovative technologies should be considered, such as anaerobic digestion. [Melin Homes, Llanarth Estates, Tirion Homes, Candleston Homes, Sero Homes Sero, Private Individuals x 2] Helpful to add a criterion noting that the storage and collection of waste or the unauthorised dumping of materials on sites without planning permission will be subject to enforcement proceedings. [Cllr Louise Brown]
LPA Response	Policy W1 of the Deposit Plan sets out the Council’s policy approach to open windrow composting and anaerobic digestion in rural locations. Policy S15 (now S17) – criterion v) addresses the need for storage and collection of waste in new developments. Enforcement action is subject to separate regulations and therefore does not need to be set out in policy.
LPA Recommendation	No change required, however, note that Policy S15 – Sustainable Waste Management is Policy S17 in the Deposit Plan.
Operational Issues	<ul style="list-style-type: none"> Introduction of wheely bins is not suitable. [Private Individual] No longer any municipal waste facility in Usk – noticeable increase in fly-tipping in the area since its closure. [Private Individual] Stop charging garden waste as an ‘extra’. [Private Individual] Reusable bags for recyclables will most likely result in litter being created as rubbish escapes bags. [Private Individual]
LPA Response	Comments noted, however, these relate to the operational side of waste collection and have been passed onto the relevant development for information.
LPA Recommendation	No change required.

Question 21 – Do you have any comments on Strategic Policy S16 – Minerals?

6 organisations or members of the public submitted a response to question 21.

Comments noted the policy requirement to prepare a Statement of Sub-Regional Collaboration to ensure mineral apportionments set out in the RTS2 are met. Detailed policy wording amendments were suggested by the Mineral Products Association.

Key Theme	Summary of Points Raised
Mineral Products Association (MPA) comments	<ul style="list-style-type: none"> Amend policy to read: i) safeguarding known/potential sand and gravel, (delete crushed rock) (replace with) sandstone and limestone resources for possible future use, as well as the minerals related infrastructure. [MPA] Amend policy to read ii) maintaining a minimum 10-year crushed rock (add word minimum), 7 years land-based sand and gravel reserves throughout the plan period in line with the requirements of the (add wording) national planning policy in PPW and the latest Welsh Government Technical Statement on Aggregates. [MPA] Clarification sought on how the required 7 years land-based sand and gravel requirement will be met – assume identification of Preferred Areas or Areas of Search is site specific allocations are not brought forward. [MPA] Paragraph 5.91 should include the following revisions – “This seeks to ensure that valuable finite resources are safeguarded for possible extraction (add) [together with mineral infrastructure] and that the use of secondary and recycled aggregates is maximised in preference to primary aggregates.” [MPA] SWRAWP annual report indicates that Ifton Quarry has been inactive for years. RTS also recognises that much of the limestone resources in South Wales lie beneath the water table within a principal aquifer. Seek clarification of how the LPA will deliver a steady and adequate supply to deliver the local plan aspirations particularly if no allocations are being brought forward. Suggest identification of Preferred Areas or Areas of Search if site specific allocations are not brought forward. [MPA] Paragraph 5.95 – “safeguarding areas for potential sources of sand and gravel and crushed rock aggregates, (add text) [together with mineral infrastructure], will be identified on the Proposals Maps accompanying the Deposit Plan in accordance with (add text) [PPW, the RTS], the National Minerals resource Maps and the National Aggregates Safeguarding Maps for Wales.” [MPA] Welcome clear policy requirements for buffer zones in the Deposit Plan. Also seek assurances that criteria against which mineral applications are considered are covered in DM policies applied to all developments, not just minerals. [MPA]
LPA Response	<p>Reference to crushed rock replaced with sandstone and limestone for clarification on the crushed rock applicable in Monmouthshire’s case. Specific reference to mineral related infrastructure not considered necessary as that would have to form part of a planning application.</p> <p>The RTS2 states that land-won sand and gravel is dredged from the Severn Estuary and Bedwin Sands. Discussions with British Marine Aggregate Producers Association (BMAPA) in 2019 suggest that similar levels of marine aggregates production are likely to continue in future years. The RTS2 therefore concludes that it is reasonable to suppose that marine-dredged aggregates will continue to supply a similar proportion of overall demand as they have done over the last decade and applies zero apportionment to Monmouthshire for sand and gravel reserves. Reference to maintaining a 7-year land bank for sand and gravel reserves has been removed from the policy to avoid confusion.</p> <p>The RLDP and reliance on reserves at Ifton Quarry to meet its apportionment is consistent with the recommendations of RTS2. Recent planning applications to discharge conditions at Ifton Quarry indicate that Hanson Aggregates intend to commence working at the quarry.</p> <p>A buffer zone has been included in the Deposit Plan around Ifton Quarry. The Deposit RLDP notes that mineral planning applications will be considered against national planning policy set out in PPW and MTAN1, as well other detailed policies of the Plan.</p>
LPA Recommendation	<p>Change reference to crushed rock to sandstone and limestone in Strategic Policy S16.</p>

Coal Authority Development Risk Plans	<ul style="list-style-type: none"> The Coal Authority has provided Development Risk plans for the Monmouthshire Area. This data identifies those parts of the area where coal mining features are recorded to be present at surface and shallow depth. LPA is expected to assess any sites being considered for allocation against this data in order to ensure that any constraints or issues arising as a consequence of the coal mining features can be identified at an early stage in the process. [Coal Authority] 	
LPA Response	Comments welcomed. Based on the information on the Coal Authority's interactive maps, there are no RLDP allocations located within identified Development High Risk Areas or features recorded to be present at surface and shallow depths. Interactive Map Viewer Coal Authority (bgs.ac.uk)	
LPA Recommendation	No change required.	
Page 1586	Regional Collaboration <ul style="list-style-type: none"> Torfaen CBC are ready to work with neighbouring LPAs on the former Gwent Statement of sub-regional collaboration as regards aggregate minerals in time for your deposit. [Torfaen CBC] It is a requirement of the RTS2 for all authorities, including Monmouthshire, to agree a Statement of Sub-Regional Collaboration (SSRC) on their contribution to the future provision of aggregate production in the Former Gwent sub-region. A SSRC is pertinent for the region as the RTS2 identifies a shortfall of crushed rock in Newport and Torfaen, with extensive unworked reserves in Monmouthshire. [WG] Not aware of any progress on the sub-regional statement of collaboration. [MPA] Gloucester CC do not consider it likely that materially significant mineral and waste impacts will emerge for Gloucestershire CC as a result of implementing the PS proposals. [Gloucestershire CC] 	
	LPA Response	Monmouthshire CC is in ongoing discussions with the other authorities making up the Former Gwent Sub-Region and the latest position on satisfying the RTS2 apportionments is set out in the SSRC Position Paper.
	LPA Recommendation	Continue ongoing discussions with the Former Gwent Sub-Region.
General	<ul style="list-style-type: none"> Add reference to national and regional policy requirements to the policy wording for clarity. [Cllr Louise Brown] 	
LPA Response	The policy and supporting text already set out national and regional policy requirements.	
LPA Recommendation	No change required.	

Question 22 – Do you have any comments on Strategic Policy S17 Green Infrastructure, Landscape and Nature Conservation?

30 organisations or members of the public submitted a response to Question 22 –Green Infrastructure, Landscape and Nature Conservation.

There is overall support for the Policy however some requests for wording changes and technical policy wording. Some respondents feel that proposing development on Greenfield land contradicts with the purpose/aims of this Policy.

The key themes raised are set out below:

Key Theme	Summary of Points Raised
Supports Policy	<ul style="list-style-type: none"> • Supports the principle of Policy S17 [Vistry]. • Principle supported, however, the Plan should be cautious not to over burden individual sites with policy requirements both through S17 and others that risk making otherwise viable sites undeliverable [Redrow Homes]. • Supports policy, but they are not reflected in the High-Level Assessment of the Candidates Sites [Mrs Shan Henshall]. • Supports Policy but the Preferred Strategy does not comply with the aims of this Policy. The Council’s predetermination of the Preferred Site in Chepstow cannot maintain, protect or enhance the County’s landscape [Cllr Christopher Edwards, Private Individual x1].
LPA Response	<p>Support welcomed.</p> <p>The High level Assessment of the Candidates Sites only considered fundamental constraints – it did not assess ecological and landscape considerations. Such matters were assessed as part of the stage 3a Candidate Site Assessment process.</p> <p>Candidate Sites that progressed from the High Level Assessment, have been subject to a detailed assessment through the stage 3a candidate site assessment process, which includes consideration of sites’ impact on landscape character. Policy S15 as well as landscape policies LC1-LC5 seeks to ensure development proposals do not have an unacceptable impact on the surrounding landscape character.</p>
LPA Recommendation	No significant changes required, the strategic policy reference has changed to S5.
Suggests word change	<ul style="list-style-type: none"> • Not all measures will be applicable, feasible or viable for each development proposal. Respectfully suggest that the phrasing ‘will include’ is substituted with ‘may include subject to site-specific considerations’ [Redrow Homes Limited, Edenstone, Barwood]. • Wording of the policy should be amended to add ‘take of reasonable steps’ ahead of maintain, protect, and enhance. This would be consistent with the wording and messaging of PPW [Richborough Estates]. • Add reference to maintaining and enhancing public open space, amenity land and heritage assets to the Policy [Cllr Louise Brown].
LPA Response	<p>It is not considered appropriate or necessary to change the policy wording as suggested. One of the RLDP’s key objective is to ‘protect, enhance and manage the resilience of Monmouthshire’s natural environment, biodiversity and ecosystems and the connectivity between them’, and in view of national policy PPW12 Chapter 6 and in order to meet the Section 6 Duty of the Environment (Wales) Act 2016 ,it is considered necessary for the policy to include strong and robust policy wording.</p> <p>Protection of and maintenance of open space and amenity land is covered under policies CI3 and CI4.</p> <p>Heritage assets has been added to the wording of Strategic Policy S5.</p>
LPA Recommendation	No significant changes required, the strategic policy reference has changed to S5.
Biodiversity Gain	<ul style="list-style-type: none"> • Point (ii) should include reference to biodiversity gain in line with PPW11 [Melin Homes, Llanarth Estates, Tirion Homes, Candlestone Homes, Sero Homes, Sero, Private Individual x2].
LPA Response	The requirement for biodiversity gain/net benefit has been included in Development Management Policy NR1 Nature Recovery and Geodivseristy. Reference to net biodiversity gain is also made in the supporting text to Strategic Policy S5.
LPA Recommendation	No significant changes required, the strategic policy reference has changed to S5.

SuDS	<ul style="list-style-type: none"> Fully endorse this policy in particular criterion vi) the incorporation of SuDS schemes into green infrastructure has multiple benefits from a water resource and environmental perspective [Dwr Cymru/Welsh Water].
LPA Response	Support welcomed.
LPA Recommendation	No significant changes required, the strategic policy reference has changed to S5.
Landscape	<ul style="list-style-type: none"> We support part (i) of S17 from a landscape perspective. The policy wording appears to distinguish landscapes as a subset of Green Infrastructure. We advise that landscapes are considerably broader than Green Infrastructure. Green Infrastructure doesn't include entire landscapes or include all elements of landscape, for example excluding agricultural land, buildings and structures. These distinctions should be acknowledged in the justification [NRW].
LPA Response	Comment noted. Specific policies in relation to the protection and enhancement of landscape character are set out in Development Management Policies LC1-LC5.
LPA Recommendation	No significant changes required, the strategic policy reference has changed to S5.
Ecosystem resilience	<ul style="list-style-type: none"> Ecosystem resilience in the county of Monmouthshire is comparatively poor (evidenced by ecosystem mapping). We suggest this fact be incorporated into the supporting text to reflect the current 'health' of green infrastructure access the county and this needs to be improved/strengthened [NRW].
LPA Response	Comment noted. Development Management Policies GI1 Green Infrastructure and NR1 Nature Recovery includes further text to enhance and strengthen GI and ecological resilience across Monmouthshire.
LPA Recommendation	No significant changes required, the strategic policy reference has changed to S5.
Water environment	<ul style="list-style-type: none"> Consider that although part (vi) of the policy wording broadly covers the need for new development to maintain, protect and enhance GI through water resource management we do not consider the policy justification has conveyed the significance and importance of the water environment in this context. It is limited to the current challenge of the phosphorus issue [NRW]. The water environment within Monmouthshire is under significant pressure. Our Water Quality Monitoring data suggests that numerous waterbodies are failing both the Water Framework Directive (WFD) targets and Habitats Directive (HD) targets. The RLDP has a role to play to prevent further deterioration as a result of development. While phosphorus levels in the SAC rivers area key concern this is far from the only water quality issues. It is recommended that this section be revised to include specific reference to the Water Environment and the importance it has within the context of S17 [NRW]. In terms of what new developments should be seeking from a water environment perspective the RLDP should inform prospective developers that where there are watercourses running through sites solutions should be found to leave the watercourse to run its natural course. New culverts, dams or impoundments should be avoided to maintain river connectivity. Where there are existing impoundments solutions should be sought to have these removed - this might be better located in a Development Management Policy [NRW].

LPA Response	Comment noted. Development Management Policies NR3 Protection of Water Sources and the Water Environment includes further text to convey the importance of protecting the water environment. A note within the policy text of NR3 has also been included in relation to leaving watercourses to run their natural courses.
LPA Recommendation	No significant changes required, the strategic policy reference has changed to S5.
Canals	<ul style="list-style-type: none"> • Pleased to note canals are specifically recognised as GI although document would be improved if the Monmouthshire & Brecon Canal was specifically recognised [The Canal and River Trust].
LPA Response	Comment noted and canals are referred to within the supporting text to Policy GI1 and Policy NR3. It has not been possible to specifically reference the Monmouthshire and Brecon Canal in need to keep the RLDP succinct, however GI SPG is to be developed and specific reference could be made within this supporting guidance.
LPA Recommendation	No change required.
Dark skies/light pollution	<ul style="list-style-type: none"> • Suggest policies relating to Tranquillity and Dark skies/light pollution are developed alongside S17 through a Development Management policy [NRW].
LPA Response	Comment noted. The RLDP includes Development Management Policy LC5 Dark skies and lighting which refers to light pollution and protecting dark skies tranquillity.
LPA Recommendation	No significant changes required, policy reference has changed to S5.
Green Belt/Green Wedge	<ul style="list-style-type: none"> • Disappointing there is not mention of creating a green belt/wedge when allocating candidate sites [Abergavenny Town Council]. • Policy support advice that assessments such as Green Belt/ Green Wedge designation should be done early in the process [Private Individual x1]. • No reference to The ofwhich should have been published alongside the Preferred Strategy to inform where the proposed level of growth will go [Private Individual x1].
LPA Response	A Green Wedge Assessment has been undertaken to inform the RLDP process.
LPA Recommendation	No significant changes required, policy reference has changed to S5.
Other	<ul style="list-style-type: none"> • Disappointing not to see a comparable strategic policy for maintaining protecting and enhancing the built fabric of the County especially the heritage features [Abergavenny & District Civic Society]. • Grove Farm care villages can be delivered in line with S17 [Grove Farm Estates & Development]. • The Landscape Character Assessment of the preferred site in Chepstow downgrades the value of the landscape character with no explanation or reflection of previous work. Has it been influenced by the speculative developer's own assessment in 2019? [Cllr Christopher Edwards, Private Individual x1]. • Support for the policies aims are countered by statements around recognition that the whole of Monmouthshire is a rural county and therefore exceptions must be made [Private Individual x1]

	<ul style="list-style-type: none"> How can Policy S17 be achieved if new housing is built on green space? [Private Individual x1].
LPA Response	<p>Maintaining, protecting and enhancing Monmouthshire's built environment is addressed within Policy S3 - Sustainable Placemaking and High Quality Design, as well as Policy HE1 Conservation Areas. National Policy Chapter 6 of PPW and TAN24 also provide policy protection and guidance to the historic built environment.</p> <p>Grove Farm care village Candidate Site has not progressed through the RLDP process.</p> <p>The Landscape Character Sensitivity Assessment is carried out by an independent accredited Landscape consultant.</p> <p>Brownfield opportunities have been considered through the site selection and candidate site process, however, there are limited brownfield opportunities in Monmouthshire and therefore greenfield opportunities have had to be considered to meet our key housing and employment requirements. Policy S5 and the supporting development management policies aim to protect and enhance our natural environment and there is a requirement to provide net biodiversity gain through mitigation and compensation of proposed developments, as set out in National Policy.</p>
LPA Recommendation	No significant changes required, policy reference has changed to S5.

Question 23 – Do you agree with the recommendations with regard to the existing Adopted LDP Development Management Policies?

39 Organisations or members of the public submitted a response to question 23.

There was general support overall for the existing Development Management Policies. A number of organisations and members of the public recommended changes to the existing wording.

Key Theme	Summary of Points Raised
General support for existing DM policies	<ul style="list-style-type: none"> Provide general support to the existing LDP policies and review recommendations [Abergavenny Town Council (1056.R25), Home Builders Federation, BB3 Limited, Leathdunn Ltd, Johnsey Estates UK, Manor Farm Partnership, Johnsey Estates 2020 Ltd, The Chepstow Society, Vistry Group, The Coldbrook Estate, Private individuals x 5].
LPA Response	Support noted.
LPA Recommendation	Updated Development Management policies are included in the Deposit Plan as a result of new evidence, guidance and local factors that have emerged as the Plan has progressed.
Housing	<ul style="list-style-type: none"> State H1 should make it clear that Abergavenny and Llanfoist are classified as a single settlement [Grove Farm Estates & Development]. Refer to Policy H3 (Residential development in Minor Villages) note any rewording of this policy must not undermine the requirement that minor infill can only take place between existing dwellings as opposed to existing buildings [Raglan Community Council]. Supports retention of Policy H7 and the intention to reflect PPW guidance on Affordable Housing Exception sites within or adjoining all settlement boundaries. Suggest it is important to review existing settlement boundaries to ensure all settlements include an appropriate boundary [Monmouthshire Housing Association & Private individuals x 2].
LPA Response	Llanfoist is noted as forming part of the Primary Settlement of Abergavenny throughout the RLDP, with further details set out in the Sustainable Settlements Appraisal.

	<p>With regards to the appropriateness of infilling between existing buildings, there may instances where infilling between existing buildings that are not dwellings will be acceptable.</p> <p>Support for the affordable housing exception site policy approach is welcomed. Settlement boundaries have been reviewed as part of the evidence base.</p>
LPA Recommendation	No change required.
Enterprise and Employment	<ul style="list-style-type: none"> Support Policy E2 (Non-allocated employment sites) noting this facilitates employment development outside of the urban settlements when it is justified and fully meet the criteria [Private individual x 1]. Suggest the omission of Policy E3 (Working from Home) may be unwise at a time this may be increasing, dealing with complaints may require clarity of rights and policy, should be worded to cover all business use, including that for a business based elsewhere [Abergavenny & District Society]. Refers to E3 (Working from Home) suggesting it is useful to continue with this policy as it makes clear that this is permitted provided there is no adverse impact on the local amenity and/or character of the area. Suggest also adding 'and no adverse impact on neighbourhood parking in the area' [Cllr Louise Brown]. Refer to Policy E3 (Working from Home) noting this will become an increasing trend, but is only available with the right infrastructure, suggest the Council should have a policy on this provision, with goals for broadband speed to all communities and encouraging broadband provision within the County [Private individual x 1].
LPA Response	<p>Support for Policy E2 – Non-Allocated Employment Sites welcomed.</p> <p>A specific policy on working from home is not considered necessary and is sufficiently covered by other policies.</p>
LPA Recommendation	No change required.
Rural Economy	<ul style="list-style-type: none"> State RE3 should be renamed to 'Farm Business Diversification [Abergavenny & District Society]. Refer to Policy RE5 (Intensive livestock/Free range poultry units) noting policy should be amended to take account of the potential effects of inappropriately located livestock development has on air quality. Suggest part d) could be amended to state 'the unit is located, designed, and uses appropriate technology, to minimise the nuisance of smell, noise and air and water pollution' [Natural Resources Wales].
LPA Response	<p>The policy title 'Agricultural Diversification' given to policy RE3 is consistent with national guidance on this policy area.</p> <p>Agree with the suggestion to include reference to air pollution in policy RE5.</p>
LPA Recommendation	<p>No change required in relation to policy RE3.</p> <p>Add reference to air pollution in policy RE5 – Intensive Livestock/Free Range Poultry Units.</p>
Retail	<ul style="list-style-type: none"> Suggest RET1 and RET2 policies need to be consistent with Placemaking Strategies proposed under S10 [Abergavenny Town Council and Abergavenny & District Society].
LPA Response	<p>Comments noted. The need to sustain and enhance the County's towns and local centres as vibrant and attractive centres, serving the needs of their population and those of their surrounding hinterlands, is a key objective of the RLDP. The policies in the Retail and Commercial Centres chapter reflect this ambition.</p>
LPA Recommendation	No change required.

Landscape	<ul style="list-style-type: none"> • Suggest LC6 (Green Wedges) should be fully adopted and incorporated in the RLDP to meet S17 [Abergavenny Town Council]. • State LC6 (Green Wedges) should be strengthened by adding ‘and to prevent urban sprawl and to protect and enhance the distinct character and identity of the villages and towns’ [Cllr Louise Brown]. • Suggests any changes to LC6 (Green Wedges) should be consulted upon before being incorporated into the Plan [Private Individual x 1]. • Review of LC6 (Green Wedges) is supported [Taylor Wimpey].
LPA Response	<p>Comments noted. The Green Wedge policy has been included within the RLDP Deposit Plan with relevant amendments and is now referenced as Policy GW1. The Policy sets out the green wedge designations in the county. The definition and purposes of green wedges is set out in PPW12 and, therefore, it is not necessary to repeat this in the policy.</p> <p>Green wedge designations will be consulted upon as part of the Deposit Plan consultation.</p> <p>A Green Wedge Assessment has been undertaken to inform the RLDP process.</p>
LPA Recommendation	Policy GW1 (formerly LC6) has been amended to reflect the findings of the Green Wedge Assessment.
Renewable Energy & Energy Efficiency	<ul style="list-style-type: none"> • State SD1 and SD2 need greater commitment to deliver this policy in the RLDP to meet S17 [Abergavenny Town Council].
LPA Response	The relationship between renewable energy (formerly SD1) and sustainable construction (formerly SD2) with green infrastructure and nature conservation objectives is fully recognised and reflected in the RLDP policy framework. Section 10 of the Deposit RLDP provides an updated policy framework in relation to Climate Change requirements including a requirement for new homes to be net zero, renewable energy generation targets and assessment criteria for renewable energy proposals.
LPA Recommendation	Refer to Section 10 of the Deposit RLDP for the updated climate change policy framework.
Flooding	<ul style="list-style-type: none"> • No objection to the deletion of SD3 and to rely on national policy. State there is opportunity to include locally specific policy if found necessary through the SFCA work within the broader spatial policy for climate change (S4) [Natural Resources Wales]. • Suggest the policy should be retained due to the importance of preventing local flooding as a reminder to its importance both locally and nationally through TAN15. Useful to have a policy that clarifies highly vulnerable development will not be permitted [Cllr Louise Brown]. • Suggest policy is retained due to climate change and likelihood of more flooding, also to ensure local considerations aren’t lost by deleting [Private individuals x 3]
LPA Response	The importance of preventing flooding is recognised within the RLDP, however, national policy contained within PPW12 and TAN 15 set out detailed national policy on development and flood risk and therefore do not need to be repeated in the Plan. Policy S4 – Climate Change, does however, require development to address the causes of, and adapt to the impacts of climate change including avoiding locating development in areas at risk of flooding and the incorporation of Sustainable Drainage Systems (SuDs).
LPA Recommendation	No change required.
Movement	<ul style="list-style-type: none"> • Supports the retention of MV1 (proposed developments and highway considerations) and the intention to update it in line with PPW refer to text in PPW11 which states ‘Planning authorities must support schemes which keep parking levels down, especially off-street parking, when well designed’

	<p>suggesting this statement should be considered in the context in any revised wording of Policy MV1 [Monmouthshire Housing Association, Edenstone and Private individuals x 2].</p> <ul style="list-style-type: none"> • Note MV4 (cycleways) relates to leisure cycling and should cover all aspects of Active Travel [Abergavenny Town Council & Abergavenny & District Society]. • Agree with recommendations set out for MV6 (Canals and redundant rail routes) that the existing policy has little benefit due to its limited scope. However, wish to advocate the need for an alternative strong canal related policy which recognises the multi-functionality of the canal and its wide-ranging benefits, note the existing policy is limited to considering sustainable transport alone. Provide detail of guiding principles for any new policy and suggested supporting text [The Canal & River Trust (Glandwr Cymru)]. • Notes MV9 (The Road Hierarchy) should be retained due to its importance as it makes important points about traffic congestion, refers to frontages on these roads [Cllr Louise Brown].
LPA Response	<p>Comments noted. Policy MV1 has been included in the Deposit Plan with some amendments – the new policy reference is ST1 Sustainable Transport Proposals. Policy ST1 has been updated in accordance with PPW12 and the policy supports car-free development in town centre locations where practicable.</p> <p>MV4 has been removed as cycling provision and connections is covered with Policy S13 and ST1</p> <p>MV6 has been amended to ST6 Protection of Redundant Routes where the focus is on re-purposing such routes for sustainable transport connections. Protection of canals and its wide-ranging benefits is covered in Policy S5 Green Infrastructure, Landscape and Nature Recovery and NR3 Protection of Water Sources and the Water Environment.</p> <p>MV9 has been retained and updated. The new reference for the policy is ST2 Highway hierarchy.</p>
LPA Recommendation	<p>Policies amended as set out above.</p>
Historic Environment	<ul style="list-style-type: none"> • Refer to reference on footnote on page 147, highlight the Historic Environment (Wales) Act that has been introduced to the Senedd is a consolidation act and will contain no new policies or legislation [Cadw]. • Suggest HE1 should be strengthened to align better with PPW11 paragraph 6.1.15 with a strong presumption against the granting of permission for developments which damage the character and appearance of a conservation area or its setting to an unacceptable level [Abergavenny & District Society].
LPA Response	<p>Comments noted, the detailed policies within the RLDP in the historic environment section cross reference national guidance and relevant legislation including the Historic Environment (Wales) Act, PPW12 and TAN24: The Historic Environment. Minor amendments have been made to both the policies and supporting text.</p>
LPA Recommendation	<p>The policies set out within the Historic Environment section have been updated to reflect updated National Policy , however none of the changes are considered to be significant.</p>
Community Facilities	<ul style="list-style-type: none"> • Supports the retention of policy CRF2 but considers text should be amended to ensure open space is assessed and provided in the context of existing provision: ‘Proposals for new residential development should provide appropriate amounts of outdoor recreation and public open space in accordance with the above standards where required. Any provision should be well related to the housing development that it is intended to serve, however the exact form and type will be determined having regard to the nature and size of the development proposed’ [Monmouthshire Housing Association, Edenstone and Private individuals x 2].

LPA Response	CRF2 (now referenced as CI2 in the Deposit Plan) has been updated to be in accordance with the latest Fields in Trust (FIT) standards. The Council has undertaken an Open Space Audit. This assesses the quantity of formal and informal public open space of existing provision within the County and compares this provision with the benchmark standards endorsed by FIT. The Open Space audit can be used as a means of justifying the provision of new recreational facilities and/or remedying local deficiencies in provision. It can also be used as a means of safeguarding and enhancing existing facilities as appropriate, as well providing the evidence and justification in seeking S106 financial obligations from developers where new housing development increases local recreational need.
LPA Recommendation	Policy CI2 (formerly Policy CRF2) updated to reflect FIT standards.
Green Infrastructure	<ul style="list-style-type: none"> Suggest it is likely GI1 will need to be amended to align with S17 and to ensure it delivers on the RLDP objectives regarding GI [Natural Resources Wales].
LPA Response	Comments noted. Policy GI1 has been updated to align with S17 (Policy reference changed to S5 in the Deposit Plan).
LPA Recommendation	Policy GI1 updated to align with Strategic Policy S5 and RLDP objectives.
Waste	<ul style="list-style-type: none"> Refer to there no longer being a tip in Usk and people having to drive to Abergavenny or Monmouth. Suggest not at a stage where the policy should be deleted as it is an on-going issue [Private individual x 1].
LPA Response	The principles of Adopted LDP policy W2 – Waste Recovery Facilities: Household, are considered relevant and necessary, but are considered to be adequately covered by other RLDP policies.
LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> Suggest there isn't enough detail in the table in order to provide comment as no supporting documentation [Private individual x 2].
LPA Response	Comments noted, the commentary provides a summary of the findings of officer working groups, however it is noted that this response is indicative and that changes would be made as new evidence, guidance or local factors emerge as the Plan progresses. As a consequence. the policies have all been reassessed in the formulation of the Deposit Plan.
LPA Recommendation	No change required.

Question 24 – Do you have any other comments on the Preferred Strategy?

42 organisations or members of the public submitted a response to Question 24 – ‘Any other comments on the Preferred Strategy?’

The key themes raised are set out below:

Key Theme	Summary of Points Raised
Archaeology/ Historic Guidance	<ul style="list-style-type: none"> The Preferred Strategy recognises the rich heritage of the area and type of historic assets designated with statutory protection. Refers to national guidance in relation to the historic environment and advisory role of GGAT [GGAT]. GGAT should be consulted at part of Candidate Site consultation review [CADW].
LPA Response	Comments noted. GGAT have been consulted on all Candidate Sites that remained in the process (Stage 3A) following the high level sift of Candidate Sites. GGAT will continue to be consulted throughout the RLDP process.
LPA Recommendation	No change required.
Housing mix	<ul style="list-style-type: none"> The suggestion that the Council are going to dictate private market mix is not supported [Redrow].
LPA Response	Comment noted. The housing mix policy included in the plan is in place to encourage a better mix of house types, tenure and size to help address demographic and affordability challenges facing the County. The policy does not dictate the private market mix but does point to the priority for small to medium size homes to help address these challenges.
LPA Recommendation	No change required.
Net zero carbon ready	<ul style="list-style-type: none"> The Council need to define the term 'net zero carbon ready' homes [Redrow].
LPA Response	In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included a change to the policy requirement for the environmental credentials of the new homes to be 'net zero carbon' rather than 'net zero carbon ready'. The Deposit Plan includes policy NZ1 which sets out the definition and the Council's standards for delivering Net Zero Carbon Homes'.
LPA Recommendation	Term 'Net Zero Carbon' homes is defined with Policy NZ1.
Green Belt/ Green Wedge	<ul style="list-style-type: none"> Disappointed in lack of inclusion for Green Wedge provision at this stage [Abergavenny Town Council, SOUL] Would have expected a strategic LDP policy dealing with both green belt/green wedges across the county. Green Wedges are strategic in terms of individual towns such as Abergavenny and should have been proposed at this stage of the Plan making process [Abergavenny & District Civic Society, SOUL]. Green Wedge to west of Rogiet should be rolled back to allow for development [BB3 Limited, Manor Farm Partnership, Private Individual x3]. Strongly object to the principle of a Green Belt in Monmouthshire [BB3 Limited, Manor Farm Partnership, Private Individual x3]. Question why the Green Belt included in Future Wales is not included in the Key Diagram [Persimmon Homes East Wales]. Vital that current Green Wedges are maintained [Private Individual x1]. Important to preserve the Green Wedge between Shirenewton and Mynyddbach [Private Individual x1].
LPA Response	A Green Wedge Assessment has been undertaken to inform the RLDP process. The green wedge west of Rogiet has been considered as part of the Green Wedge Assessment.

	<p>Future Wales Policy 34 advises that a Green Belt in the SE Wales region is to be designated as part of a Strategic Development Plan (SDP) for SE Wales. The Spatial Strategy has regard to Policy 34 and the indicative Green Belt boundary set out in Future Wales. Monmouthshire's primary settlements fall outside of the indicative Green Belt boundary. National planning policy allows for extensions to existing settlements within and adjoining the Green Belt of an appropriate scale having regard to the identified and longer term need for development land, the effects of development pressures in areas beyond the Green Belt, the need to minimise demand for travel, and the purpose of the overall greenbelt designation. It states that this may require land to be safeguarded and boundaries of proposed Green Belts must be carefully defined to achieve this. Potential Green Belt land is to be assessed and designated as part of a SDP for the South East Wales Region.</p> <p>It is not considered necessary to include the indicative Green Belt in the Key Diagram as the boundary will be informed by the SDP.</p> <p>The Green Wedge Assessment ensures that land has been reviewed relevantly to the updated Green Wedge purposes set out in PPW. National Policy sets out the guidance for the Green Wedge protection and expectations for some development proposals that maintain the openness of Green Wedge land.</p> <p>The Green Wedge between Shirenewton and Mynyddbach has been considered as part of the Green Wedge Assessment.</p>
LPA Recommendation	Green wedges have been assessed as part of the Green Wedge Assessment, the findings of which are set out in Development Management Policy GW1.
Climate Emergency	<ul style="list-style-type: none"> There is a lot in the Preferred Strategy that conflicts with the Climate and Ecological emergencies [Private Individual x1].
LPA Response	Brownfield opportunities have been considered through the site selection and candidate site process, however, given the limited brownfield opportunities in Monmouthshire, greenfield opportunities have had to be considered to meet our housing and employment requirements. There is a suite of policies in the Deposit Plan seeking to address climate and nature emergencies, including: NZ1 Net Zero Homes, CC2 Renewable Energy Allocation, CC3 Renewable Energy Generation, GI1 Green Infrastructure and NR1 Nature Recovery and Geodiversity.
LPA Recommendation	No change required.
Infrastructure	<ul style="list-style-type: none"> Community facilities are currently at saturation and there is little community spirit [Private Individual x1].
LPA Response	Comments noted. The RLDP provides support through the policy framework for new and improved community facilities.
LPA Recommendation	No change required.
Green Infrastructure	<ul style="list-style-type: none"> There is no cross reference to the MCC Green Infrastructure Plan [Abergavenny Town Council].
LPA Response	Policy GI1 Green Infrastructure and the supporting text cross references MCC'S GI Strategy, as well as the GI SPG.
LPA Recommendation	Cross reference in the supporting text of Policy GI1.
Water Environment/Phosphates	<ul style="list-style-type: none"> Forest of Dean is also concerned with regard to phosphate issues in the River Wye Catchment area though development is not currently restricted [FODDC]. The water quality in riverine SAC section should include details of the way in which improvements to WwTW under the AMP programmed needs to be explained as well as the decision to halt development in Monmouth [HBF].

	<ul style="list-style-type: none"> Plan making process is the only opportunity to review settlement boundaries therefore critical to consider where future development can be accommodated in Monmouth once a strategic solution to phosphates can be achieved [Private Individual x1].
LPA Response	The supportive text of Policy NR3 Protection of Water Sources and the Water Environment includes an explanation of DCWW's AMP process and is also addressed in paragraphs 4.1.3 – 4.15 in the key issues of the Deposit Plan. Welsh Government's response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Housing allocations, including a strategic site, have therefore been allocated in the Deposit Plan in Monmouth.
LPA Recommendation	The Deposit Plan has been updated to reflect the updated position that DCWW are committed to implement sewerage waste water treatment improvements. This includes allocating sites within Monmouth.
Designated Sites	<ul style="list-style-type: none"> Surprised the Severn Estuary Marine Site is omitted from the Summary Preferred Document (P7). This seems to be the only international designated site not mentioned in the summary document [Gloucestershire County Council].
LPA Response	Comments noted.
LPA Recommendation	The Severn Estuary Marine Site is referenced throughout the Deposit Plan and has also been considered throughout the HRA process. Protection Policy NR2 'Severn Estuary Recreational Pressure' has been included in the plan as a result of the HRA recommendation.
Plan Delivery/ timeline	<ul style="list-style-type: none"> The likely adoption date will mean the Plan will have less than 10 years 'live' [Torfaen County Borough Council]. Should there be any further slippage to the preparation of the plan the operational life of the RLDP will be reduced even further. Consequently, we would suggest that the plan period be extended to cover an increased timescale beyond 2033 with associated amendments to the housing requirement [Edenstone].
LPA Response	Comments noted. The development plans process does not allow for the Plan period to be extended beyond 2033.
LPA Recommendation	No change required.
Collaborative working	<ul style="list-style-type: none"> Will continue to work with Monmouthshire as the Plan progresses to ensure cross boundary issues are considered including growth levels, infrastructure [Torfaen County Borough Council].
LPA Response	Comments noted.
LPA Recommendation	No change required.
Suggestions	<ul style="list-style-type: none"> Home Builders Federation suggest that the fact that the County is not within a growth area as defined by the National Plan should be included and explained under the constraints section. This should include an explanation of how the plan's strategy has changed from the previous strategy [HBF]. The Strategy should include a review on how decisions have been made and if necessary, what needs to be done to improve this [Private Individual x1].
LPA Response	Welsh Government formally responded to the Preferred Strategy consultation in January 2023 with a 'green' rating and noting that "Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth

	and investment in the south east region, but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.” In this respect, the level of growth proposed has been deemed in conformity with Future Wales by Welsh Government. The Plan includes an extensive evidence base which will provides up-to -date robust evidence to support policy formulations and the information set out in the Plan. The evidence base will be available to view at Deposit consultation.
LPA Recommendation	No change required.
Candidate Sites	<ul style="list-style-type: none"> • Accepting Candidate Sites that would appear to fit the demographic bill would be catastrophic if they ignore the dangers of flooding, urban creep, increased traffic and overwhelming traffic [Private Individual x1]. • Would have been easier to comments on sites if details of infrastructure improvements had been provided [Private Individual x1]. • Preferred sites seem to have gone through a rigorous process that has come up with an outcome that is supported by evidence – however smaller sites need to go through the same process [Private Individual x1].
LPA Response	All Candidate Sites have been subject to detailed assessments – refer to the Candidate Sites Methodology and Candidate Sites Assessment Report for further details. An Infrastructure Delivery Plan has been prepared to support the Deposit Plan and will be published as part of the Deposit Plan.
LPA Recommendation	No change required.
Candidate Sites for Protection	<ul style="list-style-type: none"> • The criteria for assessment for protection does not exist. Concerned that sites for protection are now disadvantage compared with those for development [SOUL].
LPA Response	Protection Candidate Sites submissions have been assessed via other mechanisms forming part of the RLDP evidence base, which most closely relate to the suggested reason for protection. Further details are set out in the Candidate Site Assessment Report and the RLDP evidence base.
LPA Recommendation	No changes required.
New Settlement	<ul style="list-style-type: none"> • Inappropriate and unsound to rule out a long-term policy intervention such as a new settlement without fully considering the benefits that it can bring [Candlestone Homes], Sero Homes, Private Individual x1]. • New settlement in the right location would provide an appropriate long-term opportunity away from existing problems, constraints, and issues. We believe it should be eminently feasible for the RLDP to ‘dovetail’ with an SDP and such an approach can provide the most sustainable way forward and ought to be achievable in a multi-tiered development plan process [Sero Homes, Sero Homes, Private Individual x1].
LPA Response	Paragraph 3.53 of PPW12 states that “due to their strategic nature new settlements should only be proposed as part of a joint LDP, an SDP or Future Wales. This is due to their significance and impacts extending beyond a single local authority.” National Policy does therefore not allow New Settlements to be considered as part of the LDP process.
LPA Recommendation	No change required.
Chepstow	<ul style="list-style-type: none"> • Concerned about the lack of recognition of specific issues relating to Chepstow [The Chepstow Society].

	<ul style="list-style-type: none"> In Chepstow it will fail to achieve its objectives until there is a fundamental overhaul of the Business Rate System [Private Individual x1].
LPA Response	Comments noted. The Plan's issues are considered on a county-wide basis. The Infrastructure Delivery Plan considers specific infrastructure requirements for development proposals at Chepstow. Business Rates are not within the remit of MCC.
LPA Recommendation	No change required.
Reference errors	<ul style="list-style-type: none"> Should reference to Gloucestershire Council in paragraph 2.2 be GCC? [Gloucestershire County Council].
LPA Response	Comment noted.
LPA Recommendation	Reference amended accordingly.
Consultation process	<ul style="list-style-type: none"> Insufficient time given to prepare response to the consultation exercise from the Raglan drop-in session to the end of the consultation [Raglan Community Council]. Would welcome informal consultation with community groups prior to the publication of the Deposit Plan [Abergavenny & District Civic Society]. Online system to make comments is difficult to use [Private Individual x1]. More effort should be made in future public consultations to present information in an accessible format. The animation on webpage is excellent but hidden on webpages that require a lot of reading. Suggest public consultation in village halls and video played and explained in this setting [Private Individual x1]. The lack of respect for public opinion from previous consultations and in respect of allocating preferred development sites demonstrates the Council is not serving the best interests of the people it is there to serve [Cllr Christopher Edwards, Private Individual x1]. MCC doesn't want to listen to the views of the residents. Local residents have put forward hundreds of objections to development in Undy to no avail [Private Individual x1]. There are frequent statements that information on detailed policies will not be available to the Deposit Plan. The policies cannot therefore be evaluated till the publication of the Deposit Plan [Usk Civic Society]. Consultation documents animation and forms too complex suggesting feedback is not genuinely wanted [Private Individual x1].
LPA Response	<p>Raglan drop in was 19th January 2023 and deadline for comments was 30th January 2023. This gave 11 days between the drop in session and deadline for comments which is considered sufficient. Furthermore there were other drop in sessions available from the 12th December, including a drop-in session on the 19th December County Hall Usk and virtual session that was recorded and available to view on the planning policy website.</p> <p>Noted - consideration will be given to the potential for informal consultation prior to the formal Deposit Plan consultation.</p> <p>Noted in relation to animation. The Easy Read is produced to try and make the key information more accessible to communities. Note feedback that consultation forms are too complex and MCC will consider ways to improve the consultation/feedback process.</p> <p>All comments/ representations are considered throughout the plan making process. The Deposit Plan is considered to represent the best interests of Monmouthshire's residents by providing a sustainable level of growth that addresses our local issues and objectives including the delivery of much needed affordable homes, supporting sustainable economic growth, rebalancing our demography, while responding to the climate and nature emergency.</p> <p>Deposit consultation will allow further comment on the strategic policies as well as the details Development Management Policies.</p>

LPA Recommendation	Consider opportunities to improve the RLDP consultation process, as appropriate.
Other	<ul style="list-style-type: none"> • Contradictions between all levels of policies. We need decisive action to change the way we live and the structure of our county to help counter global warming and to protect our environment for the future. This strategy is ‘more of the same’ [Private Individual x1]. • Preferred Strategy contains well-meaning but vague statements with no indication of how these would be evaluated. The Deposit Plan must correct this problem [Usk Civic Society]. • I can only see that the way it has been written has been done so to provide the answers the planners wanted to hear [Private Individual x1]. • Wrong conclusions based on incomplete analysis [Private Individual x1].
LPA Response	<p>Comments noted.</p> <p>The Deposit Plan sets out the growth and spatial strategy to facilitate sustainable growth in the County up to 2033, embodying the principles set out in the Community and Corporate Plan of tackling inequality, protecting our environment and adapting to a world being reshaped by climate change. The Strategy has been informed by a wide range of robust evidence and responds to a number of key challenges that have arisen during the plan preparation process. Within this context, the RLDP seeks to deliver on the Vision and Objectives and meet our core purpose of delivering sustainable and resilient communities</p>
LPA Recommendation	No change required.

Page 1600

Question 25 – We would like to know your views on the effects that the proposals would have on the Welsh language, specifically on opportunities for people to use Welsh and on treating the Welsh language no less favourably than English. What effects do you think there would be? How could positive effects be increased, or negative effects be mitigated?

16 organisations or members of the public submitted a response to question 25.

Key Theme	Summary of Points Raised
Commuting	<ul style="list-style-type: none"> • Suggest it will not be possible to improve the use of the Welsh language as the majority of new residents will commute to Bristol and Cardiff. Suggest newcomers won't be interested as there is little opportunity to speak it in the area [Cllr Louise Brown, Cllr Christopher Edwards & Private individuals x 3] • State can only observe that in-migration is not likely to add significantly to the County's Welsh speakers but that newcomers may choose to learn the language while visiting [Abergavenny & District Civic Society].
LPA Response	<p>Comments noted. It is recognised that Monmouthshire has a relatively low proportion of population that speak, read and write Welsh compared to other Local Authorities in Wales. However, the promotion of greater opportunities for children, residents of all ages and the workforce to learn and speak Welsh is identified in the Monmouthshire Welsh Education Strategic Plan (WESP). Monmouthshire also has Welsh medium primary schools in Abergavenny, Caldicot and Monmouth (Monmouth is using a seedling school model from September 2024).</p>

LPA Recommendation	The Plan supports the aims of the WESP and will support steps taken within proposals to safeguard and grow the use of the Welsh language.
No effect	<ul style="list-style-type: none"> Suggest the proposals will have no effect on Monmouthshire and the use of the Welsh Language [Abergavenny & Crickhowell Friends of the Earth & Usk Civic Society].
LPA Response	Comment noted, the promotion of greater opportunities for children, residents of all ages and the workforce to learn and speak Welsh is identified in the Monmouthshire Welsh Education Strategic Plan (WESP). Monmouthshire has Welsh medium primary schools in Abergavenny, Caldicot and Monmouth (Monmouth is using a seedling school model from September 2024), children in new developments across the County will have access to these schools should they wish to attend a Welsh medium primary school. National planning policies provide advice regarding the consideration of Welsh language in development and will be taken into account in the determination of planning applications, where appropriate.
LPA Recommendation	The Plan supports the aims of the WESP and will support steps taken within proposals to safeguard and grow the use of the Welsh language.
Not relevant	<ul style="list-style-type: none"> Suggest Welsh Language is not relevant to planning policy [Private individual x 1]. Notes while the Welsh Language has importance in the historic language heartlands and Cardiff it can be a divisive issue in border areas, suggest it is a Welsh policy that doesn't fit to some local areas/Counties [Private individual x 1]
LPA Response	Comments noted. National guidance refers to the importance of the consideration of the needs and interests of the Welsh language in sustainable placemaking in Wales. The Plan reflects this approach.
LPA Recommendation	The Plan supports the aims of national Policy and the Monmouthshire Welsh Education Strategic Plan (WESP) and will support steps taken within proposals to safeguard and grow the use of the Welsh language.
Co-operative and community led housing	<ul style="list-style-type: none"> Refer to co-operative and community-led housing noting this has the potential to make a difference as part of the solution to the housing crisis in Wales. Suggest community-led models support the housing needs of a local community, ensuring there is sufficient affordable housing available, which in-turn protects the survival of the Welsh language [Cwmpas].
LPA Response	Comments noted, while no allocations are proposed specifically for co-operative and community-led housing these will be considered on a case-by-case basis through planning applications.
LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> Supports development of affordable housing sites to encourage younger demographics benefitting from Welsh Education by attending the local Welsh medium primary school to stay in the area. Suggest this helps to protect and enhance the Welsh speaking demographic to remain and grow in Abergavenny [Abergavenny Town Council]. Note the use of Welsh language must start in the schools and progress from there, leadership should come from Welsh Government [Private individual x 1]. Suggest family literacy classes should be offered to make learning Welsh together fun [Private individual x 1]. State candidate sites must have adequate provision for education in Welsh Language medium [Private individual x 1].

LPA Response	Comments noted, the promotion of greater opportunities for children, residents of all ages and the workforce to learn and speak Welsh is identified in the Monmouthshire Welsh Education Strategic Plan (WESP). Monmouthshire has Welsh medium primary schools in Abergavenny, Caldicot and Monmouth (Monmouth is using a seedling school model from September 2024), children in new developments across the County will have access to these schools should they wish to attend a Welsh medium primary school. National planning policies provide advice regarding the consideration of Welsh language in development and will be taken into account in the determination of planning applications, where appropriate.
LPA Recommendation	The Plan supports the aims of the WESP and will support steps taken within proposals to safeguard and grow the use of the Welsh language.
Site promotion	<ul style="list-style-type: none"> Refer to proposal for a senior neighbourhood noting there is an opportunity to incorporate the Welsh Language into signage, social events, and lessons. Suggest it offers an opportunity to allow local, Welsh speaking people to remain in their existing communities and brings opportunity for vacated housing stock to enter the market which could encourage younger residents to stay in the area bringing cultural vibrancy to Abergavenny and Llanfoist [Grove Farm Estates & Development].
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Site Assessment Report.
LPA Recommendation	No change required.

Page 10 of 20

Question 26 – Please also explain how you believe the proposals could be improved so as to have positive effects or increased positive effects on opportunities for people to use the Welsh language and on treating the Welsh language no less favourably than the English language?

4 organisations or members of the public submitted a response to question 26.

Key Theme	Summary of Points Raised
Proximity to England	<ul style="list-style-type: none"> State proposals cannot improve opportunities to increase the use of Welsh language in Monmouthshire as it is too close to England [Private individual x 1].
LPA Response	Comments noted. The promotion of greater opportunities for children, residents of all ages and the workforce to learn and speak Welsh is identified in the Monmouthshire Welsh Education Strategic Plan (WESP). Monmouthshire has Welsh medium primary schools in Abergavenny, Caldicot and Monmouth (Monmouth is using a seedling school model from September 2024), children in new developments across the County will have access to these schools should they wish to attend a Welsh medium primary school. National planning policies provide advice regarding the consideration of Welsh language in development and will be taken into account in the determination of planning applications, where appropriate.
LPA Recommendation	The Plan supports the aims of the WESP and will support steps taken within proposals to safeguard and grow the use of the Welsh language.
Cymraeg 2050, Welsh Language	<ul style="list-style-type: none"> Consideration should be given on how the RLDP can contribute to meeting the vision of the Welsh Language Measure and aims of Cymraeg 2050 as the new plan is formed [Welsh Language Commissioner (1341.R1)].

Measure and Strategy	<ul style="list-style-type: none"> The Council should consider its Welsh Education Strategic Plan (WESP) for 2022- 2032 and further the objectives of the WESP. Consideration should also be given to the Welsh Language Strategy for 2022- 2027 and explain how it will contribute to meeting the strategy's target for increasing the number of Welsh speakers in the area by 10% [Welsh Language Commissioner].
LPA Response	Comments noted, the promotion of greater opportunities for children, residents of all ages and the workforce to learn and speak Welsh is identified in the Monmouthshire Welsh Education Strategic Plan (WESP). Monmouthshire has Welsh medium primary schools in Abergavenny, Caldicot and Monmouth (Monmouth is using a seedling school model from September 2024), children in new developments across the County will have access to these schools should they wish to attend a Welsh medium primary school. Monmouthshire does not currently have any areas with a notable concentration of Welsh speakers. Subsequently, it is not considered necessary for the RLDP to contain a specific policy to address the Welsh language. National planning policies provide advice regarding the consideration of Welsh language in development and will be taken into account in the determination of planning applications, where appropriate.
LPA Recommendation	The Plan supports the aims of the WESP and will support steps taken within proposals to safeguard and grow the use of the Welsh language.
Welsh Language Impact Assessment	<ul style="list-style-type: none"> Torfaen County Borough Council are undertaking a Welsh Language Impact Assessment for their RLDP noting a major component is the promotion of Welsh medium education. Note the Welsh medium pupils in the north of Monmouthshire attend Ysgol Gymraeg Gwynllyw in Pontypool. Would like a discussion on how the proposed levels of housing growth in Monmouthshire impact upon this school [Torfaen County Borough Council].
LPA Response	Comment noted, it is recognised that there is an absence of a Welsh Medium Secondary School within the Monmouthshire area and that children accessing Welsh-medium secondary provision travel to Ysgol Gyfun Gwynllw in Torfaen County Borough Council area and Ysgol Gyfun Gwent Is Coed in Newport City Council area. This provision is delivered through partnership agreements with Torfaen County Borough Council and Newport City Council. Monmouthshire provides free school transport for children attending these schools. The Integrated Sustainability Appraisal Report includes a Welsh Impact Assessment for the Monmouthshire area.
LPA Recommendation	Continue to work with Torfaen County Council and Newport City Council to ensure there are no barriers for children in Monmouthshire attending Welsh medium secondary schools.
Site promotion	Refer to proposal for a senior neighbourhood noting there is an opportunity to incorporate the Welsh Language into signage, social events, and lessons. Suggest it offers an opportunity to allow local, Welsh speaking people to remain in their existing communities and brings opportunity for vacated housing stock to enter the market which could encourage younger residents to stay in the area bringing cultural vibrancy to Abergavenny and Llanfoist [Grove Farm Estates & Development].
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Site Assessment Report.
LPA Recommendation	No change required

Question 27 – Do you have any comments on the Initial Integrated Sustainability Appraisal Report?

21 organisations or members of the public submitted a response to question 27.

Comments were made on some of the individual themes but primarily related to the appraisal of sites, in both a supportive way and by way of comparison against other sites.

Key Theme	Summary of Points Raised
Housing	<ul style="list-style-type: none"> Support ISA's findings relating to strengths of apportioning housing to secondary settlements, helping to meet local housing need and ensuring benefits of growth such as provision of new community infrastructure is not just directed to highest tier settlements [Johnsey Estates 2020 Ltd].
LPA Response	Support noted.
LPA Recommendation	No change required.
Affordable housing	<ul style="list-style-type: none"> Support the findings in that Monmouthshire is largely a rural plan area and in this context many of the smaller settlements are unlikely to support walking and cycling access to services. Despite this it is important that such settlements receive the benefits of modest growth to sustain their vitality. Also agree that despite rural isolation it is key that some growth is directed to the rural settlements [Llanover Estates, Leathdunn Ltd & The Coldbrook Estate].
LPA Response	Comments noted.
LPA Recommendation	No change required.
Economy and employment	<ul style="list-style-type: none"> Agree with the findings that the provision of employment land will have significant long term positive effects, however, suggest the ISA overlooks the function of rural settlements, particularly in light of the change in working practices which have arisen due to Covid-19. State the Deposit Plan should recognise the value of rural and main rural settlements in providing employment opportunities close to residents to reduce the need to commute out [Llanover Estates and Leathdunn Ltd]. Suggest the economic development assessment is inadequate as it gives no basis on which future development can be judged likely to happen [Private individual x 1]
LPA Response	Comments noted. The ISA has been undertaken by AECOM and follows the relevant regulations appropriate for the different plan stages. An ISA of the Deposit Plan and its detailed allocations and polices has also be undertaken. This includes assessment of Policy RE1 relating to Secondary and Main Rural Settlements Employment Exception sites.
LPA Recommendation	Comments on Policy RE1 have been considered in the production of the Deposit ISA.
Climate change	<ul style="list-style-type: none"> Would welcome greater emphasis on promoting net zero carbon targets for any new development, state promotion of schemes to encourage energy self-sufficiency through wider provision of renewable sources would make a significant contribution to a sustainable future [Abergavenny Town Council]. Disappointed that the strategy is not expected to have any significant effect on climate change given the amount of commuting, energy efficiency in the use of buildings, energy used in construction and provision of infrastructure [Abergavenny & District Civic Society].

LPA Response	This comment does not relate specifically to the ISA. The Deposit Plan sets out a detailed policy framework, including in relation to climate change, and is supported by a robust and comprehensive evidence base. With regards to significant effects being recognised in the ISA, the ISA recognises a continuation of baseline trends (such as high levels of commuting) rather than a significant deviation from the baseline and thus significant effects.
LPA Recommendation	Refer to the Deposit Plan and supporting evidence base for further information.
Historic Environment	<ul style="list-style-type: none"> The recognition of the value and importance of the Historic Environment is noted. Assessed against existing policies the Historic Environment theme in the ISA growth options is recognised largely as being uncertain and dependent on detail, even in the delivery of strategic sites [Glamorgan Gwent Archaeological Trust].
LPA Response	Comment noted. The assessment of alternatives is essentially a 'policy-off' assessment, judging likely effects in relation to the existing baseline at a strategic level. The likely significance of effects is concluded within Part 2 of the ISA, which assesses the preferred strategy as a whole recognising precise site allocations and supporting policy mitigation. Inevitably though, effects in relation to the historic environment are often dependent upon detailed design and layout proposals at sites, detail which is unknown at the strategic scale of assessment.
LPA Recommendation	No change required.
Public transport	<ul style="list-style-type: none"> Suggest references to bus services should be treated with caution as they are particularly liable to change [Abergavenny & District Civic Society].
LPA Response	Comment noted.
LPA Recommendation	No change required.
Welsh Language	<ul style="list-style-type: none"> Reference should also be made to the Welsh language policy making standards which place a duty on local authorities to consider the effect of policy on the Welsh language. Draw attention to the Welsh Language Commissioner's advice document 'Policy Making Standards: Creating opportunities for persons to use the Welsh Language and treating the Welsh language no less favourably than the English language' [Welsh Language Commissioner]. Refer to paragraph 9.157 stating the statement creates ambiguity about the Council's objective to support and safeguard the Welsh language suggesting it should elaborate on this in the RLDP [Welsh Language Commissioner].
LPA Response	Comments noted, a Welsh Language Impact Assessment is incorporated into the ISA which considers the likely effects of the Plan on the use of the Welsh language. In accordance with Welsh Government TAN20: planning and the Welsh Language a statement of how this has been considered and addressed is included in the ISA of the Deposit Plan. In addition to this the Deposit Plan contains a section on the Welsh Language however, there is not a specific policy. Monmouthshire does not currently have any areas with a notable concentration of Welsh speakers. Subsequently, it is not considered necessary for the RLDP to contain a specific policy to address the Welsh language. National planning policies provide advice regarding the consideration of Welsh language in development and will be taken into account in the determination of planning applications, where appropriate.
LPA Recommendation	The Plan will support steps taken within proposals to safeguard and grow the use of the Welsh language.

Agricultural Land	<ul style="list-style-type: none"> Suggests the ISA does not address the national strategy to steer development away from Monmouthshire as it is a less sustainable location and will cause environment detriment [Cllr Christopher Edwards & Private individual x 1].
LPA Response	Comment noted. All options included within the ISA must be considered to be reasonable. A no growth option is not considered to be a reasonable option as it would not meet Monmouthshire's core purpose of building sustainable and resilient communities nor would it meet the RLDP objectives.
LPA Recommendation	No change required.
Green Belt	<ul style="list-style-type: none"> State the last ISA argued for development in the north of the County due to Green Belt in the south of the County, state nothing has changed other than phosphates [Cllr Louise Brown].
LPA Response	<p>Comment noted, the Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government's response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government's confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.</p> <p>The GB will be designated via a Strategic Development Plan for SE Wales in accordance with Future Wales. The spatial strategy has regard to Policy 34 and the indicative Green Belt boundary set out in Future Wales. Monmouthshire's primary settlements fall outside of the indicative Green Belt boundary. National planning policy allows for extensions to existing settlements within and adjoining the Green Belt of appropriate scale having regard to the identified and longer-term need for development land, the effects of development pressures in areas beyond Green Belt, the need to minimise demand travel, and the purpose of the overall greenbelt designation. It states that this may require land to be safeguarded and boundaries of proposed Green Belts must be carefully defined to achieve this.</p>
LPA Recommendation	No change required.
Site specific - Abergavenny	<ul style="list-style-type: none"> Question reference to Abergavenny as being one of the most self-sufficient settlements in terms of employment given the health service changes in the area [Abergavenny & District Civic Society]. Suggest the appraisal of Abergavenny East is generally fair. Note the importance of an active travel route crossing the A465 and the railway is required and must be all weather [Abergavenny & District Civic Society]. Support recognition of the significance of the role of Abergavenny as a Primary Settlement to drive growth and investment in the County and as a sustainable location to focus growth [Johnsey Estates UK & The Coldbrook Estate].
LPA Response	Comments noted.
LPA Recommendation	An ISA of the Deposit Plan and its detailed allocations and polices has been undertaken. This includes assessment of proposed site allocation policies in Abergavenny.

Site specific – Caldicot	<ul style="list-style-type: none"> • Suggests the assessment is contradictory in relation to town centre improvement as it states positive effects will be delivered through the proposed retail and leisure uses, suggests this will be detrimental to Caldicot Town Centre and will draw away trade [Private individual x 1]. • Concern the transport theme doesn't recognise limitations in public transport in the area. Refers to the appraisal of Options 1 and 2 querying no significant impact on the local road network from Chepstow and Severnside developments, particularly given the ARUP Chepstow Transport Study suggests do nothing is not an option [Private individual x 1]. • Suggests the biodiversity assessment looks at the bare minimum legal compliance with HRA and does not consider the impact of recreational use at nearby sites such as Black Rock and the Nedern [Private individual x 1]. • Suggests placemaking does not consider impacts on existing settlements such as Portskewett and Crick, which will likely be negative [Private individual x 1].
LPA Response	<p>Comments noted and considered in the Deposit ISA. A Habitats Regulations Assessment has been produced for the Deposit RLDP, this includes assessment of proposed site allocation policies.</p>
LPA Recommendation	<p>An ISA of the Deposit Plan and its detailed allocations and polices has been undertaken. This includes assessment of site allocation policies in Caldicot and the wider Severnside area.</p>
Site specific - Chepstow	<ul style="list-style-type: none"> • Notes the assessment of the strategic growth areas around Chepstow returns option E as the favoured site, suggests the Council do not provide explanation of why this hasn't been selected [Cllr Christopher Edwards & Private individual x 1]. • Suggest the times quoted for walking routes do not consider topography and are therefore misleading [Cllr Christopher Edwards & Private individual x 1]. • The Forest of Dean Local Plan is referred to as offering measures which could mitigate the increase in congestion in Chepstow, suggest this is speculative and not founded on positive action being taken by Governments or Council's either side of the border [Cllr Christopher Edwards & Private individual x 1]. • State there is no mention in the Health and Wellbeing section of the illegal levels of air pollution in Chepstow which is detrimental to health and wellbeing of residents [Cllr Christopher Edwards & Private individual x 1]. • Refers to the Historic Environment assessment which notes the Chepstow site is 300m from the Bishop Barnet's Wood Camp Scheduled Ancient Monument state this should read 30m and therefore sensitivity is greater than described [Private individual x 1].
LPA Response	<p>Comments noted. A response from the Council to the alternatives assessment is provided in Chapter 7 of the ISA Report. The methodology for calculating walking routes is described within the assessment, as a strategic assessment the outcomes are treated as broad indicators. The ISA has considered areas where air quality issues have been formally noted with the declaration of an Air Quality Management Area. An ISA of the Deposit Plan and its detailed allocations and polices has been undertaken. This includes assessment of site allocation policies in Chepstow. Option D (Bayfield) has not progressed to the Deposit Plan. In October 2023 a report of post consultation Preferred Strategy changes were agreed by Council, Option E Land at Mounon Road was included in its place</p>
LPA Recommendation	<p>No change required.</p>
Area specific - Monmouth	<ul style="list-style-type: none"> • Support the ISA findings that recognise the significance of Monmouth as a Primary Settlement [Vistry Group & Private individual x 1].

LPA Response	Comments noted. An ISA of the Deposit Plan and its detailed allocations and polices has been undertaken. This includes assessment of site allocation policies in Monmouth
LPA Recommendation	No change required.
Appendix 1 - Review of Plans, Policies, Programmes and Strategies	<ul style="list-style-type: none"> Refer to Appendix 1 noting there is no mention of Gloucestershire County Council's Minerals, Waste and Transport Plans – state this needs correcting [Gloucestershire County Council].
LPA Response	Comment noted, the Review of Plans, Policies, Programmes and Strategies makes it clear that the list is not exhaustive. No Minerals, Waste or Transport Plans have been included for adjoining Local authorities.
LPA Recommendation	No change required.
Promotion of sites	<ul style="list-style-type: none"> Leathdunn Ltd promote CS0036 Land west of B4293 and north of Devauden [Johnsey Estates UK]. Redrow Homes promote CS0270 Land north of Dixton Road, a number of queries to the ISA appraisal of Option H and I are listed. State Option I should be considered as the preferred strategic allocation in Monmouth [Redrow Homes]. Redrow Homes promote CS0129 Dewstow Golf Course, a number of queries to the ISA appraisal of Option J and K are listed, object to the ISA conclusions of Severnside suggesting they are based on a flawed analysis. State Option K is a preferable site and should be included as the primary strategic growth option for Caldicot [Redrow Homes]. Richborough Estates promote CS0087 The Showground and note concern technical information such as the masterplan, drainage strategy etc which address a lot of the points has not been considered. Concern over comments in relation to the historic environment. State the conclusions must be seen in the context of being based on a high-level assessment only and as such limitations in the conclusions and rankings which do not reflect the submissions made to date [Richborough Estates]. Barwood Development Securities Limited promote CS0165 Mounon Road, Chepstow and consider Option E performs better than Options D and F and therefore better alternative to the strategic allocation in the RLDP [Barwood Development Securities Limited]. Taylor Wimpey PLC promote CS0253 Ifton Manor Farm, note Option L which relates to this site is ranked the best performing option in terms of transport and movement. Suggest it is unclear how Option J could meet the criteria of Objective 15 of the ISA themes in relation to sustainable transport [Taylor Wimpey PLC].
LPA Response	The Council have provided reasons for the progression and rejection of options in Chapter 7 of the Deposit ISA. For a fair assessment of all options, site promoter details are not considered in detail, as these may not be available for all options. The ISA has informed the site selection process and has been updated as part of the Deposit Plan process.
LPA Recommendation	No change required.
Other	<ul style="list-style-type: none"> Suggest the ISA adds little value to the plan-making process [Abergavenny & District Civic Society].

LPA Response	Comment noted, the SA/SEA is an integral part of the plan making process and a requirement of the Planning and Compulsory Purchase Act 2004 (section 62(6)). The SA/SEA process is integral to every stage of the plan preparation process.
LPA Recommendation	No change required.

Question 28 – Do you have any comments on the Habitats Regulations Assessment (HRA)?

15 organisations or members of the public submitted a response to question 28. Comments received covered key HRA impacts to be considered, mitigation strategies, the lack of information on site allocations to allow a full assessment to be undertaken and phosphates, particularly the potential solution in Monmouth.

Key Theme	Summary of Points Raised
Key HRA Considerations	<ul style="list-style-type: none"> Gloucestershire CC agree that air quality, water quality/quantity, recreational pressure, and the potential for adverse impact of functional land are key considerations for the Deposit Plan. [Gloucestershire CC] NRW agree with identified pathways. [NRW] Advise that consideration to the fish interest of the Ramsar site is given in the deposit plan HRA. Detailed comments provided on impacts to be considered as part of the Deposit HRA. [NRW] Undertaking an HRA is vitally important and must be applied to all allocations. [Private Individual] Integrity of the Usk Bat Sites SAC should be taken extremely seriously. [Private Individual]
LPA Response	Comments noted.
LPA Recommendation	Continue to work collaboratively with the relevant organisations, including NRW, as part of the ongoing HRA of the RLDP.
Mitigation Strategies	<ul style="list-style-type: none"> Recreational mitigation strategies for the Severn Estuary and Cotswold Beechwoods produced for parts of Gloucestershire are likely to be useful evidence as they are related to other LDPs nearby. Stroud District Council are a good contact for accessing the mitigation strategies and their associated visitor survey information. [Gloucestershire CC]
LPA Response	Comments noted.
LPA Recommendation	Review relevant recreational mitigation strategies as part of the ongoing HRA recommendations work.
Lacking information	<ul style="list-style-type: none"> Frequent references without detailed information on proposals they cannot be assessed. Detail will not be available until the Deposit Plan is published so cannot be evaluated within comments on the Preferred Strategy. [Abergavenny & Crickhowell FoE, Private Individual, Usk Civic Society] Does the HRA completely comply with the Environment (Wales) Act 2016? [Private Individual]
LPA Response	The HRA has been undertaken by Aecom Consultants and follows the relevant regulations appropriate for the different plan stages. A HRA of the Deposit Plan and its detailed allocations and polices has also be undertaken.

LPA Recommendation	No change required.
Phosphates	<ul style="list-style-type: none"> Concern that upgrading sewage treatment for Abergavenny/Llanfoist will only partially deal with phosphate pollution of the River Usk. Strongly endorse planning conditions requiring phosphate neutrality. Non-statutory sector should also be included in ongoing work on maintaining the integrity of the SAC, e.g., Save the River Usk and Welsh Rivers Union. [Abergavenny & District Civic Society] Development in Monmouth and the River Wye Catchment should not be ruled out for the Plan period due to phosphates as solution is likely. As a minimum CS0216 – Land off Hereford Road, Monmouth should be safeguarded, or development boundary adjusted with no allocation for development when phosphates conditions allow. [BB3 Limited, Manor Farm Partnership, Private Individuals x 3]
LPA Response	<p>The Preferred Strategy (2022) proposed no new site allocations in Monmouth, or within the upper River Wye catchment north of Bigsweir Bridge and also assumed no existing planning permissions or small/windfall sites could come forward. This approach was taken due to the lack of an identified strategic solution to the treatment of phosphates at the Monmouth Wastewater Treatment Works (WwTW) within the Plan period. Welsh Government's response letter to the 2022 Preferred Strategy advised that new site allocations should be made in Monmouth on the basis that sufficient certainty is provided by DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025. Following Welsh Government's confidence in the removal of this constraint, Council agreed in October 2023 to the identification of a strategic site in Monmouth as well as including allowances towards windfall and infill allowances and existing commitments already with planning permission.</p> <p>The Council has been working collaboratively with a range of organisations including NRW, Dŵr Cymru Welsh Water (DCWW), Welsh Government, other Councils in Wales and England, environmental groups, developers and other stakeholders to establish solutions that will ensure that development proposals do not have an adverse impact on water quality within the SAC rivers. The spatial strategy and site allocations have been prepared with regard to Dwr Cymru's planned improvements to waste water treatment works and NRW's review of permits. Commitment from DCWW to provide phosphate mitigation at the Llanfoist and Monmouth WwTWs and NRW's review of all permits and water quality to establish what capacity (if any) exists to enable development proposals to come forward while ensuring betterment or neutrality of phosphate levels has provided the necessary confidence to support the RLDP strategy.</p>
LPA Recommendation	In accordance with the October 2023 Council Report, the Deposit Plan allows for growth in Monmouth. The Council will continue to work collaboratively with the relevant organisations with regard to phosphates and water quality issues.
Sites promoted in response to question 28	<ul style="list-style-type: none"> BB3 Ltd – CS0216 Hereford Rd, Monmouth [BB3 Ltd] Private Individual – CS0216 Hereford Rd, Monmouth [Private Individual] Manor Farm Partnership – CS0216 Hereford Rd, Monmouth [Manor Farm Partnership] Private Individual – CS0216 Hereford Rd, Monmouth [Private Individual] Private Individual – Cs0216 Hereford Rd, Monmouth [Private Individual]
LPA Response	Candidate site submissions have been considered as part of the candidate site assessment. Individual site recommendations can be viewed in the Candidate Sites Assessment Report.
LPA Recommendation	See the Candidate Sites Assessment Report for Candidate Site recommendations.

Strategic Sites

Abergavenny		
	Candidate Site: CS0213 Abergavenny East	Responder:
Page 1613	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Southern boundary adjoins the essential setting of Coldbrook House, Caederwen and other farms shown on the Tithe, exist with similar field boundaries. <i>General support for the site:</i> 2. Abergavenny Town Council and Abergavenny & District Civic Society state that objection would be made to anything but a strategic decision that development here has to be the long-term future of Abergavenny. Various physical constraints make this area the only substantial option for town growth. The masterplanning EA should proceed if the feasibility and viability of land use allocation and the phasing of development are to be soundly based for inclusion in the replacement plan. 3. Responders feel that the site boundaries should extend to encompass more land adjoining A465 for a junction with the trunk road, station car parking and an active travel crossing to Station Road as well as providing a more direct access to Ross Road. Any active travel bridge or subway crossing the railway and the A465 must be attractive to use in all conditions. 4. The site sponsor, The Coldbrook Estate, has submitted supporting documents and includes the following points: <ul style="list-style-type: none"> • The site presents a logical extension to the town that could be well connected local services and facilities. • The land is not subject to any statutory designations and is located close to employment opportunities, schools, healthcare and the range of facilities and services offered by Abergavenny Town Centre. • Matters considered as part of delivering the vision for Abergavenny East includes provision of significant infrastructure, including a cycle footway bridge over the A465 and railway. 5. Many responders offer support for the site – which should benefit from its proximity to the A465, the railway station and services and facilities within the town. 6. Proximity of the rail station to the site has been emphasised and it is felt that a frequency of 4 trains per hour, twice the current frequency, is necessary. 7. Responders feel that the site should incorporate a suitable solution to the parking problem at the railway station. 8. Responders feel that the area is generally screened from A465 by trees and there are hedgerows and small woodlands that should be incorporated into the layout of development. 9. Responders state that the agricultural land appears to be of 3a and 3b value. 10. Responders suggest that the ecology of the site could be improved by development that incorporates landscaping that encourages biodiversity. 11. Responders feel that a smaller number of houses than proposed would be more in keeping the ambience of the town and area. 12. Support for the site as the development would be near places of employment to a minimise travel to work. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society, 1 Private Individual 3. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 4. The Coldbrook Estate 5. 188 Private Individuals. 6. Abergavenny & District Civic Society 7. SOUL (163), 2 Private Individuals 8. Abergavenny Town Council, Abergavenny & District Civic Society 9. Abergavenny Town Council, Abergavenny & District Civic Society 10. 2 Private Individuals 11. 2 Private Individuals 12. 1 Private Individual 13. 1 Private Individual 14. 2 Private Individuals 15. 3 Private Individuals 16. 1 Private Individual 17. 1 Private Individual

	<p>13. Responders feel that the site should be mixed use offering an industrial estate/business park as Abergavenny is devoid of any purpose built facilities. <i>General objection to the site:</i></p> <p>14. Concern re landscape sensitivity. The site forms a significant proportion of the area A019 in a landscaping sensitivity report (Mar 2021). The area is classed in the highest sensitivity bracket.</p> <p>15. Concern re the impact of development on views from Abergavenny and Castle meadows and of the impact of light pollution on wildlife and biodiversity on The Little Skirrid and surrounding area.</p> <p>16. Concern re the slope of the site and the difficulties this will pose for development.</p> <p>17. Concern re run off water from the site and the potential risk of flooding this poses to the railway line.</p> <p>18. Concern re the potential increase in traffic and the ability of the road network to cope.</p> <p>19. Concern re lack of potential Active Travel solutions due to the railway line and A465 as well as the slope of the site.</p> <p>20. Concern whether the site would be connected to the main sewage system or would require it's own treatment plant.</p> <p>21. Concern re the power supply to the area being able to cope with new housing being all electric.</p> <p>22. General concerns re local services and employment being sufficient to cater for a site this size.</p>	<p>18. 3 Private Individuals 19. 1 Private Individual 20. 1 Private Individual 21. 1 Private Individual 22. 1 Private Individual</p>
<p>LFA Response</p>	<p>Comments noted. It is proposed to allocate the site as Strategic Allocation. The allocation is a sustainably located edge of settlement site, located on the eastern edge of Abergavenny, that provides the longer-term intention for further growth beyond the Plan period. The site performs well against the site search sequence, with no significant constraints identified on site. The integration of the site with the existing settlement is a key principle with connection links forming a key policy requirement of the site's allocation. The site also meets key policy requirements including 50% affordable housing and net zero carbon homes demonstrating its viability and deliverability.</p>	
<p>LFA Recommendation</p>	<p>Retain Land to the East of Abergavenny East as a Strategic Allocation, with site specific policy requirements set out in Policy HA1 – Land to the East of Abergavenny.</p>	
<p>Chepstow</p>		
<p>Candidate Site: CS0165 Land at Mounon Road, Chepstow</p>		<p>Representor:</p>
	<ol style="list-style-type: none"> Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Agricultural use and potential features associated with the Roman road at the south of the site. Development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation. Chepstow Town Council support the site as long as development provides at least 50% affordable housing. Chepstow Town Council support for the site as development may provide employment opportunities. Responders feel that the site should not be supported without infrastructure improvements including provision of a bypass, improvements to Highbeech roundabout and an M48 link. Responders object as the site forms an essential part of the green wedge between Pwllmeyric and Chepstow. Responders object to the development of green field sites when there are brownfield sites in the county. 	<ol style="list-style-type: none"> Glamorgan Gwent Archaeological Trust Ltd Chepstow Town Council Chepstow Town Council Cllr Louise Brown plus 3 Private Individuals

<p>7. Responders state that the proposed areas form the gateway to the Wye Valley which attracts visitors.</p> <p>8. Responders feel that development of the site will have a visual impact on the nearby AONB and on the listed building adjacent to the site.</p> <p>9. Concerns for the surrounding green spaces, used extensively by local people for leisure, and supports local, protected species such as deer, bats and birds of prey.</p> <p>10. Responders state that the is on prime agricultural land which should not be developed.</p> <p>11. Cllr Louise Brown states that the land should be reserved for potential roundabout improvements at Highbeech.</p> <p>12. Concerns regarding the safety of a Proposed Balancing Lake for surface water drainage and concerns as to whether the sewage pumping facilities may be inadequate.</p> <p>13. Responders feel there is a lack of detail in plans to provide new employment in the area. Workers currently employed in the area do not earn enough to be able to afford the properties being built.</p> <p>14. A responder comments that the plan suggests working from home will continue but evidence suggests people are returning to the workplace.</p> <p>15. Concerns that traffic congestion within Chepstow, particularly Highbeech roundabout and Hardwick Hill, is at unacceptable levels. Any incidents or planned closures cause excessive queues.</p> <p>16. Concerns that Chepstow is a Designated Air Quality Management Area with high, potentially illegal, levels of air pollution within Chepstow (contrary to Wellbeing of Future Generations Act).</p> <p>17. Development in Gloucestershire, and the wider community, will impact traffic levels in Chepstow and demand for services.</p> <p>18. A responder feels that access to the site will be challenging and require extensive remodelling of the Highbeech area.</p> <p>19. Concerns that local infrastructure and services are already overstretched with no capacity to serve this site. Local roads are congested, public transport is poor, schools are oversubscribed, it's difficult to get a GP appointment, no spaces available at NHS dentists, no longer a local hospital facility. Shortage of leisure and community facilities and no cultural facilities such as a theatre or cinema.</p> <p>20. Responders feel that the site is far from the town centre, and areas of local employment, and this along with the steep hills will encourage use of the car.</p> <p>21. Responders feel that public transport is insufficient. This site is too far from the railway station and the hills too steep to encourage use of the train, thereby encouraging use of the car.</p> <p>22. Concerns that there is no provision for safe walking and Active Travel routes.</p> <p>23. Responders feel that little affordable/social housing has been provided and no evidence of any Section 106 funds relieving any of the underlying problems. Any housing built here should be affordable for the local community who work locally.</p> <p>24. Concerns regarding lack of provision of formal and informal open spaces and Green Infrastructure onsite.</p> <p>25. Concerns that congestion is putting visitors off coming to Chepstow and supporting the shops and food outlets, resulting in a disappointing level of shopping.</p> <p>26. Concern that Chepstow is overdeveloped and will become a commuter town with no sense of community, and, with commuters bringing no benefit to local shops.</p> <p>27. Criticism of the LDP process - no consultation on candidate sites for protection, CS0165 assessed as most favourable but not selected as the preferred site.</p>	<p>5. ---	---

	<p>28. Responders state that the plan claims houses will be built as net carbon zero ready, however, no recent developments have been built to the high environmental standards we can now achieve.</p> <p>29. Responders state that the Council's Integrated Sustainability Appraisal makes it clear that development anywhere in Chepstow will make current traffic and pollution issues worse, with the (WeITAG) study demonstrating that the High Beech roundabout is already at full capacity.</p> <p>30. Concerns regarding contravention of UK Gov Policy, National Planning Policy and Localism Act - All residents of the affected areas will have a direct legal case for increased health risks.</p> <p>31. Concern that growth proposed by MCC is in conflict with WG's in terms of the number of houses advised to match job creation/growth. Growth figures exceed advice by 40%.</p>	<p>29. 1 Private Individual 30. 4 Private Individuals 31. 2 Private Individuals</p>
<p>LPA Response</p>	<p>Comments noted. It is proposed to allocate the site as a Strategic Allocation in the Deposit Plan. The allocation is a sustainably located edge of settlement site that performs well against the site search sequence, with no significant constraints identified on site. The integration of the site with the existing settlement is a key principle with connection links forming a key policy requirement of the site's allocation. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. The mixed-use development proposal, which includes a care home and hotel, is considered to have associated job creation and tourism benefits, with opportunities to work and live together and promote accessibility and connectivity to the existing settlement.</p>	
<p>LPA Recommendation</p>	<p>Include Land at Mounton Road, Chepstow as a Strategic Allocation, with site specific policy requirements set out in Policy HA3 – Land at Mounton Road, Chepstow.</p>	
<p>Monmouth</p>		
<p>Candidate Site: CS0270 Leasbrook (Land north of Dixton Road)</p>		<p>Representor:</p>
	<p>No responses received</p>	
<p>LPA Response</p>	<p>It is proposed to allocate the site as a Strategic Allocation for approximately 270 homes. The allocation is a sustainably located edge of settlement site, north of Dixton Road. The site performs well against the site search sequence, with excellent links to the comprehensive school, facilities in the town centre and surrounding infrastructure. The site offers the opportunity to create an exemplar residential and GI-led development in a gateway location on the entrance to Monmouth. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p>	
<p>LPA Recommendation</p>	<p>Include Land at Leasbrook, Monmouth as a Strategic Allocation, with site specific policy requirements set out in Policy HA4 – Land at Leasbrook, Monmouth.</p>	

Severnside

Candidate Site: CS0087 Showground, Caldicot

Representor:

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – A previous response to the LDP and pre-planning consultation recommended desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work; additionally a Heritage Impact Assessment and to consult Cadw regarding any impact on the Scheduled Monuments nearby; our understanding of the site has not changed since then, and recommendation remains the same.
2. Responders concerned re flood risk (surface water and river) on site as the site is in a flood zone, and whether the proposed developments will make the issue worse or that the site is suitable for development at all. The runoff from the site causes issues with roads and properties nearby, concerns that this will increase with development. Concerns that an on-site sewage treatment plant is not feasible on the site, the discharge of treated effluent could not be made to watercourse due to distance, and other treatment methods would not be appropriate due to the land area required to comply with building regulations. A site-specific flood modelling exercise should be undertaken as existing flood mapping does not seem to be consistent with current events. SuDS would need to be carefully considered and built into high-level development proposals. Concerns re the capacity of the current water supply, sewerage and drainage systems, and their ability to cope with an increase in residential units. Will the increased sewage outflow have an impact on the Severn SAC / SPA? Concerns that the development will increase the phosphate issue.
3. Enquiries re the use of S106 funds to support a River Restoration Options Report for the lower 3km of the Nedern. Responders require clear evidence of where S106 money will be invested upfront and also evidenced on delivery.
4. Responder and site promoters, Richborough Estates are positive about the progression of the site into Stage 3A Candidate Site Assessment, and its suitability for residential development. They note that the site is not subject to any fundamental constraints that cannot be mitigated. The responders also note that an FCA will be submitted in support of any future planning application, demonstrating that the site can be brought forward. An initial masterplan demonstrates that no built development is proposed on the areas within Flood Zones 2/3, and that an appropriate sustainable drainage strategy would result in a downstream benefit through a reduction in peak flow run-off from the development. The initial masterplan also demonstrates that there will be no development in areas of SSSI. The responders strongly maintain that the Showground site is suitable for residential development.
5. Concerns re NHS services and a lack of health infrastructure, such as Doctors, GPs, and Dentists, struggling to meet the current demands, inducing long wait times for appointments and that a large development on this site would only exacerbate the current issues. Responders also concerned that no provisions have been made to deal with the increased demand for these services brought about by development on the site, such as a sufficient number of health job posts filled. Pharmacies and hospitals are also being overwhelmed. Responders concerned that there are no places in both the local Primary and Secondary

<p>schools for existing residents, not including the new residents from developments on the site. Concerns re Telephone and Broadband services being able to keep up with current and future demands after the site has been developed.</p> <p>6. Concerns re the site location and the increase in vehicle movement in the area once it's been developed. Concerns re the lack of pedestrian links from the site to Caldicot. Concerns that existing road infrastructure is not sufficient for existing volume of vehicles, with large volumes of traffic and long queues, let alone the vast increase after development has been complete. A "do-nothing" approach is not acceptable in Chepstow – The development on the site will increase traffic at High Beech subsequently increasing air pollution. Concerns that essential improvements to road infrastructure will not be completed by 2033. Responders concerned about traffic moving into smaller local lanes to find alternative routes, resulting in dangerous driving and the overuse of roads that are not meant to cope with that volume of traffic. Concerns that commuting will increase due to the developments on the site and the lack of local links prompts people to choose their cars over other modes of transport. Concerns re the lack of pavements in the areas surrounding the site. Noise pollution will also see a dramatic increase with development of the site reducing the quality of life and health conditions. Responders believe there is a need for a reduction in speed through Crick to 30mph. Concerns re a lack of safe crossing points to important zones such as school pick up and drop off points. Concerns regarding the route taken by construction traffic and its safety. Concerns re a lack of pedestrian links. Concerns re the quality of the roads in the area and an increase in volume of traffic will only deteriorate them further. Responders concerned over the lack of road infrastructure improvements made, compared to the volume of developments completed. Concerns over poor traffic movement due to 20mph speed limits and the increase of traffic in other areas in order to avoid the imposition.</p> <p>7. Concerns that area is being developed to facilitate commuters, creating a suburb of Bristol, Newport, and Cardiff, capitalising on the proximity to the Severn crossing now that the tolls have been removed.</p> <p>8. Concerns re town centre and its state of deterioration, many shops are empty, and the main street is not a very nice place to walk at night - therefore it is not suitable to support the needs of the existing community, which will only be amplified by the development of this site. Responders concerned as there are zero real plans for infrastructure and amenity improvement. Public transport services in the area are not sufficient – bus service is limited and does not support commuting, lack of accessibility to the nearest train station with inadequate parking facilities, and no provisions have been provided for safe walking and cycling routes. Concerns re a lack of facilities for young people such as children's playparks, youth centres. Caldicot leisure centre was due to be upgraded but has not happened. Responders believe the infrastructure and amenities to support such developments on the site should be addressed first. Responders concerned that development of the site removes an important recreation and tourist facility, which not only boosts the local economy but is one of the sole reasons people visit Caldicot.</p> <p>9. Responders concerned re classification of the site as brownfield when the majority of the land is greenspace and could be classed as agricultural due to its uses, which will be lost after development. Responders note that the ecology of the natural environment should be protected for current and future generations. Concern re the finished site's ability to increase biodiversity in the area and that the development will cause habitat loss, increasing pressure on other areas of SSSI such as Nedern Wetland, due to increased human activity. Responders note that interruption to the Nedern Brook green corridor, and adverse effects on the landscape surrounding Caldicot Castle, including views in and out, would be undesirable and should be avoided.</p>	<p>16. 1 Private Individual</p> <p>17. 1 Private Individual</p> <p>18. 1 Private Individual</p> <p>19. Edenstone</p> <p>20. Taylor Wimpey PLC (Savills)</p> <p>21. Taylor Wimpey PLC (Savills)</p>
--	--

10. Concerns re the size of the development and its location in relation to Caldicot, making the site appear like a new village. Concerns re size of development being too large when compared to other recent developments in the local area. The impacts of the developments scale would mean that local villages would be subsumed by Caldicot, impacting the local character and appearance of the area, removing their historic identity. Concerns re the number of developments in the local area surrounding the site and the proximity those developments to each other, noting the area to be overdeveloped. Responders note the volume of housing proposed for the site and believe the distribution is disproportionate to the rest of Monmouthshire, changing the dynamic of the surrounding area.
11. Concerns re the volume of social housing concentrated in Caldicot because of the development of this site and therefore the separation of people from the areas in which their families live. Concerns regarding the ability to fulfil affordable housing targets and that developers are allowed to build for profit, catering towards 4/5-bedroom homes for professional middle-aged people, and not for local young people. Concerns that the developments will be marketed towards those mainly from the Bristol area and won't be affordable for locals, noting that the average salary is much higher in Bristol than Monmouthshire. Responders desire a positive help to buy scheme for young locals. Responders note that the removal of the bridge tolls did not help young people to buy homes as the average house price in the area increased and that the Redrow Sudbrook development did not meet its affordable housing targets, suggesting that affordable housing should be allocated away from the Severnside area.
12. Concerns re limited employment opportunities in the area, especially for those without transport. Responders note that those who gain work in employment opportunities provided in the local area will not be able to afford to live in the areas being developed.
13. Responders concerned re change in use of the site as it currently promotes the local area and brings people to the town. Responders note that a key criterion for developing the candidate sites is tourism and that the current site's use provides a significant tourism element to the local economy as it hosts local, regional, national, and international level events throughout the year. Concerns re maintaining the area as country site and that attractions such as David Broom's Centre on the site, supports shops and food outlets providing local employment, which will be removed if developed. The Castle provides a brilliant venue for concerts, gatherings etc, which will be sat in the middle of a housing estate when the development is completed. Responders note that if this site is developed then it will lose its unique equine interest and business that it brings to the area. The visual proximity of the development to Caldicot Castle Country Park creates a negative heritage and wellbeing impact. Concerns that the development does not protect the landscape and heritage that makes Monmouthshire unique, special and an attractive place to live or help in sustaining rural communities.
14. Responders believe that the council's approach to Climate change is unsatisfactory and believe the high quality of environmental standards promised by developments will not be met, noting that the term "net zero ready homes" does not actually mean anything. Concerns that provisions made by the council towards the net zero goals will not prevent the detrimental impact this development will have on the surrounding area. Responders concerned that the allocation of this semi-rural site for development is in complete disregard to Monmouthshire's desires to cut commuting to work for environmental purposes. Concerns that this style of development is that of housing estates from the 70s and does not respect the environment.

15. Responder believes there is a lack of trust between the council and the communities it serves as the council continues to ignore their comments and not communicate effectively, therefore the community will continue to object to these kinds of proposals.
16. Responder believes the plan contradicts itself as so much development has been proposed for Monmouthshire, yet it admits it is not in the national growth area identified in Future Wales 2040.
17. Responder notes that CS0251 Land at Bradbury Farm is to come forward in tandem with this site to proceed. Concerns re who is going to control the process and the risk involved, such as the Land at Bradbury Farm being developed but developers for this site changing their mind, or the landowner pulling out as it is a family run business, therefore producing a situation against Welsh Government Guidelines by building in open countryside.
18. Responder notes that the increased volume of new developments encouraging those from Bristol to move and commute, reduces the amount of local youngster, further contributing to a dilution of those who have an interest in speaking Welsh, which needs support if it is to survive in Monmouthshire.
19. Promoter for site CS0206, Edenstone, believe their site (Land South of Newport Road, Magor) best contributes to the vision and objectives of the RLDP and the achievement of sustainable development within the Severnside region when compared with CS0087 Showground for the below reasons.
 - The landscape of the Showground is more sensitive to residential development than that of the Land South of Newport Road, Magor.
 - Concerns that Showground land area is of predictive Grade 1 and 2 BMV, and that lower grade areas or non BMV, such as the Land South of Newport Road, Magor, should be considered in advance of BMV land.
 - Showground site is located a further walking distance away from the town centre than Land South of Newport Road, Magor is from Magor Centre. Time taken to walk from the Showground site to the town centre is greater than 20 minutes and over 30 minutes to the train station, therefore not meeting the council's aspirations for 20-minute neighbourhoods.
 - Concerns that the Showground site includes areas of flood risk.
 - Concerns that Caldicot East has the potential to impact upon Caldicot Conservation Area and Caldicot Castle Grade I Listed Building and Scheduled Monument, whereas Land South of Newport Road is free from any heritage constraints.
20. Promoter for site CS0253 and CS0254, Taylor Wimpey PLC (Savills), compares the performance of their site (Ifton Manor Farm, Site A and B), against CS0087 Showground, Caldicot (Caldicot East). Taylor Wimpey believe the Ifton Manor Farm site performs more strongly than the Caldicot East site for the following reasons.
 - Ifton Manor Farm site performs better in the Integrated Sustainability Appraisal than the Caldicot East Site.
 - Ifton Manor Farm site is more favourable in its ability to capitalise on Sustainable Transport Infrastructure and encourage modal shift.
 - Ifton Manor Farm performs better in 9, the same in 8 and worse in 1, when compared to the Caldicot East site, out of the objectives set out in the current Preferred Strategy to provide a useful framework to assess the performance of Strategic Growth Options.
 - Believes the proposed number of houses to be delivered within a set time frame for the Caldicot East site is unrealistic, due to reason such as securing planning permission, marketing the site, creation of new infrastructure to support the development and the rate of unit delivery seen in similar sites locally.

	<p>21. Taylor Wimpey notes that the Preferred Strategy being consulted upon entirely fails to give due weight to the Integrated Sustainability Appraisal, therefore Taylor Wimpey notes the settlement to be unsound as the Caldicot East site was selected to proceed over Ifton Manor Farm.</p>	
<p>LPA Response</p>	<p>Comments noted. It is proposed to allocate the site as part of a wider Strategic Allocation for approximately 770 homes. The allocation is a sustainably located edge of settlement site and will extend the settlement of Caldicot to the north-east, adjacent to the Crick Road, Portskewett site. The site performs well against the site search sequence, with good links to a shop, open space and employment uses with facilities in the town centre just over a 20 minute walk. These links will be strengthened via active travel links throughout the site. While the site has good links to a nearby primary school, a new primary school will be provided on the site to assist with capacity issues in the area and provide benefits to the wider community. The site is partly a brownfield site as it includes an existing commercial equestrian centre that is relocating elsewhere. While the site is located in close proximity to heritage designations, no significant constraints are identified on the site. The site is also in close proximity to a SSSI. No built development will take place on these sensitive areas, with the area to the west of the former railway to be designated as an Area of Amenity Importance to provide additional protection. The site offers the opportunity to create an exemplar residential-led mixed-use development. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p>	
<p>LPA Recommendation</p>	<p>Retain Land to the East of Caldicot/North of Portskewett as a Strategic Allocation, with site specific policy requirements set out in Policy HA2 – Land to the East of Caldicot/North of Portskewett.</p>	
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1621</p>	<p>Candidate Site: CS0251 Land at Bradbury Farm, Crick</p> <ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – A previous response to LDP consultation recommended desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work: our understanding of the site has not changed since the and recommendation stays the same. 2. Concerns re placemaking and its consideration of existing settlements, as building retail and leisure units on the site is likely to have an adverse effect on Caldicot town centre, where the focus should lie. 3. Promoter for site CS0206, Edenstone, believe their site (Land South of Newport Road, Magor) best contributes to the vision and objectives of the RLDP and the achievement of sustainable development within the Severnside region when compared with CS0087 Showground for the below reasons. <ul style="list-style-type: none"> • The landscape of the Showground is more sensitive to residential development than that of the Land South of Newport Road, Magor. • Concerns that Showground land area is of predictive Grade 1 and 2 BMV, and that lower grade areas or non BMV, such as the Land South of Newport Road, Magor, should be considered in advance of BMV land. • Showground site is located a further walking distance away from the town centre than Land South of Newport Road, Magor is from Magor Centre. vehicles, with large volumes of traffic and long queues, let alone the vast increase after development has been complete. A “do-nothing” approach is not acceptable in Chepstow – The development on the site will increase traffic at High Beech subsequently increasing air pollution. Concerns that essential improvements to road infrastructure will not be completed by 2033. Responders concerned about traffic moving into smaller local lanes to find alternative routes, resulting in dangerous driving and the overuse of roads that are not meant to cope with that volume of traffic. Concerns that commuting will increase due to the developments on the site and the lack of local links prompts people to choose their cars over other modes of transport. Concerns re the lack of pavements in the areas surrounding the site. Noise pollution will also see a dramatic increase with development of the site reducing the quality of life and health conditions. Responders believe there is a need for a reduction in speed through Crick to 30mph. Concerns re a lack of safe crossing points to important zones such as school pick up and drop off points. Concerns regarding the route taken by construction traffic and its safety. Concerns re a lack of pedestrian links. Concerns re the quality of the roads in the area and an increase in volume of traffic will only deteriorate them further. Responders concerned over the lack of road infrastructure improvements made, compared to the volume of developments completed. Concerns over poor traffic movement due to 20mph speed limits and the increase of traffic in other areas in order to avoid the imposition.

- 9. Concerns that area is being developed to facilitate commuters, creating a suburb of Bristol, Newport, and Cardiff, capitalising on the proximity to the Severn crossing now that the tolls have been removed.
- 10. Concerns re town centre and its state of deterioration, many shops are empty, and the main street is not a very nice place to walk at night - therefore it is not suitable to support the needs of the existing community, which will only be amplified by the development of this site. Responders concerned as there are zero real plans for infrastructure and amenity improvement. Public transport services in the area are not sufficient – bus service is limited and does not support commuting, lack of accessibility to the nearest train station with inadequate parking facilities, and no provisions have been provided for safe walking and cycling routes. Concerns re a lack of facilities for young people such as children’s playparks, youth centres. Caldicot leisure centre was due to be upgraded but has not happened. Responders believe the infrastructure and amenities to support such developments on the site should be addressed first. Responders concerned that development of the site removes an important recreation and tourist facility, which not only boosts the local economy but is one of the sole reasons people visit Caldicot.
- 11. Responders concerned re classification of the site as brownfield when the majority of the land is greenspace and could be classed as agricultural due to its uses, which will be lost after development. Responders note that the ecology of the natural environment should be protected for current and future generations. Concern re the finished site’s ability to increase biodiversity in the area and that the development will cause habitat loss, increasing pressure on other areas of SSSI such as Nedern Wetland, due to increased human activity. Responders note that interruption to the Nedern Brook green corridor, and adverse effects on the landscape surrounding Caldicot Castle, including views in and out, would be undesirable and should be avoided.
- 12. Concerns re the size of the development and its location in relation to Caldicot, making the site appear like a new village. Concerns re size of development being too large when compared to other recent developments in the local area. The impacts of the developments scale would mean that local villages would be subsumed by Caldicot, impacting the local character and appearance of the area, removing their historic identity. Concerns re the number of developments in the local area surrounding the site and the proximity those developments to each other, noting the area to be overdeveloped and urbanised.

- Responders note the volume of housing proposed for the site and believe the distribution is disproportionate to the rest of Monmouthshire, changing the dynamic of the surrounding area.
13. Concerns re the volume of social housing concentrated in Caldicot because of the development of this site and therefore the separation of people from the areas in which their families live. Concerns regarding the ability to fulfil affordable housing targets and that developers are allowed to build for profit, catering towards 4/5-bedroom homes for professional middle-aged people, and not for local young people. Concerns that the developments will be marketed towards those mainly from the Bristol area and won't be affordable for locals, noting that the average salary is much higher in Bristol than Monmouthshire. Responders desire a positive help to buy scheme for young locals. Responders note that the removal of the bridge tolls did not help young people to buy homes as the average house price in the area increased and that the Redrow Sudbrook development did not meet its affordable housing targets, suggesting that affordable housing should be allocated away from the Severnside area.
 14. Concerns re limited employment opportunities in the area, especially for those without transport. Responders note that those who gain work in employment opportunities provided in the local area will not be able to afford to live in the areas being developed.
 15. Responders concerned re change in use of the site as it currently promotes the local area and brings people to the town. Responders note that a key criterion for developing the candidate sites is tourism and that the current site's use provides a significant tourism element to the local economy as it hosts local, regional, national, and international level events throughout the year. Concerns re maintaining the area as country site and that attractions such as David Broom's Centre on the site, supports shops and food outlets providing local employment, which will be removed if developed. The Castle provides a brilliant venue for concerts, gatherings etc, which will be sat in the middle of a housing estate when the development is completed. Responders note that if this site is developed then it will lose its unique equine interest and business that it brings to the area. The visual proximity of the development to Caldicot Castle Country Park creates a negative heritage and wellbeing impact. Concerns that the development does not protect the landscape and heritage that makes Monmouthshire unique, special and an attractive place to live or help in sustaining rural communities.
 16. Responders believe that the council's approach to Climate change is unsatisfactory and believe the high quality of environmental standards promised by developments will not be met, noting that the term "net zero ready homes" does not actually mean anything. Concerns that provisions made by the council towards the net zero goals will not prevent the detrimental impact this development will have on the surrounding area. Responders concerned that the allocation of this semi-rural site for development is in complete disregard to Monmouthshire's desires to cut commuting to work for environmental purposes. Concerns that this style of development is that of housing estates from the 70s and does not respect the environment.
 17. Responder believes there is a lack of trust between the council and the communities it serves as the council continues to ignore their comments and not communicate effectively, therefore the community will continue to object to these kinds of proposals.
 18. Responder believes the plan contradicts itself as so much development has been proposed for Monmouthshire, yet it admits it is not in the national growth area identified in Future Wales 2040.
 19. Responders note that the site is located in open countryside and only connects to Caldicot via a flood zone, both criteria for ruling out sites for allocation.

	<ol style="list-style-type: none"> 3. Several responders feel the site should be included in the policy for a Green Wedge buffer between the built-up area and the National Park. 4. Traffic issues were raised with concerns that the existing road network would not cope with the increase in traffic and that a new junction may be required to access the A40. 5. A responder states that the site is grade 2 agricultural land. 6. A responder was concerned that the site would be isolated from the town by the A40 and might never form a natural part of the town active travel network. 7. Support for the size and location of the site. Hopeful that it can come forward sooner and provide much needed affordable homes. 	<ol style="list-style-type: none"> 3. Abergavenny Town Council, Abergavenny & District Civic Society 4. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 5. Abergavenny & District Civic Society 6. Abergavenny Transition Town 7. Private Individual x 1
<p>LPA Response</p>	<p>Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape impact concerns have also been raised in relation to the site's allocation. In addition, the site is identified as a Green Wedge as part of the Green Wedge Assessment which has been undertaken to support the RLDP.</p>	
<p>Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	
<p>Candidate Site: CS0094 Penlanlas Farm, Abergavenny</p>	<ol style="list-style-type: none"> 1. Concerns were raised by several responders regarding the slope of the site, and its prominence in views from the east, and the lack of green infrastructure to help it blend into the landscape. 2. Traffic issues were raised with concerns that increased traffic on Old Hereford Road would further overload Pen y Pound and its junction with the A40. 3. Responders suggest that the slope of the site might render substantial Active Travel unlikely and would limit access to existing shops and of the town centre by foot, therefore, requiring a frequent bus service / increased use of the car. 4. There is concern that allowing this site would set a precedent for other sites in the area. 5. Support for the allocation of Land at Penlanlas Farm in the RLDP Candidate Sites Register. 6. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues. 	<p>Responder:</p> <ol style="list-style-type: none"> 1. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 2. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 3. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 4. Abergavenny Town Council, Abergavenny & District Civic

		<p>Society, Abergavenny Transition Town</p> <p>5. Edenstone Homes</p> <p>6. Glamorgan Gwent Archaeological Trust Ltd</p>
LPA Response	<p>Comments noted. Overall, the site performs well against the assessment methodology with no fundamental constraints identified. The site also benefits from good access to a range of services including schools and open space. A significant proportion of the site is also identified as being non-BMV land (63%), which performs well in a Monmouthshire context. The site also meets key policy requirements including 50% affordable housing and net zero carbon homes demonstrating its viability and deliverability. It is therefore proposed to allocate the site for 100 dwellings.</p>	
LPA Recommendation	<p>It is proposed to allocate the site for 100 dwellings with site specific policy requirements set out in Policy HA5 Land at Penlanlas Farm, Abergavenny.</p>	
Candidate Site: CS0108 North Hillgrove Avenue, Abergavenny		Responder:
Page 1627	<ol style="list-style-type: none"> 1. Abergavenny Town Council state that the site is within CSP004, proposed Green Wedge between the built-up area and the National Park boundary at the highest part of the wedge. 2. Abergavenny Town Council feel that while development of the site would align with development to the south, the average slope is about 1 in 8 which is much steeper than recently developed land to the east. 3. No objection in principle from Abergavenny Transition Town & Abergavenny & District Society – whilst the site is in CSP004 as part of the Green Wedge it is now felt that the site is not essential to the purposes of the Green Wedge or its development unacceptable in the landscape. If development goes ahead the green wedge should be formally and legally defined to prevent an argument that this development site sets a precedent. 4. Responders feel that a thick hedgerow on the western boundary should be safeguarded, as should mature trees within the site and on its eastern boundary. 5. Responders state that the site may be Grade 3a agricultural land. 6. Responders suggest that vehicular access should be via Bretherton Way and/or Hillgrove Avenue/Poplars Road (with protection of trees) to avoid reliance on access only via the persimmon estate which would mean both estates using a single connection to Hereford Road. 7. A responder states that the site would be close to a Primary School and shops etc. The town centre is about 2.5kms away. Hereford Road has an hourly bus service but the new estate would need a service. Some active travel connectivity may be available via the Persimmon estate when it is completed. 8. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues. 9. The site promotor, The Stantonbury Building and Development Company, submitted a Vision Document to support consideration of their proposal. 	<ol style="list-style-type: none"> 1. Abergavenny Town Council 2. Abergavenny Town Council 3. Abergavenny & District Civic Society, Abergavenny Transition Town 4. Abergavenny & District Civic Society, Abergavenny Town Council 5. Abergavenny & District Civic Society 6. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 7. Abergavenny & District Civic Society 8. Glamorgan Gwent Archaeological Trust Ltd

		9. The Stantonbury Building and Development Company
LPA Response	Comments noted. Site is not progressing as the highway authority has raised significant concerns in relation to achieving suitable access arrangements. Landscape impact concerns have also been raised reflecting the lack of supporting information with the submission and the likely significant adverse visual impact on the Landscape Character Area. Overall, there are considered to be more suitable sites available in Abergavenny.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0128 Land at Chapel Farm, Abergavenny		Responder:
Page 1628	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red - A linear parchmark is noted in the HER, this may be related to field boundaries remaining which are depicted in the Tithe of 1848. 2. Responders state that the site is within CSP003 one of the proposed Green Wedge buffers between the built-up area and the National Park boundary and should be protected. Desire to retain the town's natural historic boundary with the National Park and keep the attractive setting of the Brecon Beacons, the town is famed for, intact. 3. Concern that the site is prominent to views from the south towards Pentre Lane with no mitigating green infrastructure to help absorb it into the landscape. 4. Site believed to be a SINCP and of very high ecological value supporting a high level of natural wildlife including birds of prey and mammals. 5. Responders suggest that although the site may accommodate as many as 250 homes a much lower density would be necessary to reflect the character of adjoining development. 6. Concern that Pentre Road (and surrounding roads) are very narrow lanes unsuitable for much vehicular traffic but popular for active travel and should be retained as such. 7. Believed to be some liability to flood towards Pentre Road and fears this development could increase run-off flooding. 8. Concerns that the connecting road network is inadequate to cope with a significant increase in traffic. This level of development would require a new direct access to the A40. 9. Concerns that increase in traffic will cause queuing and affect air quality. 10. Concerns regarding site access. 11. Responders state that there are no local shops, town centre services are up to 2km away and only a two-hourly bus service. No extra jobs, schools or medical facilities are being proposed. 12. The capacity of the local sewer network has been questioned and concerns regarding flooding caused by heavy rainfall. 13. Believed to be Grade 3b agricultural land. Quality grazing land. 14. Concerns that development at this site would set a precedent for other sites within CSP003. 15. Responders state that Pentre Road and Pentre Lane provide valuable, accessible, amenity for the community: walking, cycling, riding. Hill walking corridor from Fairfield car park to several routes onto the Sugar Loaf, encouraging tourism. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. LPA Response

Comments noted. Site not progressing as there are unresolved concerns regarding highways and access arrangements including flood risk to the south of the site onto Pentre Road and the suitability of the alternative access onto Pentre Lane. The whole site is also Grade 2 BMV agricultural land and there are more

	suitable alternatives site with lower grade agricultural land in Abergavenny. In addition, the site is identified as a Green Wedge following the Green Wedge Assessment. Overall, there are considered to be more suitable sites available in Abergavenny.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
	Candidate Site: CS0161 Land north of Hillside, Abergavenny	Responder:
Page 1630	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red - Includes part of the Registered Park and Garden of The Hill PGW (Gt) 62(MON). Cadw must be consulted and a Heritage Impact Assessment undertaken. 2. Several responders feel the site should be included in the policy for a Green Wedge buffer between the built-up area and the National Park. 3. The site is wooded and several comments were received stating that the woodland is an important element of the town's green infrastructure and is prominent from the east. 4. A suggestion was made that a small number of homes, similar to those in the grounds of The Hill, might acceptable within the less wooded western portion of the site which falls within the Abergavenny Conservation Area. 5. Traffic issues were raised with concerns that increased traffic on Old Hereford Road would further overload Pen y Pound and its junction with the A40. It was also stated that Deri Road should not be used for access to any development. 6. Responders felt that the building of the King Henry 8 school has increased traffic excessively and that school children are at risk whilst using the narrow footpath. 7. Responders suggest that the slope of the site might render substantial Active Travel unlikely and would limit access to existing shops and the town centre by foot, therefore, requiring a frequent bus service. 8. A responder feels that this is not a suitable site for residential development and that there is a better site within the candidate site list. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society 3. Abergavenny Town Council, Abergavenny & District Civic Society 4. Abergavenny Town Council, Abergavenny & District Civic Society 5. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town, 1 Private Individual 6. 1 Private Individual 7. Abergavenny Town Council, Abergavenny & District Civic Society 8. Abergavenny Transition Town
LPA Response	Comments noted. Site not progressing due to concerns raised by CADW in relation to the western part of candidate site being inside the boundaries of The Hill registered historic park and garden, with the rest of the area being an essential part of its setting. Concerns have also been raised in relation to the ecological impact development would have. In addition, the site is identified as a Green Wedge following the Green Wedge Assessment. Overall, it is considered that the desired levels of growth can be accommodated on less sensitive sites within the area.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0164 Land adjacent to Red Barn Farm (RBF1)

Responder:

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Adjacent to the route of a Roman Road, previously recommended condition for written scheme of investigation for archaeological watching brief.
2. Abergavenny Town Council object as the site falls within CSP002.
3. Several responders state that the National Park buffer zone proposal could allow for a trunk road by-pass, however, this is now unlikely due to WG policies.
4. Abergavenny & District Civic Society and Abergavenny Transition Town support the site if it is needed in this plan and if Abergavenny East site is unviable.
5. A responder states that the site is Grade 3a agricultural land.
6. Responders state the site is close to the National Park boundary but visually separated from it by a belt of woodland.
7. Responders state that flood risk from mountain streams may reduce the potential number of dwellings; potentially 60 homes but half that if a road line had to be safeguarded. Site is on an active floodplain.
8. Responders state that a new access to the A40 would be needed; perhaps shared with a new hospital access.
9. Abergavenny Transition town wants the spinney between the two sites retained for an active travel route.
10. Concerns that traffic will increase on road which are already at capacity.
11. Concerns that there is a shortage of doctors, dentists and school places within Abergavenny.
12. Concerns regarding a lack of employment in the area; houses should be built where there are employment opportunities.
13. Abergavenny Transition town suggests that any housing ought to be prioritised for allocation to hospital staff to reduce in-commuting.
14. Concern that access to the site is difficult and would require the removal of hedgerows. Responders state that the hedgerow along the A40 should be retained.
15. A responder states that the site is part of the river Usk SAC; it is presently open fields, with a rural feel, and provides natural habitat for bats, hedgehogs, voles and many other protected species.
16. The site falls within the Neville Hall RIGS and comprises three components: Neville Hall moraine feature and section, cemented outwash gravel section, post-glacial abandoned river channels and scroll marks on floodplain. The impact of proposed developments will depend on the nature of the RIGS feature, so early consultation with the local RIGS group or NRW is strongly recommended.
17. A responder states that the site is adjacent to Red Barn Farm listed buildings and forms part of its unique setting or curtilage.
18. Concerns that development would cause noise and light pollution to surrounding protected areas.
19. Concerns re increased pollution into the river Usk and Nant Iago stream.
20. Concerns re detriment to visual amenity for residents and tourists as well as loss of privacy for residents living next to the site.

LPA Response	<p>Comments noted. Viability Assessment not submitted to support proposal. The site was therefore not assessed as part of Stage 3A/3B and has not progressed further in the candidate site assessment process.</p>	
LPA Recommendation	<p>This site will not be allocated in the Deposit RLDP.</p>	

Candidate Site: CS0178 Abergavenny Workhouse		Responder:
Page 1633	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Built 1837-9 as a Workhouse, some alteration and restoration, any change will need mitigation; building recording and potentially archaeological monitoring of ground disturbance by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation. 2. Responders suggest that the present designation as a protected employment site should be maintained particularly for its wide variety of different building volumes and types. 3. Responders suggest that although only one building is listed, the complex of Victorian workhouse buildings has considerable architectural and historic qualities that would benefit from tidying up. 4. Concern regarding CS0178 and CS0286 appearing the same, apart from residential being included in CS0286. Clarification wanted whether the schemes include any demolition. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 3. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 4. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town
LPA Response	Comments noted. Site not progressing as while it performs well against the site search sequence criteria, insufficient information has been submitted to undertake a full assessment. Therefore, the site will not be allocated in the RLDP. However, given the site's location within the settlement boundary proposals can be pursued via the planning application system, subject to detailed planning policies.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0185 West of Glebe Cottage, Abergavenny		Responder:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Potential Medieval settlement and land use; desk-based assessment undertaken; archaeological monitoring of ground disturbance by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation. 2. Conditional acceptance by Abergavenny Town Council and Abergavenny & District Civic Society – The site lies within CSP001 proposed Green Wedge to protect the attractive and wildlife rich lower sides of the Gavenny Valley from development. It is also within the setting of St Teilo's Church, a Grade 1 Listed Building. 3. In 2018 Abergavenny & District Civic Society objected to an application for housing on the site. Following considerable modification, the application (for 12 affordable homes) was approved but is on hold due to drainage issues. We can now accept development here provided that the design and purpose of the housing are little changed. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society 3. Abergavenny & District Civic Society 4. Abergavenny Transition Town

	4. Abergavenny Transition Town state that the Gavenny Valley should be protected as a vital publicly accessible piece of green infrastructure, a green lung from the centre of town out to the open countryside along the river that gave the town its name.	
LPA Response	Comments noted. Site not progressing via the RLDP process as insufficient information has been submitted in relation to the candidate site submission. Therefore, the site will not be allocated in the RLDP. It is noted however, that planning application DM/2018/00834 for a rural exceptions site for 12 affordable dwellings is pending consideration following the Welsh Government decision to not call in the application for determination by the Welsh Ministers.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0192 Old Hereford Road, Abergavenny		Responder:
Page 1634	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues. 2. Responders state that the site is within CSP004 the proposed well-defined Green Wedge buffer between the built-up area and the National Park boundary. It lies at the highest part of the Wedge and is particularly prominent in views from the east. 3. Concerns regarding increased traffic on Old Hereford Road which further overload Pen y Pound and it's junction with the A40. 4. Concerns that the slope of the site would make substantial Active Travel unlikely and would limit the accessibility of local shops and the town centre. 5. Responders state that a frequent bus service would be essential. 6. The site sponsor, Candleston Homes, has submitted extensive information in support of the site, and includes the following points: <ul style="list-style-type: none"> • The site is in Flood Zone 1 for both Rivers and Sea, and, surface water flooding; therefore there is no reason why the site cannot be developed from a flood risk. • Landscape and Green Infrastructure assessments conclude that the site is suitable for development with appropriate mitigation. • A high pressure gas main crosses the site which affects the site's capacity but not it's overall suitability. • The site is sustainably located and is proximate to a range of services and well served by existing active travel routes and public transport. • The Site Ecology Assessment concludes the site is considered to have 'Medium' value and would be suitable for development. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society, 1 Private Individual 3. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town, 1 Private Individual 4. Abergavenny Town Council, Abergavenny & District Civic Society 5. Abergavenny Town Council, Abergavenny & District Civic Society 6. Candleston Homes
LPA Response	Comments noted. The site is not allocated as there is sufficient and more suitable land available for residential development within Abergavenny to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0220 Ross Road, Abergavenny

Responder:

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Area includes a Water Mill, probably of Medieval origin, part of Mardy Park, also potentially of Medieval origin and prehistoric artefacts noted.
2. Object – the site is the key section of CSP001 protecting the Gavenny Valley between the built-up area and the railway/A465 from further development.
3. Concern that part of the site is a SINC and liable to flood. These flood plains help protect the town from flooding further downstream. Further concerns are that developing this steeply sloping site would further increase the risk of flood during periods of heavy rain fall.
4. An ancient woodland SSSI is astride the site north of Ross Road forming an east-west wildlife corridor that continues east of A465. Many TPOs believed to be present. Undisturbed landscape and wildlife qualities of CSP001 would be lost. This is a vital, publicly accessible green lung from the town centre to the open countryside used as amenity land by local residents and organised groups.
5. Responders state that the river Gavenny which runs through the site has a healthy population of White Clawed Crayfish - protected under the Wildlife and Countryside Act 1981 / listed as endangered on the global IUCN Red List of Threatened Species and must be protected.
6. Responders state that the MCC Ecological Site Assessment, undertaken on this site during preparation of the previous plan, identified that the bio-diversity constraints were enough to recommend that development of a large proportion of the site should be avoided.
7. Responder suggests the site may be grade 3a agricultural land.
8. Concern regarding access issues from Ross Road; Nantgavenny Lane is unsuitable as access.
9. Concern regarding the potential increase in traffic and the ability of the road network to cope.
10. Responders feel that there is a lack of public transport into Abergavenny.
11. Concern regarding local services being able to cope with an increase in population as well as poor accessibility to local amenities from the site.
12. Concerns that the drainage and sewerage systems are at capacity.
13. Comments regarding currently uninterrupted views to the Skirrid mountain and countryside, from many areas of the Mardy and north Abergavenny, which would be adversely affected.
14. Responders stated that currently there is a high number of empty and unsold homes (both existing and new build) in the local area, so why build more?
15. Responders state that other housing developments in the area have caused pollution of the river and received NRW fines and warnings. This site is closer to the river on both sides and likely to cause significant pollution.
16. Responders feel that the site would be subject to excessive noise from the railway line and the A465. The woodland on site currently helps to reduce the noise from the A465 for residents to the West.
17. Concerns for light pollution and the loss of dark skies at night which support many species such as owls and bats as well as providing a venue for local ‘stargazers’.
18. Responders state that preserving the site supports MCC, Welsh Government and NRW environmental policies.

LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to viability to demonstrate the site is deliverable in accordance with key policy requirements. Significant concerns have also been raised in relation to highway and pedestrian access to the site and ecological impact given the SSSI and SINIC designations relating to the site.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0247 Coopers III, Llanfoist		Responder:
Page 1636	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. The HER notes earthworks, agricultural features and boundaries. <i>No objection in principle</i> 2. Concern that road access via an extension of Jones Close would only be acceptable for about 10 homes and would require significant engineering. Access via the private treatment works access lane would require negotiation and improvement, including its junction with A4143. 3. Concern that land south of the access lane appears to be partly liable to flooding and there is a substantial wooded wetland in the lower part of the northern section, possibly of considerable ecological value, so not suitable for development. 4. A responders suggests that much of the field to the east is above the flood plain and should be considered for future integrated development. 5. A responders suggests that the trees on the northern boundary and the hedgerows on the easter and southern boundaries (of the northern section) should be substantially retained. 6. The site sponsor, Johnsey Estates UK, has submitted information in support of the site and includes the following points: <ul style="list-style-type: none"> • The site is located close to employment opportunities, schools, healthcare and facilities and services at Abergavenny Town Centre and Llanfoist. • The southern parcel of land is available for any required off-site ecological mitigation and/or drainage should either be necessary. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society 3. Abergavenny & District Civic Society, Abergavenny Transition Town 4. Abergavenny & District Civic Society 5. Abergavenny & District Civic Society 6. Johnsey Estates UK
LPA Response	The site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Abergavenny including Llanfoist to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0248 Adj Llanfoist Primary School (Whole Site)		Responder:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. The HER notes the area as forming part of a 17th century park with likely Medieval origins. 2. Responders stated that the woodland area of the site should not be built on. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society,

	<ol style="list-style-type: none"> 3. Concerns that the southern part of the site would be a marked, detached protrusion beyond the now well-defined eastern boundary of Llanfoist. 4. Responders stated that the site is Grade 2 – 3b agricultural land. 5. Concerns that development of the site would ruin the clear views to the mountains, and the edge of countryside feel, from the playground of the Primary school; a vital part of the children’s heritage. 	<p>Abergavenny Transition Town</p> <ol style="list-style-type: none"> 3. Abergavenny & District Civic Society 4. Abergavenny & District Civic Society 5. Abergavenny Transition Town
LPA Response	Comments noted. Site not progressing as fundamental highways concerns have been raised as there is no adopted highway access available. Concerns have also been raised in relation to landscape and ecological impact. Overall, there are other sites in Abergavenny that are considered to be more suitable.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0249 Red Barn Farm (RFB2), Abergavenny		Responder:
Page 1637	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Formerly part of Neville Hall Park (Neville Court; The Brooks). Built 1860s; previously existing manor. Unlikely to require mitigation. 2. Responders state that the site falls within CSP002, a National Park buffer zone proposal that also could allow for a trunk road by-pass (current WG policy prohibits this now). 3. A responder felt that development would be a clearly visible urban intrusion into the Usk valley. It should remain part of a buffer zone between the well-landscaped hospital and the Park boundary. 4. A responder suggests that the spinney between the two sites should be retained for an active travel route that could connect to the Llanwenarth national cycle route. 5. A responder suggests that housing ought to be prioritised for hospital staff to reduce in-commuting. 6. A responder feels that a new access would be needed to the A40, perhaps shared with a new hospital access. 7. A responder feels that the hedgerow along A40 should be retained, contributing to the green corridor entry to the town. 8. SEWRIGS group state that the two sites fall within the Nevill Hall RIGS comprising of three components. Nevill Hall moraine feature and section, cemented outwash gravel section, post-glacial abandoned river channels and scroll marks on floodplain. The impact of proposed developments will depend on the nature of the RIGS feature, so early consultation with the local RIGS group or NRW is strongly recommended. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society, Abergavenny Transition Town 3. Abergavenny & District Civic Society 4. Abergavenny Transition Town 5. Abergavenny Transition Town 6. Abergavenny Transition Town 7. Abergavenny Transition Town 8. SEWRIGS group
LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to viability to demonstrate the site is deliverable in accordance with key policy requirements. There are also landscape impact concerns associated with development of the site. Delivery of this site is dependent on the allocation of CS0164 – Red Barn Farm (1), which has been deemed unsuitable for allocation.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0250 Land at Evesham Nurseries, Llanfoist		Responder:
Page 1638	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Consult Cadw regarding the need for an ASIDOHL to determine the impact on the adjoining Blaenavon Registered Landscape of Outstanding Historic Interest. The Blaenavon Industrial Landscape World Heritage Site also adjoins and assessment of the impact of the proposal on this is needed. Other features are noted in the area. 2. A responder states that the site is Grade 3a agricultural land? 3. Concerns re lack of local shops and facilities. 4. Responders state that despite no extra allocations being made in the 2011-2021 LDP about 180 homes have been permitted in recent years and further allocations may be unpopular. Any further increase seems disproportionate to the number needed across the county. 5. A responder suggests that the site, formerly a major horticultural site; could become an allotment site when the church reclaims the current site. 6. The site sponsor, Bellway Homes, has submitted supporting documents and includes the following points: <ul style="list-style-type: none"> • The site will not be at significant risk of flooding or increase the flood risk to others. • The site has access to a wide range of services and facilities within Abergavenny. • The site has access to excellent road links, railway station and a range of bus services. • Potential for 105 dwellings and is genuinely deliverable. 7. Concerns that some of the site has risk of flooding. 8. Concerns for an ancient mound on the site. 9. Concerns that access to the site is difficult. 10. Responders state that the south west side of the site is bounded by the cycling route NCN46; making a crossing through this would diminish the amenity of the route. 11. Concerns re the potential increase in traffic and the ability of the road network to cope. 12. Concerns that development would compromise views and diminish the enjoyment of visitors and locals who use the canal and footpaths. 13. Responders state that only a small proportion of the site is adjacent to the existing Llanfoist development boundary; adding this site would create a large peninsula with no natural boundary features. 14. Responders state that the site is not within a tier of the settlement hierarchy that allows for growth in the Preferred Strategy. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society 3. Abergavenny & District Civic Society 4. Abergavenny & District Civic Society, 2 Private Individuals 5. Abergavenny Transition Town 6. Bellway Homes 7. 3 Private Individuals 8. 3 Private Individuals 9. 3 Private Individuals 10. 3 Private Individuals 11. 3 Private Individuals 12. 3 Private Individuals 13. 2 Private Individuals 14. 2 Private Individuals
LPA Response	Comments noted. Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Abergavenny including Llanfoist to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0263 Adj Llanfoist Fawr Primary School		Responder:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues. 2. Abergavenny & District Civic Society and Abergavenny Transition Town state that the site is a solitary and valuable woodland Green Infrastructure. May need an ecological survey to establish quality. Should not be disturbed by development. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society, Abergavenny Transition Town
LPA Response	Comments noted. Site not progressing as fundamental highways concerns have been raised as there is no adopted highway access available. Concerns have also been raised in relation to landscape and ecological impact. Overall, there are other sites that are considered to be more suitable in Abergavenny.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0264 Land north of St Teilos, Abergavenny		Responder:
Page 1639	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. HER notes the area has a corn mill, and a post Medieval bridge is at the edge of the site. Less than 30m to the Medieval church enclosure. 2. Concerns that the site adjoins the National Park boundary and within CSP001. 3. Responders state that the site lies beyond the built-up extent of the town and is part of an area astride the Park boundary where residential development was quite recently refused by both MCC and the Park Authority. 4. Concern that development would detract from St Teilo's Church, a Grade 1 Listed Building. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 3. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 4. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town, Sore Group
LPA Response	Comments noted. Site not progressing as significant concerns raised in relation to the heritage and ecological impact of developing the site. The central section of the site is also within a flood risk area.	

LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0265 Tredilion Park, Abergavenny		Responder:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Tredilion Park: noted as Post-Medieval Park. Also traditional burial place of an Orgo the Giant, said to be pre AD634. 2. Abergavenny & District Civic Society and Abergavenny Transition Town state there is no need to designate this site for tourism/leisure as already partly used for this and any planning applications should be considered through the planning process. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society, Abergavenny Transition Town, Sore Group
LPA Response	Comments noted. While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0266 Land at Nantgavenny Business Park, Abergavenny		Responder:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues. 2. Conditional Acceptance – site is within CSP001, however, due to recent provision of business units north of the site and the need for allocations of employment land in the area we do not object to light industrial use of the western park of this site provided specific conditions are met. 3. Responders feel that the lower part of the site should be kept open similar to approved proposals at CS0185 and approval should not lead to further similar developments in Mardy Park to the south. 4. Responders feel that the site edge nearest to the river should be carefully landscaped and filled with suitable, biodiverse planting. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 3. Abergavenny Town Council, Abergavenny & District Civic Society 4. Abergavenny Transition Town
LPA Response	Comments noted. The site forms a logical extension to the adjoining business park and would provide much needed employment land in Abergavenny.	
LPA Recommendation	It is therefore proposed to allocate the site for B1 employment use as set out in Policy EA1, with the site specific reference EA1a Land at Nantgavenny Business Park, Abergavenny.	

Candidate Site: CS0267 Waterloo Court, Llanfoist		Responder:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Part of the area falls within the Historic Landscape Character Area HLCA012 Llanfoist. Buildings noted as tenements on the Tithe Map & Apportionment of 1843 on the roadside. 2. Abergavenny & District Civic Society and Abergavenny Transition Town have no objection in principle. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society, Abergavenny Transition Town, SOUL
LPA Response	Comments noted. The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0268 Westgate Gardens, Abergavenny		Responder:
Page 1641	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Adjoins the Registered Park of Linda Vista and the Essential Setting. Assessment of the impact will need to be undertaken to Cadw Guidance. 2. Responders state that this site is an important piece of green infrastructure within the Conservation Area. 3. Concern that the area acts as a flood meadow. 4. Responders suggest that a derelict gateway at the western end suggests history worth investigating. 5. Abergavenny Transition Town have no objection in principle. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society, 1 Private Individual 3. Abergavenny Town Council, Abergavenny & District Civic Society, 1 Private Individual 4. Abergavenny Town Council, Abergavenny & District Civic Society, 1 Private Individual 5. Abergavenny Transition Town

LPA Response	Comments noted. The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0269 Land at Grove Farm, Llanfoist		Responder:
Page 16 of 12	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. The HER notes the area as forming part of a 17th century park and house, both with likely Medieval origins. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. Objections due to insufficient information on what is intended as 'residential care' and until there is more detail it will not be known whether this is serving a justifiable local need. 3. A responder felt that the Preferred Strategy suggests that the development of this area is unnecessary in the plan period. 4. The site is Grade 2 – 3b agricultural land. 5. SOUL supports the proposal. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society, Abergavenny Transition Town 3. Abergavenny & District Civic Society 4. Abergavenny & District Civic Society 5. SOUL
	LPA Response	Comments noted. Site not progressing as significant concerns have been raised in relation to highway and pedestrian access to the site and ecological and heritage impact.
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0284 Pen-y-Worlod Stables, Llanfoist		Responder:
Page 16 of 12	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues. 2. Abergavenny & District Civic Society object – the site is dependent on CS0250 to which we also object. 3. SOUL Support the site. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny & District Civic Society 3. SOUL
	LPA Response	Comments noted. Site not progressing as it does not provide a natural and logical extension to the settlement and does not relate physically, functionally or visually to the existing settlement pattern. Given the small numbers proposed, the site would result in a pocket development detached from the main settlement of Llanfoist. Furthermore, insufficient information has been submitted in order to conduct a full assessment of the site in relation ecology and highways.

LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0286 Abergavenny Workhouse, Abergavenny		Responder:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Built 1837-9 as a Workhouse, some alteration and restoration, any change will need mitigation; building recording and potentially archaeological monitoring of ground disturbance by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation. 2. Responders state that the present designation as a protected employment site should be maintained. 3. Responders state that while only one building is Listed, the complex of Victorian workhouse buildings would benefit from tidying up. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town 3. Abergavenny Town Council, Abergavenny & District Civic Society, Abergavenny Transition Town
LPA Response	Comments noted. Site not progressing as while it performs well against the site search sequence criteria, insufficient information has been submitted to undertake a full assessment. Therefore, the site will not be allocated in the RLDP. However, given the site's location within the settlement boundary proposals can be pursued via the planning application system, subject to the detailed planning policies.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Chepstow		
Candidate Site: CS0029 Barnetts Farm Chepstow		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Earlier buildings noted on historic mapping sequences, condition for written scheme of investigation for mitigation in accordance with an agreed Written Scheme of Historic Environment Mitigation. 2. A responder stated that information presented did not identify the number, type, or mix of dwellings/affordable dwellings proposed. 3. Responders want no more development without affordable housing - no more housing at prices locals cannot afford. 4. Objection to developing green field (agricultural) sites when there are brown field sites in the county. 5. The proposed areas form the gateway to the Wye Valley which attracts visitors. 6. The proposed areas are in close proximity to ancient woodland and an AONB. 7. Concerns that Chepstow, and the local area, is already subject to traffic congestion and high levels of air pollution. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Mathern Community Council, 1 Private Individual 3. 4 Private Individuals 4. 6 Private Individuals 5. 1 Private Individual 6. 6 Private Individuals 7. 16 Private Individuals

<p>Page 1644</p>	<ol style="list-style-type: none"> 8. A responder states that Chepstow businesses are losing custom due to traffic problems. 9. A responder states that MCCs Integrated Sustainability Appraisal makes it clear that development anywhere in Chepstow will make the current traffic and pollution issues worse. 10. A responder states the annual objective level, in MCCs Local air management strategy, is being exceeded on Hardwick Hill. 11. There should be no more building until a bypass is built from the Severn Bridge to Gloucestershire. Closure of a road for planned maintenance caused tailbacks from Highbeech to Lydney, Thornwell and across the Severn bridge. 12. Concerns that road access in any direction is unsuitable and unsafe. 13. Mathern Community Council state that no public transport serves this site. 14. A responder states that no shops or employment at this site. 15. Concerns re poor broadband services and increased demand for schools, doctors and dentists. 16. Planning proposals in Gloucestershire will also have a detrimental effect on Chepstow. 17. A responder feels that more development at this site is excessive and will add to the general inability of Chepstow town to cope with more commuters who add nothing to the local economy. 18. Concerns that drainage in the outfall area of this site (surface and foul) is overcapacity with Mounon being flooded via the brook annually and having raw sewage emitting from Manholes. 19. Responders feel that infrastructure and service improvements would be necessary before any development at this site. 20. Responders feel that development will ruin views of the area. 21. CS0165 Mounon Road is a large site and nearer the motorway access and within walking distance of the town centre so appears to be a better option. 	<ol style="list-style-type: none"> 8. 1 Private Individual 9. 1 Private Individual 10. 1 Private Individual 11. 1 Private Individual 12. 3 Private Individuals 13. <p>Page 1645</p>	<ol style="list-style-type: none"> 7. Agricultural land should not be used for housing. 8. Concerns regarding the only access to the adjacent agricultural land being through the site offered for development. 9. Concerns that Chepstow, and the local area, is already subject to traffic congestion, long queues, and high (illegal) levels of air pollution. Hardwick Hill and Highbeech roundabout are particular pinch points. 10. Planning proposals in Gloucestershire will also have a detrimental effect on the traffic issues in Chepstow. 11. Responders stated that MCCs Integrated Sustainability Appraisal makes it clear that development anywhere in Chepstow will make the current traffic and pollution issues worse. Development will contravene UK, National and local policies. 12. There should be no more building until a bypass is built from the Severn Bridge to Gloucestershire. Closure of a road for planned maintenance caused tailbacks from Highbeech to Lydney, Thornwell and across the Severn bridge. 13. A responder states that Chepstow businesses are losing custom due to traffic problems. 14. Responders feel that the site is too far from public transport options, which are poor and cannot be relied upon to the meet the needs of a working population, and the area too steep for active travel. 15. Responders feel that overdevelopment is having a detrimental effect on residents and visiting tourists. 16. A responder states that the information presented does not identify the number, type or mix of dwellings/affordable dwellings proposed. 17. Responder feels that the site would be better accessed from the Itton Road as there is a roundabout junction for that road with the A466. 18. A responder feels that residential development would be poor use of the eastern part of this site; could be a visitor attraction or hotel if development is necessary. 19. Concerns that existing community/public services are already overstretched. Infrastructure and service improvements would be necessary before any development at this site. 20. Responders want no more development without affordable housing. No more housing at prices locals cannot afford. 21. Concerns that there are no recreation or leisure facilities, nor green infrastructure included in the plans. 22. Concerns regarding the proposed lake for surface water drainage and for the adequacy of sewage pumping facilities. 23. Concerns regarding water run off and the impact of development on the water table. 24. Support for the site having excellent road access, suitable crossings and pedestrian access to the town and local amenities. 	<ol style="list-style-type: none"> 9. 16 Private Individuals 10. 4 Private Individuals 11. 4 Private Individuals 12. 1 Private Individual 13. 1 Private Individual 14. 9 Private Individuals 15. 2 Private Individuals 16. 1 Private Individual 17. 1 Private Individual 18. 1 Private Individual 19. 10 Private Individuals 20. 3 Private Individuals 21. 1 Private Individual 22. 1 Private Individual 23. 1 Private Individual 24. 1 Private Individual
<p>LPA Response</p>	<p>Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating viability and deliverability in accordance with key policy requirements. Inclusion of the site of this scale would also have a negative impact on ecology due to loss of a locally protected SINCP and nationally important Priority Habitats.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	
<p>Candidate Site: CS0098 Bayfield, Chepstow</p>		<p>Representor:</p>
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation. 2. Support for the site as long as development provides at least 50% affordable housing. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd

- 3. The site promotor, Vistry, has submitted extensive information in support of the site and makes the following key points:
 - The site is not subject to any fundamental constraints that cannot be mitigated.
 - The development proposals are designed in such a way that a green buffer can be maintained with Pwllmeyric ensuring no coalescence of these settlements.
 - The site is not located in an area at risk of flooding.
 - Around 13ha of green infrastructure will permeate the development and will include the retention and enhancement of the vast majority of woodland and boundary vegetation.
 - The Preliminary Transport Appraisal has identified an improvement scheme which would alleviate capacity constraints on the High Beech Roundabout; the proposed development could facilities the implementation of such a scheme.
- 4. **Responders have support for the overall strategy but state that this site cannot be developed until the infrastructure within Chepstow to support it has been expanded.**
- 5. Responders state that no development should go ahead until a bypass has been provided.
- 6. Objection to developing green field sites (with public rights of way) when there are brownfield sites in the county.
- 7. Responders state that the proposed areas form the gateway to the Wye Valley which attracts visitors.
- 8. Concerns that the site is in close proximity to an AONB.
- 9. Responders state that the site is adjacent to an ancient woodland, used extensively by local people for leisure, and supports local, protected species such as deer, bats and birds of prey.
- 10. Responders state that the site has acknowledged national landscape interest and would be entirely inappropriate for the site to be allocated for development.
- 11. Responders feel that the development of the site would detract unacceptably from the wider AONB setting. The visual distinction between town and protected woodland would be lost forever.
- 12. Responders state that the site is on prime agricultural land.
- 13. Several responders feel that the site is sloping away from the main settlement, visually relating to the AONB rather than the town, and not being conducive to quality placemaking.
- 14. Concerns that traffic congestion within Chepstow, particularly Highbeech roundabout and Hardwick Hill, is at unacceptable levels. Any incidents or planned closures cause excessive queues.
- 15. Concerns re Chepstow being a Designated Air Quality Management Area with high, potentially illegal, levels of air pollution (contrary to Wellbeing of Future Generations Act).
- 16. Development proposals in Gloucestershire, and the wider community, will impact traffic levels in Chepstow and demand for services.
- 17. Responders feel that the site is at a dangerous location for pedestrians (no safe walking routes) and active travel routes are not viable.
- 18. Responders feel that the B4235 is not suitable for heavy traffic and will be increasingly dangerous during construction and afterwards.
- 19. Concerns that local infrastructure and services are already overstretched with no capacity to serve this site. Local roads are congested, public transport is poor, schools are oversubscribed, it's difficult to get a GP appointment, no spaces available at

<p>Page 1647</p>	<p>NHS dentists, no longer a local hospital facility. Shortage of leisure and community facilities and no cultural facilities such as a theatre or cinema.</p> <p>20. Responders feel that this site is farthest from the town centre and areas of local employment and involves steep walks back from the centre.</p> <p>21. Responders state that the site is far from public transport routes and no improvement in public transport recently. Lack of suitable services (no direct rail link to Bristol) as well as cost encourages driving.</p> <p>22. Concern that congestion is putting visitors off coming to Chepstow and supporting the shops and food outlets, resulting in a disappointing level of shopping.</p> <p>23. Responders want no more housing at prices that locals cannot afford.</p> <p>24. Concern that affordable housing will attract crime, drugs and other anti social behaviour.</p> <p>25. Concern that Chepstow is overdeveloped and will become a commuter town with no sense of community.</p> <p>26. Concerns regarding potential groundwater contamination, from construction, of the natural spring below the site.</p> <p>27. Concerns regarding potential flooding as currently significant throughflow of water through adjacent streets during heavy rainfall.</p> <p>28. Concerns that development in Chepstow has the potential to impact the River Wye SSSI and to impact the Wye Valley Woodlands SSSI/National Nature Reserve through atmospheric pollution.</p> <p>29. Concerns that development would affect the right to light as it would impact the solar generation of solar panelled properties.</p> <p>30. Responders state that the Council's Integrated Sustainability Appraisal makes it clear that development anywhere in Chepstow will make current traffic and pollution issues worse, with the (WeITAG) study demonstrating that the High Beech roundabout is already at full capacity.</p> <p>31. Concern that growth figures conflict with WG advice to limit number to a maximum of 4275 new houses and exceed this target by 40%.</p> <p>32. Concern that the Council's aspirations for job created lack credibility.</p> <p>33. A responder feels that building near the Severn bridge will attract middle aged commuters from Bristol and South Gloucestershire rather than the young people needed to rebalance the County's demography.</p> <p>34. Responders state that recent Planning Application for the site has over 800 oppositions. Site also previously refused planning for reasons which are still valid.</p> <p>35. Criticism of the LDP process - re 2nd consultation so soon after 1st, this site being the preferred option whilst not scoring the best. Plans not aligned with WG policy.</p> <p>36. Responders ask why were only 7.5% of houses on the Fairfield Mabey site allocated for affordable on that brownfield site. Now MCC is saying this greenfield site is required for Affordable Housing.</p> <p>37. Concerns regarding provision of formal and informal open spaces and Green Infrastructure onsite - history of developers not delivering.</p>	<p>25. 17 Private Individuals</p> <p>26. 1 Private Individual</p> <p>27. 13 Private Individuals</p> <p>28. 3 Private Individuals</p> <p>29. 4 Private Individuals</p> <p>30. 16 Private Individuals</p> <p>31. 16 Private Individuals</p> <p>32. 6 Private Individuals</p> <p>33. 1 Private Individual</p> <p>34. 12 Private Individuals</p> <p>35. 12 Private Individuals</p> <p>36. 7 Private Individuals</p> <p>37. 10 Private Individuals</p>
	<p>LPA Response</p>	<p>Comments noted. In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included amending the strategic site in Chepstow from Bayfield to Land at Mounton Road. On balance, it is considered that the benefits of the commercial development and associated job creation at the Mounton Road site outweighed the loss of higher quality agricultural land and encroachment into the existing green wedge separating Chepstow and Pwllmeyric, given the absence of alternative commercial sites and the importance of Chepstow for tourism as the gateway to the Wye Valley.</p>

	It is considered that sufficient separation between Chepstow and Pwllmeyric would remain to prevent coalescence of the settlements. As such, it is considered that there is sufficient and more suitable land available for residential development within the town to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Page 1648	Candidate Site: CS0112 Land at St Lawrence Lane, Chepstow	Representor:
		<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. The HER indicates the course of a Roman road passing through the south of the site, the potential site of a medieval Grange, and findspots of both Roman and Medieval date. Desk-based assessment and geo-physical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. The site promotor, Vistry, has submitted extensive information in support of the site and makes the following points: <ul style="list-style-type: none"> • The site is not subject to any fundamental constraints that cannot be mitigated. • The proposals will maximise opportunities for active travel with a network of well connected pedestrian and cycle links that also have the advantage of providing enhanced sustainable links between Pwllmeyric and Chepstow. • The development proposals are designed in such a way that a green buffer can be maintained with Pwllmeyric ensuring no coalescence of these settlements. • The site is not located in an area at risk of flooding. • The Preliminary Transport Appraisal has identified an improvement scheme which would alleviate capacity constraints on the High Beech Roundabout; the proposed development could facilities the implementation of such a scheme. 3. Responders state that a green wedge between Chepstow and Pwllmeyric is essential (to help retain their own identities) so would not support the development of CS0112. 4. Objection to developing Green field sites when there are brownfield sites within the county. 5. Responders state that the site is on prime agricultural land. 6. Responders state that the proposed areas form the gateway to the Wye Valley which attracts visitors. Development would ruin views of the AONB. 7. A responder feels that development would have a detrimental effect on the wildlife that currently resides in the area and hedgerows. 8. Responders feel that green spaces enjoyed by the community should not be built on. 9. Responders state that no development should go ahead until a bypass has been provided and substantial improvements to Highbeech roundabout. 10. Concerns that access onto the A48 here would be dangerous and difficult to use due to queuing traffic. 11. Concerns that traffic congestion within Chepstow, particularly Highbeech roundabout and Hardwick Hill, is at unacceptable levels. Any incidents or planned closures cause excessive queues. 12. Concerns that Chepstow is a Designated Air Quality Management Area with high, potentially illegal, levels of air pollution (contrary to Wellbeing of Future Generations Act). 13. Development in Gloucestershire, and the wider community, impacts traffic levels in Chepstow and demand for services.

Page 1649

- 14. Concerns that local infrastructure and services are already overstretched with no capacity to serve this site. Local roads are congested, public transport is poor, schools are oversubscribed, it's difficult to get a GP appointment, no spaces available at NHS dentists, no longer a local hospital facility. Shortage of leisure and community facilities and no cultural facilities such as a theatre or cinema.
- 15. Concerns that the plans don't include any additional recreation or leisure facilities. What Green Infrastructure will be included?
- 16. Responders feel that affordable housing is needed but no evidence of this being supplied on current developments. The only housing that should be built in the area should be Affordable for local workers only.
- 17. Responders state that the plan suggests working from home will continue but evidence suggests people are returning to the workplace.
- 18. Concern re lack of plans to increase employment in the area. Workers currently employed in the area do not earn enough to be able to afford the properties being built.
- 19. Responders state that site is far from the town centre, and areas of local employment, and involves steep walks back from the centre.
- 20. Responders state that site is far from public transport routes and no improvement in public transport recently. Lack of suitable services (no direct rail link to Bristol) as well as cost encourages driving.
- 21. Concern that there is no provision for safe walking and Active Travel routes.
- 22. Concern that Chepstow is overdeveloped and will become a commuter town with no sense of community.
- 23. Congestion is putting visitors off coming to Chepstow and supporting the shops and food outlets, resulting in a disappointing level of shopping.
- 24. Concerns that the sewage system on Pwllmeyric Hill has significant impact on mountain stream with regular raw sewage outfall in the river.
- 25. Concerns that the land floods frequently.
- 26. Plan claims houses will be built as net carbon zero ready, however, no recent developments have been built to the high environmental standards we can now achieve.
- 27. Responders state that the Council's Integrated Sustainability Appraisal makes it clear that development anywhere in Chepstow will make current traffic and pollution issues worse, with the (WeITAG) study demonstrating that the High Beech roundabout is already at full capacity.
- 28. Concern that growth figures conflict with WG advice to limit number to a maximum of 4275 new houses and exceed this target by 40%.

LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating the viability and deliverability of the site. The site is within a Green Wedge and would also have negative ecology impact due to the ancient woodland priority habitat within the site.
LPA Recommendation	This site will not be allocated in the Deposit RLDP.

<p>Candidate Site: CS0154 Land to the north of M48, Chepstow</p>		<p>Representor:</p>
<p>Page 1650</p>	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues. Existing disturbance from M4 construction and landscaping. 2. Support for the site as it's near the motorway and bring additional employment to the area. 3. Concern that development would erode the green wedge between Mathern and Bulwark. 4. Objection to developing Green field sites when there are brownfield sites within the county. 5. A responder feels that the green belt around Chepstow, which contains a well used public footpath, would be compromised. 6. Responders state that the proposed areas form the gateway to the Wye Valley which attracts visitors. Development would ruin views of the AONB. 7. A responders feels that no development should go ahead until a bypass has been provided and substantial improvements to High Beech roundabout. 8. Concerns that access to the site will be difficult and dangerous for pedestrians. 9. Concerns that traffic congestion within Chepstow, particularly Highbeech roundabout and Hardwick Hill, is at unacceptable levels. Any incidents or planned closures cause excessive queues. 10. Concerns that Chepstow is a Designated Air Quality Management Area with high, potentially illegal, levels of air pollution. 11. Development in Gloucestershire, and the wider community, impacts traffic levels in Chepstow and demand for services. 12. Concerns that local infrastructure and services are already overstretched with no capacity to serve this site. <p>LPA Response</p>	<p>Comments noted. While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	

Candidate Site: CS0260 South of J2 M48 (Option 1: Hotel & Employment)		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. A desk based assessment and geophysical survey prior to any determination of an application would inform mitigation which may include further pre-determination work. 2. Objection to developing greenfield sites when brownfield sites are available in the county. 3. Concern that the proposed areas form part of the gateway to the Wye Valley, which attracts visitors, and the areas are close to an AONB. 4. Concern for the impact the increase in traffic will have on Chepstow which is already suffering from traffic congestion and high levels of air pollution. 5. Planning proposals in Gloucestershire will have a detrimental effect on Chepstow. 6. Responders state that public transport is not a viable option for many people – buses are infrequent and stop early and there are no direct trains to Bristol increasing use of the car. 7. Support for the site due to it's location close to the motorway and for the additional employment it may bring. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. 1 Private Individual 3. 1 Private Individual 4. 4 Private Individual 5. 2 Private Individual 6. 2 Private Individual 7. 4 Private Individuals
LPA Response	Comments noted. A separate Candidate Site submission for Mixed Use: Petrol Station (Sui Generis), Drive Thru (A1/A3) and Employment (B1/B2/ B8) has been submitted please see CS0261 for further details.	
LPA Recommendation	See response to CS0261.	
Candidate Site: CS0261 South of J2 M48 (Option 2: Petrol Station, Drive Thru and Employment)		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. A desk based assessment and geophysical survey prior to any determination of an application would inform mitigation which may include further pre-determination work. 2. Objection to developing greenfield sites when brownfield sites are available in the county. 3. Concern that the proposed areas form part of the gateway to the Wye Valley, which attracts visitors, and the areas are close to an AONB. 4. Concern for the impact the increase in traffic will have on Chepstow which is already suffering from traffic congestion and high levels of air pollution. 5. Planning proposals in Gloucestershire will have a detrimental effect on Chepstow. 6. Responders state that public transport is not a viable option for many people – buses are infrequent and stop early and there are no direct trains to Bristol increasing use of the car. 7. Responder states that there are already 3 petrol stations in Chepstow so another is not needed. 8. Concerns that a drive through would only increase traffic, pollution and littering. 9. Support for the site due to its location close to the motorway and for the additional employment it may bring. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. 1 Private Individual 3. 1 Private Individual 4. 4 Private Individual 5. 2 Private Individual 6. 2 Private Individual 7. 1 Private Individual 8. 1 Private Individual 9. 4 Private Individuals
LPA Response	Comments noted. The Site has recently gained planning permission (DM/2022/01155) for the non-B use suis generis use of a Petrol Station and Drive Thru facility. Overall, the remaining employment land at the site provides an opportunity for B use employment land within an already established and protected industrial site.	

LPA Recommendation	It is therefore proposed to allocate the site for B1,B2,B8 employment use as set out in Policy EA1, with the site specific reference EA1d Newhouse Industrial Estate, Chepstow.	
Monmouth		
Candidate Site: CS0006 Land at Osbaston Road		Representor:
	No responses received	
LPA Response	Comments noted. While internal and external consultee comments were obtained on this Candidate Site submission, it relates to a use more appropriately considered through the policy approach to community and recreation facilities adjoining identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific community facility related allocations in the RLDP.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0051 Land at Croft y Bwla		Representor:
	No responses received	
LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape impact and highway concerns have also been raised in relation to the site's allocation given the large scale of the site. Overall, there are considered to be more suitable sites available in Monmouth.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0074 Land rear of The Royal Oak		Representor:
	No responses received	
LPA Response	Comments noted. The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0076 West of Rockfield Road, Monmouth		Representor:
	1. Responder does not support the filtering out of the site due to CIRIA SuDS information released and to view their formal representations for further information.	1. Hallam Land Management Ltd.

LPA Response	Comment noted. Part of this Candidate Site submission has extant planning permission for 70 dwellings. The remainder of the site sits neatly within a gap between the permitted site to the east, residential development to the south and west and consequently has limited landscape impact. While the site is Best and Most Versatile agricultural Land, the principle of development in this location has been established through the permission of the adjacent site. The site benefits from good access to a range of services including a primary school, open space and neighbourhood centre. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.	
LPA Recommendation	It is proposed to allocate the site for 60 dwellings with site specific policy requirements set out in Policy HA6 Land at Rockfield Road, Monmouth.	
Candidate Site: CS0078 Croft y Bwla Farm, Monmouth		Representor:
	<ol style="list-style-type: none"> 1. Responder does not support the filtering out of the site due to CIRIA SuDS information released and to view their formal representations and Brookbanks Nutrient Neutrality Assessment for further information. 2. Responder provides a summary of their Nutrient Neutrality Assessment. The summary notes that proposals for 300 dwellings at the site can be self-sufficient in becoming Nutrient Neutral in line with NRW guidance. 3. The summary states that the proposed development will result in a positive TP budget that will require mitigation to be delivered, the summary includes mitigation proposals as such: Proposed SuDS features for surface water runoff, foul water discharge treatment and a constructed wetland suggested to treat effluent. 	<ol style="list-style-type: none"> 1. Taylor Wimpey 2. Taylor Wimpey 3. Taylor Wimpey
LPA Response	Comments noted. Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0099 Land at Drybridge Farm		Representor:
	No responses received	
LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape impact and heritage concerns have also been raised in relation to the site's allocation.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0136 Land at former Poultry Units at Rockfield Road		Representor:
	No responses received	
LPA Response	Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability for residential uses in accordance with key policy requirements. The whole site is located in flood zone which would not be suitable for highly vulnerable development. Therefore, this site will not be allocated in the RLDP for mixed-use residential and employment use. A separate Candidate Site submission for employment use has been submitted – please see CS0272 for details.	

LPA Recommendation	See response to CS0272 for details.	
Candidate Site: CS0151 Former Troy Rail Yard, Monmouth		Representor:
Page 1654	<ol style="list-style-type: none"> 1. Responder notes the history of promotion of the site through the previous stages of the RLDP process, and the recommendation for the site not to progress to the next stage as the site is in the Upper River Wye catchment area, requires an FCA complying with the new TAN15 guidelines, and relates to a brownfield site development that is not permitted in area of Zone 3. 2. Responder acknowledges the Preferred Strategy seeks to make no new allocations but believes provisions should be made for delivering sustainable growth across the entire plan period and beyond. Responder quotes Planning Policy Wales (Edition 11) reaffirming that planning authorities should take the lead on previously developed land, considering and identifying the interventions necessary to assist in its delivery. 3. Responder provides a completed FCA for the site compliant with the new TAN15 guidelines. Responder notes the site is at risk of flooding from Zone 2 and Zone 3 but that no developments will be proposed in the areas at risk. There is a marginal surface water and small watercourse risk present in parts of the site, but these are outside of the property and site access routes, therefore complying with TAN15 guidelines. The development will not increase the risk of flooding elsewhere as adequate attenuation will be designed for events up to and including the 1-in-100yr, and a foul pumping station will be used to manage foul flows which will be positioned outside of flood Zone 2 and Zone 3. 4. Responder believes the site should be incorporated into the settlement boundary of Monmouth. 	<ol style="list-style-type: none"> 1. 1 Private Individual 2. 1 Private Individual 3. 1 Private Individual 4. 1 Private Individual
	LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Approximately a third of the site is located in flood zone which would not be suitable for highly vulnerable development.
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0189 Land at Tudor Road, Monmouth		Representor:
	<ol style="list-style-type: none"> 1. Significant progress has been made on technical work and investigating a resolution to the phosphate constraint in Monmouth, by site promoter and responder Edenstone, noting that pre-application negotiations have taken place. 2. Through pre-application and candidate site submissions, Edenstone believe their client demonstrates that a scheme for 58 dwellings can be delivered successfully. 	<ol style="list-style-type: none"> 1. Edenstone 2. Edenstone
LPA Response	Comments noted. his site was allocated in the Adopted LDP, however, phosphates prevented its development in coming forward. In view of DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025, a planning application has been submitted and is currently being considered. The site performs well against the site search sequence, with excellent links to a primary school, local shop/post office and open space. A significant proportion of the site is also identified as being non-BMV land (65%), which performs well in a Monmouthshire context. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.	
LPA Recommendation	It is proposed to allocate the site for approximately 50 dwellings with site specific policy requirements set out in Policy HA8 Land at Tudor Road, Wyesham.	

Candidate Site: CS0216 Land at Hereford Road		Representor:
	No responses received	
LPA Response	Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0271 Land at Vauxhall Fields		Representor:
	No responses received	
LPA Response	Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Page 1655	Candidate Site: CS0272 Land at former Poultry Units at Rockfield Road	
		No responses received
	LPA Response	While located in floodplain, this relates to a brownfield site with extant planning permission for B1 employment use, the proposed use would reflect the planning permission and therefore would not be contrary to TAN15.
	LPA Recommendation	It is therefore proposed to allocate the site for B1 employment use as set out in Policy EA1, with the site specific reference EA1b Poultry Units, Rockfield Road, Monmouth.
Candidate Site: CS0274 Land North of Wonastow Road, Monmouth		Representor:
	<ol style="list-style-type: none"> 1. Richborough Estates, the site promoter, confirms through the council's high-level assessment that the site is not subject to any fundamental constraints that cannot be mitigated. 2. Part of the site is subject to surface water flooding, but developments would mitigate this issue and improve drainage, resulting in a downstream benefit through a reduction in peak flow run-off. 3. The site is shown, through the high-level assessment, to not be compatible due to its location within the Upper River Wye catchment area. If the council's position on phosphates change, the responder believes the site represents the most appropriate direction for future growth. 	<ol style="list-style-type: none"> 1. Richborough Estates 2. Richborough Estates 3. Richborough Estates
LPA Response	Comments noted. Site is not allocated for a mixed use residential and employment site as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need. Part of the site is, however, considered appropriate for B1/B2/B8 employment uses as it forms a logical extension to adjoining employment uses and would provide much needed employment land in Monmouth.	

LPA Recommendation	It is therefore proposed to allocate the site for B1, B2, B8 employment use as set out in Policy EA1, with the site specific reference EA1c Land north of Wonastow Road, Monmouth.	
Candidate Site: CS0275 Land off Wonastow Road Industrial Estate		Representor:
	No responses received	
LPA Response	While located within defended flood zone, the site is greenfield and the proposal is therefore contrary to provisions set out in the latest National Planning Policy in relation to Flooding.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0277 Land at Drewen Farm, Monmouth		Representor:
Page 1656	<ol style="list-style-type: none"> 1. Responder and developer of the site, Vistry Group, is in favour of the site and welcomes the development due to its partial inclusion in the adopted LDP and vicinity to a wide range of amenities that support the development. 2. Vistry Group has undertaken a range of initial surveys to inform the design proposals for the site and concluded that the site will be a viable and deliverable proposition. 3. Responder believes once the phosphates challenge has been overcome at Monmouth, the delivery of the site will provide a valuable contribution towards the housing needs of the county. 	<ol style="list-style-type: none"> 1. Vistry Group 2. Vistry Group 3. Vistry Group
	LPA Response	Comments noted. This site was allocated in the Adopted LDP, however, phosphates prevented its development in coming forward. In view of DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025 the site can now be progressed. The site performs well against the site search sequence, with good links to a primary school, neighbourhood centre, employment uses and open space.
LPA Recommendation	It is proposed to allocate the site for approximately 110 dwellings with site specific policy requirements set out in Policy HA7 Land at Drewen Farm, Monmouth.	
Candidate Site: CS0292 Rhossili, Hadnock Road		Representor:
	No responses received	
LPA Response	Site not progressing as significant concerns have been raised in relation to highway capacity and safety, along with ecological impact.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Caerwent

Candidate Site: CS0009 Former MoD Training Centre, Caerwent

Representor:

Page 1657	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. A desk based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. The site promotor states that the site is located on previously developed land. 3. Concerns regarding the provision of Doctors, Dentists, Telephone and Broadband. 4. Concerns regarding the provision of Primary and Secondary school places. 5. Concerns regarding the adequacy of sewage processing. 6. Concerns regarding surface water run off causing flooding. 7. The flood plains provide a natural reserve for wildfowl and such habitat loss would impact a SSSI 8. Poor local bus services with no service in the evening or on Sundays. 9. Better train service from Caldicot required plus a bus link to the station. 10. Concerns regarding an increase in traffic locally plus on the M4 and A48 around Larkfield, Chepstow. 11. Further development will destroy the look and feel of these peaceful rural villages. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Edenstone 3. 2 Private individuals 4. 1 Private individual 5. 1 Private individual 6. 2 Private individuals 7. 1 Private individual 8. 1 Private individual 9. 1 Private individual 10. 2 Private individuals 11. 1 Private individual
LPA Response	<p>Comments noted. It is proposed to allocate the site as mixed-use residential and employment (B1) allocation in the Deposit Plan. The allocation is a sustainably located edge of settlement site, which is previously developed land that performs well against the site search sequence, with no significant constraints identified on site that would prohibit its development. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p> <p>The mixed-use development proposal which is allocated for 40 residential units and a minimum of 1ha of B1 employment land is considered to have associated job creation with opportunities to work and live together and promote accessibility and connectivity to the existing settlement of Caerwent and the wider Severnside Region. The site is not allocated for C2 (care home) /community use (D1) as the need for these uses was not evidenced in this location.</p>	
LPA Recommendation	<p>It is proposed to allocate the site for 40 dwellings with site specific policy requirements set out in Policy HA9 Land at Former MOD, Caerwent.</p>	

Candidate Site: CS0017 Village Farm, Llanvair Discoed (Caerwent ward)		Representer:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Site c35m north of the Scheduled Monument of 13th century Llanfair Discoed Castle MM047, Roman finds recorded in the vicinity. Development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation.	1. Glamorgan Gwent Archaeological Trust Ltd
LPA Response	Comment noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. The site also is not able to connect to the public sewerage system and is within a groundwater Source Protect Zone (SPZ), meaning that its development would result in an unacceptable impact on the water environment.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0071 Land at Slough Farm, Caerwent		Representer:
Page 1658	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. A desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work 2. Landscape sensitivity to residential development is high/medium. 3. The area is classified as predictive grade 1 BMV land. 4. The site is located a significant distance from all day to day services and responders are concerned that there is sufficient provision of services including Doctors, Dentists, Telephone, Broadband and school places. 5. The site's relationship with the green belt designated under Policy 34 of Future Wales is also a consideration. 6. Concern regarding underlying water courses and the risk of sink holes. 7. Concerns re flooding and water run off entering the nearby SSSI and the danger of pollution of the SSSI by grey water. 8. A responder states that the Nedern valley should be preserved as a green biodiversity corridor of significance as recognised by the SSSI. 9. Concerns regarding the adequacy of sewage processing. 10. Poor local bus services with no service in the evening or on Sundays. 11. Better train service from Caldicot required plus a bus link to the station. 12. Concerns re an increase in traffic. 13. Further development will destroy the look and feel of these peaceful rural villages of Crick and Caerwent. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Ecology concerns have also been identified.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Caldicot

Candidate Site: CS0007 Pill Row, Caldicot

Representor:

1. Responder notes that employment land adjacent to Pill Row and Severn Bridge Industrial Estate has been omitted. An existing planning application has been submitted and First Investments is providing answers to questions for the Planning Committee in the coming months.
2. Owner of land adjacent to Pill Row has concerns re their land not being taken up as a candidate site for employment, when First Investments, who submitted their land, has had their site - land adjacent to Severn Bridge Industrial Estate – designated in the existing LDP. Responder requests that their land is included in the revised LDP as a candidate site for employment.
3. FI Real Estate Management Ltd strongly object to the removal of the site through the High-Level Assessment to progress to Stage 3A. FIREM object to the methodology in the Candidate Site Assessment Methodology that has been applied, disagreeing that the site cannot be mitigated for flood risk and that there should be an allowance to use a current planning application as evidence as part of the sieving exercise.
4. FIREM note that the proposed changes to TAN15 relate to providing a more flexible approach with regard to less vulnerable development, such as employment use, and believe this Candidate Site, and potentially others, should be carried forward into Stage 3A assessment. Because of the proposed changes, FIREM believe the Council should pause to allow the process to catch-up and revise the Methodology to re-run the assessments and should include a more flexible interpretation of the site opportunities that land, such as CS0007, can play for future development when the site benefits from flood defences.
5. In the view of FIREM, the associated evidence of the Employment Land Report Update would realise a different outcome to assessment of Policy SAE1h and retention of the employment land allocation.

1. Private Individual x 1
2. Private Individual x 1
3. FI Real Estate Management Ltd
4. FI Real Estate Management Ltd
5. FI Real Estate Management Ltd

LPA Response

Comments noted. Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.

LPA Recommendation

This site will not be allocated in the Deposit RLDP.

Candidate Site: CS0067 East & West Church Road, Caldicot

Representor:

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – A previous response to pre-planning consultation recommended desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include pre-determination work; our understanding of the site has not changed since then, and our recommendation remains the same.

1. Glamorgan Gwent Archaeological Trust Ltd

LPA Response

Comment noted. The site is considered to be of small scale and would have limited impact on achieving the required quantum of development in this area. Site is not allocated as there is sufficient and more suitable land available for residential development within the Severnside area to accommodate its housing need.

<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDLP.</p>	
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1660</p>	<p>Candidate Site: CS0129 Dewstow Village, Former Dewstow Golf Course</p>	
	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – A previous response to the LDP consultation recommended desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work; our understanding of the site has not changed since then, and recommendation remains the same.</p> <p>2. Site promoter provides support for the Dewstow Village site noting:</p> <ul style="list-style-type: none"> • The site has capacity for 580 to 815 homes that could be delivered over a number of phases. • If the upper number of homes were progressed the scheme would also be able to support a local centre and an employment work hub. • Masterplan submitted identifies access routes through the site and access for vehicles. • Site has benefits of existing rights of way and links that can be enhanced with good access to primary schools. • Opportunity to locate outdoor play space as well as areas of sustainable urban drainage. • Comprises two land parcels offering flexibility in delivery and quantum of development. 	<p>Representor:</p> <ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Redrow Homes
<p>LPA Response</p>	<p>Comments noted. This site is considered too divorced from the settlement of Caldicot, as it is physically separated by the M48. Concerns have also been raised in relation to highways and landscape impact. There are considered to be more suitable sites available in this area.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDLP.</p>	
<p>Crick</p>		
<p>Candidate Site: CS0091 Caerwent Depot, Crick</p>	<p>Representor:</p>	
	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as AMBER – Whilst the site has been disturbed by its former use, the route of a Roman road is adjacent to the site, and a Scheduled Monument (MM151 Crick Round Barrow), a burial mound is 100m W, development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation.</p> <p>2. Concerns re drainage, flooding, and sewerage in the area. Crick has no mains drainage system and flooding of nearby fields and properties has occurred in the recent past due to surface run off. The Crick Brook is already considered to have a flood plain within the hamlet environs and has recently caused flooding, making it unsuitable for additional water disposal. Carefully considered SuDs will need to find reliable means to deal with surface water drainage and deal with site constraints. Without</p>	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. 6 Private Individuals 3. 6 Private Individuals 4. 5 Private Individuals 5. 3 Private Individuals 6. 3 Private Individuals

introducing a sewer system to Crick, the treated effluent from a development of this size cannot be dealt with, even with an on-site sewage treatment plant (STP). An existing STP from the nursing home discharged into Crick Brook repeatedly fails to function effectively, therefore increasing concern for a development of this size. Distance from site to drainage point, sewage system and watercourse, dramatically reduces feasibility of the site. Developing on this site will greatly intensify existing issues.

3. Concerns re road infrastructure, traffic, and access. Significant changes to the current access will be required in order to maintain the safety of residents and visitors entering and leaving the site. Due to current and newly completed developments the area has seen a significant increase in traffic, with motorists opting to use smaller alternate routes increasing traffic in those areas. Current roads infrastructure already struggling, therefore new routes will worsen the issue causing children to be late for school, commuters late for work and an increase in pollution. Lack of amenities in the area increases traffic. Responders concerned that there is no obvious engineering solution to the issues faced. Concerns that a large proportion of residents buying homes in the new developments will be commuters to Bristol, increasing traffic and producing very little benefit to the Welsh economy.
4. Local services such as telephone, broadband, schools, doctors, dentists, and other NHS services are at max capacity, oversubscribed and have huge waiting lists, therefore an increase in residents will only worsen issues. Concerns that there have been no provisions made to improve these facilities.
5. Responders concern re the lack of amenities and local facilities to service the residents in the existing area, expecting worsening conditions after new developments. Public Transport in Crick is poor, running infrequently and not at times needed by those who commute. Service provisions will need to be made to facilitate this development. Responders concerned as Public Transport is not sufficient enough for day-to-day needs, yet they're being encouraged to reduce car usage in favour of Public Transport.
6. Concern re the scale of the proposed development which would double the number of dwellings, impacting on the nature and character of the hamlet. Chepstow and the surrounding areas have been extensively developed, responders noting that these developments will represent the urbanisation of rural settlements, subsuming Crick into Caldicot. Responders object to the change in character which runs counter to the principals of Future Wales 2040.
7. Responders note that the Crick Brook flows directly into the Nedern wetland area of SSSI status. Concern re additional housing in the area reducing green open space and countryside. The floodplains affecting the site provide a natural reserve for wildfowl, therefore development would lead to habitat loss and impact on the SSSI.
8. Responders note lack of jobs in the local area.
9. Concern that proposed net zero developments and the increased use of electric vehicles will not be enough to prevent the developments from having an effect on nature, flooding, and the general health of those who live in the area.
10. Responder notes that the site has had much contamination over the area and would need substantial clearing and cleaning.
11. Responder supports site of previously developed land in Crick.
12. Site Promoters for Land South of Newport Road, Magor, Edenstone, note the site to be located on previously developed land and are against development for the following reasons.
 - Abnormal costs associated with the delivery of the site owing to it being previously developed.
 - The site's location adjacent to Crick is far less sustainable when compared to other location in Severnside.

	<ul style="list-style-type: none"> It is noted that whilst previously developed land should be prioritised above greenfield land when allocating sites, it is not considered sound to prioritise brownfield land which is far less sustainably located when compared with sustainably located greenfield sites such as the Land South of Newport Road, Magor. 		
LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability for residential uses in accordance with key policy requirements. Furthermore, the site is unable to connect to the public sewerage system and is located within a groundwater Source Protection Zone. As such, development in this location would as a consequence result in an unacceptable impact on the water environment.		
LPA Recommendation	This site will not be allocated in the Deposit RLDP.		
Magor with Undy			
Page 1662	Candidate Site: CS0038 Land to the west of Wales One Business Park, Magor		Representor:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. A desk based assessment and geophysical survey prior to any determination of an application would inform mitigation which may include further pre-determination work.	1. Glamorgan Gwent Archaeological Trust Ltd	
	LPA Response	This site has now been constructed under planning application DM/2022/00634.	
	LPA Recommendation	The site is allocated as a protected employment site under Policy EA2 with the site specific reference of EA2s.	
Candidate Site: CS0206 South of Newport Road, Magor		Representor:	
1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Geophysical survey in 2008 on part of the site identified potential archaeological features.	2. The site sponsor, Edenstone, have submitted extensive information and state that the development will provide: <ul style="list-style-type: none"> A range and choice of housing (including market housing, affordable housing and potential for bungalows) along with a care home. Good quality open spaces, trim trails and community allotments for the benefit of existing and proposed residents. Green Infrastructure with biodiversity benefits (delivering a biodiversity enhancement). Economic benefits as the proposed development will generate jobs and create additional tax revenue. 3. A responder states that the site is a valuable green space which has been used by the community to walk dogs for well over 20 years; around 100 dogs use this field on a daily basis. 4. A responder feels that local leisure facilities are already inadequate for the current population.		1. Glamorgan Gwent Archaeological Trust Ltd
2. The site sponsor, Edenstone, have submitted extensive information and state that the development will provide:			2. Edenstone

Rogiet		
Candidate Site: CS0168 Adjacent to Merlin Close, Rogiet		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. The HER notes a coin hoard of Roman date was found within the area, and remains of a Roman building excavated adjacent to the site, and a well to the south. An archaeological desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. The site promotor, Manor Farm Partnership, makes the following supporting comments: <ul style="list-style-type: none"> • We believe this site is technically deliverable, viable and developable, meeting the requirements of the Preferred Strategy. • We believe the site could potentially be delivered subject to a suitable flood consequence assessment report. • The site would provide 50% affordable housing, enhance active travel links, provide green open space for public access and provide a high quality settlement edge. 3. Concerns regarding mineral resources – the site is currently constrained by mineral safeguarding. 4. Responders state that the site has been graded as 1 for BMV agricultural land. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd plus 17 Private Individual 2. Manor Farm Partnership 3. 19 Private Individual 4. 19 Private Individual 5. 20 Private Individual 6. 1 Private Individual 7. 18 Private Individual 8. 7 Private Individual

	<ol style="list-style-type: none"> 5. Responders state that the site is currently classified as a Green Wedge constraining any development. The site also adjoins an existing conservation area as designated in the current LDP. 6. A responder states that Great Crested Newts have been seen in the area, as recently as 2022 (video evidence may be available) 7. Concerns that the site is classified, by NRW, as adjoining an area at risk of flooding from rivers and sea and the site itself is a high surface water risk. 8. Concerns regarding ever increasing traffic issues, noise and pollution levels which would have a negative impact on the peaceful village of Rogiet. 9. General objection to the site being included in the LDP and the affect development would have on the separation between Rogiet and Undy as well as the visual impact. 10. Concerns regarding access to services and amenities such as dentists, medical care, shops, pubs and school places; few services are provided within Rogiet requiring residents to travel to other villages. 11. Concerns that the site is significantly higher than the adjacent houses; any development would block natural light and affect privacy and enjoyment of those homes. 12. General support for additional development around Rogiet. 	<ol style="list-style-type: none"> 9. 2 Private Individual 10. 5 Private Individual 11. 2 Private Individuals 12. 1 Private Individual
<p>LPA Response</p>	<p>Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. A significant proportion of the site is located in flood zone which would not be suitable for highly vulnerable development. The site is also within a green wedge designation where there is a presumption against new built development.</p>	
<p>Page 1665 Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	
<p>Candidate Site: CS0253 Ifton Manor (Site A), Rogiet</p>	<p>Representor:</p>	
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. A desk based assessment and geophysical survey prior to any determination of an application would inform mitigation which may include further pre-determination work. 2. Responder states that this land is agricultural for farming and grazing livestock. 3. Responder states that the land is used by the community for walking and exercise (both for residents and pets). 4. Concerns that this 'green wedge' is the final distinction between Rogiet and Caldicot and development would see the smaller village subsumed by the larger town. 5. Traffic concerns as the B4245 is the only route through the village and subject to long delays when incidents happen on the network; adding more homes will create even more reliance on this single point of failure. 6. Environment/biodiversity concerns as this area supports a vast array of local wildlife, some of which is endangered. It also serves as a release site for Hedgehog Helpline Cymru and is developing a healthy population of this endangered species. 7. Responders raise concerns over the history of flooding of the area which often renders the site impassable with several feet of water in places. This flooding can reach within metres of existing properties so there are concerns over the impact development would have on the flooding risk to these homes. Photographs submitted as evidence. 8. The site promoter, Taylor Wimpey PLC (Savills), has submitted extensive information to support the site and makes the following points: 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. 1 Private Individual 3. 1 Private Individual 4. Edenstone plus 1 Private Individual 5. 1 Private Individual 6. 1 Private Individual 7. Edenstone plus 1 Private Individual 8. Taylor Wimpey PLC (Savills) 9. 1 Private Individual 10. 1 Private Individual 11. 1 Private Individual

	<ul style="list-style-type: none"> • There is a clear aspiration, from WG and MCC, to deliver an improved vehicular linkage from either the B4245 and/or the M48 to Severn Tunnel Junction Railway Station and the indicative masterplan makes an allowance for land to provide this. • The site is considered to have 'High' value in terms of ecological connectivity but the site does not meet the tests for Sites of Importance for Nature Conservation and is suitable for development in part, however, extensive portions of the site cannot be developed due to flood risk so would be used for biodiversity mitigation, compensation and enhancement. • With regards to Active travel in a Transport Note, prepared by TPA, Ifton Manor Farm performs considerably stronger than Caldicot Eastwith regards to proximity to services, accessibility by public transport and connectivity to the existing active travel network. <p>9. A responder states that this additional strategic delivery will offset the scaling back of CS0251 to deliver overall housing need.</p> <p>10. A responder states that the plan is silent on a new motorway junction on the M48 to link to STJ. The plan should set out clear support for this infrastructure and lobby WG accordingly.</p> <p>11. A responder requests that car parking spaces per dwelling are reduced from 3 to 2 so as not to re-enforce reliance on the car.</p>	
<p>LPA Response</p>	<p>Comments noted. Site not progressing as it is designated as a green wedge in the RLDP where there is a presumption against new built development. and due to the scale of the proposal there are significant landscape concerns the proposal would have impacted on the openness of the green wedge land. The site also comprises 100% BMV land (38% of which relates to Grade 1 BMV). Overall, there are considered to be more suitable alternative sites in the Severnside area.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	
<p>Candidate Site: CS0254 Ifton Manor (Site B), Rogiet</p>		<p>Representor:</p>
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. 	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues.	1. Glamorgan Gwent Archaeological Trust Ltd
LPA Response	Comment noted. The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Secondary Settlements

Penperlleni		
Candidate Site: CS0037 South Usk Rd, Penperlleni		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red - Desk based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. Support for the site (along with CS0280) stating the development is capable of sitting comfortably within its landscape setting with the Council's Landscape Sensitivity Study identifying the site as having the lowest landscape sensitivity of all of the candidate sites submitted in Penperlleni. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Edenstone
LPA Response	Comments noted. Overall, the site performs well against the assessment methodology with no fundamental constraints identified. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.	
LPA Recommendation	It is proposed to allocate the site for approximately 42 dwellings with site specific policy requirements set out in Policy HA12 Land west of Trem yr Ysgol, Penperlleni.	
Candidate Site: CS0138 Land at Goytre Farm, Penperlleni		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red - The HER notes an area of agricultural estate management. An archaeological desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. Support for the site as Penperlleni within the Preferred Strategy is highlighted as a Tier 2 secondary settlement. The settlements proximity to the A4042/Usk Road ensures convenient access to the services, amenities and employment. The village is well catered for in terms of local amenities, services and buses to Newport, Cwmbran and Abergavenny which are all located within a short walk. The representor concludes that the site lies in a sustainable settlement that is not located within the Upper River Wye Catchment Area and is not impacted by the implications of the TAN15 flood map and states that there are no designations that cannot be carefully mitigated and accommodated for. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Persimmon Homes East Wales
LPA Response	Comments noted. Site is not progressing to the Deposit Plan as there are landscape and ecological concerns particularly in relation to a significant proportion of the site being a designated Site of Importance for Nature Conservation (SINC). Overall, there are considered to be more suitable alternative sites in the area	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0217 Land at Fairfield, Penperlleni		Representor:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red - The HER notes the site of a potential Medieval Manor house and possible remains. An archaeological desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.	1. Glamorgan Gwent Archaeological Trust Ltd
LPA Response	Comment noted. Site is not progressing to the Deposit Plan as the site has a significant ecology constraint as the whole of the site is within a designated Site of Importance for Nature Conservation (SINC).	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0279 Land West of Usk Road, Penperlleni		Representor:
Page 1669	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red - The HER notes the site of a potential Medieval mill, channel, and other possible remains. An archaeological desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.	1. Glamorgan Gwent Archaeological Trust Ltd
	2. The site promotor, Barratt and David Wilson Homes South Wales, has submitted extensive information in support of the site and make the following points: <ul style="list-style-type: none"> The majority of the site is grassland which is considered in their Preliminary Ecological Appraisal to be of low ecological value. The Flood Risk and Drainage Advice Note submitted previously concludes that the site is within Flood Zone 1 for Rivers and Sea and that development for housing is acceptable within this flood zone. MCC's Environmental Health Assessment concludes that development of the site, for housing, is acceptable from an environmental health perspective. MCC's Active Travel Assessment concludes that the site is suitable to be developed from an active travel perspective. 	2. Barratt and David Wilson Homes South Wales
LPA Response	Comments noted. Site is not progressing to the Deposit Plan as there are significant landscape concerns in relation to developing west of the A4042 which would significantly change Penperlleni's settlement pattern and valued landscape. There are also concerns regarding connectivity to facilities in the settlement due to the location on the opposite side of the A4042. Overall, there are considered to be more suitable alternative sites in the area.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0280 Land at Walnut Tree Farm, Penperlleni		Representor:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red - The HER notes the site of a potential early post-Medieval farmhouse and outbuildings shown on the Tithe of 1838. An archaeological desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.	1. Glamorgan Gwent Archaeological Trust Ltd

	<p>2. The site promotor, Edenstone, has submitted extensive information in support of the site. Key points include:</p> <ul style="list-style-type: none"> • The site is sustainably located and could help to deliver the Council's 20 minute neighbourhood aspirations. • The site is close to the village centre and could encourage and support active travel. • The Council's Landscape Sensitivity Study identified the site as have the lowest landscape sensitivity of the candidate sites in Penperlleni. • On the basis of the technical assessments undertaken to date the promotor states that there are not considered to be any unresolvable constraints to the proposed development of the site. 	2. Edenstone
LPA Response	Comments noted. Site is not progressing to the Deposit Plan as the site has a significant highway constraint as it has not been able to demonstrate safe pedestrian access and connectivity from the site to the village centre of Penperlleni. Overall, there are considered to be more suitable alternative sites in the area.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Raglan

Candidate Site: CS0069 Raglan Enterprise Park

Page 1670		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – Previous responses to consultation recommended desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work; our understanding of the site has not changed since then, and recommendation stays the same. 2. Responder in support of the site as its scale is appropriate for the village and the development would contribute to climate change initiatives and increase local employment. However, much care should be given to the development so that it meets its goals in relation to; future needs, community, environment, sustainability, and traffic production, otherwise consideration will be given to its objection. 3. Responder believes expansion of existing commercial estate at Little Castle Farm site would be more proactive, than allocating a new site to develop on prime agricultural land. CS0278 would be a better site for the development due to its access. Acknowledgment that site CS0278 is outside of village envelope but believes this is more important for residential sites not employment sites and is positive about the prospect of employment opportunities. 4. Responder objects to site and any other applications due to the delay in development of a previous 45 dwelling council approved residential site in Raglan. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trist Ltd 2. Raglan Community Council 3. 1 Private Individual 4. 1 Private Individual
LPA Response	Comments noted. It proposed to allocate approximately 1.5ha of land adjoining the existing Protected Employment site as a new employment allocation, allowing for an extension to the existing Enterprise Park and supporting job growth in the Raglan and wider area. No fundamental constraints were identified as part of the assessment process. The allocation also provides an opportunity to develop an off-grid employment site linked to the proposed adjoining ground mounted solar array.	

	<p>It is also proposed to identify approximately 16ha of land to the west of the existing Raglan Enterprise Park as having potential for a ground mounted solar development, subject to detailed planning considerations. While the site is Grade 3a BMV land, it performs best in this respect when compared to the other solar related candidate site submissions. Allocation of the site provides an opportunity to contribute to local and national renewable energy targets.</p>				
<p>LPA Recommendation</p>	<p>It is therefore proposed to allocate part of the site for B1,B2,B8 employment use as set out in Policy EA1, with the site specific reference EA1i Raglan Enterprise Park, Raglan.</p> <p>Part of the site is also allocated as having potential for a ground mounted solar development in Policy CC2 – Renewable Energy Allocation.</p>				
<p>Candidate Site: CS0183 South of Monmouth Road, Raglan</p>					
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1671</p>	<table border="1" style="width: 100%;"> <tr> <td style="width: 80%;"></td> <td style="width: 20%; text-align: right;">Representor:</td> </tr> <tr> <td> <ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as AMBER – Subsequent to an archaeological desk-based assessment, geophysical survey, and archaeological field evaluation, for a previous submission in the planning process, due to evidence of Medieval activity within the area, it was, and remains, our opinion, that development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation. 2. Raglan Community council believe the development of this site would lead to an unacceptable loss of agricultural land and would damage the high-quality historical landscape important to conservation areas, the castle, and residents for recreation. 3. Concerns re unsustainable transport and commuting impacts, safety re the increase in traffic movement, and congestion in the village centre, which is not aided by the approved application for 45 residential dwellings. 4. Concerns re the number of housing units allocated to Raglan. Responder believes the site’s scale to be out of proportion with the existing village. If it is not economical to develop a site below 120 units, then the responder believes the previously approved 45 dwellings should be annulled. 5. Responder believes CS0205 to be a natural expansion of the village down to its natural boundary of the Wilcae River, and a better fit. 6. Responder and site promotor, Richborough Estates, are in full support of the site for residential allocation. The responders state that there are no fundamental constraints with the site, but note that the council require an FCA to support any application, which they believe due to previous attempts of development on the site will be overcome, as flooding risks can be mitigated with scheme design/ planning condition, and that the development of the site would result in a downstream benefit through a reduction in peak flow run-off, improving future resilience. 7. Richborough Estates maintain that the development will not only bring forward new residential development and a significant amount of public open space, but also the potential to accommodate community uses, to be determined at a later date based on local needs. An area of 0.2 ha is set aside as part of the scheme for community use. </td> <td> <ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Raglan Community Council 3. <p>LPA Response</p>	<p>Comments noted. A reduced area to the candidate site submission is proposed for allocation in the RLDP. Overall, the site performs well against the site search sequence with good access to local amenities and no fundamental constraints have been identified. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p>				
<p>LPA Recommendation</p>	<p>It is proposed to allocate the site for approximately 54 dwellings with site specific policy requirements set out in Policy HA10 Land South of Monmouth Road, Raglan.</p>				

Candidate Site: CS0205 Land at Usk Road, Raglan		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – Previous response to consultation recommended desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work; our understanding of the site has not changed since then, and recommendation remains the same. 2. Responder supports the allocation of the site as the developable area of the site is modest and more in scale with Raglan’s needs. As the site is not extendable, it will round the village off to the natural boundary of the brook. The site is also accessible and safe for commuting. 3. Concerns re volume of residential development being allocated to Raglan and believes the existing 45 units allocated should be annulled. 4. Responder believes the site would be a natural extension of the village down to its boundary of the river, having good access without impacting congestion. 5. Site promoter and responder Edenstone, support the allocation of the site. See additional supporting documents for the Monmouthshire RLDP Preferred Strategy Representations on behalf of Edenstone. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Raglan Community Council 3. 1 Private Individual 4. 1 Private Individual 5. Edenstone
Response	Comments noted. While a southern section of the site is within a flood risk area, development could be directed away from this part of the site. However, the site is not allocated as there is sufficient and more suitable land available for residential development within Raglan to accommodate its housing need.	
Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0278 Land West of Raglan		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – The HER notes the site of a potential Medieval land management adjacent; artefacts of prehistoric date recorded within the site. An archaeological desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. Concerns re the scale of the site in relation to the rest of the community and its needs. 3. The development of a site of this scale would heavily reduce the amount of high-quality agricultural land. 4. Concerns re unsustainable transport and commuting caused by proposed development contrary to Planning Policy Wales. Site will generate an unacceptable level of traffic. 5. Concerns re the impact that the proposed development will have on the setting and landscape of the village from viewpoints across the area. 6. Responder objects to this site as they believe that the needs of the present are met but at the cost of compromising the ability for future generations to meet their own needs. 7. Responder believes existing commercial estate should be expanded instead of allocating a new site. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Raglan Community Council 3. Raglan Community Council plus 1 Private Individual 4. Raglan Community Council 5. Raglan Community Council 6. 1 Private Individual 7. 1 Private Individual 8. 1 Private Individual

	<p>8. Responder believes this site to be the best out of those proposed due to its good road access and believes that the development would bring lots of advantages.</p> <p>9. Concerns regarding the incomplete residential site for 45 dwellings within the village envelope and will object of site CS0278 until the council demonstrates its ability to turn planning into reality.</p> <p>10. Responders believe the site is deliverable, viable and developable and meets the requirements of the preferred strategy.</p> <p>11. The site has good access and could be developed without significantly effecting the existing village. The site also provides a range of employment opportunities; therefore, the responders support the development of the site and ask that the council contact them if they require further information pertaining to the site.</p>	<p>9. 1 Private Individual</p> <p>10. 1 Private Individual</p> <p>11. 1 Private Individual</p>
LPA Response	Comments noted. A reduced area of approximately 4.5 ha (compared to the submitted 8ha) is proposed to be allocated for employment use in the RLDP, responding to site elevations and integrating the proposal more effectively into the landscape. No fundamental development constraints have been identified as part of the assessment process. Its allocation will provide much needed employment land in Raglan and the wider County reflecting Raglan's location and its access links to other settlements.	
LPA Recommendation	It is therefore proposed to allocate the site for B1,B2,B8 employment use as set out in Policy EA1, with the site specific reference EA1j Land West of Raglan.	
Candidate Site: CS0281 Raglan Country Estate		Representor:
Page 1673	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – The HER notes the area as a part of a Medieval deer park, some changes due to the landscaping for the golf club, areas of land remain as fields; artefacts of prehistoric date recorded within the site. An archaeological desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.</p> <p>2. Concerns re scale of the development and effect this would have on the landscape from vantage points around the community.</p> <p>3. Concerns that developments would cause an increase in traffic generation.</p> <p>4. The responder objects to the development of the site as they believe it focuses on short terms needs and doesn't consider the long-term implications it could have on future residents.</p> <p>5. Responder would object to this site if CS0278 was approved as they believe it is a better site from an access point of view and would also object if there was no strategic traffic planning in place for the development.</p>	<p>1. Glamorgan Gwent Archaeological Trust Ltd</p> <p>2. Raglan Community Council</p> <p>3. Raglan Community Council plus 1 Private Individual</p> <p>4. Raglan Community Council</p> <p>5. 1 Private Individual</p>
LPA Response	Comments noted. While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Usk

Candidate Site: CS0039 Little Castle Farm, Monmouth Road, Usk

Representor:

Page 1674

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Farm buildings extant on 1831 First Series mapping, desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.
2. Responders state that along with the other two sites (CS0113 and CS0282) would amount to an unacceptable scale of expansion of Usk and would be contrary to MCC policy of just a small amount of new housing in secondary settlements.
3. Concerns re a surface water problem and the phosphate issues which continue to pollute the river. The River Usk is a SSSI/SAC and is heavily polluted with the highest phosphate levels of any river in Wales.
4. Concerns that development will increase the risk of flooding due to the lack of natural moisture absorption through fields, hedgerows and trees.
5. Concerns that Usk's sewerage system is antiquated and unable to cope with current demand. Sewage matter is released through the Mill St Combined Storm Overflow.
6. The A472 passing through Usk is one of only 2 areas in Monmouthshire that is subject to Air Quality Monitoring. This is exacerbated by inadequate parking leading to on street parking which causes congestion. Any development would likely lead to further commuting and general travel with worsening air quality.
7. Concerns for Usk bridge which cannot withstand more big lorries which would be needed for construction along with the increase in traffic that development would bring.
8. Responders state there is no road access to this field and any new access onto Monmouth Road would require up-grading of that stretch of road.
9. Concerns that the town does not have the infrastructure of doctors/dentists/local transport/school/leisure facilities to handle any further demand.
10. Responders state there is a limited bus service, sporadic evening taxi service and no railway station resulting in a high dependence on car use and no investment to develop cycleways to relieve local traffic.
11. Responders state that the site falls outside the desirable 20 minute walk from the centre of Usk town and, with it's significant gradient, would not be a sustainable site nor promote active travel.
12. Concerns re the limited amount of employment within Usk with no realistic expectation developing sufficient jobs to employ new residents.
13. Responders feel there is a lack of study in the area of Environment/Animals/Landscape with reference to the impact any development would have on protected animal and bird species. Usk has an iconic landscape with importance for wildlife sustainability, existing habitat and habitat connectivity for protected species such as bats and newts.

18. 1 Private Individual
19. 1 Private Individual

	<p>14. Responders state that any development above the current contour of the Usk settlement would have a detrimental effect on the existing landscape. Expansive views from the nearby popular tourist footpath would be ruined.</p> <p>15. Responders state that the land proposed is greenfield, grade 3 agricultural land currently used for crops and grazing.</p> <p>16. Concerns re the loss of open green space, within walking distance, for health and wellbeing.</p> <p>17. Concerns that development would affect the privacy of existing homes.</p> <p>18. A responder states that Usk is a historic town and the site is the location of the battle of Pwll Melyn and as such should be preserved.</p> <p>19. Notices at the candidate sites would have ensured a more representative consultation.</p>	
<p>LPA Response</p>	<p>Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape and ecological concerns have also been raised particularly in relation to a significant proportion of the site being a designated Site of Importance for Nature Conservation (SINC) and due to the topography of the site and its elevated position it is likely to have a detrimental landscape impact. Overall, there are considered to be more suitable alternative sites in the area.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	

Candidate Site: CS0105 Land at Former Goods Yard, Usk

Page 1675

	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. 19th century goods yard to the Monmouth to Pontypool railway, extant contemporary buildings, also Second World War defences in the immediate area. Development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation.</p> <p>2. A responder states that Flood modelling by JBA Consulting concludes that the site is at flood risk in extreme events. It is proposed that the development site is raised above the flood level to comply with TAN15. Compensatory flood storage should be implemented alongside the ground raising. The responder states that their clients control land outside of the site which could provide storage for the development of the site but could also contribute towards the wider flood defences for Usk.</p> <p>3. Usk Civic Society objects to the site due to it being in the 1 in 100 year flood event zone making it unsuitable for vulnerable housing development. Furthermore the A472 (the means of exit from the site) floods in sub 1 in 100 events (eg Storm Dennis). Other responders have concerns re the increased potential of water run-off which is already a problem on Monmouth Road.</p> <p>4. Support for development of the site as it is brownfield and its size is in proportion to the targets identified in the RLDP Preferred Strategy. The site is close to town centre enabling residents to walk and not increase traffic and development would have a positive impact on the visual appeal of the area.</p> <p>5. Respondents state that Usk and nearby settlements have very limited employment opportunities requiring residents to travel for work and as public transport is limited, to an infrequent bus service, these journeys have to be made by car.</p> <p>6. Concerns re increased pollution, as air quality levels in the town are currently below the required standards and an increase in traffic will exacerbate this, along with extra congestion, parking problems and a greater risk of accidents at current black spots.</p> <p>7. Concerns re local amenities. There is no spare capacity in services such as GPs and dentists, and, no local bank or police station.</p>	<p>Representor:</p> <ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. 2 Private Individuals 3. Usk Civic Society plus 4 Private Individuals 4. 1 Private Individual 5. 3 Private Individuals 6. 4 Private Individual 7. 4 Private Individuals 8. 5 Private Individuals 9. 3 Private Individuals 10. 1 Private Individual
--	---	--

	<p>8. Concerns regarding the ageing sewage system, lack of investment by Dwr Cymru/Welsh Water and pollution of the river Usk from sewage outfall. Respondents have further concerns of pollution to the River Usk, from increased urban run off from development of the site and the risk of increased phosphorus loading.</p> <p>9. Concerns that development will have a detrimental impact on the habitats of local wildlife; evidence of protected species at the candidate site.</p> <p>10. A responder feels that notices at the candidate sites would have ensured a more representative consultation.</p>	
<p>LPA Response</p>	<p>Site not progressing as insufficient information has been submitted in relation to viability to demonstrate the site is deliverable in accordance with key policy requirements. The site, which is within the settlement boundary of Usk is previously developed land, a protected employment site in the current LDP that has been vacant for some time.</p> <p>The site is wholly within flood zones 2 and 3, however is within a TAN15 defended zone. National Policy set out in TAN15 does allow for brownfield sites in defended zones to be considered acceptable providing they can meet flood risk criteria set out in the policy. The costs of flood risk mitigation also has had an impact of the viability and deliverability of the site.</p> <p>There is also constraint in relation connection to public sewerage system, with the connection point at least 400m away from the site, again resulting in significant costs. A private sewerage treatment plant would not be appropriate for a development of this scale, particularly as the site is within a phosphate catchment zone of the River Usk Special Area of Conservation (SAC). Overall, it is not viable and deliverable to progress this site as an allocation. The site remains in the settlement boundary and as a consequence could progress for appropriate forms of development subject to detailed planning considerations.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	
<p>Candidate Site: CS0113 Burrium Gate (Phase II), Usk</p>		<p>Representor:</p>
	<ol style="list-style-type: none"> Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Farm buildings extant on 1831 First Series mapping, desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. Responders state that along with the other two sites (CS0113 and CS0282) would amount to an unacceptable scale of expansion of Usk and would be contrary to MCC policy of just a small amount of new housing in secondary settlements. <p>Page 1677</p>	<ol style="list-style-type: none"> 7. Concerns regarding the hazard of double parking and parking on pavements at the existing dwellings in the vicinity of this site. 8. Concerns for Usk bridge which cannot withstand more big lorries which would be needed for construction along with the increase in traffic that development would bring. 9. Responders state there is no road access to this field and any new access onto Monmouth Road would require up-grading of that stretch of road. 10. Concerns that the town does not have the infrastructure of doctors/dentists/local transport/schools/leisure facilities to handle any further demand. A responder comments on the closure and cutting back of many services including the closure of the local police station and of the waste recycling facility. 11. Responders state there is a limited bus service, sporadic evening taxi service and no railway station resulting in a high dependence on car use and no investment to develop cycleways to relieve local traffic. 12. Responders state that the site falls outside the desirable 20 minute walk from the centre of Usk town and, with it's significant gradient, would not be a sustainable site nor promote active travel. 13. Concerns re the limited amount of employment within Usk with no realistic expectation of developing sufficient jobs to employ new residents; increasing the need for commuting. 14. Responders feel there is a lack of study in the area of Environment/Animals/Landscape with reference to the impact any development would have on protected animal and bird species. Usk has an iconic landscape with importance for wildlife sustainability, existing habitat and habitat connectivity for protected species such as bats and newts. 15. Responders state that any development above the current contour of the Usk settlement would have a detrimental effect on the existing landscape. Expansive views from the nearby popular tourist footpath would be ruined. 16. Responders state that the land proposed is greenfield, grade 3 agricultural land currently used for crops and grazing. 17. Concerns re the loss of open green space, within walking distance, for health and wellbeing. 18. Responders state that Usk is a historic town and the proposed site is the location of the battle of Pwll Melyn, and as such, should be preserved. Development would have a detrimental impact on the features and areas of tourism interest and on the beautiful and peaceful landscape. 19. Notices at the candidate sites would have ensured a more representative consultation. 	<ol style="list-style-type: none"> 9. 1 Private Individual 10. Usk Town Council plus 15 Private Individuals 11. Usk Town Council, Usk Civic Society plus 10 Private Individuals 12. Usk Civic Society plus 6 Private Individuals 13. 11 Private Individual 14. Usk Town Council plus 11 Private Individual 15. Usk Town Council, Usk Civic Society plus 10 Private Individuals 16. 3 Private Individuals 17. 1 Private Individual 18. 2 Private Individuals 19. 1 Private Individual
<p>LPA Response</p>	<p>Comments noted. The site performs well against the assessment methodology with no fundamental constraints identified. A landscape concern has been raised but it is considered that this can be mitigated providing development is maintained within a ridgeline no more than 40m above Ordnance Datum (AOD). The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p>	
<p>LPA Recommendation</p>	<p>It is proposed to allocate the site for approximately 40 dwellings with site specific policy requirements set out in Policy HA11 Land east of Burrium Gate, Usk.</p>	
<p>Candidate Site: CS0282 North Burrium Gate, Usk</p>		<p>Representor:</p>
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. Farm buildings extant on 1831 First Series mapping, desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. The site sponsor, Johnsey Estates 2020 Ltd, supports the site and makes the following comments: 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd

<ul style="list-style-type: none"> • By virtue of its location relatively close to Monmouth and the key services and facilities available in Monmouth and in Usk itself, Usk has the potential to accommodate a level of growth. • Usk experiences higher levels of self-containment and provides significant potential for minimising the need to travel and for sustainable travel. • Initial site and other assessments have confirmed that there are no fundamental constraints to the site coming forward for development. • It is anticipated that the site could provide up to 95 units which would increase the critical mass of the settlement and help to sustain vital local services and facilities. <ol style="list-style-type: none"> 3. Responders state that along with the other two sites (CS0113 and CS0282) would amount to an unacceptable scale of expansion of Usk and would be contrary to MCC policy of just a small amount of new housing in secondary settlements. 4. Concerns re a surface water problem and the phosphate issues which continue to pollute the river. The River Usk is a SSSI/SAC and is heavily polluted with the highest phosphate levels of any river in Wales. 5. Concerns that development will increase the risk of flooding due to the lack of natural moisture absorption through fields, hedgerows and trees. 6. Concerns that Usk's sewerage system is antiquated and unable to cope with current demand. Sewage matter is released through the Mill St Combined Storm Overflow. 7. The A472 passing through Usk is one of only 2 areas in Monmouthshire that is subject to Air Quality Monitoring. This is exacerbated by inadequate parking leading to on street parking which causes congestion. Any development would likely lead to further commuting and general travel with worsening air quality. 8. Concerns for Usk bridge which cannot withstand more big lorries which would be needed for construction along with the increase in traffic that development would bring. 9. Responders state there is no road access to this field and any new access onto Monmouth Road would require up-grading of that stretch of road. 10. Concerns that the town does not have the infrastructure of doctors/dentists/local transport/school/leisure facilities to handle any further demand. There is no local recycling centre, supermarket nor police presence. 11. Responders state there is a limited bus service, sporadic evening taxi service and no railway station resulting in a high dependence on car use and no investment to develop cycleways to relieve local traffic. 12. Responders state that the site falls outside the desirable 20 minute walk from the centre of Usk town and, with it's significant gradient, would not be a sustainable site nor promote active travel. 13. Concerns re the limited amount of employment within Usk with no realistic expectation developing sufficient jobs to employ new residents. 14. Responders feel there is a lack of study in the area of Environment/Animals/Landscape with reference to the impact any development would have on protected animal and bird species. Usk has an iconic landscape with importance for wildlife sustainability, existing habitat and habitat connectivity for protected species such as bats and newts. 15. Responders state that any development above the current contour of the Usk settlement would have a detrimental effect on the existing landscape. Expansive views from the nearby popular tourist footpath would be ruined. 16. Responders state that the land proposed is greenfield, grade 3 agricultural land currently used for crops and grazing. 	<ol style="list-style-type: none"> 2. Johnsey Estates 2020 Ltd 3. Usk Civic Society plus 4 Private Individuals 4. Usk Town Council plus 13 Private Individuals 5. Usk Town Council plus 17 Private Individuals 6. Usk Town Council plus 14 Private Individuals 7. 	<p>17. Concerns re the loss of open green space, within walking distance, for health and wellbeing.</p> <p>18. Responders state that Usk is a historic town and the proposed site is the location of the battle of Pwll Melyn, and as such, should be preserved. Development would have a detrimental impact on the features and areas of tourism interest and on the beautiful and peaceful landscape.</p> <p>19. Notices at the candidate sites would have ensured a more representative consultation.</p>	
LPA Response	Comments noted. Site not progressing to the Deposit Plan as there are landscape and ecological concerns, particularly in relation to a significant proportion of the site being a designated Site of Importance for Nature Conservation (SINC), and due to the topography of the site and its elevated position. Overall, there are considered to be more suitable alternative sites in the area.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0285 Glen Yr Afon, Usk		Representor:
Page 1679	<p>1. A responder raises the following concerns:</p> <ul style="list-style-type: none"> • Massive population increase with limited employment opportunities in Usk. • Increased pollution, congestion and parking problems. • Services including GP and dentist already under strain and no local bank or police station. • Ageing sewage system already overwhelmed. • Increased risk of flooding due to loss of land absorbency. • Further encroachment on the habitat of delicate ecosystems. 	<p>1. 1 Private Individual</p>
	LPA Response	Comments noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements.
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Main Rural Settlements

Devauden		
Candidate Site: CS0036 North Devauden		Representor:
Page 1680	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues. 2. The site promotor, Leathdunn Ltd, has submitted supporting information for the site and makes the following points: <ul style="list-style-type: none"> • The site is not constrained by topography, ecology, heritage or landscape features and its proximity and connection to Devauden make it a logical extension of the settlement. • A Flood Consequence Assessment would need to be carried out for the site to confirm its suitability for development and confirm that an FCA would be carried out and submitted with any planning application for the site should it be allocated within the RLDP. • The site would not contribute to coalescence of Devauden with any other settlement and would not represent encroachment into the countryside due to the presence of existing properties to the north. 3. Responders state that the site was previously rejected as a candidate site due to its High Biodiversity Value and has subsequently been designated as a SINC. 4. The site has species-rich hedgerows and is considered to have high connectivity value to both the adjacent habitat and the wider landscape of the neighbouring SINC sites. 5. Concerns that the site is highly visible within the Wye Valley AONB; development of a site with evidenced high biodiversity value and within an AONB would directly contravene The Well-being of Future Generations (Wales) Act 2015. 6. Concerns that the sewage treatment plant in Devauden is at capacity; there have been sewage overflow issues already. 7. Concerns regarding surface water run off on the property directly below the site. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Leathdunn Ltd 3. 3 Private Individuals 4. 2 Private Individual 5. 3 Private Individuals 6. 2 Private Individual 7. 1 Private Individual
LPA Response	Comments noted. Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0214 Land at Churchfields, Devauden		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues. 2. The site promotor, Monmouthshire Housing Association, makes the following supporting comments: 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd

	<ul style="list-style-type: none"> • The development opportunity is considered to represent proportionate growth in line with the Council’s {referred Strategy. • The site will provide much needed affordable homes. • The development will help support and benefit from existing services within the settlement. • Devauden is served by a bus route between the key towns of Monmouth and Chepstow. • Landscape Appraisal confirmed that there’s no reason why the site could not be developed in landscape and visual terms with regard to the AONB. 	<p>2. Monmouthshire Housing Association</p>
<p>LPA Response</p>	<p>The site performs well against the assessment methodology with no fundamental constraints identified. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p>	
<p>LPA Recommendation</p>	<p>It is proposed to allocate the site for approximately 20 dwellings with site specific policy requirements set out in Policy HA14 Land at Churchfields, Devauden.</p>	
<p>Little Mill</p>		
<p>Page 1681</p>	<p>Candidate Site: CS0016 Land to the east of Little Mill</p>	<p>Representor:</p>
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues. 2. On the basis of the technical, work set out at the Candidate Sites stage in August 2021, the site sponsor believes this site is technically deliverable, viable and developable and meets the requirements of the Preferred Strategy. The site has sound access off the public and highway and good transport links. The responder believes the site is a logical extension to the wider village and could be developed without significantly affecting the setting of the existing village. The proposal for the site includes a small commercial hub to support local businesses and startups. 3. A responder states that this rural employment site is on greenfield land and would not be in sufficiently close proximity to Usk to serve as a local employment opportunity for this Tier 2 Secondary Settlement. 4. SEWRIGS group state that the site lies within the Usk Terminal Moraine Regionally Important Geodiversity Site (RIGS): Important site showing the maximum extent of the Late Devensian glaciation in SE Wales. The study of the last ice age is part of Climate Science. This site was the limit of glaciation during the last ice age. It is important that no action is taken which would jeopardise further research. As stated in Planning Policy Wales, Planning Authorities should protect the features and qualities for which RIGS have been designated. The impact of proposed developments will depend on the nature of the RIGS feature, so early consultation with the local RIGS group or NRW is strongly recommended. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. BB3 Limited 3. 1 Private Individual 4. SEWRIGS group

LPA Response	<p>Comments noted. A reduced area to the candidate site submission is proposed for allocation in the RLDP. Overall, the site performs well against the site search sequence. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p> <p>The commercial element of the candidate site submission for B1/B8 uses is not considered appropriate in this location and given the site's reduced size. More appropriate sites for B1/B8 uses are identified elsewhere in the County.</p>
LPA Recommendation	It is proposed to allocate the site for approximately 20 dwellings with site specific policy requirements set out in Policy HA15 Land east of Little Mill.
<p>Candidate Site: CS0075 Little Mill (Site B)</p>	
	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues.</p>
LPA Response	<p>Comment noted. This is an existing Adopted LDP allocation (SAH11(v)) and is reallocated in the RLDP as a 'Rollover' Allocation. A resolution to approve planning application DM/2020/01438 for 15 residential units was made by Planning Committee on 16th July 2024 and is awaiting the signing of the S106 Agreement.</p>
LPA Recommendation	It is proposed to allocate the site for approximately 15 dwellings with site specific policy requirements set out in Policy HA16 Land North of Little Mill.
<p>Candidate Site: CS0103 Adj Berthon Road, Little Mill</p>	
	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues. Mill race shown on historic mapping forms the southern boundary.</p> <p>2. Monmouthshire Housing Association have submitted separate supporting information but note that an FCA has been prepared which concludes that the site is in Flood Zone A which is considered to be at little or no risk of flooding and that proposed development would not increase flooding elsewhere.</p> <p>3. Concerns re volume of traffic exacerbating a dangerous junction from a private driveway, a potentially dangerous junction into the site and over height HGVs unable to pass under the railway bridge.</p> <p>4. Concerns re flooding as the lower area of the site is often waterlogged and during periods of heavy rain is flooded. The site currently acts as a sponge so should it be built on there are concerns as to the effect on water levels further down into the village.</p> <p>5. Environmental issues including concern for the three large oaks on site which provide habitat for a number of bird species, the meadow itself is a hunting ground for owls and the hedgerows provide habitat for hedgehogs and slow worms.</p> <p>6. A responder states that the village has a lack of amenities, no school and a limited bus service. Pavements under the narrow railway bridge are inadequate and there is no safe crossing for the dual carriageway.</p>
	<p>Representor:</p>
	<p>1. Glamorgan Gwent Archaeological Trust Ltd</p> <p>2. Monmouthshire Housing Association</p> <p>3. 1 Private Individual</p> <p>4. 1 Private Individual</p> <p>5. 1 Private Individual</p> <p>6. 1 Private Individual</p>

LPA Response	Comments noted. The site is not allocated as there is sufficient and more suitable land available for residential development within Little Mill to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Page 1683	Candidate Site: CS0104 Cae Melin, Little Mill	
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues. Trackway shown on historic mapping to the east. 2. The site sponsor, Persimmon Homes East Wales, makes the following key points: <ul style="list-style-type: none"> • The site is within a short walk of local amenities and services including a bus stop which provides access to the 61 & 63 services. • Further services, amenities and employment at nearby towns and cities are easily accessible via the A4042. • The site is not located within the Upper River Wye Catchment Area and is not impacted by the implications of the TAN15 flood map. • There are no designations that cannot be carefully mitigated and accommodated for. 3. SEWRIGS group state that the site falls within the Usk Glacier Terminal Morain RIGS. As per PPW, Planning Authorities should protect the features and qualities for which RIGS have been designated. The impact of proposed developments will depend on the nature of the RIGS feature so early consultation with the local RIGS group or NRW is strongly recommended. 4. Concerns re flooding to adjacent property caused by run off from this site; development of the site would exacerbate this. 5. A responder states that the site is currently used for agricultural purposes: grazing for livestock as well as providing hay/silage. 6. Concerns re increased pressure on sewerage system 7. Concerns re overloading of local infrastructure such as doctors surgery and the school at Penperlleni. 8. Concerns re increased traffic on the roads and reduced air quality. 	Representor: <ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Persimmon Homes East Wales 3. SEWRIGS group 4. 1 Private Individual 5. 1 Private Individual 6. 1 Private Individual 7. 1 Private Individual 8. 1 Private Individual
LPA Response	Comments noted. The site is not allocated as there is sufficient and more suitable land available for residential development within Little Mill to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
	Candidate Site: CS0233 Mulberry House, Berthon Road, Little Mill	
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues. 	Representor: <ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. SEWRIGS group

	2. SEWRIGS group state that the site falls within the Usk Glacier Terminal Morain RIGS. As per PPW, Planning Authorities should protect the features and qualities for which RIGS have been designated. The impact of proposed developments will depend on the nature of the RIGS feature so early consultation with the local RIGS group or NRW is strongly recommended.	
LPA Response	Comments noted. The small-scale nature of the site does not justify an allocation in the plan. Further consideration will be given to the site as part of the settlement boundary review.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Candidate Site: CS0241 Land to North of Little Mill (Site A)		Representor:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues.	1. Glamorgan Gwent Archaeological Trust Ltd
LPA Response	Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Llanbadoc		
Candidate Site: CS0238 Land at Prioress Mill Lane, Llanbadoc		Representor:
	1. A responder makes the following points in support of the site: <ul style="list-style-type: none"> • Monmouthshire has a net-outflow of commuters; support for inward investment and local employment growth/opportunities is needed. • This site would facilitate the provision of a range of types and sizes of employment uses in a broadly sustainable location where it could serve nearby communities, including the settlement of Usk, and complement nearby uses, on previously developed commercial land. It is therefore firmly contended that the site is in accordance with the Preferred Strategy. • No other Candidate Sites were promoted in or around the settlement of Usk for employment use. Only two Candidate Sites, which included employment use in rural areas, have been progressed; both of these rural employment sites are on greenfield land and neither would be in sufficiently close proximity to Usk to serve as a local employment opportunity for this Tier 2 Secondary Settlement which has been identified for growth. 	1. 1 Private Individual
LPA Response	Comments noted. Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.	

LPA Recommendation	This site will not be allocated in the Deposit RLDP.
---------------------------	--

Llandogo

LPA Recommendation	This site will not be allocated in the Deposit RLDP.
LPA Response	Comments noted. Site is located within the existing development boundary which is proposed to be retained in this location. Given the site’s location within the settlement boundary proposals can be pursued via the planning application system, subject to detailed planning policies.
LPA Recommendation	This site will not be allocated in the Deposit RLDP.
LPA Response	Comments noted. Site is located within the existing development boundary which is proposed to be retained in this location. Given the site’s location within the settlement boundary proposals can be pursued via the planning application system, subject to detailed planning policies.

Candidate Site: CS0101 Land adjacent to Parklands, Llandogo

Representor:

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red – Concerns about the impact of the site on the Lower Wye Valley Registered Landscape of Outstanding Historical interest, and HLCA024 Llandogo and the need for an ASIDOHL. No recorded or known archaeological features in the site.
2. The responder is concerned that the current village infrastructure is not able to sustain the new development.
3. Concerns re an increase in commuters, and that access and commuting roads used will not be suitable for an influx in usage. Roads have been subject to landslips and falling trees, deep surface water after heavy rain and surface degradation, making them not fit for current usage.
4. Concerns re previous major water outages and the measures the wastewater treatment works will take to cope with the new developments.
5. Bus service does not operate in times needed for an increase in usage by working people.
6. Concerns re the use of greenfield sites for new housing and how the infrastructure needed for new developments will degrade the wildlife and biodiversity of the village, negatively impacting Wye Valley as an AONB.
7. Concerns re flooding and what defences will need to be implemented as the site is subject to TAN 15 and water covers the lower parts of the fields when the Wye breaches.
8. Concern re vacant properties around the site many of which are used for Holiday Letting and Airbnb, reducing the amount of long-term rental properties.

	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green. No recorded or known archaeological or historic environment issues.	1. Glamorgan Gwent Archaeological Trust Ltd

	<p>2. The site promotor, Llanover Estates, has submitted extensive information in support of the site and makes the following points:</p> <ul style="list-style-type: none"> Initial site and other assessments have shown that there are no fundamental constraints to the site coming forward for development. The site itself is not subject to any statutory designations and is located close to employment opportunities, schools, healthcare and the range of facilities and services offered by Abergavenny Town Centre. The site has the capacity to accommodate a wetland area which will not only act to separate the built development from the River Usk, but will also offer the opportunity to incorporate reed beds for the purpose of phosphate stripping. <p>3. A responder feels that the B4269 which links the site to the A4042 suffers from substandard junction arrangement with the A4042 in terms of geometry and visibility.</p> <p>4. The responder states that the site has a high Landmap value for LLCA in terms of visual and sensory, historic and cultural landscapes.</p> <p>5. The site lies within Flood zone 2/3 and is at risk of flooding by the River Usk.</p> <p>6. The sites northern boundary is in direct proximity to the River Usk corridor which forms part of an ecological designation within the current LDP (SSSi & SAC) which indicates that the site has high ecological significance.</p>	<p>2. <p>Llangwm</p>		
<p>Candidate Site: CS0283 Rockfield Farm, Llangwm</p>		<p>Representor:</p>
	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red – The HER notes the Scheduled Monument of Ringwork NE of New House MM074 borders the site. Desk based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.</p>	<p>1. Glamorgan Gwent Archaeological Trust Ltd</p>
<p>LPA Response</p>	<p>Comment noted. Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	

Llangybi		
Candidate Site: CS0019 St Cybi Drive, Llangybi		Representor:
Page 1690	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Green - No recorded or known archaeological or historic environment issues. 2. Concerns re the 50yr old sewage system, and its ability to cope with current sewage levels at the Treatment Plant. Frequent blockages and overflows have caused effluent to flow out onto Ynys Lane, which has had an impact on pedestrians most notably dog walkers. An increased number of residents, is believed, will exacerbate the issues, and disturb existing systems. 3. Concerns re waterlogging and natural springs which feed down into the lower reaches of the village. Surface water is already streaming through properties nearby the sites due to insufficient infrastructure. The reduction of permeable land due to development will create a serious risk of flood. 4. Concerns re an increased number of vehicles and therefore traffic due to new developments, where existing infrastructure inadequately deals with current demands because of narrow roads and lack of pavements. Parking for vehicles has become a problem, especially near existing MHA dwellings. 5. Concerns re the lack and loss of local amenities such as the school, shop, post office services, sports facilities, and garage. This has contributed to scepticism surrounding the areas categorisation as a main village in the RLDP proposals. 6. Concerns re developments preventing the continued use of the site as agricultural land for sheep to graze upon and its importance in the lambing process. 7. Concerns regarding the existing limited bus service. 8. Concerns re distance of the site from main road systems. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust 2. Recommendation	This site will not be allocated in the Deposit RLDP.	
Mathern		
Candidate Site: CS0026 West Baileys Hay, Mathern		Representor:
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red – No recorded or known archaeological or historic environment issues. Mill race noted on historic mapping, outside the boundary to the west. 2. Concerns re lack of infrastructure and amenities and plans for new infrastructure and amenities to support current residents, such as broadband services, playparks, and education centres. An increase in residents due to the developments will only worsen the issue. 3. Concerns re inadequate Public Transport facilities and active travel measures to provide access to local areas and for commuting purposes, only increasing car usage. 4. New residents are likely to work away from home increasing number of commuters. Roads are inadequate for current levels of traffic and congestion and development would exacerbate this. Current congestion on the A48 increases the number of cars using small local lanes which are not able to deal with the demand. Increased car usage leads to increased pollution. Concerns re safety of those accessing area via active travel. 5. Concerns re impact on aesthetics. Development needs to be sensitive of the village's local character. 6. Concerns re health services ability to cope demand and an increased number of residents due to development will increase issues. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Mathern Community Council, Cllr Louise Brown plus 3 Private Individuals 3. Mathern Community Council, Cllr Louise Brown plus 1 Private Individual 4. Mathern Community Council, Cllr Louise Brown plus 4 Private Individuals

	<ol style="list-style-type: none"> 7. Concerns re sewerage and water drainage facilities as effluent has previously spilled out onto the street and the use of WCs in local dwellings have been affected. Water pressure and electricity supply may also be affected by the developments. 8. Site is agriculturally productive. 9. Concerns re development of the area as it is not marked as a national growth area identified in Future Wales 2040. 10. Concerns re sites partial inclusion in Main Village Boundary and therefore should not be taken forward into the replacement LDP. 11. Concerns re the introduction of a younger demographic and its effects on pace of life. New residents negatively impact areas by using development as strategic residence for commuting and not contributing to existing village culture. 12. New developments are not affordable. Concerns over the viability of 50% affordable housing and concerns over low standards for net zero homes. 13. Lack of or no consultation with residents affected by the site. Residents not included in the correct area zones for consultation 	<ol style="list-style-type: none"> 5. Mathern Community Council, Cllr Louise Brown 6. Mathern Community Council, Cllr Louise Brown plus 2 Private Individuals 7. 2 Private Individuals 8. 1 Private Individual 9. 2 Private Individuals 10. Cllr Louise Brown 11. 2 Private Individuals 12. 1 Private Individual 13. 1 Private Individual
<p>LPA Response</p>	<p>Comments noted. Site is not progressing as although the site meets key policy requirements including 50% affordable housing and net zero carbon homes, the proposed scale and size of the site is too large for a Main Rural Settlement. There are also concerns in relation to negative landscape impact associated with the proposed scale of the site within a wide open landscape, along with its close proximity to Mathern’s Conservation Area. The site search sequence has identified that there are more suitable sites available for residential development within our Main Rural Settlements to accommodate identified housing need.</p>	
<p>Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	
<p>Candidate Site: CS0053 East of Cherry Trees, Mathern</p>	<p>Representor:</p>	
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red – Adjoins the Registered Park of WyelandsPGW(Gt)51(MON), and part of the Essential Setting is within the south-eastern part of the site. Assessment of the impact will need to be undertaken to Cadw Guidance. 2. Drainage issues including concerns re the open water source flowing through the site which has made the site prone to flooding, development could enhance this. 3. Concerns re access to the site and the impact of increased use by cars on non-vehicle users. 4. Concerns over lack of infrastructure for existing residents, such as NHS availability and public transport. 5. An increased number of residents in the area will result in more traffic and subsequent congestion. 6. Concerns re unmanaged conservation area. 7. Responder expresses overall support. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeologic Trust Ltd 2. Mathern Community Council, Cllr Louise Brown plus 1 Private Individual 3. Cllr Louise Brown plus 1 Private Individual 4. Mathern Community Council 5. 1 Private Individual 6. 1 Private Individual 7. Mathern Community Council

--	---	---

	5. A responder feels that a lack of green open space and countryside is having an effect on nature, flooding and the general health of those who live here.	
LPA Response	Comments noted. While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Pwllmeryric

Candidate Site: CS0030 Land Off Chapel Lane, Pwllmeryric

Representor:

Page 1697	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red – A crop mark is noted in the area, no further information. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. Concerns re development of the area as it is not marked as a national growth area identified in Future Wales 2040. 3. Site is an essential and clearly visible piece of green between Pwllmeryric and Mathern. 4. Site is productively in use as valuable agricultural land. 5. Roads surrounding the area are already congested and a new development would increase traffic and therefore noise and pollution. Potential to obstruct emergency vehicle accessibility. Access in and out of area will also be affected. 6. Concerns re infrastructure such as broadband, education, local amenities, NHS: Doctors and Dentist already under strain from current residents, adding to this will have a detrimental impact. 7. Compromise local character, identity, and individuality of the area as two villages will be joined if the site is no longer green belt. 8. Concerns re drainage and the previous flooding of the area as well as new developments being able to cope with sewerage demands. 9. Concerns re the introduction of a younger demographic and its effects on pace of life. New residents negatively impact areas by using developments as strategic dormitories for commuting to larger cities and towns. 10. New developments are not affordable. Concerns over the viability of 50% affordable housing and concerns over low standards for net zero homes. 11. Lack of or no consultation with residents affected by the site. Residents not included in the correct area zones for consultation. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. 2 Private Individuals 3. LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Shirenewton		
Page 1698	Candidate Site: CS0111 Adjacent to Thistledown Barn, Shirenewton	
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red – HER details extensive prehistoric artefacts and cropmarks, and enclosure of potential Iron Age / Roman date in the field and surrounding fields. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include pre-determination work. 2. In favour of as it is justifiable in relation to flood risk and proposed drainage strategy in line with Statutory SuDS Standards. 3. Concern re previous flooding in relation to drainage and sewerage management, with fields being flooded with raw sewerage from existing residents, and the implications caused by a new development on the site. 4. Concerns re lack of current infrastructure in the village such as public transport, broadband, shop, pub, post office, which will be even more insufficient after this site is developed. 5. The school has reached its maximum capacity and NHS service are being overwhelmed by current demands, which will only be exacerbated by a large increase in residents. 6. Concerns re the scale and over-bearing plans of new developments in proportion to the existing village and therefore its character and appearance, and a reduction in the open aspect of the village and its existing views, significantly expanding the size of the village. 7. Concerns re an increase in traffic on the rural roads, as the only option for new residents would be to access facilities in neighbouring villages and towns using private vehicles. Adding more traffic because of an increase in residents will exacerbate congestion and pollution, there are no public charging points for electric vehicles and current infrastructure to support these schemes are not complete and plans are yet to be produced. Also concerns re the lack of safe pedestrian footpaths in the village and to walk to Chepstow and no dedicated cycle route as the country lanes can be dangerous for everyone. Responders note that the development will decrease access to the area and that there is already an issue with speeding. Because of the remote nature of the site and its lack of links to centres and amenities only further increases the necessity to use cars for transport.	Representor: 1. Glamorgan Gwent Archaeological Trust 2. 1 Private Individual 3. Shirenewton Community Council plus 7 Private Individuals 4. Shirenewton Community Council plus 9 Private Individuals 5. Shirenewton Community Council plus 5 Private Individuals 6. Shirenewton Community Council plus 8 Private Individuals 7. Shirenewton Community Council plus 9 Private Individuals

	<ol style="list-style-type: none"> 8. Responders note that the development of the site would mean the loss of valuable green wedge land, important to the villages distinct sense of place and identity. The green space maintains the distinction between the countryside and the settlements and protects the open character and landscape of the area. It is also noted that the green space greatly benefits humans and wildlife and is an important component of the wildlife reserve. Concerned re development of grade one agriculture land being in contrast to the views of Future Wales 2040 which, prioritises the development of Newport, Cardiff, and the Valleys. 9. Concern re site being outside of defined village development boundary and would extend the village envelope. 10. Responder believes sites in rural areas should be allocated for self-build bungalows for a retiring population, freeing up existing family homes in the area. Responder also believes that a rural village is not the place to build affordable homes for young people and notes that they will be better served by a town with more facilities, access to transport and a wider availability of services. 11. Concerns re the villages lack of opportunities for sustainable growth in terms of employment as there are no SMEs to provide jobs. 12. Responders fail to see how development in the village will help the climate emergency, noting that it's the opposite of what Future Wales 2040 wants. 13. Concerns of significant adverse effects on current residential amenity, by reason of noise disturbance, overlooking, loss of privacy, overshadowing etc. 14. Responder notes that local consultation should take place on the options before any individual sites are considered for inclusion in the allocation. 15. Concerns that the proposed candidate site is capable under MCC's housing density policy of up to 26 units, which, is far more than the settlement average. 16. Responder believes the proposal to be alienating the people who have moved to the countryside for all of its benefits, driving them somewhere else and reducing the desirability of the village. This is detrimental to Monmouthshire and will take away the key reasons as to why residents want to live in Shirenewton. 	<ol style="list-style-type: none"> 8. Shirenewton Community Council plus 7 Private Individuals 9. Shirenewton Community Council plus 4 Private Individuals 10. 1 Private Individual 11. 8. Concern re site being outside of defined village development boundary and would extend the village envelope.
9. Concerns re the villages lack of opportunities for sustainable growth in terms of employment as there are no SMEs to provide jobs.
10. Responders fail to see how development in the village will help the climate emergency.
11. Concerns of significant adverse effects on current residential amenity, by reason of noise disturbance, overlooking, loss of privacy, overshadowing etc.
12. Responder notes that local consultation should take place on the options before any individual sites are considered for inclusion in the allocation.
13. Concerns that the proposed candidate site is capable under MCC's housing density policy of up to 26 units, which, is far more than the settlement average.
14. Responder believes the proposal to be alienating the people who have moved to the countryside for all of its benefits, driving them somewhere else and reducing the desirability of the village. This is detrimental to Monmouthshire and will take away the key reasons as to why residents want to live in Shirenewton.

LPA Response	Comments noted. Site not progressing as significant concerns have been raised in relation to heritage impact.
LPA Recommendation	This site will not be allocated in the Deposit RLDP.

Candidate Site: CS0218 Land at Ditch Hill Lane, Shirenewton (Option A)	Representor:
<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – Coxe’s Well marked at the eastern periphery, other springs marked on historic mapping; the Well marked as a Brake on the Tithe Map. HER details extensive prehistoric artefacts and cropmarks, and enclosure of potential Iron Age / Roman date in the field and surrounding fields. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.</p> <p>2. Concern re previous flooding in relation to drainage and sewerage management, with fields being flooded with raw sewerage from existing residents, and the implications caused by a new development on the site.</p> <p>3. Concerns re lack of current infrastructure in the village such as public transport, broadband, shop, pub, post office, which will be even more insufficient after this site is developed.</p> <p>4. The school has reached its maximum capacity and NHS service are being overwhelmed by current demands, which will only be exacerbated by a large increase in residents.</p> <p>5. Concerns re the scale and over-bearing plans of new developments in proportion to the existing village and therefore its character and appearance, and a reduction in the open aspect of the village and its existing views, significantly expanding the size of the village.</p> <p>6. Concerns re an increase in traffic on the rural roads, as the only option for new residents would be to access facilities in neighbouring villages and towns using private vehicles. Adding more traffic because of an increase in residents will exacerbate congestion and pollution, there are no public charging points for electric vehicles and current infrastructure to support these schemes are not complete and plans are yet to be produced. Also concerns re the lack of safe pedestrian footpaths in the village and to walk to Chepstow and no dedicated cycle route as the country lanes can be dangerous for everyone. Responders note that the development will decrease access to the area and that there is already an issue with speeding. Because of the remote nature of the site and its lack of links to centres and amenities only further increases the necessity to use cars for transport.</p> <p>7. Responders note that the development of the site would mean the loss of valuable green wedge land, important to the villages distinct sense of place and identity. The green space maintains the distinction between the countryside and the settlements and protects the open character and landscape of the area. It is also noted that the green space greatly benefits humans and wildlife and is an important component of the wildlife reserve. Concerned re development of grade one agriculture land being in contrast to the views of Future Wales 2040 which, prioritises the development of Newport, Cardiff, and the Valleys.</p> <p>8. Concern re site being outside of defined village development boundary and would extend the village envelope.</p> <p>9. Concerns re the villages lack of opportunities for sustainable growth in terms of employment as there are no SMEs to provide jobs.</p> <p>10. LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0229 Land Opposite Chepstow Garden Centre, Pwllmeyric (Shirenewton ward)	Representor:
<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – A complex of circular enclosures as crop marks tentatively identified as part of a prehistoric burial cairns are within the area. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.</p> <p>2. Concerns re drainage of the site as the field regularly floods from the local stream and is potentially in a flood zone area. The issue re flooding and drainage on the site would make the site unsuitable for the residential nature of a hotel and would render the solar panels ineffective if water-logged. Responders also note that the development of the site is likely to increase flooding elsewhere in the village and nearby buildings due to increased surface water runoff from the field. Concerns re current sewage infrastructure’s inability to cope with current demands, resulting in raw sewage running down nearby roads, without any additional burden.</p> <p>3. Responders concerned re road infrastructure’s ability to deal with current demands and that development will only increase the number of cars using the local roads and also cars parked in the local lanes and in field and property access points. Development will not only increase traffic, congestion, and delays, but further degrade air quality due to increased pollution and increase noise. Responders note that motorists try to avoid traffic by using smaller local lanes that are not designed to accommodate the volume of traffic, also causing dangerous driving. Concerns re safety around the roads as the area is an existing accident hotspot having poor visibility. Responders note that the congestion also stops emergency vehicles being able to pass the main arterial route. No provisions have been made for safe walking and cycling routes, causing concerns for the safety of pedestrians. The introduction of 20mph speed limits is ineffective as reducing speeding. It is noted that there may be a conflict between the traffic coming out of both the garden centre and proposed hotel.</p> <p>4. Responders note that the site is in an area that suffers from having no spare infrastructure and amenities locally to serve it, such as broadband, reliable public transport and playparks with existing infrastructure and amenities under further strain. Responders concerned that there are zero real plans for infrastructure and amenity improvement.</p> <p>5. Concerns re NHS services at max capacity with long wait times and no availability, and a lack of schools locally to keep up with demand, both issues that will only get worse with increased development.</p> <p>6. Scale Character identity Individuality. Concerns that the development of this site will compromise the identity and individuality of the local area is not in keeping with its historic nature. The proposed solar panels and hotel on the site is noted to be totally out of place for the quiet, rural land, and will overpower and dominate the nearby properties and approach to the conservation area of Mathern village.</p> <p>7. Concerns re the removal of an essential part of the green belt/ wedge between Pwllmeyric, Hayes Gate and Mathern if this site is developed also reducing the amount of land for agriculture in the area. Responders note development of this site to be inappropriate and contrary to Planning Policy Wales Edition 11, severely affecting the rural setting and landscape of the surrounding villages. Concern that a high security fence surrounding the site will transform the area into an industrial landscape. Despite the constant expansion of the garden centre site opposite, this is still a quiet rural area and not one of industry and should therefore be kept that way.</p> <p>8. Concerns re glare caused by the solar panels due to the site’s proximity to the A48 Pwllmeyric major road, its visibility, and its openness to the surrounding landscape. The light reflected by the solar panels could dazzle drivers and cause a road traffic</p>	<p>1. Glamorgan Gwent Archaeological Trust Ltd</p> <p>2. Mathern Community Council, Cllr Louise Brown plus 3 Private Individuals</p> <p>3. Mathern Community Council, Cllr Louise Brown plus 7 Private Individuals</p> <p>4. Mathern Community Council plus 4 Private Individuals</p> <p>5. 2 Private Individuals</p> <p>6. Mathern Community Council, Cllr Louise Brown plus 2 Private Individuals</p> <p>7. Mathern Community Council, Cllr Louise Brown plus 5 Private Individuals</p> <p>8. Cllr Louise Brown plus 3 Private Individuals</p> <p>9. 2 Private Individuals</p> <p>10. 2 Private Individuals</p> <p>11. Cllr Louise Brown plus 2 Private Individuals</p> <p>12. Cllr Louise Brown plus 1 Private Individual</p> <p>13. 1 Private Individual</p> <p>14. Mathern Community Council</p> <p>15. 1 Private Individual</p> <p>16. 1 Private Individual</p> <p>17. 1 Private Individual</p>

<p>Page 1706</p>	<p>accident. The site is also looked down upon from the garden centre also causing glare issues. Responders believe solar panel sites should be in more isolated locations. Screening of the site will not be effective due to its lower position compared to the surrounding landscape.</p> <ol style="list-style-type: none"> 9. Responders concerned that development are not sustainable or help to reducing the climate emergency, even with proposed mitigation strategies. 10. Concerns that a hotel by its very nature will increase noise and disturbance at all hours of the day. A growth of people in this currently quiet area will also increase littering, nuisance, and antisocial behaviour. Responders living in close proximity to the site note that it would result in a loss of privacy for their property, with the hotel possibly overlooking and dominating smaller buildings. 11. Responders believe there is no necessity for hotel accommodation in Pwllmeyric as there is already tourist accommodation at Mounon Brook Lodge, Willowbrook Guest House, Marriott St Pierre Hotel and Country Club, and the Two Rivers nearby. 12. Responder notes that the site does not lie in the boundaries of any of the villages and is also not located in any of the Less Constrained Solar Area laid out in the RLDP. 13. Development of the site would severely affect the conservation area of Mathern and Pwllmeyric and is not in keeping with this historic area. 14. Responder noted that a hotel would be better placed in Chepstow, where it could help to regenerate the town. 15. Responder notes that the allocation of this site only benefits the developers and makes them profit and that the site should not be allocated as Monmouthshire is not in a national growth area identified in Future Wales 2040. 16. Concerns re the affordability of housing in the area and that those who work the jobs brought about by the development of the hotel would not be able to afford to live in the area, further contributing to issues surrounding commuting. 17. Responder believes the consultation for the site should be extended as the site has not been highlighted to Chepstow, Pwllmeyric and Mather residents, being hidden in the rural plans. 	
<p>LPA Response</p>	<p>Comments noted. While internal and external consultee comments were obtained in relation to tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.</p> <p>The solar element is not being progressed as an allocation due to concerns raised in relation to the site’s proximity to the Gwent Levels Historic Landscape. Ecology concerns have also raised in relation to the presence of a SINC on site, as well as flood risk issues on the eastern edge of the site. In addition, the site is predominantly Grade 2 BMV land, with the Minster for Climate Change letter of 1st March 2022 noting that significant weight should be given to protecting BMV land where solar arrays are proposed and the availability of more suitable alternatives.</p>	
<p>LPA Recommendation</p>	<p>This site will not be allocated in the Deposit RLDP.</p>	

Candidate Site: CS0231 West of Shirenewton Recreation Hall (Smaller Site), Shirenewton	Representor:

This is detrimental to Monmouthshire and will take away the key reasons as to why residents want to live in Shirenewton. 15. Responders believe planned access is very dangerous as the hill is steep and the visibility is poor, posing an unacceptable level of risk. 16. Responder is in support of the site as they believe the site is technically deliverable, viable and developable and meets the requirements of the Preferred Strategy. The site has sound access off the public highway and could be developed without significantly affecting the setting of the existing village. The site has demonstrated as having no constraints that cannot be mitigated against. The responder believes that housing can be provided in one of the most sustainable villages in the county and asks the LPA to allocate the site in the deposit LDP. 	<ol style="list-style-type: none"> 8. Shirenewton Community Council plus 4 Private Individuals 9. Shirenewton Community Council plus 1 Private Individual 10. 1 Private Individual 11. 2 Private Individuals 12. 1 Private Individual 13. Shirenewton Community Council 14. 1 Private Individual 15. 2 Private Individuals 16. 1 Private Individual
<p style="background-color: #4b4b9b; color: white; padding: 5px;">LPA Response</p>	<p>Comments noted. A reduced area to the candidate site submission is proposed for allocation in the RLDP. Overall, the site performs well against the site search sequence. This site is located on the western edge of Shirenewton. While the site is partly Best and Most Versatile (BMV) agricultural land, it performs better in this respect compared to other Candidate Sites within the area as most have higher proportions of BMV agricultural land. The site benefits from excellent access to the recreation ground, play area and recreation hall due to its location opposite the site, and is also within walking distance of the primary school. The site meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p>	
<p style="background-color: #4b4b9b; color: white; padding: 5px;">LPA Recommendation</p>	<p>It is proposed to allocate the site for 26 dwellings with site specific policy requirements set out in Policy HA18 Land west of Redd Landes, Shirenewton.</p>	
<p>Candidate Site: CS0240 Land to the East of Mounton Court, Shirenewton</p>		<p>Representor:</p>
	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – HER details prehistoric artefacts and crop mark enclosures in the surrounding fields. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. 2. Concern re previous flooding in relation to drainage and sewerage management, with fields being flooded with raw sewerage from existing residents, and the implications caused by a new development on the site. 3. Concerns re lack of current infrastructure in the village such as public transport, broadband, shop, pub, post office, which will be even more insufficient after this site is developed. 	<ol style="list-style-type: none"> 1. Glamorgan Gwent Archaeological Trust Ltd 2. Shirenewton Community Council plus 5 Private Individuals 3. Shirenewton Community Council

<p>4. The school has reached its maximum capacity and NHS service are being overwhelmed by current demands, which will only be exacerbated by a large increase in residents.</p> <p>5. Concerns re the scale and over-bearing plans of new developments in proportion to the existing village and therefore its character and appearance, and a reduction in the open aspect of the village and its existing views, significantly expanding the size of the village. Concerns re the footpath used to access the school becoming suburban and hemmed in by development.</p> <p>6. Concerns re an increase in traffic on the rural roads, as the only option for new residents would be to access facilities in neighbouring villages and towns using private vehicles. Adding more traffic because of an increase in residents will exacerbate congestion and pollution, there are no public charging points for electric vehicles and current infrastructure to support these schemes are not complete and plans are yet to be produced. Also concerns re the lack of safe pedestrian footpaths in the village and to walk to Chepstow and no dedicated cycle route as the country lanes can be dangerous for everyone. Responders note that the development will decrease access to the area and that there is already an issue with speeding. Because of the remote nature of the site and its lack of links to centres and amenities only further increases the necessity to use cars for transport.</p> <p>7. Responders note that the development of the site would mean the loss of valuable green wedge land, important to the villages distinct sense of place and identity. The green space maintains the distinction between the countryside and the settlements and protects the open character and landscape of the area. It is also noted that the green space greatly benefits humans and wildlife and is an important component of the wildlife reserve. Concerned re development of grade one agriculture land being in contrast to the views of Future Wales 2040 which, prioritises the development of Newport, Cardiff, and the Valleys.</p> <p>8. Concern re site being outside of defined village development boundary and would extend the village envelope.</p> <p>9. Concerns re the villages lack of opportunities for sustainable growth in terms of employment as there are no SMEs to provide jobs.</p> <p>10. Responders fail to see how development in the village will help the climate emergency.</p> <p>11. Concerns of significant adverse effects on current residential amenity, by reason of noise disturbance, overlooking, loss of privacy, overshadowing etc.</p> <p>12. Responder notes that local consultation should take place on the options before any individual sites are considered for inclusion in the allocation.</p> <p>13. Concerns that the proposed candidate site is capable under MCC's housing density policy of up to 26 units, which, is far more than the settlement average.</p> <p>14. Responder believes the proposal to be alienating the people who have moved to the countryside for all of its benefits, driving them somewhere else and reducing the desirability of the village. This is detrimental to Monmouthshire and will take away the key reasons as to why residents want to live in Shirenewton.</p> <p>15. Responder believes the village of Shirenewton has no opportunity for sustainable growth in terms of employment.</p> <p>16. Responder believes sites in rural areas should be allocated for self-build bungalows for a retiring population, freeing up existing family homes in the area. Responder also believes that a rural village is not the place to build affordable homes for young people and notes that they will be better served by a town with more facilities, access to transport and a wider availability of services.</p>	<p>plus 6 Private Individuals</p> <p>4. Shirenewton Community Council plus 3 Private Individuals</p> <p>5. Shirenewton Community Council plus 8 Private Individuals</p> <p>6. Shirenewton Community Council plus 6 Private Individuals</p> <p>7. Shirenewton Community Council plus 5 Private Individuals</p> <p>8. LPA
Recommendation

This site will not be allocated in the Deposit RLDP.

Candidate Site: CS0244 Land West of Ditch Hill Lane, Shirenewton

Representor:

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as RED – Coxe’s Well marked at the eastern periphery, other springs marked on historical mapping; the Well is marked as a Brake on the Tithe Map. HER details extensive prehistoric artefacts and cropmarks, and enclosure of potential Iron Age / Roman date in the field and surrounding fields. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work.
2. Concern re previous flooding in relation to drainage and sewerage management, with fields being flooded with raw sewerage from existing residents, and the implications caused by a new development on the site.
3. Concerns re lack of current infrastructure in the village such as public transport, broadband, shop, pub, post office, which will be even more insufficient after this site is developed.
4. The school has reached its maximum capacity and NHS service are being overwhelmed by current demands, which will only be exacerbated by a large increase in residents.
5. Concerns re the scale and over-bearing plans of new developments in proportion to the existing village and therefore its character and appearance, and a reduction in the open aspect of the village and its existing views, significantly expanding the size of the village.
6. Concerns re an increase in traffic on the rural roads, as the only option for new residents would be to access facilities in neighbouring villages and towns using private vehicles. Adding more traffic because of an increase in residents will exacerbate congestion and pollution, there are no public charging points for electric vehicles and current infrastructure to support these schemes are not complete and plans are yet to be produced. Also concerns re the lack of safe pedestrian footpaths in the village and to walk to Chepstow and no dedicated cycle route as the country lanes can be dangerous for everyone. Responders note that the development will decrease access to the area and that there is already an issue with speeding. Because of the remote nature of the site and its lack of links to centres and amenities only further increases the necessity to use cars for transport.
7. Responders note that the development of the site would mean the loss of valuable green wedge land, important to the villages distinct sense of place and identity. The green space maintains the distinction between the countryside and the settlements and protects the open character and landscape of the area. It is also noted that the green space greatly benefits humans and wildlife and is an important component of the wildlife reserve. Concerned re development of grade one agriculture land being in contrast to the views of Future Wales 2040 which, prioritises the development of Newport, Cardiff, and the Valleys.
8. Concern re site being outside of defined village development boundary and would extend the village envelope.
9. Concerns re the villages lack of opportunities for sustainable growth in terms of employment as there are no SMEs to provide jobs.
10. Responders fail to see how development in the village will help the climate emergency.
11. Concerns of significant adverse effects on current residential amenity, by reason of noise disturbance, overlooking, loss of privacy, overshadowing etc.

2. Shirenewton Community Council plus 6 Private Individuals
3. Shirenewton Community Council plus 7 Private Individuals
4. Shirenewton Community Council plus 3 Private Individuals
5. Shirenewton Community Council plus 8 Private Individuals
6. Shirenewton Community Council plus 7 Private Individuals
7. Shirenewton Community Council plus 6 Private Individuals
8. Shirenewton Community Council plus 3 Private Individuals
9. Shirenewton Community Council plus 1 Private Individual
10. 1 Private Individual

	<p>12. Responder notes that local consultation should take place on the options before any individual sites are considered for inclusion in the allocation.</p> <p>13. Concerns that the proposed candidate site is capable under MCC’s housing density policy of up to 26 units, which, is far more than the settlement average.</p> <p>14. Responder believes the proposal to be alienating the people who have moved to the countryside for all of its benefits, driving them somewhere else and reducing the desirability of the village. This is detrimental to Monmouthshire and will take away the key reasons as to why residents want to live in Shirenewton.</p> <p>15. Responder notes that the site is surrounded by the indicative green belt in Future Wales Plan 2040 and therefore, development would be contrary to Planning Policy Wales Edition 11. The site would also be too close to Mynydbach and there needs to be a distinction between the two.</p>	<p>11. 3 Private Individuals</p> <p>12. 1 Private Individual</p> <p>13. Shirenewton Community Council</p> <p>14. 1 Private Individual</p> <p>15. Cllr Louise Brown</p>
LPA Response	Comments noted. Site is not allocated as there is sufficient and more suitable land available for residential development within the Main Rural Settlement of Shirenewton to accommodate its housing need.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
<p>Page 17 of 12</p> <p>Arvans</p>		
Candidate Site: CS0003 Livox Quarry		Representor:
	<p>1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red. The HER notes finds of prehistoric date, and Medieval and post-medieval artefacts also. Outside but near to the boundary are Scheduled Monuments of Roman and Modern date. Desk-based assessment and geophysical survey prior to any determination of an application would inform mitigation, which may include further pre-determination work. Also within the Registered Landscape of Outstanding Historic Interest of the Lower Wye Valley, in character area HLCA007 Livox Farm, consult Cadw regarding the need for an ASIDOHL to determine the impact on this.</p>	<p>1. Glamorgan Gwent Archaeologic Trust Ltd</p>
LPA Response	Comment noted. While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0077 Adj Piercefield Public House, St Arvans

Representor:

1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. HER notes route of a Roman road at the east of the site area marked as orchard on historic mapping. Development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation.
2. A responder states that the land provides habitat for wildlife including badgers, hedgehogs, bats, owls and mice, all of which would face a loss of habitat if the site was developed as all other local fields are used for livestock and are therefore unsuitable for this wildlife.
3. Concerns regarding capacity of the water treatment plant.
4. Concerns as the access for the site is likely to be opposite a busy pre-school nursery and other entrances and junctions on this busy road.
5. SEWRIGS group state that the site lies within the Otter Hole RIGS on Datamap Wales, but the site is listed for the Otter Hole Cave system underground. The impact of proposed developments will depend on the nature of the RIGS feature, so early consultation with the local RIGS group or NRW is strongly recommended.
6. A responder states that the land has not been used for agricultural purposes for many but is largely abandoned and is known to have Japanese knotweed in several locations.
7. Concerns regarding a loss of privacy to properties and gardens.
8. The site sponsor, Marston’s PLC, has submitted supporting information and makes the following points:
 - A Flood Consequence Assessment & Drainage Strategy was commissioned which confirms that the site is considered appropriate for residential purposes in terms of national and local planning policy for flood risk.
 - Following assessment through a Landscape and Visual Impact Assessment the Illustrative Masterplan has emerged which ensures that the proposed development would assimilate carefully into its surrounds and would avoid any harm to the AONB.
 - The site is located immediately adjacent to the A466 and also benefits from having bus stops immediately adjacent.
 - A Viability Assessment demonstrated that the proposals could meet all S106 obligations and infrastructure requirements including 50% affordable housing.
 - The Illustrative Masterplan demonstrates that the site would be GI led in excess of 40% on site and would provide opportunities for biodiversity habitat and net-gain.
 - St Arvans is one of the most disproportionately aging communities in the County and so growth of the village through delivery of the site would serve to meet the requirements of local planning policy relating to demographic rebalancing of rural communities.
 - A Preliminary Ecological Appraisal concluded that the proposals have sought to minimise impacts and subject to the implementation of appropriate avoidance, mitigation and compensation measures, it is unlikely that the proposals will result in significant harm to biodiversity.

1. Glamorgan Gwent Archaeological Trust Ltd
2. 1 Private Individual
3. 1 Private Individual
4. 1 Private Individual
5. SEWRIGS group plus 2 Private Individuals
6. 1 Private Individual
7. 1 Private Individual
8. Marston’s PLC

LPA Response	Comments noted. The site performs well against the assessment methodology with no fundamental constraints identified. Although within the Wye Valley National Landscape (AONB), the proposal is small scale and the landscape assessment has demonstrated limited harm. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.	
LPA Recommendation	It is proposed to allocate the site for approximately 16 dwellings with site specific policy requirements set out in Policy HA13 Land adjacent to Piercefield Public House, St. Arvans.	
Candidate Site: CS00223 Land at New Barn Workshop, St Arvans		Representor:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. HER notes route of a Roman road at the north of the site; adjoining field has find spots of prehistoric and 8 th century artefacts. Development could be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation.	1. Glamorgan Gwent Archaeological Trust Ltd
LPA Response	Comment noted. While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Trellech		
Candidate Site: CS0092 Monmouth Road, Trellech		Representor:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Amber. Following archaeological field evaluation, it was recommended that development be mitigated by condition, in accordance with an agreed Written Scheme of Historic Environment Mitigation.	1. Glamorgan Gwent Archaeological Trust Ltd
LPA Response	Comment noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. In addition, there is no capacity at the Trellech WwTW to accommodate foul flows from the site.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Candidate Site: CS0234 East of De Clere Way, Trellech		Representor:
	1. Glamorgan Gwent Archaeological Trust Ltd assess the site as Red – Partly with the Trellech Archaeologically Sensitive Area, archaeological evaluation adjacent encountered Medieval remains. Geophysical survey and field evaluation prior to determination of any application.	1. Glamorgan Gwent Archaeological Trust Ltd
LPA Response	Comment noted. Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. In addition, there is no capacity at the Trellech WwTW to accommodate foul flows from the site.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	
Werngifford Pandy		
Candidate Site: CS0219 Land at Sun Meadow		Representor:
	No responses received.	
LPA Response	Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. In addition, there is no capacity at the Pandy WwTW to accommodate foul flows from the site and there are concerns over flooding on the access to the site.	
LPA Recommendation	This site will not be allocated in the Deposit RLDP.	

Page 17/15

Candidate Sites for Protection

Abergavenny & Llanfoist

Candidate Site: CSP001 Gavenny Valley, Abergavenny		Representor:
Page 1716	<ol style="list-style-type: none"> 1. Support for inclusion as part of a policy for a Green Wedge buffer between the built-up area and the National Park and to protect the lower sides of the Gavenny Valley between the built-up area and the railway/A465 from further development. 2. Responders state that the steeply sloping wooded lower part of the site is a SINC including floodplains which have their own unique biodiversity and a developed species hierarchy. 3. Concerns that the site is partly liable to flood, absorbing excess rainfall which prevents flooding of existing homes and the risk of subsidence. 4. Concerns that an ancient woodland SSSI crosses the site providing an east-west wildlife corridor. Development would require access from Ross Road via a small area of level field and a breach in the SSSI. There are many trees on site subject to TPOs. 5. Concern about the impact of any development on the river quality. The river supports many species, some protected under the Wildlife and Countryside Act 1981, such as brown trout, otters, white-clawed crayfish, kingfishers, dippers, various birds of prey and various bats. 6. Abergavenny Town Council state that the site is within the setting of St Teilo’s Church, a Grade 1 Listed Building. A responder also mentions the presence of World War 2 Pill Boxes and an Air Raid Shelter which should be preserved. 7. Responders state that the preservation of this site supports MCC, Welsh Government and NRW environmental policies and addresses the Climate and Nature Emergencies called by WG. 8. Responders state that the site provides access to dark skies. 9. Responders state that the woodland helps to reduce noise from the A465. 10. Responders state that the site provides valuable amenity space giving easy access to beautiful walks benefiting both mental and physical wellbeing. A responder believes the site meets DES2 criteria. 11. Responders state that the site provides uninterrupted countryside views to Skirrid Mountain; development would alter the skyline for the worse. 12. Responders state that the previous MCC Ecological Site Assessment (previous LDP/CS0054) recommended that the development of a high proportion of the site should be avoided. 13. Responders state that the site is important for tourism in the area, supporting existing holiday accommodation. Feedback from visitors confirms appreciation for this unspoilt area so close to the town. 14. Abergavenny & District Civic Society suggest the site may be Grade 3a agricultural land. 15. Concerns for the loss of undeveloped land; brownfield sites should be developed. 16. Concerns for the increase in traffic and pollution that development would bring. 17. Concerns for building more homes when a number of houses in the area remain unoccupied. 	<ol style="list-style-type: none"> 1. Abergavenny Town Council plus 16 Private Individuals 2. Abergavenny Town Council, Abergavenny & District Civic Society plus 15 Private Individuals 3. Abergavenny Town Council, plus 16 Private Individuals 4. Abergavenny & District Civic Society plus 20 Private Individuals 5. Abergavenny Town Council, Abergavenny & District Civic Society, plus 23 Private Individuals 6. Abergavenny Town Council plus 2 Private Individuals 7. 10 Private Individuals 8. 6 Private Individuals 9. 10 Private Individuals 10. 13 Private Individuals 11. 5 Private Individuals 12. 1 Private Individual 13. 2 Private Individuals 14. Abergavenny & District Civic Society 15. 5 Private Individual 16. 5 Private Individual 17. 2 Private Individuals

LPA Response	Comments noted. The site has been considered as part of the review of Areas of Amenity Importance which concludes that apart from Croesonen Parc, which will be designated separately, the site is mostly private, inaccessible and considered to be Open Countryside.	
LPA Recommendation	The site is therefore not suitable for designation as an Area of Amenity Importance.	
Candidate Site: CSP002 Western Abergavenny		Responder:
	<ol style="list-style-type: none"> 1. General support for protection as a buffer to the National Park; to be retained as a Green Wedge. 2. Abergavenny Town Council and Abergavenny & District Civic Society state that the site forms the National Park buffer zone proposal which could allow for a trunk road by-pass. 3. Abergavenny Town Council and Abergavenny & District Civic Society raise concerns that a flood risk from mountain streams may impact any development on the site. 4. Abergavenny & District Civic Society state that the site is Grade 3a agricultural land quality. 	<ol style="list-style-type: none"> 1. 2 Private Individuals 2. Abergavenny Town Council, Abergavenny & District Civic Society 3. Abergavenny Town Council, Abergavenny & District Civic Society 4. Abergavenny & District Civic Society
LPA Response	Comments noted. The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations.	
LPA Recommendation	The candidate site has also been assessed as part of the Green Wedge Assessment and in accordance with the review's findings, the relevant sections of the site have been designated as green wedge.	
Candidate Site: CSP003 Land at Pentre Road, Abergavenny		Responder:
	<ol style="list-style-type: none"> 1. General support for protection as a buffer to the National Park; to be retained as a Green Wedge. 2. Abergavenny Town Council state that the site is steeply sloped and prominent to views from the south with no mitigating green infrastructure that would help to absorb any development into the landscape. 3. Abergavenny Town Council state that a thick hedgerow on the western boundary must be safeguarded. 4. Responders feel that the woodland is an important element of the town's green infrastructure. 5. Responders state that the site offers iconic views of The Sugar Loaf Mountain and along with the unspoilt nature of the landscape is a key asset to Abergavenny's tourism. 6. Responders state that the site on the border of the Abergavenny Conservation Area and that four of the eleven fields which constitute the site are registered as SINCs. The fields are therefore of very high ecological value, supporting a high level of natural wildlife including birds of prey and mammals, and should be protected. 7. Concerns that residential development will increase light pollution adversely affecting nocturnal wildlife in the BBNP. 8. SOUL state that many of the lanes which surround or cross the site are single track providing excellent conditions for walking and exercise. 9. Responders state that these lanes provide access to The Sugar Loaf, St Mary's Vale and The Vineyard for serious walkers, visiting tourists and locals and act as a natural boundary between the town development and the countryside. 	<ol style="list-style-type: none"> 1. Abergavenny Town Council, SOUL, 208 Private Individuals 2. Abergavenny Town Council plus 7 Private Individual 3. Abergavenny Town Council 4. Abergavenny Town Council, 1 Private Individual 5. SOUL, 19 Private Individual 6. SOUL plus 17 Private Individuals 7. 2 Private Individuals 8. SOUL plus 12 Private Individual

	<ol style="list-style-type: none"> 10. A responder states that the site provides connectivity with the green infrastructure of the town – linking the National Park and Conservation Area designations to the town’s green spaces. 11. There is concern that allowing development at this site would set a precedent for other sites in the area. 12. Responders felt that the site is has no local shops and only a two-hourly bus service and that any residential development would be up to 2km from the town centre services. 13. Traffic issues were raised with concerns that any development would increase traffic and may require a new junction with the A40. Access would be through narrow, often single lane, streets which are not suitable for through traffic. These narrow lanes would make Active Travel difficult. 14. Concerns re pollution from an increase in traffic from development. 15. Concerns that there is no infrastructure to support any development here, no extra jobs, schools, shops, medical facilities. 16. Concerns re drainage problems in the area and the increased risk of run-off water during heavy rainfall. 17. The 11 fields, which occupy the proposed Green Wedge, are of high quality land offering grazing to horses, cattle and sheep. 18. Better development options are available on the site east of the A465, and the railway station, and vacant buildings, and brownfield sites, within the town could be utilised. 	<ol style="list-style-type: none"> 9. SOUL, 10 Private Individuals 10. 2 Private Individual 11. Abergavenny Town Council 12. Abergavenny Town Council plus 2 Private Individual 13. Abergavenny Town Council plus 14 Private Individual 14. 1 Private Individual 15. 2 Private Individual 16. 1 Private Individual 17. 5 Private Individual 18. 3 Private Individual
--	---	--

<p>LPA Response</p>	<p>Comments noted. The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations.</p>
----------------------------	--

<p>Recommendation</p>	<p>The candidate site has also been assessed as part of the Green Wedge Assessment and consistent with its findings the site is designated as a Green Wedge in the RLDP.</p>
------------------------------	--

<p>Candidate Site: CSP004 Land north of Abergavenny</p>	<p>Responder:</p>
--	-------------------

	<ol style="list-style-type: none"> 1. General support for protection as a buffer to the National Park; to be retained as a Green Wedge. 2. Concerns were raised regarding the slope of the site, and its prominence in views from the east, and the lack of green infrastructure to help it blend into the landscape. 3. A responder states that the area is of high visual landscape importance, highly visible from popular tourist routes to the Sugarloaf. It provides the setting for the National Park, with iconic views towards the Sugarloaf Mountain and St Mary’s Vale as well as the setting for the Abergavenny Conservation Area. It also provides connectivity with the green infrastructure of the town, linking the National Park, Conservation Area designations and the town’s green spaces such as Bailey Park. 4. SOUL state that four of the eleven fields which constitute the site are registered as SINCS. Development of this site would have a negative effect on the Conservation Area which abuts it. 5. SOUL state that many of the lanes which surround or cross the site are single track providing excellent conditions for walking and exercise. 6. SOUL state that these lanes provide access to The Sugar Loaf, St Mary’s Vale and The Vineyard for serious walkers, visiting tourists and locals. 7. Traffic issues were raised with concerns that any development would increase traffic on Old Hereford Road which would further overload Pen y Pound and its junction with the A40. 8. Responders suggest that the slope of the site might render substantial Active Travel unlikely and would limit access to existing shops and of the town centre by foot, therefore, requiring a frequent bus service / increased use of the car. 	<ol style="list-style-type: none"> 1. Abergavenny Town Council, SOUL plus 1 Private Individual 2. Abergavenny Town Council plus 1 Private Individual 3. SOUL plus 1 Private Individual 4. SOUL 5. SOUL 6. SOUL 7. Abergavenny Town Council 8. Abergavenny Town Council 9. Abergavenny Town Council 10. Abergavenny Town Council
--	---	---

	<p>9. There is concern that allowing development at this site would set a precedent for other sites in the area.</p> <p>10. The woodland is an important element of the town's green infrastructure as an extension to the Deri woodlands and prominent from the east.</p>	
LPA Response	<p>Comments noted. The site has been assessed as part of the Green Wedge Assessment and consistent with its recommendations the northern slither of land, adjoining the BBNP boundary, has been designated as a Green Wedge due to its function in relation to the protection of Abergavenny's setting with the BBNP. However, the Green Wedge Assessment also concludes that the southern section of the site has a moderate buffer role and therefore a green wedge designation is not considered appropriate. Consistent with national guidance, which allows for green wedge and settlement boundaries to make provision for a sufficient range of development land which is suitably located in relation to the existing urban edge should be made available, having regard to the longer-term need for development land, the effects of development pressures in areas beyond the green wedge and the need to minimise demand for travel.</p>	
LPA Recommendation	<p>It is proposed to allocate the site for 100 dwellings with site specific policy requirements set out in Policy HA5 Land at Penlanlas Farm, Abergavenny.</p>	

Chepstow

Candidate Site: CSP017 Land at Bayfield, Chepstow

		Representor:
	<p>1. Support for the proposal to protect this site - the site should be protected to maintain the open field, rolling landscape which creates a visual distinction between town and the recognised AONB and ancient woodland.</p> <p>2. Concerns that development on land abutting an AONB could set a precedent for building on other sites like this and destroy what makes Monmouthshire so special.</p>	<p>1. 1 Private Individual</p> <p>2. 1 Private Individual</p>
LPA Response	<p>Comments noted. The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. A site-specific protection designation is therefore not considered necessary in addition to the policy protection proposed in the Plan.</p>	
LPA Recommendation	<p>This site will not be allocated in the Deposit RLDP.</p>

Candidate Site Assessment Report

1. Introduction

- 1.1. The purpose of this report is to outline the findings of the Candidate Site Assessment process for the consideration of land for development and protection in the Replacement Local Development Plan (RLDP). It provides an overview of the candidate site assessment process from the Second Call for Candidate Sites to the proposed Deposit Plan allocations.

2. Call for Candidate Sites

- 2.1. As part of the RLDP preparation process, the Council invited landowners, developers and the public to put forward 'Candidate Sites' to be considered for development, redevelopment or protection in the Monmouthshire RLDP. This was undertaken via a two-stage Call for Candidate Sites in accordance with the South East Wales Strategic Planning Group (SEWSPG) methodology.
- 2.2. **An Initial Call for Candidate Sites** was undertaken over a 16-week period from the 30th July 2018 to 19th November 2018. The purpose of inviting Candidate Site submissions at this stage was to assist the Council in understanding what land was available to inform the RLDP Preferred Strategy. A total of 204 Candidate Sites were submitted for development/redevelopment for a range of uses including residential, employment and recreation uses. A total of 16 sites were also submitted for protection.
- 2.3. The **Second Call for Candidate Sites** took place for an 8-week period from the 5th July 2021 to 31st August 2021. The purpose of the Second Call for Candidate Sites was to invite the submission of new sites for potential inclusion in the RLDP that accord with the Preferred Strategy (together with supporting information), and to seek the submission of additional supporting information for existing Candidate Site submitted during the Initial Call. A total of 159 Candidate Sites were submitted for a range of uses including residential, employment, and recreation uses. A combined total of 20 Candidate Sites were submitted for protection, this includes sites carried forward from the Initial Call for Sites. Sites that were not resubmitted following the Initial Call for Candidate Sites no longer formed part of the Candidate Site process and are listed in Appendix 1.
- 2.4. A further candidate site was submitted as part of the **Preferred Strategy** consultation that took place between 5th December 2022 and 30th January 2023.

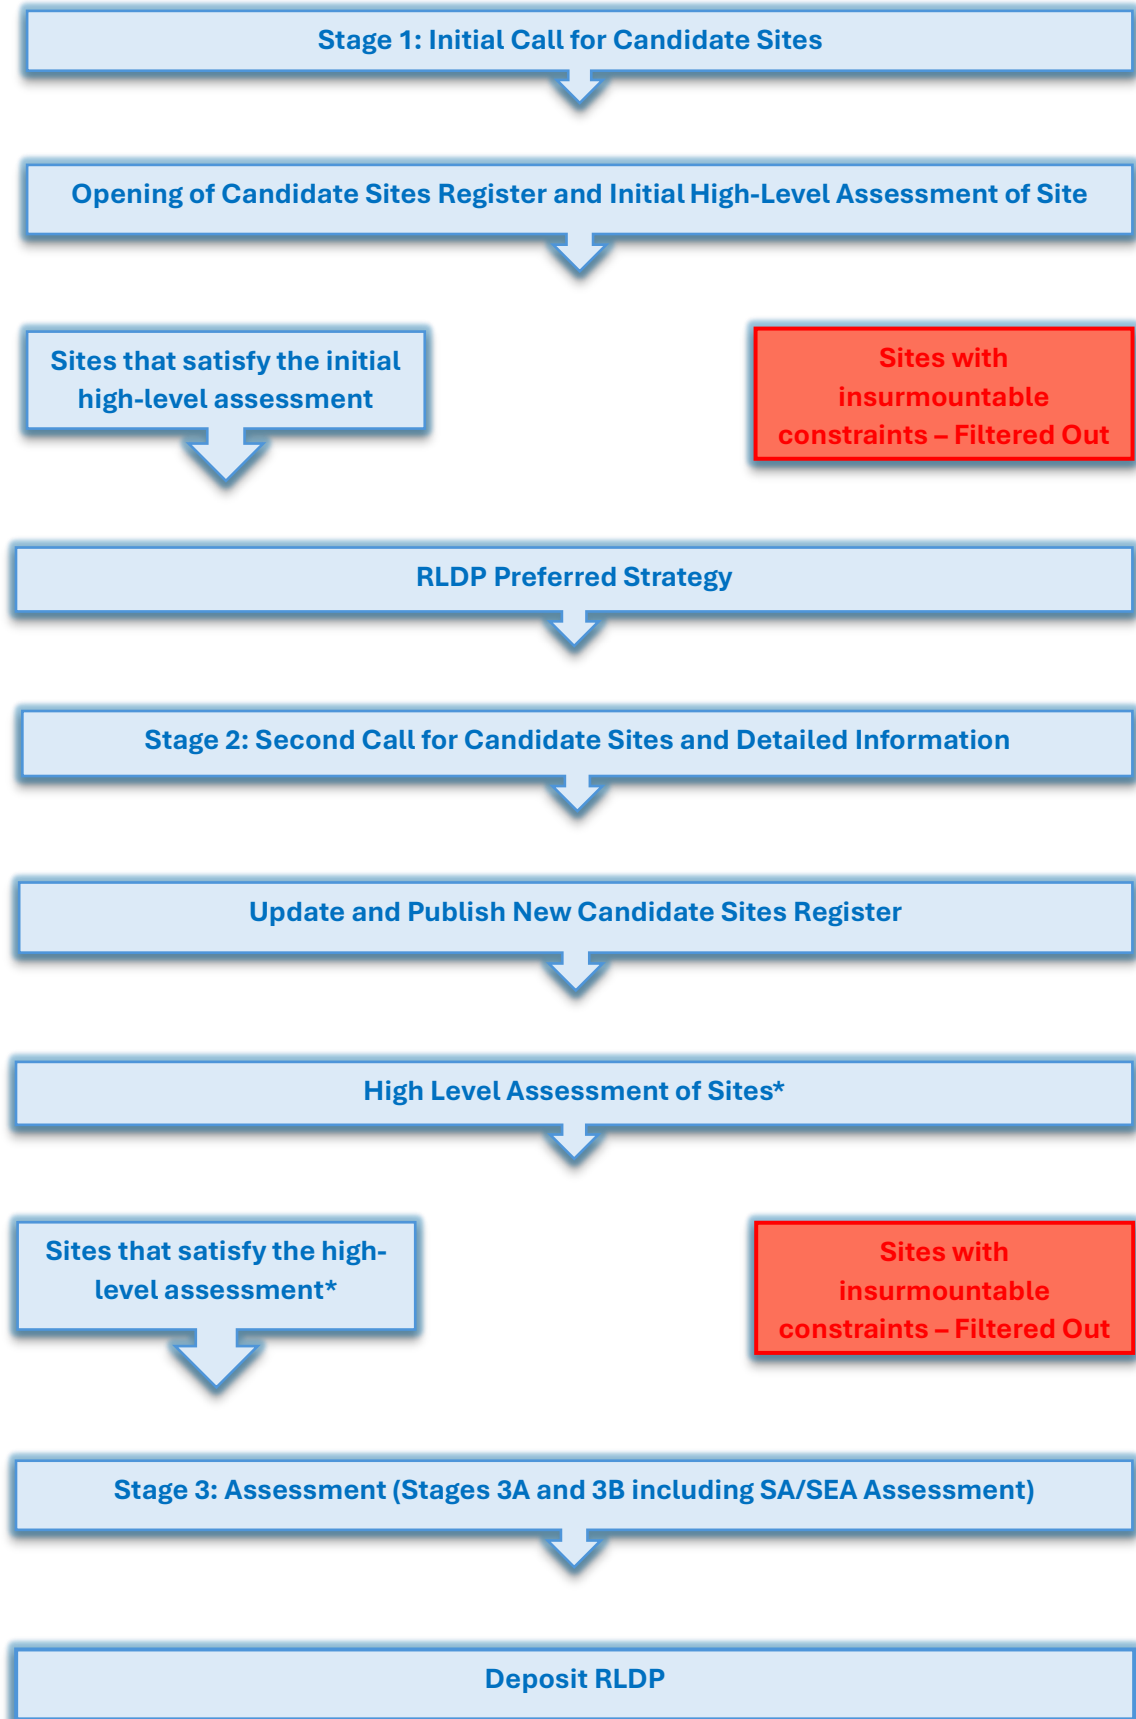

3. Candidate Site Register

- 3.1. All sites submitted at the Second Call for Candidate Sites and Preferred Strategy Consultation stages have been published in a Candidate Site Register. Consultation on the Candidate Site Register ran alongside the Preferred Strategy consultation between 5th December 2022 and 30th January 2023.

4. Candidate Site Assessment

4.1. An overview of the Candidate Site Process is set out in Figure 1 below. Full details of each stage are set out in the Candidate Sites Assessment Methodology Background Paper.

Figure 1: Overview of the Candidate Sites Process (adapted from SEWSPG methodology)

*Additional stage not contained in SEWSPG methodology.

5. Candidate Sites Assessment of Sites Submitted for Development

5.1. As noted above, sites that were not resubmitted at the Second Call for Candidate Sites did not progress in the process. Only sites submitted at the Second Call for Candidate Sites were subject to the high-level assessment associated with Stage 2. Those sites that progressed past Stage 2, were then subjected to Stages 3a and 3b including ISA/SEA assessment. A brief overview of the different stages is set out below with additional information available in the Candidate Site Assessment Methodology Background Paper.

Stage 2 – High Level Assessment

5.2. Following the Second Call for Candidates Sites a high-level assessment was undertaken involving a desk-based assessment of all submitted sites, identifying and discarding sites that did not meet the following initial filtering assessment criteria:

- **Compatibility with the RLDP Preferred Strategy**
- **Site size**
- **Fundamental Constraints**
- **Submission of Site Viability Evidence**

5.3. Sites that did not meet any of the above criteria were filtered out and not considered further in the RLDP process and are identified in table 1 with a ✘ under the Stage 2 column.

Stage 3 – Detailed Assessment

5.4. Stage 3 of the Candidate Sites Assessment involved two stages:

- Stage 3A: officer level detailed assessment using a ‘traffic light’ coding system, incorporation of comments from internal departments of the Council and an assessment against the Council’s ISA/SEA Framework.
- Stage 3B: external consultation with statutory agencies including Dwr Cymru Welsh Water and Natural Resources Wales (NRW).

5.5. Following the completion of Stages 3A and 3B, some sites were not considered suitable as a potential allocation in the RLDP and were sifted out of the process and given no further consideration in the assessment. Examples include where a statutory agency identified a fundamental constraint that could not be overcome. These sites are identified in Table 1 with a ✘ in the column titled ‘Site Progressed past Stage 3A/3B’.

6. Sites Not Assessed at Stage 3

6.1. While undertaking Stage 3 of the assessment process, it became apparent that some candidate sites would be better assessed via a different process or did not require a detailed assessment as a result of the emerging Deposit Plan policy framework facilitating consideration of the sites via the planning application process. These involved the following:

6.2. **Small scale candidate sites:** the Stage 2 methodology notes that sites of less than 5 units would be considered via the settlement boundary review. However, following

further analysis during stage 3, additional sites of greater than 5 units but small scale in nature were also considered to be too small for allocation and more appropriately considered as part of the settlement boundary review.

- 6.3. **Tourism Candidate Sites:** While internal and external consultee comments were obtained on these sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It was therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.

7. Candidate Sites Submitted for Protection

- 7.1. Sites for a range of protection policy options were also submitted as part of the Call for Candidate Sites. These were considered to be most appropriately assessed via other mechanisms forming part of the RLDP evidence base. These included:
- 7.2. **Green Wedges:** A number of protection candidate sites were submitted seeking protection as a buffer to the BBNP. These sites have been considered as part of the Green Wedge Assessment undertaken to inform the RLDP.
- 7.3. **Areas of Amenity Importance:** Sites put forward as potential amenity areas have been considered as part of the review of Areas of Amenity Importance for the RLDP.
- 7.4. **Natural Flood Management/Retrofit of Sustainable Drainage Measures:** These sites were forwarded to the Council's Flood Risk Management Team for consideration. However, natural flood management proposals such as additional tree planting or sustainable drainage measures to enhance the site's flood management role can be considered outside of the RLDP or within its policy framework where planning permission is required, and therefore do not require a specific allocation in the Plan.
- 7.5. **Protection from Development:** A number of sites were put forward for to be protected from development. In all cases these are located outside of the settlement boundary and are therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. A site-specific protection designation is therefore not considered necessary in addition to the policy protection proposed in the RLDP.

8. Integrated Sustainability Appraisal (ISA)

- 8.1. As noted above, Stage 3 of the Candidate Site assessment process integrates a sustainability assessment into the site selection process, based on the sustainability objectives/themes developed for the RLDP ISA. In this context, a sustainability appraisal of all candidate sites progressing past Stage 2 has been undertaken. In line with the Development Plans Manual, separate, more spatially specific and quantitative criteria have been developed to assess candidate sites through the ISA, which builds on the ISA Framework developed at the scoping stage. The methodology for the ISA of candidate sites involves employing GIS data-sets and measuring (quantitative analysis) of how each candidate site relates to various constraints and opportunity features. Specifically, the aim is to differentiate the performance of the candidate sites in respect of specific locational (e.g. distance to different types of services) / locational (e.g. intersect with flood risk zone) criteria. The ISA methodology allows for the consistent and transparent assessment of candidate sites. Further details on the

sustainability assessment of the candidate sites can be found in the Integrated Sustainability Assessment Report.

9. Sites Taken Forward as Deposit Allocations

- 9.1. Following the completion of the above stages, a list of sites has been identified for inclusion in the Deposit Plan for a range of uses including residential and employment. These are identified in Table 1 and are included within the Deposit Plan. Once identified as potential allocations, consultations and dialogue with external and internal stakeholders, as well as site promoters, has continued and has formed the basis for the site allocation policies contained within the Deposit Plan. This dialogue will be ongoing throughout the Plan process.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Primary Settlements: Abergavenny							
Abergavenny (Cantref)	CS0056	Land south Brecon Road	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape impact concerns have also been raised in relation to the site's allocation. In addition, the site is identified as a Green Wedge as part of the Green Wedge Assessment which has been undertaken to support the RLDP. Therefore, this site will not be allocated in the RLDP.
Abergavenny (Llanfoist Fawr)	CS0089	Land adjacent to Beech Grove	Residential	✗			Viability Assessment not submitted to support proposal. The site was therefore not assessed as part of Stage 3A/3B and has not progressed further in the candidate site assessment process.
Abergavenny (Mardy)	CS0094	Land at Penlanlas Farm	Residential	✓	✓	✓	Overall, the site performs well against the assessment methodology with no fundamental constraints identified. The site also benefits from good access to a range of services including schools and open space. A significant proportion of the site is also identified as being non-BMV land (63%), which performs well in a Monmouthshire context. The site also meets key policy requirements including 50% affordable housing and net zero carbon homes demonstrating its viability and deliverability. It is therefore proposed to allocate the site for 100 dwellings.
Abergavenny (Mardy)	CS0108	Land north of Hillgrove Avenue	Residential	✓	✗		Site is not progressing as the highway authority has raised significant concerns in relation to achieving suitable access arrangements. Landscape impact concerns have also been raised reflecting the lack of supporting information with the submission and the likely significant adverse visual impact on the Landscape Character Area. Overall, there are considered to be more suitable sites available in Abergavenny and therefore the site will not be allocated in the RLDP.
Abergavenny (Cantref)	CS0128	Land at Chapel Farm	Residential	✓	✗		Site not progressing as there are unresolved concerns regarding highways and access arrangements including flood risk to the south of the site onto Pentre Road and the suitability of the alternative access onto Pentre Lane. The whole site is also Grade 2 BMV agricultural land and there are more suitable alternatives site with lower grade agricultural land in Abergavenny. In

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							addition, the site is identified as a Green Wedge following the Green Wedge Assessment. Overall, there are considered to be more suitable sites available in Abergavenny and therefore the site will not be allocated in the RLDP.
Abergavenny (Lansdown)	CS0161	Land north of Hillside	Residential	✓	✗		Site not progressing due to concerns raised by CADW in relation to the western part of candidate site being inside the boundaries of The Hill registered historic park and garden, with the rest of the area being an essential part of its setting. Concerns have also been raised in relation to the ecological impact development would have. In addition, the site is identified as a Green Wedge following the Green Wedge Assessment. Overall, it is considered that the desired levels of growth can be accommodated on less sensitive sites within the area. Therefore, this site will not be allocated in the RLDP.
Abergavenny (Grofield)	CS0164	Land adjacent to Red Barn Farm (RBF1)	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. The site is also wholly grade 2 BMV agricultural land and there are more suitable alternatives site with lower grade agricultural land in Abergavenny. Concerns have also been raised in relation to the impact on the setting of the listed building. Therefore, the site will not be allocated in the RLDP.
Abergavenny (Mardy)	CS0174	Nantgavenny Lane	Residential	✗			Viability Assessment not submitted to support proposal. The site was therefore not assessed as part of Stage 3A/3B and has not progressed further in the candidate site assessment process.
Abergavenny (Grofield)	CS0178	The Abergavenny Workhouse (excluding residential)	Mixed Use: Retail/Professional services/Food outlets (A1/A2/A3), Employment (B1/B2/B8), Health/leisure (D1/D2) and Sui Generis	✓	✗		Site not progressing as while it performs well against the site search sequence criteria, insufficient information has been submitted to undertake a full assessment. Therefore, the site will not be allocated in the RLDP. However, given the site's location within the settlement boundary proposals can be pursued via the planning application system, subject to detailed planning policies.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Abergavenny (Mardy)	CS0185	Land to the west of Glebe Cottage,	Residential	✓	✗		Site not progressing via the RLDP process as insufficient information has been submitted in relation to the candidate site submission. Therefore, the site will not be allocated in the RLDP. It is noted however, that planning application DM/2018/00834 for a rural exceptions site for 12 affordable dwellings is pending consideration following the Welsh Government decision to not call in the application for determination by the Welsh Ministers.
Abergavenny (Lansdown)	CS0192	Land off Old Hereford Road	Residential	✓	✓	✗	The site is not allocated as there is sufficient and more suitable land available for residential development within Abergavenny to accommodate its housing need.
Abergavenny (Llanover)	CS0213	Land east of A465	Mixed Use: Residential (C3), Employment (B1), Retail (A1), Leisure, Education and Community Use (D1 and D2)	✓	✓	✓	It is proposed to allocate the site as Strategic Allocation. The allocation is a sustainably located edge of settlement site, located on the eastern edge of Abergavenny, that provides the longer-term intention for further growth beyond the Plan period. The site performs well against the site search sequence, with no significant constraints identified on site. The integration of the site with the existing settlement is a key principle with connection links forming a key policy requirement of the site's allocation. The site also meets key policy requirements including 50% affordable housing and net zero carbon homes demonstrating its viability and deliverability.
Abergavenny (Croesonen)	CS0220	Land at Ross Road	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to viability to demonstrate the site is deliverable in accordance with key policy requirements. Significant concerns have also been raised in relation to highway and pedestrian access to the site and ecological impact given the SSSI and SINC designations relating to the site. Therefore, the site will not be allocated in the RLDP.
Abergavenny (Llanfoist Fawr)	CS0247	Coopers III (Land east of James Jones Close)	Residential	✓	✓	✗	The site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Abergavenny including Llanfoist to accommodate its housing need.
Abergavenny (Llanfoist Fawr)	CS0248	Land adjacent to Llanfoist Fawr	Residential	✓	✗		Site not progressing as fundamental highways concerns have been raised as there is no adopted highway access available. Concerns have also been raised in relation to landscape and ecological

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
		Primary School (Whole Site)					impact. Overall, there are other sites in Abergavenny that are considered to be more suitable. Therefore, this site will not be allocated in the RLDP.
Abergavenny (Grofield)	CS0249	Land at Red Barn Farm (RBF2)	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to viability to demonstrate the site is deliverable in accordance with key policy requirements. There are also landscape impact concerns associated with development of the site. Delivery of this site is dependent on the allocation of CS0164 – Red Barn Farm (1), which has been deemed unsuitable for allocation. Therefore, the site will not be allocated in the RLDP.
Abergavenny (Llanfoist Fawr)	CS0250	Land at Evesham Nurseries	Residential	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Abergavenny including Llanfoist to accommodate its housing need.
Abergavenny (Llanover)	CS0262	Dobsons Farm	Employment (B1/B8)	✗			Site considered to be too divorced from the settlement and as a consequence would result in development in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Abergavenny (Llanfoist Fawr)	CS0263	Land adjacent to Llanfoist Fawr Primary School	Residential	✓	✗		Site not progressing as fundamental highways concerns have been raised as there is no adopted highway access available. Concerns have also been raised in relation to landscape and ecological impact. Overall, there are other sites that are considered to be more suitable in Abergavenny. Therefore, this site will not be allocated in the RLDP.
Abergavenny (Mardy)	CS0264	Land north of St Teilos	Residential	✓	✗		Site not progressing as significant concerns raised in relation to the heritage and ecological impact of developing the site. The central section of the site is also within a flood risk area. Therefore, the site will not be allocated in the RLDP.
Abergavenny (Mardy)	CS0265	Tredillion Park	Tourism/Leisure	✓	✗		While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							appropriate/necessary to identify site specific tourism related allocations in the RLDP.
Abergavenny (Mardy)	CS0266	Land at Nantgavenny Business Park	Employment (B1/B2)	✓	✓	✓	The site forms a logical extension to the adjoining business park and would provide much needed employment land in Abergavenny. It is therefore proposed to allocate the site for B1/B2 employment use.
Abergavenny (Llanfoist Fawr)	CS0267	Waterloo Court	Residential	✓	✗		The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.
Abergavenny (Grofield)	CS0268	Westgate Gardens	Residential	✓	✗		The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.
Abergavenny (Llanfoist Fawr)	CS0269	Land at Grove Farm	Residential Care (C2)	✓	✗		Site not progressing as significant concerns have been raised in relation to highway and pedestrian access to the site and ecological and heritage impact. Therefore, the site will not be allocated in the RLDP.
Abergavenny (Llanfoist Fawr)	CS0284	Pen-Y-Worlod Stables	Residential	✓	✗		Site not progressing as it does not provide a natural and logical extension to the settlement and does not relate physically, functionally or visually to the existing settlement pattern. Given the small numbers proposed, the site would result in a pocket development detached from the main settlement of Llanfoist. Furthermore, insufficient information has been submitted in order to conduct a full assessment of the site in relation ecology and highways. Therefore, the site will not be allocated in the RLDP.
Abergavenny (Grofield)	CS0286	The Abergavenny Workhouse (including residential)	Mixed use: Retail/Professional services/Food outlets (A1/A2/A3), Employment (B1/B2/B8), Health/leisure (D1/D2), Sui Generis and Residential (C3)	✓	✗		Site not progressing as while it performs well against the site search sequence criteria, insufficient information has been submitted to undertake a full assessment. Therefore, the site will not be allocated in the RLDP. However, given the site's location within the settlement boundary proposals can be pursued via the planning application system, subject to the detailed planning policies.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Abergavenny (Llanover)	CS0293	Land east of A465 2	Mixed Use: Residential (C3), Employment (B1/B8), Retail/Commercial (A1/A3), Leisure, education and community use (D1/D2)	✓	✗	✗ (limited area allocated for placemaking purposes)	A small section of the Candidate Site at the northern end is allocated for placemaking purposes alongside CS0213 to form the strategic site allocation on land to the east of Abergavenny. Insufficient information has been submitted in relation to the wider site to undertake a full assessment and demonstrate deliverability in accordance with key policy requirements.
Primary Settlements: Chepstow							
Chepstow (Shirenewton)	CS0029	Barnetts Farm	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. This site is also considered to be of small scale and would have limited impact on achieving the required quantum of development in this area. Overall, there are considered to be more be more suitable sites available in Chepstow and therefore, this site will not be allocated in the RLDP.
Chepstow (St Arvans)	CS0054	Land west of Racecourse Roundabout	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating viability and deliverability in accordance with key policy requirements. Inclusion of the site of this scale would also have a negative impact on ecology due to loss of a locally protected SINC and nationally important Priority Habitats. Therefore, the site will not be allocated in the RLDP.
Chepstow (St Kingsmark/ Shirenewton)	CS0098	Land at Bayfield	Residential	✓	✓	✗	In October 2023 a report of post consultation Preferred Strategy changes was agreed by Council. This included amending the strategic site in Chepstow from Bayfield to Land at Mounton Road. On balance, it is considered that the benefits of the commercial development and associated job creation at the Mounton Road site outweighed the loss of higher quality agricultural land and encroachment into the existing green wedge separating Chepstow and Pwllmeyric, given the absence of alternative commercial sites and the importance of Chepstow for tourism as the gateway to the Wye Valley. It is considered that sufficient separation between Chepstow and Pwllmeyric would remain to prevent coalescence of the settlements. As such, it is considered that there is sufficient

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							and more suitable land available for residential development within the town to accommodate its housing need. Therefore, the site will not be allocated in the RLDP.
Chepstow (Shirenewton)	CS0112	Land at St Lawrence Lane	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating the viability and deliverability of the site. The site is within a Green Wedge and would also have negative ecology impact due to the ancient woodland priority habitat within the site. Therefore, the site will not be allocated in the RLDP.
Chepstow (Thornwell)	CS0154	Land to the north of M48	Hotel (C1)	✓	✗		While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.
Chepstow (St Kingsmark)	CS0165	Land at Mounton Road	Mixed Use: Residential (C3), Residential Care (C2), Hotel (D1)	✓	✓	✓	It is proposed to allocate the site as a Strategic Allocation in the Deposit Plan. The allocation is a sustainably located edge of settlement site that performs well against the site search sequence, with no significant constraints identified on site. The integration of the site with the existing settlement is a key principle with connection links forming a key policy requirement of the site's allocation. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. The mixed-use development proposal, which includes a care home and hotel, is considered to have associated job creation and tourism benefits, with opportunities to work and live together and promote accessibility and connectivity to the existing settlement.
Chepstow (Thornwell)	CS0260	Land south of Junction 2 M48 (Option 1: Hotel and Employment)	Mixed Use: Hotel (C1), Employment (B1/B2/B8)	✓	✓	✗	A separate Candidate Site submission for Mixed Use: Petrol Station (Sui Generis), Drive Thru (A1/A3) and Employment (B1/B2/B8) has been submitted please see CS0261 for further details.
Chepstow (Thornwell)	CS0261	Land south of Junction 2 M48	Mixed Use: Petrol Station (Sui Generis),	✓	✓	✓	Site to progress to Deposit Plan as an employment site allocation. The Site has recently gained planning permission

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
		(Option 2: Petrol Station, Drive Thru and Employment)	Drive Thru (A1/A3), Employment (B1/B2/B8)				(DM/2022/01155) for the non-B use suis generis use of a Petrol Station and Drive Thru facility. Overall, the remaining employment land at the site provides an opportunity for B use employment land within an already established and protected industrial site.
Primary Settlements: Monmouth							
Monmouth (Dixton with Osbaston)	CS0006	Land at Osbaston Road	Healthcare Centre (D1)	✓	✗		While internal and external consultee comments were obtained on this Candidate Site submission, it relates to a use more appropriately considered through the policy approach to community and recreation facilities adjoining identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific community facility related allocations in the RLDP.
Monmouth (Drybridge)	CS0044	Land off Chartist Rise	Commercial (Class A/B1)	✗			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Monmouth (Drybridge)	CS0045	Land off Cornpoppy Avenue	Commercial (Class A/B1)	✗			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Monmouth (Drybridge)	CS0051	Land at Croft y Bwla Farm	Residential and Employment	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape impact and highway concerns have also been raised in relation to the site's allocation given the large scale of the site. Overall, there are considered to be more suitable sites available in Monmouth and therefore, this site will not be allocated in the RLDP.
Monmouth (Dixton with Osbaston)	CS0074	Land rear of The Royal Oak	Residential	✓	✗		The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.
Monmouth (Drybridge)	CS0076	Land west of Rockfield Road	Residential	✓	✓	✓	Part of this Candidate Site submission has extant planning permission for 70 dwellings. The remainder of the site sits neatly

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							within a gap between the permitted site to the east, residential development to the south and west and consequently has limited landscape impact. While the site is Best and Most Versatile agricultural Land, the principle of development in this location has been established through the permission of the adjacent site. The site benefits from good access to a range of services including a primary school, open space and neighbourhood centre. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 60 homes.
Monmouth (Drybridge)	CS0078	Land adjacent to Croft y Bwla Farm	Residential	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.
Monmouth (Drybridge)	CS0099	Land at Drybridge Farm	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape impact and heritage concerns have also been raised in relation to the site's allocation. Therefore, this site will not be allocated in the RLDP.
Monmouth (Wyesham)	CS0131	Land off Justins Hill	Residential	✗			Viability Assessment not submitted to support proposal. The site was therefore not assessed as part of Stage 3A/3B and has not progressed further in the candidate site assessment process.
Monmouth (Drybridge)	CS0136	Land at former Poultry Units at Rockfield Road	Mixed Use: Residential(C3)/B1 and D1	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability for residential uses in accordance with key policy requirements. The whole site is located in flood zone which would not be suitable for highly vulnerable development. Therefore, this site will not be allocated in the RLDP for mixed-use residential and employment use. A separate Candidate Site submission for employment use has been submitted – please see CS0272 for details.
Monmouth (Overmonnow)	CS0151	Former Troy Rail Yard	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Approximately a third of the site is located in flood zone which would not be suitable for

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							highly vulnerable development. Therefore, this site will not be allocated in the RLDP.
Monmouth (Wyesham)	CS0189	Land at Tudor Road	Residential	✓	✓	✓	This site was allocated in the Adopted LDP, however, phosphates prevented its development in coming forward. In view of DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025, a planning application has been submitted and is currently being considered. The site performs well against the site search sequence, with excellent links to a primary school, local shop/post office and open space. A significant proportion of the site is also identified as being non-BMV land (65%), which performs well in a Monmouthshire context. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 50 homes.
Monmouth (Dixton with Osbaston)	CS0216	Land at Hereford Road	Residential	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.
Monmouth (Dixton with Osbaston)	CS0270	Leasbrook (Land north of Dixton Road)	Residential	✓	✓	✓	It is proposed to allocate the site as a Strategic Allocation for approximately 270 homes. The allocation is a sustainably located edge of settlement site, north of Dixton Road. The site performs well against the site search sequence, with excellent links to the comprehensive school, facilities in the town centre and surrounding infrastructure. The site offers the opportunity to create an exemplar residential and GI-led development in a gateway location on the entrance to Monmouth. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.
Monmouth (Drybridge)	CS0271	Land at Vauxhall Fields	Mixed Use: Residential (C3), Residential Care (C2), Community Hub (A1/A3/D1)	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Monmouth (Drybridge)	CS0272	Land at former Poultry Units at Rockfield Road	Employment (B1 new build)	✓	✓	✓	While located in floodplain, this relates to a brownfield site with extant planning permission for B1 employment use, the proposed use would reflect the planning permission and therefore would not be contrary to TAN15. This site is therefore proposed to be allocated for B1 use in Policy EA1.
Monmouth (Wyesham)	CS0273	Rhossili, Hadnock Road	Residential	✓	✗		Site not progressing as significant concerns have been raised in relation to highway capacity and safety, along with ecological impact. Therefore, the site will not be allocated in the RLDP.
Monmouth (Drybridge)	CS0274	Land north of Wonastow Road	Mixed Use: Residential (C3), Employment (B1/B2/B8) and Community Use	✓	✓	✓ (part of the site for B1/B2/B8 only)	Site is not allocated for a mixed use residential and employment site as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need. Part of the site is, however, considered appropriate for B1/B2/B8 employment uses as it forms a logical extension to adjoining employment uses and would provide much needed employment land in Monmouth. Part of CS0274 is therefore proposed to be allocated as a B1, B2 and B8 site in Policy EA1.
Monmouth (Drybridge)	CS0275	Land off Wonastow Road Industrial Estate	Employment (B1/B2/B8)	✓	✗		While located within defended flood zone, the site is greenfield and the proposal is therefore contrary to provisions set out in the latest National Planning Policy in relation to Flooding. Therefore, the site will not be allocated in the RLDP.
Monmouth (Dixton with Osbaston)	CS0276	Land at Dixton Roundabout	Retail	✗			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Monmouth (Drybridge)	CS0277	Land at Drewen Farm	Residential	✓	✓	✓	This site was allocated in the Adopted LDP, however, phosphates prevented its development in coming forward. In view of DCWW's planned improvements at the Monmouth Wastewater Treatment Works by 31st March 2025 the site can now be progressed. The site performs well against the site search sequence, with good links to a primary school, neighbourhood centre, employment uses and open space. It is therefore proposed to allocate the site for approximately 110 homes.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Monmouth (Drybridge)	CS0287	Land off Chartist Rise	Residential	✘			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Monmouth (Drybridge)	CS0288	Land off Cornpoppy Avenue	Residential	✘			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Monmouth (Dixton with Osbaston)	CS0289	Land at Dixton Roundabout	Employment	✘			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Monmouth (Dixton with Osbaston)	CS0290	Land at Dixton Roundabout	Roadside facilities	✘			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Monmouth (Wyesham)	CS0292	Rhossili, Hadnock Road	Employment and Hotel	✓	✘		Site not progressing as significant concerns have been raised in relation to highway capacity and safety, along with ecological impact. Therefore, the site will not be allocated in the RLDP.

Primary Settlements: Severnside - Caerwent

Caerwent	CS0009	Land at Former MoD Training Centre	Mixed Use: Residential (C3), Care (C2), Employment (B1), Community Use (D1)	✓	✓	✓	It is proposed to allocate the site as mixed-use residential and employment (B1) allocation in the Deposit Plan. The allocation is a sustainably located edge of settlement site, which is previously developed land that performs well against the site search sequence, with no significant constraints identified on site that would prohibit its development. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. The mixed-use development proposal which is allocated for 40 residential units and a minimum of 1ha of B1 employment land is considered to have associated job creation with opportunities to work and live together and promote accessibility and connectivity to the existing settlement of Caerwent and the wider Severnside Region. The site is not allocated for C2 (care home) /community
----------	--------	------------------------------------	---	---	---	---	--

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							use (D1) as the need for these uses was not evidenced in this location.
Caerwent	CS0071	Land at Slough Farm	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Ecology concerns have also been identified. Therefore, the site will not be allocated in the RLDP.
Primary Settlements: Severnside - Caldicot							
Caldicot (Severn)	CS0002	Land at the sewage works	Employment (B Use Classes)	✗			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Caldicot (Severn)	CS0007	Land adjacent to Pill Row	Employment (B1, B2 and B8)	✗			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Caldicot (Caldicot Castle)	CS0067	Land east and west of Church Road	Residential	✓	✓	✗	The site is considered to be of small scale and would have limited impact on achieving the required quantum of development in this area. Site is not allocated as there is sufficient and more suitable land available for residential development within the Severnside area to accommodate its housing need.
Caldicot (Caldicot Castle/Portskewett)	CS0087	The Showground	Residential	✓	✓	✓	It is proposed to allocate the site as part of a wider Strategic Allocation for approximately 770 homes. The allocation is a sustainably located edge of settlement site and will extend the settlement of Caldicot to the north-east, adjacent to the Crick Road, Portskewett site. The site performs well against the site search sequence, with good links to a shop, open space and employment uses with facilities in the town centre just over a 20 minute walk. These links will be strengthened via active travel links throughout the site. While the site has good links to a nearby primary school, a new primary school will be provided on the site to assist with capacity issues in the area and provide benefits to the wider community. The site is partly a brownfield site as it includes an existing commercial equestrian centre that is

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							relocating elsewhere. While the site is located in close proximity to heritage designations, no significant constraints are identified on the site. The site is also in close proximity to a SSSI. No built development will take place on these sensitive areas, with the area to the west of the former railway to be designated as an Area of Amenity Importance to provide additional protection. The site offers the opportunity to create an exemplar residential-led mixed-use development. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.
Caldicot (Caerwent)	CS0129	Dewstow Village, Former Dewstow Golf Course	Residential	✓	✗		This site is considered too divorced from the settlement of Caldicot, as it is physically separated by the M48. Concerns have also been raised in relation to highways and landscape impact. There are considered to be more suitable sites available in this area and, therefore, the site will not be allocated in the RLDP.
Caldicot (West End/Rogiet)	CS0133	Land at Garthalan Drive	Employment (B Use Classes/Sui Generis)	✗			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Primary Settlements: Severnside - Crick							
Crick (Caerwent)	CS0091	Caerwent Depot	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability for residential uses in accordance with key policy requirements. Furthermore, the site is unable to connect to the public sewerage system and is located within a groundwater Source Protection Zone. As such, development in this location would as a consequence result in an unacceptable impact on the water environment. Therefore, the site will not be allocated in the RLDP.
Crick (Portskewett)	CS0251	Land at Bradbury Farm	Mixed Use: Residential (C3), Employment (B1/B2/B8), Retail (A1), Leisure (D1/Sui Generis)	✓	✓	✓ (site has been	It is proposed to allocate part of the site as part of a wider Strategic Allocation for approximately 770 homes. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability.</p> <p>6ha of the northern part of the originally submitted Candidate Site has been included as a separate B1, B2, B8 allocated employment site namely EA1e Land adjoining Oak Grove Farm, Caldicot.</p> <p>A gypsy and traveller site is included within the red line boundary of the originally submitted Candidate Site and has been assessed as part of a different process.</p>	
	Primary Settlements: Severnside – Magor with Undy							
	Magor (Mill)	CS0038	Land to the west of Wales One Business Park	Commercial (B1/B2/B8 uses)	✓	✓	✗	This site has now been constructed under planning application DM/2022/00634. The site is therefore allocated as a protected employment site under Policy (EA2S).
	Magor (Mill)	CS0206	Land south of Newport Road	Residential and Residential Care Facility (C2)	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within Severnside to accommodate its housing need.
Undy (The Elms)	CS0211	Land at Rockfield Farm	Residential	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within Severnside to accommodate its housing need.	

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Magor (Mill)	CS0227	Land at Bareland Street	Employment (B1/B8)	✘			Site not progressing as it is located within the Gwent Levels SSSI and there is no previous planning consent associated with the site, therefore there is evidence it will not deliver employment opportunities. There is no justification to continue with the current LDP employment allocation.
Magor (Mill)	CS0228	Land off Green Moor Lane	Employment (B1/B2/B8)	✓	✓	✓	Site to be allocated as an employment site in the Deposit Plan. The site is part of the southern section of CS0258 (Quay Point). No fundamental development constraints have been identified as part of the assessment process. Its allocation will provide much needed employment land in the Severnside region.
Magor (Mill)	CS0252	Gwent Europark	Employment (B1/B2/B8)	✓	✓	✓	Site to be allocated as an employment site in the Deposit Plan. The site is identified as an employment site in the current adopted LDP and has there is a history of planning consents granted on the site. The immediately adjacent land which lies within Newport Council Local Planning Authority and which forms part of the planning permission is currently being developed. Given its strategic location and evidence the site will come forward it is being reallocated in the RLDP.
Usk (The Elms)	CS0257	Land at Former Tythe House	Residential	✘			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Magor (Mill)	CS0258	Quay Point (Land south of Magor Brewery)	Employment (B2/B8)	✓	✓	✓	Site to be allocated as an employment site in the Deposit Plan. No fundamental development constraints have been identified as part of the assessment process. Its allocation will provide much needed employment land in the Severnside region.
Primary Settlements: Severnside – Rogiet							
Rogiet	CS0134	Land at Chestnut Grove	Residential	✘			Proposal is contrary to provisions set out in National Planning Policy in relation to Flooding. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Rogiet	CS0168	Land adjacent to Merlin Close	Residential	✓	✘		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							accordance with key policy requirements. A significant proportion of the site is located in flood zone which would not be suitable for highly vulnerable development. The is also site within a green wedge designation where there is a presumption against new built development. Therefore, the site will not be allocated in the RLDP.
Rogiet	CS0253	Ifton Manor (Site A)	Mixed Use: Residential (C3), Employment (B1/B2/B8)	✓	✗		Site not progressing as it is designated as a green wedge in the RLDP where there is a presumption against new built development. and due to the scale of the proposal there are significant landscape concerns the proposal would have impacted on the openness of the green wedge land. The site also comprises 100% BMV land (38% of which relates to Grade 1 BMV). Overall, there are considered to be more suitable alternative sites in the Severnside area and, therefore, the site is not allocated in the RLDP.
Rogiet	CS0254	Ifton Manor (Site B)	Open Space, Green Infrastructure, Active Travel Links, Drainage associated with proposed residential and employment to the north (Site A)	✓	✗		The site has been promoted in association with the proposed residential/mixed-use development associated with CS0253 Ifton Manor Site A which has not progressed for the reasons set out above in response to CS0253. It is therefore not appropriate to allocate this use and the site is not allocated in the RLDP.
Rogiet	CS0255	Land adjacent to Ifton Industrial Estate	Employment (B2/B8)	✓	✗		The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.
Rogiet	CS0256	The Paddocks, Land adjacent to Rogiet Road	Residential	✓	✗		The small-scale nature of the site does not justify an allocation in the Plan. Further consideration will be given to the site as part of the settlement boundary review.

Secondary Settlements: Penperlleni

Penperlleni (Goetre Fawr)	CS0037	Land South of Usk Road	Residential	✓	✓	✓	Overall, the site performs well against the assessment methodology with no fundamental constraints identified. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for
---------------------------	--------	------------------------	-------------	---	---	---	---

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							approximately 42 dwellings in Policy HA12 Land west of Trem yr Ysgol, Penperlleni.
Penperlleni (Goetre Fawr)	CS0138	Land at Goytre Farm	Residential	✓	✗		Site is not progressing to the Deposit Plan as there are landscape and ecological concerns particularly in relation to a significant proportion of the site being a designated Site of Importance for Nature Conservation (SINC). Overall, there are considered to be more suitable alternative sites in the area and, therefore, the site will not be allocated in the RLDP.
Penperlleni (Goetre Fawr)	CS0217	Land at Fairfield	Residential	✓	✗		Site is not progressing to the Deposit Plan as the site has a significant ecology constraint as the whole of the site is within a designated Site of Importance for Nature Conservation (SINC). Therefore, the site will not be allocated in the RLDP.
Penperlleni (Goetre Fawr)	CS0279	Land west of Usk Road	Residential	✓	✗		Site is not progressing to the Deposit Plan as there are significant landscape concerns in relation to developing west of the A4042 which would significantly change Penperlleni's settlement pattern and valued landscape. There are also concerns regarding connectivity to facilities in the settlement due to the location on the opposite side of the A4042. Overall, there are considered to be more suitable alternative sites in the area and, therefore, the site will not be allocated in the RLDP.
Penperlleni (Goetre Fawr)	CS0280	Land at Walnut Tree Farm	Residential	✓	✗		Site is not progressing to the Deposit Plan as the site has a significant highway constraint as it has not been able to demonstrate safe pedestrian access and connectivity from the site to the village centre of Penperlleni. Overall, there are considered to be more suitable alternative sites in the area and, therefore, the site will not be allocated in the RLDP.
Penperlleni (Goetre Fawr)	CS0291	Land east of Usk Road	Residential	✗			Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, the site will not be allocated in the RLDP.

Secondary Settlements: Raglan

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Raglan	CS0069	Land at Raglan Enterprise Park	Employment (B1) and Renewable Energy (Solar)	✓	✓	✓	<p>It proposed to allocate approximately 1.5ha of land adjoining the existing Protected Employment site as a new employment allocation, allowing for an extension to the existing Enterprise Park and supporting job growth in the Raglan and wider area. No fundamental constraints were identified as part of the assessment process. The allocation also provides an opportunity to develop an off-grid employment site linked to the proposed adjoining ground mounted solar array.</p> <p>It is also proposed to identify approximately 16ha of land to the west of the existing Raglan Enterprise Park as having potential for a ground mounted solar development, subject to detailed planning considerations. While the site is Grade 3a BMV land, it performs best in this respect when compared to the other solar related candidate site submissions. Allocation of the site provides an opportunity to contribute to local and national renewable energy targets.</p>
Raglan	CS0183	Land south of Monmouth Road	Residential	✓	✓	✓	<p>A reduced area to the candidate site submission is proposed for allocation in the RLDP. Overall, the site performs well against the site search sequence with good access to local amenities and no fundamental constraints have been identified. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 54 dwellings.</p>
Raglan	CS0205	Land at Usk Road	Residential	✓	✓	✗	<p>While a southern section of the site is within a flood risk area, development could be directed away from this part of the site. However, the site is not allocated as there is sufficient and more suitable land available for residential development within Raglan to accommodate its housing need.</p>
Raglan	CS0278	Land west of Raglan	Employment	✓	✓	✓	<p>A reduced area of approximately 4.5 ha (compared to the submitted 8ha) is proposed to be allocated for employment use in the RLDP, responding to site elevations and integrating the proposal more effectively into the landscape. No fundamental development constraints have been identified as part of the assessment process. Its allocation will provide much needed</p>

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							employment land in Raglan and the wider County reflecting Raglan's location and its access links to other settlements.
Raglan	CS0281	Raglan Country Estate	Tourism/Leisure/Commercial (A1/A3/C1/D1/D2/Sui Generis)	✓	✗		While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.
Secondary Settlements: Usk							
Usk	CS0039	Land at Little Castle Farm, Monmouth Road	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape and ecological concerns have also been raised particularly in relation to a significant proportion of the site being a designated Site of Importance for Nature Conservation (SINC) and due to the topography of the site and its elevated position it is likely to have a detrimental landscape impact. Overall, there are considered to be more suitable alternative sites in the area and, therefore, the site will not be allocated in the RLDP.
Usk (Llanbadoc)	CS0105	Land at Former Goods Yard	Residential	✓	✗		<p>Site not progressing as insufficient information has been submitted in relation to viability to demonstrate the site is deliverable in accordance with key policy requirements. The site, which is within the settlement boundary of Usk is previously developed land, a protected employment site in the current LDP that has been vacant for some time.</p> <p>The site is wholly within flood zones 2 and 3, however is within a TAN15 defended zone. National Policy set out in TAN15 does allow for brownfield sites in defended zones to be considered acceptable providing they can meet flood risk criteria set out in the policy. The costs of flood risk mitigation also has had an impact of the viability and deliverability of the site.</p>

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							There is also constraint in relation connection to public sewerage system, with the connection point at least 400m away from the site, again resulting in significant costs. A private sewerage treatment plant would not be appropriate for a development of this scale, particularly as the site is within a phosphate catchment zone of the River Usk Special Area of Conservation (SAC). Overall, it is not viable and deliverable to progress this site as an allocation. The site remains in the settlement boundary and as a consequence could progress for appropriate forms of development subject to detailed planning considerations.
Usk Page 1748	CS0113	Burrium Gate (Phase II)	Residential	✓	✓	✓	The site performs well against the assessment methodology with no fundamental constraints identified. A landscape concern has been raised but it is considered that this can be mitigated providing development is maintained within a ridgeline no more than 40m above Ordnance Datum (AOD). The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 40 dwellings.
Usk	CS0282	Land north of Burrium Gate	Residential	✓	✗		Site not progressing to the Deposit Plan as there are landscape and ecological concerns, particularly in relation to a significant proportion of the site being a designated Site of Importance for Nature Conservation (SINC), and due to the topography of the site and its elevated position. Overall, there are considered to be more suitable alternative sites in the area and, therefore, the site will not be allocated in the RLDP.
Usk (Llanbadoc)	CS0285	Glen Yr Afon	Residential	✗			Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, the site will not be allocated in the RLDP.
Main Rural Settlements							
Devauden	CS0036	Land west of the B4293 and north of Devauden	Residential	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within the primary settlement of Monmouth to accommodate its housing need.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Devauden	CS0214	Land at Churchfields	Residential	✓	✓	✓	The site performs well against the assessment methodology with no fundamental constraints identified. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 20 dwellings.
Devauden	CS0236	Coal Lane Valley View	Residential	✗			No supporting information was submitted to evidence the deliverability of the proposed scheme of 3 market houses and gifting of remaining land for affordable housing. As such, the site has not progressed further in the candidate site assessment process. This site has been considered as part of the settlement boundary review.
Little Mill (Goetre Fawr)	CS0016	Land to the east of Little Mill	Residential and Commercial Hub (B1/B8)	✓	✓	✓	A reduced area to the candidate site submission is proposed for allocation in the RLDP. Overall, the site performs well against the site search sequence. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 20 dwellings. The commercial element of the candidate site submission for B1/B8 uses is not considered appropriate in this location and given the site's reduced size. More appropriate sites for B1/B8 uses are identified elsewhere in the County.
Little Mill (Goetre Fawr)	CS0075	Land to the north of Little Mill (Site B)	Residential	✓	✓	✓	This is an existing Adopted LDP allocation (SAH11(v)) and is reallocated in the RLDP as a 'Rollover' Allocation. A resolution to approve planning application DM/2020/01438 for 15 residential units was made by Planning Committee on 16 th July 2024 and is awaiting the signing of the S106 Agreement. The site is therefore allocated in the RLDP.
Little Mill (Goetre Fawr)	CS0103	Land adjacent to Berthon Road	Residential	✓	✓	✗	The site is not allocated as there is sufficient and more suitable land available for residential development within Little Mill to accommodate its housing need.
Little Mill (Goetre Fawr)	CS0104	Land at Cae Melin	Residential	✓	✓	✗	The site is not allocated as there is sufficient and more suitable land available for residential development within Little Mill to accommodate its housing need.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Little Mill (Goetre Fawr)	CS0233	Mulberry House, Berthon Road	Residential	✓	✗		The small-scale nature of the site does not justify an allocation in the plan. Further consideration will be given to the site as part of the settlement boundary review.
Little Mill (Goetre Fawr)	CS0241	Land to the north of Little Mill (Site A)	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Llandogo (Trellech United)	CS0101	Land adjacent to Parklands	Residential	✓	✗		Site is located within the existing development boundary which is proposed to be retained in this location. Given the site's location within the settlement boundary proposals can be pursued via the planning application system, subject to detailed planning policies.
Llandogo (Trellech United)	CS0124	The Reckless	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Llandogo (Trellech United)	CS0230	Land south of A466	Residential and Amenity Land	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Llandogo (Trellech United)	CS0245	Land at Parklands	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Llanellen (Llanfoist Fawr)	CS0027	Land adjacent to Llanellen Court Farm (North)	Residential	✓	✓	✓	A reduced area of 1.56ha to the candidate site submission is proposed for allocation in the RLDP to provide a more appropriate scale of development in a village context and to reflect the settlement's position in the hierarchy. Overall, the site performs well against the site search sequence and no fundamental constraints have been identified. The site also meets key policy requirements including 50% affordable housing and net zero carbon homes demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 26 dwellings.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Llanellen (Llanfoist Fawr)	CS0028	Land adjacent to Llanellen Court Farm (South)	Residential	✘			Site is not considered compatible with the Preferred Strategy and is divorced from the settlement boundary. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Llanellen (Llanfoist Fawr)	CS0215	Land at Llanellen	Residential	✓	✘		Site not progressing as significant concerns have been raised in relation ecological impact. Therefore, the site will not be allocated in the RLDP.
Llanellen (Llanfoist Fawr)	CS0243	Land to the north of the Village Hall	Residential	✓	✘		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Llangybi (Llangybi Fawr)	CS0019	Land West of St. Cybi Drive	Residential	✓	✘		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Llangybi – (Llangybi Fawr)	CS0020	Land West of The Chase	Residential	✓	✘		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape concerns have also been identified. Therefore, this site will not be allocated in the RLDP.
Llangybi (Llangybi Fawr)	CS0242	Land north of New House	Residential	✓	✘		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Landscape concerns have also been identified and Cadw raised concerns in relation to the impact of any development upon the nearby listed building and registered historic park and garden. Therefore, this site will not be allocated in the RLDP.
Llanover	CS0139	Land at Former Petrol Station	Employment (B1) (including farm shop A1)	✓	✘		The site is not progressing as an allocation due to heritage concerns regarding the impact on the Llanover Conservation Area, nearby Listed Buildings and the Llanover Historic Park and Garden. Therefore, this site will not be allocated in the RLDP.
Llanover	CS0140	Land south of Rhyd-y-Meirch	Residential	✓	✘		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Llanvair Discoed (Caerwent)	CS0017	Land at Village Farm	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. The site also is not able to connect to the public sewerage system and is within a groundwater Source Protect Zone (SPZ), meaning that its development would result in an unacceptable impact on the water environment. Therefore, this site will not be allocated in the RLDP.
Mathern (Shirenewton)	CS0026	Land west of Baileys Hay	Residential	✓	✗		Site is not progressing as although the site meets key policy requirements including 50% affordable housing and net zero carbon homes, the proposed scale and size of the site is too large for a Main Rural Settlement. There are also concerns in relation to negative landscape impact associated with the proposed scale of the site within a wide open landscape, along with its close proximity to Mathern's Conservation Area. The site search sequence has identified that there are more suitable sites available for residential development within our Main Rural Settlements to accommodate identified housing need. Therefore, this site will not be allocated in the RLDP.
Mathern (Shirenewton)	CS0053	Land to the east of Cherry Trees	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Pwllmeyric (Shirenewton)	CS0030	Land off Chapel Lane	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, this site will not be allocated in the RLDP.
Pwllmeyric (Shirenewton)	CS0229	Land opposite Chepstow Garden Centre	Tourism (Hotel) and Renewable Energy (Solar)	✓	✗		While internal and external consultee comments were obtained in relation to tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							<p>appropriate/necessary to identify site specific tourism related allocations in the RLDP.</p> <p>The solar element is not being progressed as an allocation due to concerns raised in relation to the site's proximity to the Gwent Levels Historic Landscape. Ecology concerns have also raised in relation to the presence of a SINCL on site, as well as flood risk issues on the eastern edge of the site. In addition, the site is predominantly Grade 2 BMV land, with the Minister for Climate Change letter of 1st March 2022 noting that significant weight should be given to protecting BMV land where solar arrays are proposed and the availability of more suitable alternatives.</p>
Shirenewton	CS0111	Land adjacent to Thistledown Barn	Residential	✓	✗		Site not progressing as it is wholly Grade 2 Best and Most Versatile agricultural land and there are more suitable alternative sites with a lesser proportion of BMV land in Shirenewton. Therefore, the site will not be allocated in the RLDP.
Shirenewton	CS0208	Land west of Shirenewton Recreation Hall	Residential	✓	✗		Site not progressing as significant concerns have been raised in relation to heritage impact. Therefore, the site will not be allocated in the RLDP.
Shirenewton	CS0218	Land at Ditch Hill Lane (Option A)	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, the site will not be allocated in the RLDP.
Shirenewton	CS0225	Land at Ditch Hill Lane (Option B)	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, the site will not be allocated in the RLDP.
Shirenewton	CS0226	Land at Ditch Hill Lane (Option C)	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. Therefore, the site will not be allocated in the RLDP.
Shirenewton	CS0231	Land west of Shirenewton	Residential	✓	✗		Site not progressing as significant concerns have been raised in relation to heritage impact. Therefore, the site will not be allocated in the RLDP.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
		Recreation Hall (Smaller Site)					
Shirenewton	CS0232	Land to the west of Redd Landes	Residential	✓	✓	✓	A reduced area to the candidate site submission is proposed for allocation in the RLDP. Overall, the site performs well against the site search sequence. This site is located on the western edge of Shirenewton. While the site is partly Best and Most Versatile (BMV) agricultural land, it performs better in this respect compared to other Candidate Sites within the area as most have higher proportions of BMV agricultural land. The site benefits from excellent access to the recreation ground, play area and recreation hall due to its location opposite the site, and is also within walking distance of the primary school. The site meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 26 homes.
Shirenewton	CS0240	Land to the east of Mounton Court	Residential	✓	✗		Site not progressing as concerns have been raised in relation to highway impact. Therefore, the site will not be allocated in the RLDP.
Shirenewton	CS0244	Land to the west of Ditch Hill Lane	Residential	✓	✓	✗	Site is not allocated as there is sufficient and more suitable land available for residential development within the Main Rural Settlement of Shirenewton to accommodate its housing need.
St Arvans	CS0077	Land adjacent to Piercefield Public House	Residential	✓	✓	✓	The site performs well against the assessment methodology with no fundamental constraints identified. Although within the Wye Valley National Landscape (AONB), the proposal is small scale and the landscape assessment has demonstrated limited harm. The site also meets key policy requirements, including 50% affordable housing and net zero carbon homes, demonstrating its viability and deliverability. It is therefore proposed to allocate the site for approximately 16 homes.
St Arvans	CS0223	Land at New Barn Workshop	Tourism (Hotel)	✓	✗		While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
							appropriate/necessary to identify site specific tourism related allocations in the RLDP.
Trellech (Trellech United)	CS0092	Land at Monmouth Road	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. In addition, there is no capacity at the Trellech WWTW to accommodate foul flows from the site. Therefore, the site will not be allocated in the RLDP.
Trellech (Trellech United)	CS0234	Land east of De Clere Way	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. In addition, there is no capacity at the Trellech WWTW to accommodate foul flows from the site. Therefore, the site will not be allocated in the RLDP.
Werngifford/Pandy (Crucorney)	CS0219	Land at Sun Meadow	Residential	✓	✗		Site not progressing as insufficient information has been submitted in relation to demonstrating deliverability in accordance with key policy requirements. In addition, there is no capacity at the Pandy WWTW to accommodate foul flows from the site and there are concerns over flooding on the access to the site. Therefore, the site will not be allocated in the RLDP.
Minor Rural Settlements							
Grosmont (Crucorney)	CS0141	Land at Riverview	Residential	✗			Only minor residential infilling of 1 or 2 dwellings is considered acceptable in Minor Rural Settlements, subject to the detailed planning policy requirements. As such, the site has not progressed further in the candidate site assessment process.
Grosmont (Crucorney)	CS0246	Land west of Bevan Court	Residential and Community Hub (A1/A3/B1)	✗			Only minor residential infilling of 1 or 2 dwellings is considered acceptable in Minor Rural Settlements, subject to the detailed planning policy requirements. As such, the site has not progressed further in the candidate site assessment process.
Llandenny (Raglan)	CS0157	Land adjacent to Orchard Cottages	Residential	✗			Only minor residential infilling of 1 or 2 dwellings is considered acceptable in Minor Rural Settlements, subject to the detailed planning policy requirements. As such, the site has not progressed further in the candidate site assessment process.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Llandewi Rhydderch (Llanover)	CS0207	Land west of Llandewi Rhydderch	Residential	x			Only minor residential infilling of 1 or 2 dwellings is considered acceptable in Minor Rural Settlements, subject to the detailed planning policy requirements. As such, the site has not progressed further in the candidate site assessment process.
Llanishen (Trellech United)	CS0221	Land at Penarth Farm	Residential	x			Llanishen is located within Tier 4 Minor Rural Settlement. Only minor infilling considered acceptable, subject to the detailed planning policy requirements.
Llanishen (Trellech United)	CS0222	Land at Penarth Farm, Llanishen	Renewable Energy (Solar)	x			The site is not being progressed as an allocation due to its location in the Wye Valley National Landscape (AONB) and PPW's policy position that the AONB designation should be afforded the highest protection. In addition, 67% of the site relates to Best and Most Versatile agricultural land, with the Minister for Climate Change letter of 1 st March 2022 noting that significant weight should be given to protecting BMV land where solar arrays are proposed and the availability of more suitable alternatives.
Penallt (Trellech United)	CS0047	Land at Penallt	Residential	x			Penallt is located within Tier 4 Minor Rural Settlements. Only minor infilling considered acceptable, subject to the detailed policy requirements of the RLDP.

Open Countryside

Llanbadoc	CS0210	Land at Llanbadoc	Residential	x			Site is contrary to provisions set out in National Planning Policy in relation to flooding. Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Llanbadoc	CS0237	Land at Llanbadoc, north of Usk Garden Centre	Employment (B1/B8)	x			Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Llanbadoc	CS0238	Land at Prioress Mill Lane	Employment (B1/B8)	x			Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Site progressed past Stage 2	Site progressed past Stage 3A/3B	Site taken forward as a Deposit Allocation	Comments
Llanbadoc	CS0239	Land at Prioress Mill Lane	Mixed Use: Residential (C3) and Employment (B1/B8)	✘			Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Near Llangwm (Devauden)	CS0283	Rockfield Farm	Tourism	✘			Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Manson (Dixton with Osbaston)	CS0088	Land adjacent to Fairview, Manson	Residential	✘			Site is not considered compatible with the Preferred Strategy due to its location in the open countryside. As such, the site is not suitable for development and has not progressed further in the candidate site assessment process.
Near Portskewett (Portskewett/Saernewton)	CS0066	Bridge View Farm	Renewable Energy (Solar)	✓	✘		The site is not being progressed as an allocation due to concerns raised in relation to the site's location on the Gwent Levels. In addition, the site is wholly Grade 2 BMV land, with the Minister for Climate Change letter of 1 st March 2022 noting that significant weight should be given to protecting BMV land where solar arrays are proposed and the availability of more suitable alternatives. Therefore, the site will not be allocated in the RLDP.
Near Portskewett (Portskewett)	CS0259	Bridge View Farm	Tourism	✓	✘		While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.
Near St. Arvans (St. Arvans)	CS0003	Livox Quarry	Tourism/Leisure	✓	✘		While internal and external consultee comments were obtained on tourism sites, the proposed tourism policy approach in the Deposit Plan more appropriately allows for consideration of sustainable tourism related proposals, including beyond identified settlement boundaries. It is therefore not considered appropriate/necessary to identify site specific tourism related allocations in the RLDP.

North of Magor (Mill, The Elms, Rogiet, Caerwent)	CS0198	St Brides New Settlement (Land north of Junction 23, Magor)	New Settlement	✘			Site is not considered compatible with the Preferred Strategy or national planning policy which states new settlements should be proposed via a Joint LDP, SDP or Future Wales. As such, the site has not progressed further in the candidate site assessment process.
North of Raglan (Raglan, Llanover, Mitchel Troy)	CS0224	Cwm Pentref New Community	New Settlement	✘			Site is not considered compatible with the Preferred Strategy or national planning policy which states new settlements should be proposed via a Joint LDP, SDP or Future Wales. As such, the site has not progressed further in the candidate site assessment process.

Candidate Sites for Protection

Settlement (Ward)	Candidate Site Ref	Site Name	Proposed Use	Comments
Primary Settlements: Abergavenny				
Abergavenny (Croesonen/Mardy)	CSP001	Gavenny Valley	DES2 – Area of Amenity Importance	The site has been considered as part of the review of Areas of Amenity Importance which concludes that apart from Croesonen Parc, which will be designated separately, the site is mostly private, inaccessible and considered to be Open Countryside. It is therefore not suitable for designation as an Area of Amenity Importance.
Abergavenny (Cantref/Grofield)	CSP002	Western Abergavenny	Protection as buffer to BBNP	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. The candidate site has also been assessed as part of the Green Wedge Assessment and in accordance with the review's findings, the relevant sections of the site have been designated as green wedge.
Abergavenny (Cantref)	CSP003	Land at Pentre Road	Protection as buffer to BBNP	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. The candidate site has also been assessed as part of the Green Wedge Assessment and consistent with its findings the site is designated as a Green Wedge in the RLDP.
Abergavenny (Croesonen / Lansdown / Mardy)	CSP004	Land north of Abergavenny	Protection as buffer to BBNP	The site has been assessed as part of the Green Wedge Assessment and consistent with its recommendations the northern slither of land, adjoining the BBNP boundary, has been designated as a Green Wedge due to its function in relation to the protection of Abergavenny's setting with the BBNP. However, the Green Wedge Assessment also concludes that the southern section of the site has a moderate buffer role and therefore a green wedge designation is not considered appropriate. Consistent with national guidance, which allows for green wedge and settlement boundaries to make provision for a sufficient range of development land which is suitably located in relation to the existing urban edge should be made available, having regard to the longer-term need for development land, the effects of development pressures in areas beyond the green wedge and the need to minimise demand for travel, Land at Penlanlas (CS094), is allocated for residential purposes.
Primary Settlements: Chepstow				
Chepstow (Mount Pleasant / Shirenewton St Kingsmark)	CSP017	Land at Bayfield	Protection from development	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. A site-specific protection designation is therefore not considered necessary in addition to the policy protection proposed in the Plan.
Primary Settlements: Monmouth				

Monmouth (Overmonnow)	CSP005	Triwall Factory Old Playing Field	DES2 – Area of Amenity Importance	The site has been considered as part of the review of Areas of Amenity Importance which concludes that this area is private and inaccessible and, therefore, is not suitable for designation as an Area of Amenity Importance.
Monmouth (Osbaston)	CSP007	Land at Old Hereford Road	Protection from development	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. A site-specific protection designation is therefore not considered necessary in addition to the policy protection proposed in the Plan.
Monmouth (Wyesham)	CSP008	Claypatch Woods	Natural flood management	The site is proposed to be allocated as an Area of Amenity Importance within the RLDP, which protects the land from development. Natural flood management proposals such as additional tree planting to enhance the site's flood management role can be considered outside of the RLDP or within its policy framework where planning permission is required and, therefore, do not require a specific designation in the Plan. The Council is currently preparing an update to the Local Flood Strategy with a consultation exercise anticipated towards the end of 2024 or early 2025.
Monmouth (Osbaston)	CSP009	Land adjacent Orchard Cottage	Natural flood management	Natural flood management proposals such as additional tree planting to enhance the site's flood management role can be considered outside of the RLDP or within its policy framework where planning permission is required and, therefore, do not require a specific designation in the Plan. The Council is currently preparing an update to the Local Flood Strategy with a consultation exercise anticipated towards the end of 2024 or early 2025.
Monmouth (Wyesham)	CSP010	Wyesham	Retrofit of SUDs measures	The introduction of sustainable drainage measures within Wyesham can be considered within the RLDP's policy framework where planning permission is required and, therefore, does not require a specific designation in the Plan. The Council is currently preparing an update to the Local Flood Strategy with a consultation exercise anticipated towards the end of 2024 or early 2025.
Monmouth (Osbaston)	CSP011	Osbaston	Retrofit of SUDs measures	The introduction of sustainable drainage measures within Wyesham can be considered within the RLDP's policy framework where planning permission is required and, therefore, does not require a specific designation in the Plan. The Council is currently preparing an update to the Local Flood Strategy with a consultation exercise anticipated towards the end of 2024 or early next 2025.
Monmouth (Wyesham)	CSP012	Land adjacent Wyesham Lane	Natural flood management	Natural flood management proposals such as additional tree planting to enhance the site's flood management role can be considered outside of the RLDP or within its policy framework where planning permission is required and, therefore, do not require a specific designation in the Plan. The Council is currently preparing an update to the Local Flood Strategy with a consultation exercise anticipated towards the end of 2024 or early 2025.
Monmouth (Drybridge)	CSP013	Land east Kingswood	Natural flood management	Natural flood management proposals within the candidate site boundary such as additional tree planting to enhance the site's flood management role can be considered outside of the RLDP or within its policy framework where planning permission is required and, therefore, do not require a specific designation in the Plan. The Council is currently preparing an update to the Local Flood Strategy with a consultation exercise anticipated towards the end of 2024 or early 2025.

Monmouth (Osbaston)	CSP016	Hereford Road	Protection from development	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. A site-specific protection designation is therefore not considered necessary in addition to the policy protection proposed in the Plan.
Monmouth (Town)	CSP018	Land at Monmouth Comprehensive School	Open space	The site has been considered as part of the review of Areas of Amenity Importance which concludes that the area should not be designated as an Area of Amenity Importance but can contribute to Open Space provision. Accordingly, this site is identified on the Proposals Map as Open Space.
Monmouth (Drybridge)	CSP019	Land west of Kingswood Gate	Natural flood management	Natural flood management proposals such as additional tree planting to enhance the site's flood management role can be considered outside of the RLDP or within its policy framework where planning permission is required and, therefore, do not require a specific designation in the Plan. The Council is currently preparing an update to the Local Flood Strategy with a consultation exercise anticipated towards the end of 2024 or early 2025.
Monmouth (Drybridge)	CSP020	Land at Cornpoppy Avenue	Open space	The site has been considered as part of the review of Areas of Amenity Importance which concludes that both areas are private and inaccessible so cannot be designated as an Area of Amenity Importance but can contribute to Open Space provision. Accordingly, this site is identified on the Proposals Map as Open Space.

Primary Settlements: Severnside

Magor with Undy (Magor West / Magor East)	CSP021	Land north and west of Magor	Protection from development	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. The northern section of the site has also been considered as part of the review of Areas of Amenity Importance as it was submitted for this purpose under Candidate Site submission CSP022. This review concludes that the northern area has no formal amenity value and being located outside of the development boundary, is considered to be open countryside. The area is therefore not suitable for designation as an Area of Amenity Importance. A site-specific protection allocation is therefore not considered necessary.
Magor with Undy (Magor West / Magor East)	CSP022	Land to the north of Magor	DES2 – Area of Amenity Importance	The site has been considered as part of the review of Areas of Amenity Importance which concludes that the area has no formal amenity value and being located outside of the development boundary and is therefore considered to be open countryside. The area is therefore not suitable for designation as an Area of Amenity Importance.

Rural General

Coed-y-paen (Llangybi Fawr)	CSP006	Land adjacent Garden Cottage	DES2 – Area of Amenity Importance	The site has been considered as part of the review of Areas of Amenity Importance which concludes that this area is inaccessible and therefore is not suitable for designation as an Area of Amenity Importance.
Crick (Caerwent / Shirenewton)	CSP014	Runston Village Conservation Area	Protection from development	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. A site-specific protection designation is therefore not considered necessary in addition to the policy protection proposed in the Plan.

Mathern / Portskewett (Portskewett / Shirenewton)	CSP015	St Pierre Conservation Area	Protection from development	The site is located outside the settlement boundary and is therefore considered to have sufficient protection as any proposals would be assessed against national and local policy requirements relating to open countryside locations. A site-specific protection allocation is therefore not considered necessary in addition to the policy protection proposed in the Plan.

3. General Conformity with Future Wales: The National Plan 2040 Assessment	26

Self-Assessment of the Deposit Plan against the Tests of Soundness

1. Introduction

- 1.1. This paper is one of a series produced by Monmouthshire County Council (MCC) as part of the evidence base for the Replacement Local Development Plan (RLDP) which covers the period 2018 – 2033. As part of the development plan process the Council needs to demonstrate that the Plan is ‘sound’. The purpose of this paper is to assess the Deposit Plan against the tests of soundness set out in the Development Plans Manual (Edition 2 – March 2020).
- 1.2. The self-assessment undertaken is considered to demonstrate that the Deposit Plan and the processes followed to reach this stage are ‘sound’.
- 1.3. The soundness of the RLDP will continue to be assessed against the tests of soundness as the Plan progresses to an independent Examination by a Planning Inspector.
- 1.4. The Council’s self-assessment of the Deposit Plan is set out below.

2. Self-assessment of the Deposit Plan against the Tests of Soundness

Test of Soundness Development Plans Manual – Ed 3, March 2020	Response This self-assessment has been undertaken to monitor consistency with the Tests of Soundness at the Deposit stage of the Replacement Local Development Plan process.
<p>Preparation Requirements:</p> <ul style="list-style-type: none"> • Has preparation of the plan complied with legal and regulatory procedural requirements? (LDP Regulations, CIS, SEA Regulations, SA, HRA etc.?) • Is the plan in general conformity with the NDF (now referred to as Future Wales: The National Plan 2040) and/or SDP? (when published or adopted respectively) 	<p>The Deposit Plan has been prepared in accordance with the procedural requirements. Notable reference should be had to the publication of the Integrated Sustainability Appraisal (ISA) (2024) and the Habitats Regulations Assessment (HRA) Report (2024) which have been published as supporting documents to the Deposit Plan. These build on the work undertaken to accompany earlier stages of the Replacement Local Development Plan (RLDP) process – Integrated Sustainability Appraisal Scoping Report (December 2018), Initial Integrated Sustainability Appraisal (ISA) for the Monmouthshire RLDP (Nov 2022) and Initial Habitats Regulations Assessment Screening Report (December 2018) and Habitats Regulations Assessment of the Monmouthshire RLDP Preferred Strategy (Nov 2022).</p> <p>Scheduled consultation arrangements and documents are in accordance with the LDP Regulations (2005 as amended 2015). The scope and method of consultation is consistent with the Community Involvement Scheme, which includes engagement with a range of stakeholders including the public, elected members, developers and statutory consultees. Many of the consultation measures put in place during the Covid-19 pandemic have been retained to add to the methods of engagement. These provide communities and stakeholders the ability to engage with the RLDP consultation in a virtual manner through webinars and are scheduled alongside face to face ‘drop-in’ sessions. Full details of the consultation arrangements will be available on the Council’s website.</p> <p>Prior to the consultation on the Deposit Plan, significant non-statutory consultation has also been undertaken to gain an understanding of the issues and options relevant to the County, with a couple of stages revisited and reviewed due to updated evidence, the Covid-19 pandemic and consideration</p>

Page 1772

of comments received during consultation exercises. A summary of key RLDP stages undertaken is set out in Appendix 2 of the Deposit Plan.

Full details of the consultation methods undertaken are set out in the Initial Consultation Report which accompanies the Deposit Plan.

Welsh Government published Future Wales: The National Plan 2040 in February 2021. This establishes the national development framework, setting the direction for development in Wales to 2040 and provides the policy framework for SDPs and LDPs, with a requirement for the lower tier plans to be in general conformity with Future Wales. In response to the Preferred Strategy (Dec 2022), consultation Welsh Government formally responded with a 'green' rating and noting that *"Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region, but reflects the urgent need to increase the supply of affordable housing in Monmouthshire."* In this respect the overarching strategy of the Deposit Plan has been accepted as being in conformity with Future Wales by Welsh Government.

The proposed level of growth set out in the Deposit Plan is essential to deliver on our local evidence-based issues and objectives and to ensure the RLDP is 'sound'. It is supported by policies 3, 4, 5 and 7 of FW, which support public leadership and the use of public land to deliver on ambitious affordable housing targets, demographically balanced rural communities, the rural economy and the delivery of affordable homes. The growth strategy will assist in addressing our core issues without harming or compromising Welsh Government's objectives for wider South East Wales region by striking a compromise between achieving our local evidence-based objectives and not undermining the prospects of surrounding local authorities or the ambitions for the National Growth Area of the

Cardiff Capital Region. Conversely, a lower level of growth would not address the local evidence-based issues and objectives and would therefore fail the tests of soundness.

Spatially, the RLDP preparation process has reflected the policies of Future Wales and again Welsh Government noted in its response the Preferred Strategy that it does not object to the settlement hierarchy and distribution of housing growth. Consideration of earlier spatial options for Dispersed Growth and New Settlement and New Settlement with Limited Growth in Primary Settlements, Secondary Settlements and Severnside only, which formed part of the initial Growth and Spatial Options Consultation Paper (June 2019), have been ruled out for the RLDP on the basis that Welsh Government officials have stated that a New Settlement cannot be pursued outside of the Strategic Development Plan or joint LDP processes. Such changes are considered to demonstrate actions taken to ensure general conformity with Future Wales and SDP processes.

A further issue of relevance to Monmouthshire is the requirement of Policy 34 for the Strategic Development Plan to identify a green belt to the north of Cardiff, Newport and the eastern part of the region. The South East Wales Regional Strategic Diagram (page 163 of Future Wales) provides an indicative plan of the area for consideration with the detailed boundary to be defined through the preparation of the SDP. In advance of an SDP, the area shown for consideration in Future Wales should be treated as a designated Green Belt. In assessing the spatial strategy for distributing growth within the County consideration has been given to paragraph 3.72 of PPW12 which states that:

“when considering a Green Belt designation, a sufficient range of development land which is suitably located in relation to the existing urban edge should be made available, having regard to the longer term need for development land, the effects of development pressures in areas beyond the Green Belt and the need to minimise demand for travel. This may require land to be safeguarded, and boundaries of proposed Green Belts must be carefully defined to achieve this”.

	<p>Such an approach is essential to address the Council’s significant concerns regarding the long-term policy implications of the permanency of a Green Belt designation on future growth and prosperity in Monmouthshire.</p> <p>In this respect, the Deposit Plan is considered to facilitate the identification of a Green Belt in southern Monmouthshire with the primary settlements situated outside the broad coverage, consistent with the indicative plan and meeting the aims of Policy 34 but allowing for an appropriate level of growth in Monmouthshire to address its local challenges and issues.</p> <p>More generally, the overarching policy framework of the Deposit Plan is considered to align with the policy aims of the Future Wales, with many common policy themes running through both. Examples of this include placemaking (Policy 2), active travel (Policy 12), town centre first (Policy 6) and creating resilient ecological networks and enhancing green infrastructure provision (Policy 9). Particularly relevant in a Monmouthshire context is the policy focus on supporting rural communities (Policy 4) and the rural economy (Policy 5) and delivering affordable homes (Policy 7) which are key challenges for the County. In this respect the Deposit Plan is considered to set the policy framework for delivering the policy objectives of Future Wales at a local level. The RDLP provides an opportunity for public sector leadership (Policy 3), with the Caldicot East Strategic Development Site (Policy HA2) including Council-owned land, allowing for different approaches to affordable housing delivery to be explored.</p> <p>Further details of alignment with FW2040 are set out in Section 3 of this paper.</p>
<p>Test 1: Does the plan fit? (Is it clear that the LDP is consistent with other plans?)</p> <p>Questions</p> <ul style="list-style-type: none"> Does it have regard to national policy (PPW) and Future Wales? 	<p>The formulation of the Deposit Plan has been prepared with full regard to the relevant plans and strategies, whilst recognising that it will need to respond and develop as it progresses through its preparatory process. The national, regional and local plans are where relevant identified within the Plan but also within the background and supporting documents and within the in-combination considerations of the ISA and HRA Reports. The ISA process reviews the relevant policies, plans and programmes and considers their implications in relation to the growth levels and spatial options</p>

<ul style="list-style-type: none"> • Does it have regard to Well-being Goals? • Does it have regard the Welsh National Marine Plan? • Does it have regard to the relevant Area Statement? • Is the plan in general conformity with the NDF? • Is the plan in general conformity with relevant SDP (when adopted)? • Is it consistent with regional plans, strategies and utility programmes? • Is it compatible with the plans of neighbouring LPAs? • Does it reflect the Single Integrated Plan (SIP) Well-being Plan or the National Park Management Plan (NPMP)? • Has the LPA demonstrated it has exhausted all opportunities for joint working and collaboration on both plan preparation and the evidence base? 	<p>considered and have subsequently informed the Strategy, Strategic Policies and associated Development Management Policies.</p> <p>Each of the Test 1 questions is discussed in turn:</p> <p>National Policy (PPW12) and Future Wales</p> <p>The Deposit Plan has regard to national policies and guidance as set out in PPW12 and associated Technical Advice Notes (TANs). The RLDP and supporting documents refer to relevant sections of PPW12 specific to the issue being discussed and the policy requirements of PPW12 have been considered and incorporated where relevant in the preparation of the Strategic Policies and detailed Development Management policies. The supporting text adds further commentary on the links to national guidance. Each of the Strategic Policies is supported by a policy context section which sets out links to the wider policy framework including PPW12 and TANs. The relationship between the Deposit Plan and Future Wales is discussed above and in Section 3 of this Paper. The RLDP is recognised as a key mechanism in delivering the planning policy priorities identified in national policy.</p> <p>Well-Being Goals</p> <p>The Deposit Plan has full regard to the provisions of the Well-being of Future Generations Act 2015 and the well-being goals, as well as the five ways of working as demonstrated by the additional non-statutory consultation and engagement undertaken on the Issues, Vision and Objectives, the Growth and Spatial Options Papers and the Preferred Strategy stage of the plan process. The promotion and recognition of well-being has been a consideration from the outset of the Plan preparation process. The links between the RLDP objectives and the Well-being Goals is clearly set out in the Issues, Vision and Objectives Paper (updated December 2022), which relates and groups the issues and opportunities under the well-being goal themes. Each Strategic Policy provides a table setting out its links to the wider policy framework and which of the well-being goals it will contribute to.</p>
---	---

Welsh National Marine Plan

The Strategic Policies and associated Development Management policies cover a number of issues and policy areas which complement the aims and objectives of the Marine Plan. In particular, Strategic Policies S3 – Sustainable Place Making and High Quality Design, S4 – Climate Change and S5 – Green Infrastructure, Landscape and Nature Conservation complement the Marine Plan by directing development away from areas of flood risk, protecting and enhancing green infrastructure and networks and recognising the challenges posed by climate change. The relationship with the Marine Plan is enhanced further through the detailed policies in the Deposit Plan. For example, policies NR2 – Severn Estuary Recreational Pressure, which seeks to ensure that there are no adverse impacts on the integrity of the Severn Estuary SAC, SPA and Ramsar as a result of an increase in visitor pressures and NR3 – Protection of Water Sources and the Water Environment, which looks to ensure development does impact upon quality and quantity of water sources. As such, the policy framework seeks to safeguard the river ecosystem, which flows into the Severn Estuary and National Marine Plan area.

Area Statement

Monmouthshire forms part of the South East Wales Area Statement along with Blaenau Gwent, Caerphilly, Newport and Torfaen, which was published by NRW in March 2020. The Deposit Plan has regard to the Area Statement’s strategic themes of Linking Our Landscape; Climate Ready Gwent; Healthy Active Connected; and Ways of Working and through the Strategic Policies seeks to achieve many of the outcomes associated with each theme. Examples of this include Strategic Policy S5 – Green Infrastructure, Landscape and Nature Conservation which is consistent with many of the outcomes sought from the Area Statement including improved resilience of our ecosystems across Gwent and the need to safeguard and enhance core habitat networks and support ecological connectivity on and between our best sites across Gwent. Similarly, Strategic Policies S3 – Sustainable Placemaking and High Quality Design and S4 – Climate Change are consistent in their aims as many of the outcomes associated with Climate Ready Gwent and Healthy Active Connected. Consequently,

the Deposit Plan is considered to be consistent with the key themes and aims of the South East Wales Area Statement.

Future Wales: The National Plan 2040 (February 2021)

Conformity with Future Wales is discussed above and in Section 3 of this Paper.

Strategic Development Plan (SDP)

The preparation of an SDP has not yet formally commenced for the region, however, consultation on a Delivery Agreement is anticipated to be undertaken towards the end of 2024. Monmouthshire County Council has been actively involved in the discussions and agreements put in place to date and Council has formally resolved to be part of the SDP.

Regional plans, strategies and utility programmes

The Deposit Plan has been prepared within the context of the relevant regional plans, strategies and utility provider programmes, with Appendix 3 of the Plan, associated background papers and the supporting commentary of the strategic and detailed policies providing details of the documents that have been considered. Specific reference is made to the regional assessment of future growth and migration for the Cardiff Capital Region (CCR). This report aims to review how each LPA could contribute towards increasing the number of jobs across the region by 2040 and how the increase in jobs corresponds with projected growth in LPAs, the region and Future Wales 2040. It reviews the migration assumptions underpinning the proposed level of population/jobs growth and the potential implications of the spatial distribution of jobs and people on travel patterns. The study provides a policy-off approach to the assessment of potential growth in the region. As such, it sits alongside and complements RDLP evidence prepared by each authority in the region. It is not intended to replace or supersede the detailed consideration of growth potential prepared by individual authorities to inform the RLDP process.

The Initial Sustainability Assessment and Habitats Regulations Assessment also consider the in-combination effects of the Plan along with other plans and strategies in the region and conclude that the Plan is in line with both regional and local environmental protection objectives.

The preparation of the Deposit Plan has also involved a regional and coordinated approach to the collection of evidence, including population projection modelling and regional employment study, Development Viability Model, Renewable Energy Assessment and Strategic Flood Consequence Assessment. This has provided a consistent and comparable approach to methodologies and a basis to consider the evidence and any implications on a more regional basis as well as at a local level. Long standing regional working methods associated with areas such as waste and minerals are continued and are reflected in the Deposit Plan.

Utility companies have been involved from an early stage in the development of the RLDP to ensure consistency with their programmes. For example, extensive discussions have taken place between the Council and Dŵr Cymru Welsh Water to identify solutions to the phosphates constraint affecting the County, as well as other utility companies such as Western Power to understand capacity for growth and for renewable energy.

Plans of Neighbouring Authorities (LPAs)

The Deposit Plan takes into account cross-border issues and the plans of neighbouring authorities and reflects the discussions and agreements reached relating to cross-border issues. Examples include agreement on the approach to the housing numbers attributed to growth in the Brecon Beacons National Park Authority area, growth levels in Torfaen, consideration of Newport's capacity to accommodate an element of Monmouthshire's growth on previously developed land, and discussion with the Forest of Dean regarding their issues and objectives and growth strategy with particular reference to infrastructure impact on Chepstow. Further details of joint working and collaboration are set out in Appendix 3 of the Plan.

As noted above, in recognition of the value of working with neighbouring authorities, and in response to PPW12 and the Development Plans Manual (Ed 3, March 2020) emphasis on collaborative working, we have worked on or are working on a number of pieces of evidence together. These include:

regional assessment of future growth and migration for the Cardiff Capital Region (CCR), a Larger than Local Employment Study, Population and Household Projections, Integrated Sustainability Appraisal, Habitats Regulation Assessment, Development Viability Model and Renewable Energy Assessment. In addition, work undertaken by SEWSPG and topic-based Pathfinder groups, have helped establish a common approach to a number of Plan preparation tasks including candidate sites assessments, sustainable settlement appraisals and retail and employment land monitoring.

Regard will continue to be had to the emphasis on regional working in light of future provisions around Strategic Development Plans and Future Wales.

Single Integrated Plan (SIP), Well-being Plan or the National Park Management Plan (NPMP)

In 2021 a new Gwent wide well-being Public Service Board (PSB) was established replacing the five separate Public Service Boards in the Gwent region (Blaenau Gwent, Caerphilly, Newport, Monmouthshire and Torfaen), forming the Gwent PSB. The Gwent PSB Well-Being Plan was published in 2023 and sets out what the PSB could do over the next five years to tackle the social, economic, environmental and cultural issues which can affect well-being in Gwent. The Well-Being Plan contains two main objectives; to create a fairer, more equitable and inclusive Gwent for all and a climate-ready Gwent, where our environment is valued and protected, benefitting our well-being now and for future generations. The Well-Being Plan then identifies five steps that will help to achieve the two well-being objectives. The RLDP objectives as shown in Table 1 of the Deposit Plan sets out the Gwent PSB Well-Being Plan steps that are considered to correspond with the RLDP objective to illustrate where the two align and illustrate how the RLDP will help to deliver on the Gwent PSB Well-Being Plan. The Strategic Policies also set out which of the Well-being Plan objectives it has a particular link to.

Prior to the formulation of the Gwent PSB, the Monmouthshire Well-being Plan was prepared by the Monmouthshire PSB and endorsed in February 2018. The RLDP Issues, Vision and Objectives are heavily drawn from and reflect the Monmouthshire PSB Well-being Plan which was extensively consulted upon by the Public Service Board in 2017 and resulted in contributions from more than

1,400 people. This approach reflects Welsh Government guidance which recognises the significance of local well-being plans as a key evidence source for LDP preparation (paragraphs 1.6 and 1.21, PPW12). In this respect, the Monmouthshire Well-being Plan was an integral part of the non-statutory stages ensuring it seeks to address key issues identified for Monmouthshire.

In 2022, Monmouthshire County Council published Taking Monmouthshire Forward, a Community and Corporate Plan covering the period 2022-2028. It establishes the Council's purpose is for Monmouthshire to be "a zero-carbon county, supporting well-being, health and dignity for everyone at every stage of life". It sets out the objectives and values that will be adhered to and the actions needed to meet this purpose. These objectives and values are embodied in the RLDP strategy, with specific alignment between the RLDP and Corporate Plan's objectives highlighted in Table 1 of the Deposit Plan. The objectives each Strategic Policy support is also set out in the Links to Wider Policy Framework tables noted after each Strategic Policy.

The area of Brecon Beacons National Park that sits within Monmouthshire County Council's administrative area is excluded from the extent of the RLDP's geographical area and does not form part of Monmouthshire's Planning Authority remit. The relationship and impact on the Brecon Beacons National Park, does, however, remain a significant consideration for the preparation of the RLDP. The RLDP is considered to reflect the aims of Y Bannau: The Future, the Management Plan for Bannau Brycheiniog National Park (2023 – 2028) and its five inter-connected missions relating to Climate, Water, Nature, People and Place with the complexities in balancing these goals represented in adapted version of the 'Doughnut' model of social and ecological boundaries. Many of the Plan's policies seek to deliver the same outcomes as Y Bannau: The Future.

Joint Working and Collaboration on both plan preparation and the evidence base

As demonstrated above, a significant amount of the evidence base has been commissioned on a joint basis with Blaenau Gwent and Torfaen and on a sub-regional basis with Blaenau Gwent, Torfaen,

	<p>Caerphilly and Newport. We have held regular joint meetings to ensure there is a consistency of approach. Further details of joint working and collaboration are set out in Appendix 3 of the Deposit Plan and specific examples referenced throughout the Preferred Strategy in relation to the Strategic Policies.</p> <p>On-going meetings and collaboration are pursued through the longstanding South East Wales Strategic Planning Group (SEWSPG), the Planning Officers South Wales (POSW) and the South East Wales Planning Officer Society (SEWPOS).</p>
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Page 1782</p> <ul style="list-style-type: none"> • Test 2: Is the plan appropriate? (Is the plan appropriate for the area in the light of the evidence?) Questions • Is it locally specific? • Does it address the key issues? • Is it supported by robust, proportionate and credible evidence? • Can the rationale behind plan policies be demonstrated? • Does it seek to meet assessed needs and contribute to the achievement of sustainable development? • Are the vision and the strategy positive and sufficiently aspirational? • Have the 'real' alternatives been properly considered? • Is it logical, reasonable and balanced? • Is it coherent and consistent? • Is it clear and focused? 	<p>Is it Locally Specific?</p> <p>In order to address the key issues and challenges facing Monmouthshire, the Deposit Plan builds upon the Adopted Local Plan objectives, taking account of a range of other policy drivers including the Well-Being of Future Generations Act 2015, the Gwent Public Service Board (PSB) Well-being Plan (this replaces the objectives previously set out in the Monmouthshire PSB Well-being Plan and the Council's Community and Corporate Plan. In this respect, the formulation of the Deposit Plan and the stages that came before, has been underpinned by this locally specific evidence base. Building on this and the extensive non-statutory consultation that has been undertaken to date (see Appendix 2 of the Deposit Plan for a summary) the Deposit Plan's overarching strategy has emerged as a direct result of a number of very locally specific issues, with a number of core objectives becoming apparent as the Plan has progressed: delivering affordable housing to help address inequality, rebalancing the County's demography to ensure communities are socially and economically sustainable, responding to the climate and nature emergency to ensure proposals are environmentally sustainable and supporting and enabling sustainable economic growth.</p> <p>The Plan also responds to a number of challenges that have arisen following stakeholder consultation and engagement on the earlier non-statutory stages. Of note is the Welsh Government objection to the level of growth set out in that June 2021 Preferred Strategy and the issue of phosphate water quality issues in the River Wye and River Usk.</p>

The Plan's Growth Strategy as set out in Strategic Policies S1 and S2 propose a level and distribution of growth that has regard to these locally specific issues, whilst also ensuring that the RLDP delivers on our objectives and addresses our core issues of delivering affordable homes, responding the climate and nature emergency by delivering net zero carbon homes and ensuring our communities are socially and economically sustainable be attracting and retaining younger people to rebalance our ageing demographic.

Does it address key issues?

Each Strategic Policy highlights the links to the RLDP objectives, Gwent PSB Well-being Plan objectives and the Monmouthshire Community and Corporate Plan objectives. These locally specific, key issues are referenced extensively throughout the Deposit Plan and have formed the principal rationale for choosing the policy approach taken. Key issues addressed by the Plan include:

- Delivering a level of growth (homes and jobs) that address our local issues, having regard to Welsh Government's comments regarding alignment with Future Wales: the National Plan 2040.
- Maximising affordable housing delivery on new housing allocations, reflecting the Council's commitment to deliver 50% affordable homes on new housing sites.
- Requiring new homes to be net zero carbon reflecting our commitment to responding to and tackling climate change.
- Promoting sustainable economic growth.
- Identifies Strategic Site Allocations within the primary settlements of Abergavenny, Caldicot (including Severnside), Chepstow and Monmouth, Monmouthshire's most sustainable locations that have opportunities and potential to connect and link with regional travel aspirations, in particular identified opportunities at Severn Tunnel Junction and the South East Wales Metro Scheme.
- Lower level of growth in the most sustainable lower tier settlements to deliver affordable homes and address rural inequality and rural isolation in these areas.

Is it supported by robust, proportionate and credible evidence?

Extensive evidence building has been undertaken to support the Deposit Plan which is available to view on the Council's website. Further work will be undertaken during the Plan preparatory process as appropriate and necessary.

Can the rationale behind plan policies be demonstrated?

The evidence gathered to date has informed the preparation of the Plan and its overarching strategy and policies, which need to be read in conjunction with one another in order to gain an understanding of the overall policy direction of the Plan. Each strategic policy has a reasoned justification and a summary table setting out how it relates to the relevant RLDP objectives, national policy, and Well Being Goals, as well as the key evidence. They are also supported by a series of detailed development management policies, which will help deliver on the aims of the strategic policies. All policies reference the relevant sections of PPW12, combined with any regionally or locally specific evidence forming a key approach to establishing the rationale to the Plan's policies. Policy areas are also supported by Background Papers, where relevant, to add further evidence to the rationale behind a policy approach.

Does it seek to meet assessed needs and contribute to the achievement of sustainable development?

The Deposit Plan is derived from evidence that assesses the needs of the County, particularly in respect of homes (both market and affordable) and jobs, as well as the need to protect the most valuable areas of land. The Growth and Spatial Options Paper (September 2022) and Integrated Sustainable Appraisal (2024) accompanying the RLDP, appraise the Deposit's contribution to locally specific needs and sustainable development credential respectively. The Integrated Sustainability Appraisal process has an integral and iterative role in the preparation of the RLDP. In this respect, its use in testing or measuring the performance of the RLDP from its inception through to the preparation of the Deposit Plan is indicative of the iterative feedback between the ISA and the RLDP as work progresses.

When assessed against the ISA themes the Deposit Plan is predicted to have a positive significant effect on themes including economy and employment, population and communities, health and wellbeing, equalities, diversity, and social inclusion and transport and movement in recognition of the Plan's proposing to deliver new employment and homes including tackling the affordable housing challenge, distributed to the higher tier settlements, where there is greater need and better access to sustainable transport modes and wider infrastructure. Minor positive effects are considered most likely in relation to the biodiversity and geodiversity ISA theme reflecting the policy framework in place to avoid adverse impacts on biodiversity and the policy requirement to bring forward biodiversity net gains and ecological connectivity.

Significant negative effects are predicted in relation to the natural resources (air, land, minerals and water) ISA themes due to the substantial (and unavoidable) loss of greenfield and agricultural land. The ISA recognises that there are limited brownfield opportunities within Monmouthshire and that the Plan works well to allocate strategic site adjacent to built up areas. Minor negative effects are considered likely in relation to the landscape theme recognising that whilst development will impact upon landscape character and quality in Monmouthshire, the RLDP works well to reduce this impact by allocating sites within settlement boundaries and outside of landscape designations. Furthermore, the development policies and wider policy provisions under the RLDP work to maintain and enhance landscape character and quality.

Effects remain uncertain in relation to the historic environment ISA theme due to the proximity of the strategic site allocations to heritage features, however it also recognises that there are notable policy provisions that will benefit the historic environment by protecting features and the setting they are located within.

A neutral effect is considered most likely in relation to climate change adaptation and its relationship to flooding reflecting the allocation of sites at little or no risk of flooding. However, a minor negative effect is concluded in terms of climate change mitigation due to the level of growth proposed through the housing policies, although the ISA recognises the policies that seek to reduce emission.

In addition, the Local Housing Market Assessment has provided key evidence on the level of affordable housing need in the County. An Employment Land Review has been undertaken to quantify the future employment land requirements based on the Welsh Government Practice Guidance for Economic Development, supplemented by Monmouthshire's Economy, Employment and Skills Strategy (2023). The need for homes and jobs has also been considered alongside the need to protect the County's land resources for environmental, agricultural and nature conservation purposes. The balance to be achieved between these differing and sometime competing needs has been a key focus of the RLDP as it progressed to the Deposit stage.

The Plan's contribution to the RLDP locally specific objectives is discussed above, which concludes that the Strategy/Plan performs well against addressing the needs of the County, with Plan's overarching strategy emerging as a direct result of a number of very locally specific issues, with a number of core objectives becoming apparent as the Plan has progressed: delivering affordable housing to help address inequality, rebalancing the County's demography to ensure communities are socially and economically sustainable, responding to the climate and nature emergency to ensure proposals are environmentally sustainable and supporting and enabling sustainable economic growth.

The hierarchy of settlements has been developed taking account of the sustainability credentials of each settlement and how they can contribute to their wider communities. This hierarchy recognises and acknowledges the availability of services and facilities, accessibility issues and other considerations. Reference should be made to the Sustainable Settlement Appraisal Background Paper (December 2022) for full details. This work has formed the basis for the proposed spatial strategy, which seeks to ensure development is located in the most sustainable settlements within a Monmouthshire context.

Are the vision and the strategy positive and sufficiently aspirational?

The RLDP Vision has been developed to take into account the key challenges and opportunities for change, whilst being aspirational and positive enough to seek a reversal to the otherwise projected decline in job numbers and younger age groups present in the County. The vision for growth is a

positive one which seeks to create high quality, sustainable places in both urban and rural settlements within a Monmouthshire context. The Plan's strategy takes a positive, yet realistic approach to achieving growth within the context of Monmouthshire and tackling key national and local issues, such as the provision of affordable homes, growing Monmouthshire's economic base, tackling climate change and creating sustainable places to live and work in. The strategy is considered to present a balanced approach to growth by putting forward a strategy that is aspirational enough to address a number of key issues facing the County, whilst also having regard to Welsh Government Officer concerns regarding alignment with Future Wales: the National Plan 2040.

Have the 'real' alternatives been properly considered?

A number of different alternative growth and spatial options are considered in the Growth and Spatial Options Paper (September 2022), and also against the ISA themes through the Integrated Sustainability Assessment process. Having regard to the outcome of these assessments, four options setting out different combinations of growth and spatial options as set out in the Growth and Spatial Options Paper (September 2022) were considered as part of the Progressing the Monmouthshire's Replacement Local Development Plan Council Report on 27th September 2022. These were:

- Option 1: Proceed with the previous Preferred Strategy that we consulted on in July-August 2021;
- Option 2: Adopt an amended approach and proceed with a demographic-led strategy (based on the latest detailed population data) and an amended spatial strategy to take account of the phosphate constraint in the River Wye catchment. This is the recommended option;
- Option 3: Proceed with the WG prescribed maximum dwelling requirement (4,275 dwellings over the Plan period), and a spatial strategy that takes account of the phosphate constraint in the River Wye catchment; or
- Option 4: Restart the RLDP process.

Council endorsed option 2 as the basis for progressing the RLDP as set out in the 2022 Preferred Strategy.

Following consultation on the 2022 Preferred Strategy, which took place between December 2022 and January 2023, a report was taken to Council in October 2023 to seek endorsement of a number of updates to the Preferred Strategy as the basis for the ongoing preparation of the Deposit Plan. As a result of the consultation, a small number of key changes to the Preferred Strategy were agreed and incorporated into the Deposit Plan:

- The factual update to include 2022/23 data in the spatial distribution of housing table (this has since been updated to incorporate 2023/24 data).
- Identification of a strategic site in Monmouth in response to Dwr Cymru Welsh Water investment and Welsh Government advice, together with changes to how the previously termed ‘bonus sites’ are factored into the housing figures.
- Changing the strategic site in Chepstow.
- Increasing the flexibility level from 10% to 15% and consequential adjustments to the spatial distribution of housing tables.
- Enhancing the sustainability credentials and energy efficiency of new homes to be net zero carbon homes rather than net zero ready homes.

The extensive consultation that has been undertaken on the non-statutory stages of the Plan process and the changes that have been made as a result of those consultation exercises, is considered to sufficiently demonstrate that ‘real’ alternatives have been considered throughout the plan process.

In addition the ISA also includes an assessment of reasonable alternatives in relation to the level of growth, location of growth and strategic growth area options.

Is it logical, reasonable and balanced?

The Deposit Plan has emerged from a clear understanding of the issues at a national, regional and local level. It has considered a range of options and has had regard to the views expressed during the non-statutory consultation and engagement exercises to date and made changes to the options considered as a result. The Plan has emerged from engagement and evidence and as such it is considered to be logical and reasonable within the context of the issues facing Monmouthshire. It is

	<p>considered to provide a balanced approach that integrates with other plans and strategies, whilst ensuring it is reflective of national policy and the need for a sustainable and deliverable Plan.</p> <p>Is it coherent and consistent?</p> <p>The Deposit Plan sets out a coherent strategy from which its strategic and detailed policies flow. The strategy is guided by, and consistent with, the Plan vision and objectives, the principles of sustainability and placemaking set out in national planning guidance, the growth and spatial options and the evidence base.</p> <p>Is it clear and focused?</p> <p>The Deposit Plan is set out in a clear and logical form, clearly showing the links between the various elements of the overarching Strategy. It provides a clear focus of its purpose, identifying the vision and issues associated with the Plan and how the Plan will seek to address these.</p>
<p>Test 3: Will the plan deliver (Is it likely to be effective?)</p> <p>Questions</p> <ul style="list-style-type: none"> • Will it be effective? • Can it be implemented? • Is there support from the relevant infrastructure providers both financially and in terms of meeting relevant timescales? • Will development be viable? • Can the sites allocated be delivered? 	<p>Will it be effective?</p> <p>The RLDP's objectives have emerged from an understanding of the challenges and needs of Monmouthshire as well as a sound, logical and robust evidence base. The strategy seeks to integrate and reflect other plans and strategies as part of an integrated approach to delivery, maximising its opportunities to be effective in its implementation.</p> <p>The RLDP makes provision for 6,210 homes, including a 15% flexibility allowance to meet a requirement of 5,400 homes over the Plan period, including the provision of up to 2,000 affordable homes. This level of growth will enable the provision of market and affordable housing and provides the opportunity to address the unbalanced demography, improve labour force retention and assists in the County's housing affordability challenge.</p> <p>In order to meet the housing provision figure of 6,210 homes, the RLDP makes 18 new housing/mixed use allocations for 2,305 new homes reflecting the number of units that already have planning permission or that will be delivered via other housing supply streams, such as windfall and infill sites.</p>

<ul style="list-style-type: none"> • Is the plan sufficiently flexible? Are there appropriate contingency provisions? • Is it monitored effectively? 	<p>These new allocations provide the Council with the opportunity to open up longer term directions for strategic growth and implement place-making and climate change principles.</p> <p>The Plan also allocates 57ha of B Use Class employment land to meet the minimum requirement of 38ha and provides the planning policy framework to facilitate the growth of the resident workforce to support 6,240 jobs over the Plan period to help grow Monmouthshire’s economic base and reduce the out-commuting experienced within the County. This level of job growth aligns with the projected population and housing growth and takes account of adjustments to household membership rates for key younger age groups and a reduced level of commuting by retaining more of the resident workforce.</p> <p>Responding to the climate and nature emergency, the RLDP establishes the requirement for new homes to be net zero carbon, reflecting the Council’s commitment to responding to and tackling climate change. New housing allocations have also been made on a 50% affordable homes basis, delivering on the key objective of providing more affordable homes in the County.</p> <p>Can it be implemented?</p> <p>The preparation of the Deposit Plan is with the clear intention that it will be implementable and that its policies and proposals will be delivered within the Plan period. The Deposit Plan sets out a deliverable spatial framework and growth levels which are based on sustainability principles and responsive to the needs of the communities of Monmouthshire. The policies and proposals (both strategic and detailed) provide the framework through which the Plan’s objectives will be implemented and the decision-making process undertaken.</p> <p>More detailed assessment work, covering issues such as viability, phasing and deliverability of sites forms part of the extensive evidence base supporting the Deposit Plan.</p> <p>The level of affordable housing noted above aligns with the Council commitment of ensuring that new site allocations provide 50% affordable housing. In order for residential sites to be allocated in the RLDP, it has been a pre-requisite that site promoters demonstrate that sites are viable and deliverable, having regard to the Council’s commitment for 50% affordable housing provision on new</p>
--	--

sites. To ensure the site delivers on the key priorities of the RLDP, site specific policies have been prepared for every housing allocation and an Infrastructure Delivery Plan (Appendix 8 of the RLDP) has also been prepared which identifies the key infrastructure needed, anticipated timescales of delivery and potential funding streams to support the delivery of the allocated sites. Housing and employment trajectories are also included in the Deposit Plan setting out anticipated timescales for the delivery of site allocations.

Providing for the level of jobs growth is part of a complex picture, including the provision of a deliverable range of employment land supply, in appropriate locations. It will also be achieved through the allocation of 57ha of employment land to meet a minimum requirement of 38ha of employment land to facilitate the delivery of industrial and business employment uses. The RLDP will also include a policy framework to support job growth from other key employment sectors including retail, leisure and tourism.

Details of the net zero carbon homes policy are set out in Policy NZ1 – Monmouthshire Net Zero Carbon Homes.

The Deposit RLDP sets out an effective and appropriate monitoring framework, which will form the basis for undertaking the Annual Monitoring Report (AMR). The AMR will represent the main method for measuring and assessing the progress in the implementation of the policies and proposals of the adopted RLDP.

Is there support from the relevant infrastructure providers both financially and in terms of meeting the relevant timescales?

Infrastructure providers are an important component in developing the RLDP and form a key consultee. In this respect they have and will continue to be engaged throughout the Plan making process. Extensive discussions have taken place between the Council and Dŵr Cymru Welsh Water and NRW to identify workable solutions to the phosphates water quality issue. Other infrastructure providers have also been involved in on-going discussion including Western Power, the Aneurin Bevan University Health Board, Transport for Wales, and the Local Education Authority. The RLDP is supported by an Infrastructure Delivery Plan (Appendix 8 of the RLDP) and site-specific viability

assessments which have factored in appropriate costs and timescales for supporting infrastructure to be provided.

Will the development be viable?

The Plan is supported by a high-level affordable housing viability evidence and detailed 'site specific' viability assessments that have used the Development Viability Model, which was developed by Burrows-Hutchinson Ltd on behalf of SEWSPG, establishing a robust and consistent methodology for assessing viability across authorities in the south east Wales region. This demonstrates that on-site provision of 50% affordable homes is achievable throughout most of the County on sites of 20 homes or more. On sites of 5-19 homes, on-site provision of 40% affordable homes is evidenced to be achievable. The affordable housing thresholds are set out in Strategic Policy S7 and reflect the outcomes of the viability evidence.

The input of a Viability Steering Group has also informed the viability process to ensure key inputs reflect market conditions in Monmouthshire. This site-specific information together with viability modelling has been used to evidence that the sites allocated in the Deposit Plan are viable.

Each proposed housing allocation is supported by robust technical and viability evidence. The individual site-specific viability assessments that accompany each allocation reflect the circumstances specific to that development whilst also applying a standard approach/cost to variables agreed as part of the Viability Steering Group, where relevant. The site-specific assessments have been periodically updated throughout the plan preparation to ensure they capture the latest costs, values and planning obligation requirements as well key policy requirements such as 50% affordable homes and net zero carbon homes. The latest round of site-specific viability assessments reaffirmed that the proposed allocations are viable and can accommodate the Plan's policy requirements.

Can the sites allocated be delivered?

In addition to the viability evidence noted above, the Plan is also accompanied by a housing trajectory, which demonstrates the phasing and delivery of housing over the lifetime of the plan. This has been produced in consultation with site promoters and wider stakeholders to ensure realistic phasing and delivery rates have been considered. The Infrastructure Delivery Plan (Appendix 8 of the RLDP) also demonstrates how infrastructure provision has been considered in tandem to support the housing trajectory.

Is the Plan sufficiently flexible? Are there appropriate contingencies in place?

The RLDP has been designed to provide a flexible policy framework which is capable of providing certainty on how much growth is proposed and its broad distribution, but flexible enough to consider appropriate and acceptable opportunities that may arise during the Plan period, such as windfall sites and rural enterprise developments. The dwelling and employment land requirement figures contain a flexibility allowance to allow for unforeseen circumstances that may emerge through the Plan period.

In December 2022, the Preferred Strategy (2022) was published for public consultation between the period 5th December 2022 and 30th January 2023. The Preferred Strategy included a housing requirement figure of 5,400 homes and included a flexibility allowance of 10%, caveated that this was subject to review as part of the Deposit Plan preparation. In October 2023, a report was taken to Full Council to seek Council's endorsement of a number of post-consultation updates to the Preferred Strategy. An increase in the flexibility rate from 10% to 15% was one of the updates agreed. The increase in flexibility from 10% to 15% increases the housing provision from 5,940 to 6,210 homes and resulted in an additional 270 units being added to the total figure to be provided for in the RLDP.

The Council report justifies the increase in the flexibility allowance on the following basis:

- It ensures the strategic sites at Abergavenny East and Caldicot East are sufficiently large to deliver the required infrastructure whilst allowing the allocation of smaller sites across the County to sustain and enhance existing communities.
- Ensures that the Plan is more robust and resilient as there is delivery in the short-term while the large strategic sites take time to be developed out.

- Will result in the Plan being able to provide a range and choice of sites and ensure that the plan is not solely reliant on the delivery of larger strategic sites which are more complicated to develop.
- A range of smaller sites will ensure the delivery of much needed affordable housing after the adoption of the plan to start addressing current unmet affordable housing need.

As evidenced through the housing trajectory, this level of flexibility comfortably demonstrates delivery of the Anticipated Annual Build Rate (AABR) throughout the Plan period. The flexibility allowance has been reviewed and increased to ensure the Plan will remain effective in the event of changing circumstances.

Similarly, in order to support the Plan’s economic growth aspirations, 57ha of B Use Class has been allocated to meet the minimum requirement of 38ha. This allows for a range of employment sites to be allocated to meet a range of employment needs throughout the County. The Plan also provides a supportive policy framework to provide a flexible approach to economic opportunities that might come forward throughout the Plan period.

Is it monitored effectively?

An effective and appropriate monitoring framework has been developed and included within the Plan and will form the basis for undertaking the Annual Monitoring Report (AMR). The AMR represents the main method for measuring and assessing the progress in the implementation of the policies and proposals of the adopted RLDP. In the meantime, a number of annual monitoring exercises will continue to be undertaken to help ensure evidence is up-to-date. This includes the annual housing surveys, Employment and Retail Surveys and preparation of the Adopted LDP Annual Monitoring Reports.

3. General Conformity with Future Wales: The National Plan 2040 Assessment

- 3.1. Future Wales: The National Plan 2040 (referred to as Future Wales from this point on) was published by Welsh Government in February 2021 to promote development that enhances well-being and quality of life in Wales. It considers the issues significant to Wales's prosperity and well-being, such as the economy, housing, transport, energy, and the environment. It identifies where national developments should take place, where the key growth areas are and what infrastructure and services are needed. It is set in the context of a vision that will help deliver sustainable places across Wales by 2040, by supporting placemaking and ensuring our choices direct development to the right places, making the best use of resources, creating and sustaining accessible healthy communities, protecting our environment and supporting prosperity for all.
- 3.2. The requirement for a development plan to be in general conformity with the upper tier statutory development plan in Wales is set out in primary legislation. Planning Policy Wales 12 and the Development Plans Manual (March 2020) provide additional guidance on how to assess general conformity. Paragraph 2.18 of the Development Plans Manual notes that "the fact that a development plan may be inconsistent with one or more policies in the upper tier plan, either directly or through the omission of a policy/proposal, does not, by itself, mean that the plan is not in general conformity. Rather, the fundamental point is how significant the inconsistency is from the point of view of delivery of the upper tier plan". It goes on to note in paragraph 2.19 "whilst it would be acceptable for the lower tier plan to provide further detail in relation to making it more locally distinctive, it fundamentally must not undermine the overarching strategy, policies or proposals in the upper tier plan(s)". The requirement to be in general conformity with Future Wales is also a test of soundness and will be tested through the examination process.
- 3.3. The purpose of this Appendix is to demonstrate that the Monmouthshire Deposit Replacement Local Development Plan assists in the delivery of the Future Wales policies and is in general conformity with its overarching strategy.
- 3.4. The following section assesses whether the RLDP objectives and Strategic Policies set out in the RLDP are considered to be in general conformity with Future Wales Policies using the traffic light model below:

RLDP is considered to be in general conformity with the Future Wales 2040 policy objective.

RLDP is considered to make a neutral contribution to the Future Wales 2040 policy objective.

RLDP is not considered to be in general conformity with the Future Wales 2040 policy objective.

Page 1797

Future Wales Policy	Relevant RLDP Objectives and RLDP Strategic Policies	General Conformity with FW Strategy
<p>Policy 1 – Where Wales will grow</p> <p>The Welsh Government supports sustainable growth in all parts of Wales. In three National Growth Areas there will be growth in employment and housing opportunities and investment in infrastructure. The National Growth Areas are:</p> <ul style="list-style-type: none"> • Cardiff, Newport and the Valleys • Swansea Bay and Llanelli • Wrexham and Deeside <p>The National Growth Areas are complemented by Regional Growth Areas which will grow, develop and offer a variety of public and commercial services at regional scale. There are Regional Growth Areas in three regions:</p> <ul style="list-style-type: none"> • The South West • Mid Wales • The North 	<p>RLDP Objectives:</p> <p>Objective 1 – Economic Growth / Employment</p> <p>Objective 6 – Land</p> <p>Objective 9 – Demography</p> <p>Objective 10 – Housing</p> <p>Objective 12 – Communities</p> <p>Objective 13 – Rural Communities</p> <p>Preferred Strategy Strategic Policies:</p> <p>S1 – Growth Strategy</p> <p>S2 – Spatial Distribution of Development – Settlement Hierarchy</p>	<p>Monmouthshire is not identified as a growth area in Future Wales, however, the policy allows for growth in towns and villages in rural areas of an appropriate scale and to support local aspiration and need. The RLDP growth level has emerged from an understanding of the issues, challenges and needs of Monmouthshire as well as a sound, logical and robust evidence base.</p> <p>The Council has considered how best to progress the RLDP having regard to a number of challenges that have arisen following stakeholder consultation and engagement on the non-statutory stages. In response to the Preferred Strategy (Dec 2022), consultation Welsh Government formally responded with a ‘green’ rating and noting that <i>“Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not</i></p>

<p>Development and growth in towns and villages in rural areas should be of appropriate scale and support local aspirations and need.</p>	<p>S7 – Affordable Homes S8 – Site Allocations and Placemaking Principles S10 – Employment Sites Provision S13 – Sustainable Transport</p>	<p><i>undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region, but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.”</i> In this respect the overarching strategy of the Deposit Plan has been accepted as being in conformity with Future Wales by Welsh Government.</p> <p>Although Monmouthshire is not within the national growth area identified in Future Wales 2040: The National Plan, our evidence shows that the proposed level of growth is essential to deliver our local evidence-based issues and objectives and to ensure the RLDP is ‘sound’. It is supported by policies 3, 4, 5 and 7, which support public leadership and the use of public land to deliver on ambitious affordable housing targets, demographically balanced rural communities, the rural economy and the delivery of affordable homes. The growth strategy will assist in addressing our core issues without harming or compromising Welsh Government’s objectives for wider South East Wales region. On the basis of the evidence prepared to support the RLDP, is it considered the level and distribution of growth proposed is of an appropriate scale to specifically address local aspirations and needs.</p>
---	---	---

<p>Policy 2 – Shaping Urban Growth and Regeneration – Strategic Placemaking</p> <p>The growth and regeneration of towns and cities should positively contribute towards building sustainable places that support active and healthy lives, with urban neighbourhoods that are compact and walkable, organised around mixed-use centres and public transport, and integrated with green infrastructure.</p> <p>Urban growth and regeneration should be based on the following strategic placemaking principles:</p> <ul style="list-style-type: none"> • creating a rich mix of uses; • providing a variety of housing types and tenures; • building places at a walkable scale, with homes, local facilities and public transport within walking distance of each other; • increasing population density, with development built at urban densities that can support public transport and local facilities; • establishing a permeable network of streets, with a hierarchy that informs the nature of development; • promoting a plot-based approach to development, which provides opportunities for the development of small plots, including for custom and self-builders; and • integrating green infrastructure, informed by the planning authority’s Green Infrastructure Assessment. 	<p>RLDP Objectives:</p> <p>Objective 3 – Green Infrastructure, Biodiversity and Landscape</p> <p>Objective 8- Health and Well-being</p> <p>Objective 11 – Placemaking</p> <p>Objective 12 – Communities</p> <p>Objective 13 – Rural Communities</p> <p>Objective 15 – Accessibility</p> <p>Objective 16 – Culture, Heritage and Welsh Language</p> <p>RLDP Strategic Policies:</p> <p>S3 – Sustainable Placemaking and High-Quality Design</p> <p>S5 – Green infrastructure, Landscape and Nature Conservation</p> <p>S8 – Site Allocation Placemaking Principles</p> <p>S13 – Sustainable Transport</p>	<p>The Strategic Policy Framework supported by detailed policies, seeks to ensure development contributes to the creation of sustainable places that focus on delivering placemaking and ensuring Monmouthshire’s communities are sustainable in the long terms and are attractive places to live, work and visit.</p> <p>The policy framework set out in the Deposit Plan is considered to reflect the policy objectives of the Future Wales policy and provide the basis to make a significant contribution to placemaking objectives at the local level within Monmouthshire.</p> <p>The Deposit Plan focuses growth on the four primary settlements of Abergavenny, Caldicot (including Severnside), Monmouth and, to a lesser extent, Chepstow. The Strategy identifies four Strategic Development Sites which will deliver sustainable and well-connected urban extensions. The sites will have good walking and cycling links to the respective town centres and railway stations and public transport links. The larger Abergavenny and Caldicot sites will deliver a mix of uses and amenities on site. Input from the Design Commission for Wales has also helped shape the progression of the Strategic sites and identify key placemaking parameters.</p> <p>In addition, a range of other housing sites are allocated throughout the County in our most</p>
--	--	--

<p>Planning authorities should use development plans to establish a vision for each town and city. This should be supported by a spatial framework that guides growth and regeneration, and establishes a structure within which towns and cities can grow, evolve, diversify and flourish over time.</p>	<p>S15 – Community and Recreation Facilities</p>	<p>sustainable settlements as identified by the Sustainable Settlement Appraisal. All residential allocations must comply with Policy S8 – Site Allocation Placemaking Principles and site-specific requirements which are set out in individual site allocation policies. Overall, the RLDP is considered to be in conformity with the principles set out in Policy 2 of Future Wales.</p>
<p>Policy 3 – Supporting Urban Growth and Regeneration – Public Sector Leadership</p> <p>The Welsh Government will play an active, enabling role to support the delivery of urban growth and regeneration. The Welsh Government will assemble land, invest in infrastructure and prepare sites for development. We will work with local authorities and other public sector bodies to unlock the potential of their land and support them to take an increased development role.</p> <p>The public sector must show leadership and apply placemaking principles to support growth and regeneration for the benefit of communities across Wales.</p> <p>The public sector’s use of land, developments, investments and actions must build sustainable places that improve health and well-being.</p>	<p>RLDP Objectives:</p> <p>Objective 1 – Economic Growth / Employment</p> <p>Objective 10 – Housing</p> <p>Objective 11 – Placemaking</p> <p>Objective 14 – Infrastructure</p> <p>RLDP Strategic Policies:</p> <p>S1 – Growth Strategy</p> <p>S2 – Spatial Distribution of Development – Settlement Hierarchy</p> <p>S3 – Sustainable Placemaking & High-Quality Design</p>	<p>The Deposit Plan policy framework establishes the direction for the RLDP to ensure sustainable growth in the County, embodying the principles set out in the Community and Corporate Plan of tackling inequality, protecting our environment and adapting to a world being reshaped by climate change. Monmouthshire County Council recognise the significant role it must play in providing public leadership in achieving this aim.</p> <p>To deliver on these key objectives sites allocated in the RLDP have been required to demonstrate that they are viable and deliverable, having regard to the Council’s commitment for 50% affordable housing provision on new site allocations, the requirement for net zero carbon homes and associated infrastructure to ensure the development is sustainable and well-connected. This commitment could have financial implications for the Council of reduced land sale receipts. It may also</p>

<p>Planning authorities must take a proactive role and work in collaboration with the Welsh Government and other public sector bodies to identify the best locations for growth and regeneration, and provide certainty about how they should be developed.</p>	<p>S5 – Green Infrastructure, Landscape and Nature Recovery S6 – Infrastructure Provision S7– Affordable Homes S8 – Site Allocation Placemaking Principles S12 – Employment Sites Provision</p>	<p>require Welsh Government policy position changes on use of Social Housing Grant of other public funding. The suggested approaches are supported by Policy 3 of FW which supports public leadership and the use of public land to deliver on ambitious affordable housing targets. One of the Strategic Site Allocations is promoted by a Registered Social Landlord, and another extends onto Council-owned land offering opportunities to deliver affordable housing in a different way.</p>
<p>Policy 4 – Supporting Rural Communities</p> <p>The Welsh Government supports sustainable and vibrant rural communities.</p> <p>Strategic and Local Development Plans must identify their rural communities, assess their needs and set out policies that support them. Policies should consider how age balanced communities can be achieved, where depopulation should be reversed and consider the role of new affordable and market housing, employment opportunities, local services and greater mobility in tackling these challenges.</p>	<p>RLDP Objectives:</p> <p>Objective 1 – Economic Growth / Employment Objective 8 – Health and Well-being Objective 9 – Demography Objective 10 – Housing Objective 11 – Placemaking Objective 12 – Communities Objective 13 – Rural communities Objective 16 – Culture, Heritage and Welsh Language</p> <p>RLDP Strategic Policies:</p>	<p>The issues identified in Policy 4 of Future Wales are directly related to the issues and challenges that the Monmouthshire RLDP is seeking to address. The RLDP proposes a level and distribution of growth that provides the opportunity to address the County’s key issues/challenges including an unbalanced demography, improve labour force retention and out-commuting rates and assist in the County’s housing affordability challenge. In this respect the Deposit Plan is considered to offer a significant contribution to achieving the objectives of Policy 4 of Future Wales whilst also being the most conducive to achieving the RLDP vision and the Council’s core purpose of building sustainable and resilient communities across Monmouthshire.</p>

	<p>S1 – Growth Strategy</p> <p>S2 – Spatial Distribution of Development – Settlement Hierarchy</p> <p>S3 – Sustainable Placemaking & High-Quality Design</p> <p>S7 – Affordable Homes</p> <p>S11 – Rural Enterprise</p> <p>S12 – Visitor Economy</p> <p>S13 – Sustainable Transport</p>	
<p>Policy 5 – Supporting the rural economy</p> <p>The Welsh Government supports sustainable, appropriate and proportionate economic growth in rural towns that is planned and managed through Strategic and Local Development Plans.</p> <p>Strategic and Local Development Plans must plan positively to meet the employment needs of rural areas including employment arising from the foundational economy; the agricultural and forestry sector, including proposals for diversification; start-ups and micro businesses.</p> <p>The Welsh Government also strongly supports development of innovative and emerging technology businesses and sectors to help rural areas unlock their</p>	<p>Objective 1 – Economic Growth / Employment</p> <p>Objective 9 – Demography</p> <p>Objective 11 – Placemaking</p> <p>Objective 12 – Communities</p> <p>Objective 13 – Rural Communities</p> <p>Objective 16 – Culture, Heritage and Welsh Language</p> <p>RLDP Strategic Policies:</p> <p>S1 – Growth Strategy</p>	<p>A significant issue for Monmouthshire is the need to sustain and regenerate the County’s rural economy consistent with the policy aims of Policy 5 of Future Wales. The Deposit Plan provides the policy framework to allow for an appropriate amount of diversification and enterprise in rural areas as well as the infrastructure both physical and digital to facilitate this. The Plan also recognises the role the agricultural and forestry, tourism and leisure sectors play in Monmouthshire’s economy and seeks to facilitate their growth at an appropriate scale. The Plan is supplemented by a range of employment/economy-based evidence including the Economy, Employment and Skill Strategy.</p>

<p>full potential, broadening the economic base, and creating higher paid jobs.</p>	<p>S2 – Spatial Distribution of Development – Settlement Hierarchy S3 – Sustainable Placemaking & High-Quality Design S6 – Infrastructure S10 – Employment Sites Provision S11 – Rural Enterprise S12 – Visitor Economy</p>	
<p>Policy 6 – Town Centre First Significant new commercial, retail, education, health, leisure and public service facilities must be located within town and city centres. They should have good access by public transport to and from the whole town or city and, where appropriate, the wider region. A sequential approach must be used to inform the identification of the best location for these developments and they should be identified in Strategic and Local Development Plans.</p>	<p>RLDP Objectives: Objective 1 – Economic Growth / Employment Objective 2 – Town and Local Centres Objective 11 – Placemaking Objective 12 – Communities Objective 13 Rural Communities Objective 15 – Accessibility</p> <p>RLDP Strategic Policies: S1 – Growth Strategy</p>	<p>In accordance with PPW12 the Deposit Plan sets out the town centre hierarchy for Monmouthshire with a view to sustaining and enhancing the County’s main towns as vibrant and attractive centres and to maintain their essential functions as attractive places to live and visit and provide a valuable role in meeting the needs of local communities. The hierarchy assists the implementation of the sequential approach and town centre first principle by directing retail, commercial and social developments, including leisure, cultural and entertainment uses to the appropriate position in the hierarchy.</p> <p>The Monmouthshire Town Centre / Retail Study (2024) which includes an update of retail expenditure forecasts confirms that there will be more limited expenditure growth available to support shop</p>

	<p>S2 – Spatial Distribution of Development – Settlement Hierarchy</p> <p>S3 – Sustainable Placemaking & High-Quality Design</p> <p>S14 – Town, Local and Neighbourhood Centres</p>	<p>floorspace within Monmouthshire centre than previously forecast. In this respect, the RLDP therefore does not make any new retail allocations.</p>
<p>Policy 7 – Delivering Affordable Homes</p> <p>The Welsh Government will increase delivery of affordable homes by ensuring that funding for these homes is effectively allocated and utilised.</p> <p>Through their Strategic and Local Development Plans planning authorities should develop strong evidence based policy frameworks to deliver affordable housing, including setting development plan targets based on regional estimates of housing need and local assessments. In response to local and regional needs, planning authorities should identify sites for affordable housing led developments and explore all opportunities to increase the supply of affordable housing.</p>	<p>RLDP Objectives:</p> <p>Objective 1 – Economic Growth / Employment</p> <p>Objective 6 – Land</p> <p>Objective 9 – Demography</p> <p>Objective 10 – Housing</p> <p>Objective 12 – Communities</p> <p>Objective 13 – Rural Communities</p> <p>Preferred Strategy Strategic Policies:</p> <p>S1 – Growth Strategy</p> <p>S2 – Spatial Distribution of Development – Settlement Hierarchy</p> <p>S7 – Affordable Homes</p>	<p>Tackling affordability issues in Monmouthshire’s housing market has been identified as a key challenge to address through the RLDP process and is a key driver behind the Plan’s overarching Strategy. Accordingly, the Deposit Plan establishes a policy framework that seeks to address this through an affordable housing target of up to 2,000 affordable homes, establishing affordable housing percentage thresholds within Strategic Policy S7 and requiring 50% affordable housing on new site allocations. Additional opportunities to increase the supply of affordable housing through a housing mix policy and an affordable housing exceptions sites policy have also been incorporated in the Plan.</p> <p>As noted in relation to Policy 3, Monmouthshire County Council recognise the significant role it must play in providing public leadership in achieving this aim as well as the role the RLDP plays. The RLDP sets out the Council’s commitment for 50% affordable housing provision on new site allocations. This</p>

	<p>S8 – Site Allocation Placemaking Principles</p>	<p>commitment could have financial implications for the Council of reduced land sale receipts. It may also require Welsh Government policy position changes on use of Social Housing Grant or other public funding. The suggested approaches are supported by Policy 3 of FW which supports public leadership and the use of public land to deliver on ambitious affordable housing targets.</p> <p>The latest Local Housing Market Assessment (LHMA) (May 2024) provides the evidence base on affordable housing matters within the RLDP.</p>
<p>Policy 8 – Flooding</p> <p>Flood risk management that enables and supports sustainable strategic growth and regeneration in National and Regional Growth Areas will be supported.</p> <p>The Welsh Government will work with Flood Risk Management Authorities and developers to plan and invest in new and improved infrastructure, promoting nature-based solutions as a priority. Opportunities for multiple social, economic and environmental benefits must be maximised when investing in flood risk management infrastructure. It must be ensured that projects do not have adverse impacts on international and national statutory designated sites for nature conservation and the features for which they have been designated.</p>	<p>RLDP Objectives:</p> <p>Objective 3- Green Infrastructure, Biodiversity and Landscape</p> <p>Objective 4 – Flood Risk</p> <p>Objective 6 – Land</p> <p>Objective 7 – Natural Resources</p> <p>Objective 17 – Climate and Nature Emergency</p> <p>RLDP Strategic Policies:</p> <p>S4 – Climate Change</p>	<p>The Deposit Plan is underpinned by Objective 4 which seeks to ensure that new development takes account of the risk of flooding, both existing and in the future, including the need to avoid inappropriate development in areas that are at risk from flooding or that may increase the risk of flooding elsewhere and the need to design development, including the use of natural flood management measures to appropriately manage flood risk and surface water run-off.</p> <p>Policy S4 of the Plan makes a policy commitment to avoid locating development in areas at risk of flooding, or where appropriate, minimise the risk of flooding including the incorporation of measures such as Sustainable Drainage Systems and flood resilience design. In accordance with the updated TAN15, a</p>

	<p>S5 – Green Infrastructure, Landscape and Nature Conservation</p>	<p>Strategic Flood Consequence Assessment (SFCA) along with other Planning Authorities in the South-East Wales region, has been undertaken to inform the preparation of the RLDP and the site allocation process.</p> <p>The RLDP also recognises the significant role Green Infrastructure plays in flood attenuation and water resource management and managing and enhancing biodiversity and ecosystems resilience.</p>
<p>Policy 9 – Resilient Ecological Networks and Green Infrastructure</p> <p>To ensure the enhancement of biodiversity, the resilience of ecosystems and the provision of green infrastructure, the Welsh Government will work with key partners to:</p> <ul style="list-style-type: none"> • identify areas which should be safeguarded and created as ecological networks for their importance for adaptation to climate change, for habitat protection, restoration or creation, to protect species, or which provide key ecosystems services, to ensure they are not unduly compromised by future development; and • identify opportunities where existing and potential green infrastructure could be maximised as part of placemaking, requiring the use of nature-based solutions as a key mechanism for securing sustainable growth, ecological connectivity, social equality and well-being. 	<p>RLDP Objectives:</p> <p>Objective 3- Green Infrastructure, Biodiversity and Landscape</p> <p>Objective 4 – Flood Risk</p> <p>Objective 6 – Land</p> <p>Objective 7 – Natural Resources</p> <p>Objective 8 – Health and Well-being</p> <p>Objective 17 – Climate and Nature Emergency</p> <p>RLDP Strategic Policies:</p> <p>S4 – Climate Change</p>	<p>Monmouthshire has significant green infrastructure, landscape, biodiversity and nature conservation resources. The need to protect and enhance these resources is a key focus of the RLDP, recognising the multifunctional role it has in delivering active travel, placemaking, ecosystem resilience, climate change mitigation and improving general health and well-being.</p> <p>The Council has prepared the Monmouthshire Green Infrastructure Strategy (2019), which has also informed the evidence base of the SE Wales Area Statement. This provides an overarching framework for positive actions by all stakeholders involved in the future protection, management and enhancement of green infrastructure in Monmouthshire and sets out key strategic objectives and priorities for guiding the</p>

<p>Planning authorities should include these areas and/or opportunities in their development plan strategies and policies in order to promote and safeguard the functions and opportunities they provide. In all cases, action towards securing the maintenance and enhancement of biodiversity (to provide a net benefit), the resilience of ecosystems and green infrastructure assets must be demonstrated as part of development proposals through innovative, nature-based approaches to site planning and the design of the built environment.</p>	<p>S5 – Green Infrastructure, Landscape and Nature Conservation</p> <p>S8 – Site Allocation Placemaking Principles</p>	<p>planning management and delivery of green infrastructure in Monmouthshire.</p> <p>Section 5 of the RLDP also sets out the policy requirements relating to ecological resilience and green infrastructure with site specific requirements set out in policy S8 – Site Allocation Placemaking Principles and site-specific requirements set out in policies HA1 – HA18.</p>
<p>Policy 10 – International Connectivity</p> <p>The Welsh Government identifies the following Strategic Gateways to facilitate international connectivity:</p> <ul style="list-style-type: none"> • Cardiff Airport • Holyhead Port • Haven Waterway, including the Ports of Milford Haven and Pembroke Dock • Fishguard Port <p>The Welsh Government will work with the operators, investors and local authorities to support Strategic Gateways and maintain their international connectivity roles.</p> <p>Strategic and Local Development Plans should support the Strategic Gateways by maximising the benefits they provide to their respective regions and Wales.</p>		<p>There are no Strategic Gateways to facilitate international connectivity identified in the Monmouthshire boundary. The RLDP is therefore considered to have a neutral impact on the achieving the Future Wales policy.</p>

<p>New development around the Strategic Gateways should be carefully managed to ensure their operation is not constrained or compromised.</p>		
<p>Policy 11 – National Connectivity</p> <p>The Welsh Government will support and invest in improving national connectivity. Our priorities are to encourage longer-distance trips to be made by public transport, while also making longer journeys possible by electric vehicles. The Welsh Government will work with Transport for Wales, local authorities, operators and partners to support the delivery of the following measures to improve national connectivity:</p> <ul style="list-style-type: none"> • Rail Network – Transform the rail network and improve the quality of rail services for passengers. • Bus Network – Invest in the development of the national bus network, fully integrated with regional and local bus networks, to increase modal share of bus travel and improve access by bus to a wider range of trip destinations. • Strategic Road Network – Invest in road improvements to reduce journey times, deliver a safer and more resilient road network, and improve air and noise quality. Create a network of rapid-charging points to enable longer distance travel by electric vehicles throughout Wales. • National Cycle Network – Revitalise the National Cycle Network to create a network of traffic-free 	<p>RLDP Objectives:</p> <p>Objective 14 – Infrastructure</p> <p>Objective 15 – Accessibility</p> <p>Objective 17 – Climate and Nature Emergency</p> <p>RLDP Strategic Policies:</p> <p>S4 – Climate Change</p> <p>S6 – Infrastructure Provision</p> <p>S8 – Site Allocation Placemaking Principles</p> <p>S13 – Sustainable Transport</p>	<p>The Deposit Plan seeks to promote sustainable forms of transport, reduce the need to travel, increase provision for walking and cycling and improve public transport provision. The spatial strategy of the RLDP is to focus development in those locations that provide the best opportunities for achieving sustainable development, which offer a choice of transport modes and contribute towards the development of a sustainable transport network and provide opportunities to enhance and connect to the Active Travel Networks.</p> <p>Enhancing the use of ultra-low emission vehicles through the provision of sufficient charging infrastructure is also recognised as a key contributor to improving sustainable national connectivity given Monmouthshire’s rural character and is a requirement of Policy S4 – Climate Change.</p> <p>The RLDP promotes the sustainable transport hierarchy and requires new developments to incorporate new links to facilitate movement by non-car methods. However, Monmouthshire is predominantly a rural County and as set out in FW Policy 5, it is recognised that there are significant</p>

<p>paths connecting cities, towns and countryside across Wales.</p> <p>Planning authorities should support developments associated with improvements to national connectivity and, where appropriate, maximise the opportunities that arise from them.</p> <p>Planning authorities must ensure that, where appropriate, new development contributes towards the improvement and development of the National Cycle Network and key links to and from it.</p>		<p>disparities between urban areas with regard to the feasibility of delivering effective public transport systems and active travel routes. Development proposals in rural areas of Monmouthshire should therefore demonstrate innovative solutions to connect rural locations to services and facilities.</p> <p>The RLDP will also seek to facilitate the Monmouthshire specific recommendations of the South East Wales Transport Commission Final Recommendations Plan 2020, which recommends the enhancement of the Severn Tunnel Junction rail station and access arrangements, and development of a walkway station at Magor and Undy.</p> <p>The RLDP has therefore planned for strategic development with Monmouthshire’s most sustainable locations that have opportunities and potential to connect and link with regional travel aspirations and plans, in particular identified opportunities at Severn Tunnel Junction and the South East Wales Metro scheme. The identified Strategic Site Allocations of Land to the East of Abergavenny, Mounton Road in Chepstow, Leasbrook in Monmouth and Land to the East of Caldicot will be linked to the town centre and railway stations (where relevant) via active travel connections. Site specific allocation policies have set out key placemaking and active travel requirements.</p>
---	--	---

		<p>An updated Monmouthshire Local Transport Plan taking account of recent key evidence including the South East Wales Transport Commission Final Recommendations Plan: November 2020 and South East Metro has been prepared alongside the preparation of the Deposit Plan. The RLDP supports the transport schemes identified within the updated LTP, and where appropriate, safeguards land for key transport proposals.</p>
<p>Policy 12 – Regional Connectivity</p> <p>The Welsh Government will support and invest in improving regional connectivity. In urban areas, to support sustainable growth and regeneration, our priorities are improving and integrating active travel and public transport. In rural areas our priorities are supporting the uptake of ultra-low emission vehicles and diversifying and sustaining local bus services.</p> <p>The Welsh Government will work with Transport for Wales, local authorities, operators and partners to deliver the following measures to improve regional connectivity:</p> <ul style="list-style-type: none"> Active Travel – Prioritising walking and cycling for all local travel. We will support the implementation of the Active Travel Act to create comprehensive networks of local walking and cycling routes that connect places that people need to get to for everyday purposes. 	<p>RLDP Objectives:</p> <p>Objective 14 – Infrastructure</p> <p>Objective 15 – Accessibility</p> <p>Objective 17 – Climate and Nature Emergency</p> <p>RLDP Strategic Policies:</p> <p>S4 – Climate and Nature Emergency</p> <p>S6 – Infrastructure Provision</p> <p>S8 – Site Allocation Placemaking Principles</p> <p>S13 – Sustainable Transport</p>	<p>The Deposit Plan seeks to promote sustainable forms of transport, reduce the need to travel, increase provision for walking and cycling and improve public transport provision. The spatial strategy of the RLDP aims to focus development in those locations that provide the best opportunities for achieving sustainable development, which offer a choice of transport modes and contribute towards the development of a sustainable transport network and provide opportunities to enhance and connect to the Active Travel Networks. Enhancing the use of ultra-low emission vehicles through the provision of sufficient charging infrastructure is also recognised as a key contributor to improving sustainable national connectivity given Monmouthshire’s rural character and is a requirement of Policy S4 – Climate Change.</p>

- Bus – Improve the legislative framework for how local bus services are planned and delivered. We will invest in the development of integrated regional and local bus networks to increase modal share of bus travel and improve access by bus to a wider range of trip destinations.
- Metros – Develop the South East Metro, South West Metro and North Wales Metro. We will create new integrated transport systems that provide faster, more frequent and joined-up services using trains, buses and light rail.
- Ultra-Low Emission Vehicles – Support the roll-out of suitable fuelling infrastructure to facilitate the adoption of ultra-low emission vehicles, particularly in rural areas.

Planning authorities must plan the growth and regeneration of the National and Regional Growth Areas to maximise opportunities arising from the investment in public transport, including identifying opportunities for higher density, mixed-use and car-free development around metro stations.

Active travel must be an essential and integral component of all new developments, large and small. Planning authorities must integrate site allocations, new development and infrastructure with active travel networks and, where appropriate, ensure new development contributes towards their expansion and improvement.

As noted above the RLDP will also seek to facilitate the Monmouthshire specific recommendations of the 'South East Wales Transport Commission Final Recommendations Plan 2020, which recommends the enhancement of the Severn Tunnel Junction rail station and access arrangements, and development of a walkway station at Magor and Undy. It will also plan for strategic development with Monmouthshire's most sustainable locations that have opportunities and potential to connect and link with regional travel aspirations and plans, in particular identified opportunities at Severn Tunnel Junction and the South East Wales Metro scheme. The identified Strategic Site Allocations of Land to the East of Abergavenny, Mounton Road in Chepstow, Leasbrook in Monmouth and Land to the East of Caldicot will be linked to the town centre and railway stations (where relevant) via active travel connections. Site specific allocation policies have set out key placemaking and active travel requirements.

An updated Monmouthshire Local Transport Plan taking account of recent key evidence including the South East Wales Transport Commission Final Recommendations Plan: November 2020 and South East Metro has been prepared alongside the Deposit Plan. The RLDP supports the transport schemes in identified within the updated LTP, and where

<p>Planning authorities must act to reduce levels of car parking in urban areas, including supporting car-free developments in accessible locations and developments with car parking spaces that allow them to be converted to other uses over time. Where car parking is provided for new non-residential development, planning authorities should seek a minimum of 10% of car parking spaces to have electric vehicle charging points.</p>		<p>appropriate, safeguards land for key transport proposals.</p>
<p>Policy 13 – Supporting Digital Communications</p> <p>The Welsh Government supports the provision of digital communications infrastructure and services across Wales.</p> <p>Planning authorities must engage with digital infrastructure providers to identify the future needs of their area and set out policies in Strategic and Local Development Plans to help deliver this.</p> <p>New developments should include the provision of Gigabit capable broadband infrastructure from the outset.</p>	<p>RLDP Objectives: Objective 14- Infrastructure</p> <p>RLDP Strategic Policies: S6 – Infrastructure Provision</p>	<p>Given Monmouthshire’s rural character, the RLDP recognises the importance of ensuring the provision of adequate digital infrastructure to enhancing the County’s economic and community connectivity and communication needs and reducing the need to travel.</p>
<p>Policy 14 – Planning in Mobile Action Zones</p> <p>The Welsh Government supports increased mobile phone coverage and the associated economic and social benefits it brings.</p> <p>The Welsh Government will identify Mobile Action Zones, showing locations where there is little or no mobile telecommunications coverage.</p>	<p>RLDP Objectives: Objective 14- Infrastructure</p> <p>RLDP Strategic Policies: S6 – Infrastructure Provision</p>	<p>Future Wales does not identify the Mobile Action Zones at this stage. The RLDP is therefore considered to have a neutral impact on achieving the policy aims. This will be reviewed once the Mobile Action Zones are published.</p>

<p>The Welsh Government, planning authorities and mobile telecommunications operators must work together to achieve increases in mobile coverage within Mobile Action Zones.</p>		
<p>Policy 15 – National Forest</p> <p>The Welsh Government is committed to developing a national forest through the identification of appropriate sites and mechanisms. Action to safeguard proposed locations for the national forest will be supported.</p>	<p>RLDP Objectives:</p> <p>Objective 3- Green Infrastructure, Biodiversity and Landscape</p> <p>Objective 4 – Flood Risk</p> <p>Objective 6 – Land</p> <p>Objective 7 – Natural Resources</p> <p>Objective 8 – Health and Well-being</p> <p>Objective 17 – Climate and Nature Emergency</p> <p>RLDP Strategic Policies:</p> <p>S4 – Climate Change</p> <p>S5 – Green Infrastructure, Landscape and Nature Conservation</p>	<p>Future Wales does not identify the location(s) of the proposed national forest. However, Welsh Government identify 14 National Forest Sites that are part of its estate and managed and maintained by Natural Resources Wales, two of which are within Monmouthshire’s boundary – Wentwood Forest and Wye Valley Woodlands. Work is ongoing by Welsh Government to identify additional sites. Policy S5 of the Deposit is supportive of protecting and enhancing Green Infrastructure assets within the County consistent with the aims of Policy 15 of FW.</p>
<p>Policy 16 – Heat Networks</p>	<p>RLDP Objectives:</p> <p>Objective 17 – Climate and Nature Emergency</p>	<p>There are no Priority Areas for District Heat Networks identified within the Monmouthshire boundary within Future Wales. The RLDP does, however, establish the</p>

<p>Within Priority Areas for District Heat Networks planning authorities should identify opportunities for District Heat Networks and plan positively for their implementation.</p> <p>Large scale mixed-use development should, where feasible, have a heat network with a renewable / low carbon or waste heat energy source. Planning applications for such development should prepare an Energy Masterplan to establish whether a heat network is the most effective energy supply option and, for feasible projects, a plan for its implementation.</p>	<p>RLDP Strategic Policies:</p> <p>S4 – Climate Change</p> <p>S8 – Site Allocation Placemaking Principles</p>	<p>policy framework requiring residential developments to be built to net zero carbon standards, including the requirement to not connect to the gas grid and heating to be provided through low carbon heating systems. Similarly, the RLDP supports the development of renewable and low/zero carbon energy generation in principle and has allocated a potential ground mounted solar development.</p> <p>A Renewable and Low Carbon Energy Assessment (RLCEA) of the potential for renewable energy generation, using the Welsh Government Toolkit, has been undertaken and informed the Deposit Plan in terms of its policy approach in relation to local search areas for the potential for types of renewable and low/zero carbon energy and renewable energy targets. The assessment reviews the potential for District Heat Networks in Monmouthshire and concludes that there is very little potential for financially viable traditional heat networks (50 kWh/m² and greater). This corresponds with the Welsh Government’s heat mapping for Future Wales.</p>
<p>Policy 17 – Renewable and Low Carbon Energy and Associated Infrastructure</p> <p>The Welsh Government strongly supports the principle of developing renewable and low carbon energy from all technologies and at all scales to meet our future energy needs.</p>	<p>RLDP Objectives:</p> <p>Objective 17 – Climate and Nature Emergency</p> <p>RLDP Strategic Policies:</p> <p>S4 – Climate Change</p>	<p>There are no Pre-Assessed Areas for Wind Energy within the Monmouthshire boundary within Future Wales. Consistent with Policy 17 of Future Wales the RLDP does, however, establish the policy framework for developing renewable and low carbon energy from all technologies through Strategic Policy S4 – Climate Change and associated detailed policies. An assessment of the potential for renewable energy</p>

In determining planning applications for renewable and low carbon energy development, decision-makers must give significant weight to the need to meet Wales' international commitments and our target to generate 70% of consumed electricity by renewable means by 2030 in order to combat the climate emergency.

In Pre-Assessed Areas for Wind Energy the Welsh Government has already modelled the likely impact on the landscape and has found them to be capable of accommodating development in an acceptable way. There is a presumption in favour of large-scale wind energy development (including repowering) in these areas, subject to the criteria in policy 18.

Applications for large-scale wind and solar will not be permitted in National Parks and Areas of Outstanding Natural Beauty and all proposals should demonstrate that they will not have an unacceptable adverse impact on the environment.

Proposals should describe the net benefits the scheme will bring in terms of social, economic, environmental and cultural improvements to local communities.

New strategic grid infrastructure for the transmission and distribution of energy should be designed to minimise visual impact on nearby communities. The Welsh Government will work with stakeholders, including National Grid and Distribution Network Operators, to transition to a multi-vector grid network and reduce the barriers to the implementation of new grid infrastructure.

generation, using the Welsh Government Toolkit, has been undertaken and informed the Deposit Plan's approach to the identification of local search areas for different types of renewable and low/zero carbon energy. Consistent with FW, the Renewable and Low Carbon Energy Assessment (RLCEA) concludes that there is limited wind resource in Monmouthshire. It does, however, identify significant solar resource. However, this resource is reduced significantly when Best and Most Versatile Agricultural Land is excluded, with the remaining 'less constrained' areas being sparse, distinct land parcels distributed throughout the County rather than broad areas. Therefore, given the prevalence of high-quality agricultural land in the County, the RLDP does not allocate Local Search Areas for either wind or solar, it does, however, include a criteria-based policy to determine proposals on a site-by-site basis. The findings of the RLCEA have also been used to inform the RLDP renewable energy generation targets. The Plan also allocates a potential ground mounted solar development.

Policy 18 – Renewable and Low Carbon Energy Developments of National Significance

Proposals for renewable and low carbon energy projects (including repowering) qualifying as Developments of National Significance will be permitted subject to policy 17 and the following criteria:

1. outside of the Pre-Assessed Areas for wind developments and everywhere for all other technologies, the proposal does not have an unacceptable adverse impact on the surrounding landscape (particularly on the setting of National Parks and Areas of Outstanding Natural Beauty);
2. there are no unacceptable adverse visual impacts on nearby communities and individual dwellings;
3. there are no adverse effects on the integrity of Internationally designated sites (including National Site Network sites and Ramsar sites) and the features for which they have been designated (unless there are no alternative solutions, Imperative Reasons of Overriding Public Interest (IROPI) and appropriate compensatory measures have been secured);
4. there are no unacceptable adverse impacts on national statutory designated sites for nature conservation (and the features for which they have been designated), protected habitats and species;
5. the proposal includes biodiversity enhancement measures to provide a net benefit for biodiversity;

Policy 18 of Future Wales sets out the criteria Welsh Government will use to assess renewable and low carbon energy developments of national significance. The RLDP is therefore considered to have a neutral impact on its delivery as it is not Monmouthshire’s policy framework being used to determine the proposals.

As noted above, an assessment of the potential for renewable energy generation, using the Welsh Government Toolkit, has been undertaken and informed the Deposit Plan’s approach to the identification of local search areas for different types of renewable and low/zero carbon energy. Consistent with FW, the Renewable and Low Carbon Energy Assessment (RLCEA) concludes that there is limited wind resource in Monmouthshire. It does, however, identify significant solar resource. However, this resource is reduced significantly when Best and Most Versatile Agricultural Land is excluded, with the remaining ‘less constrained’ areas being sparse, distinct land parcels distributed throughout the County rather than broad areas. Therefore, given the prevalence of high-quality agricultural land in the County, the RLDP does not allocate Local Search Areas for either wind or solar, it does, however, include a criteria-based policy to determine proposals on a site-by-site basis. The findings of the RLCEA have also been used to inform the RLDP renewable energy

<p>6. there are no unacceptable adverse impacts on statutorily protected built heritage assets;</p> <p>7. there are no unacceptable adverse impacts by way of shadow flicker, noise, reflected light, air quality or electromagnetic disturbance;</p> <p>8. there are no unacceptable impacts on the operations of defence facilities and operations (including aviation and radar) or the Mid Wales Low Flying Tactical Training Area (TTA-7T);</p> <p>9. there are no unacceptable adverse impacts on the transport network through the transportation of components or source fuels during its construction and/or ongoing operation;</p> <p>10. the proposal includes consideration of the materials needed or generated by the development to ensure the sustainable use and management of resources;</p> <p>11. there are acceptable provisions relating to the decommissioning of the development at the end of its lifetime, including the removal of infrastructure and effective restoration.</p> <p>The cumulative impacts of existing and consented renewable energy schemes should also be considered.</p>		<p>generation targets. The Plan also allocates a potential ground mounted solar development.</p>
<p>Policy 19 – Strategic Policies for Regional Planning</p> <p>Strategic Development Plans should embed placemaking as an overarching principle and should establish for the</p>	<p>RLDP Objectives:</p> <p>Objective 1 – Economic Growth / Employment</p> <p>Objective 5 – Minerals and Waste</p>	<p>A Strategic Development Plan for the South East Wales region is yet to commence. However, the preparation of the RLDP has involved a regional and coordinated approach to the collection of evidence including a Regional Assessment of Future Growth and Migration</p>

<p>region (and where required constituent Local Development Plans):</p> <ol style="list-style-type: none"> 1. a spatial strategy; 2. a settlement hierarchy; 3. the housing provision and requirement; 4. the gypsy and traveller need; 5. the employment provision; 6. the spatial areas for strategic housing, employment growth and renewable energy; 7. the identification of green belts, green corridors and nationally important landscapes where required; 8. the location of key services, transport and connectivity infrastructure; 9. a framework for the sustainable management of natural resources and cultural assets; 10. ecological networks and opportunities for protecting or enhancing the connectivity of these networks and the provision of green infrastructure; and 11. a co-ordinated framework for minerals extraction and the circular economy, including waste treatment and disposal. <p>The Welsh Government requires the adoption of Strategic Development Plans in the North, Mid Wales, South West and South East regions.</p>	<p>Objective 7 – Natural Resources Objective 10 – Housing Objective 14 – Infrastructure</p> <p>RLDP Strategic Policies:</p> <p>S1 – Growth Strategy S2 – Spatial Distribution of Development – Settlement Hierarchy S6 – Infrastructure Provision S7 – Affordable Housing S8 – Site Allocation Placemaking Principles S9 – Gypsy and Travellers S10 – Employment Sites Provision S13 – Sustainable Transport S16- Minerals S17 – Sustainable Waste Management</p>	<p>for the Cardiff Capital Region (CCR), commissioned on behalf of local authorities in the South East Wales region.</p> <p>Further evidence has been approached with a regionally agreed methodology including population projection modelling, regional employment study, Renewable and Low Carbon Energy Assessment and Integrated Sustainability Assessment and Habitats Regulations Assessment. This has provided a consistent and comparable approach to methodologies and a basis to consider the evidence and any implications on a more regional basis as well as at a local level. Similarly, a number of jointly commissioned pieces of evidence have also informed the RLDP including a Development Viability Model and a Strategic Flood Consequence Assessment. Long standing regional working methods associated with areas such as waste and minerals are continued and reflected in the Plan.</p> <p>This regional approach to many of the policy areas covered in the RLDP will provide a substantial evidence base for the preparation of the South East Wales SDP.</p>
---	---	--

<p>Policy 33 – National Growth Area – Cardiff, Newport and the Valleys</p> <p>Cardiff, Newport and the Valleys will be the main focus for growth and investment in the South East region.</p> <p>Strategic and Local Development Plans should recognise the National Growth Area as the focus for strategic economic and housing growth; essential services and facilities; advanced manufacturing; transport and digital infrastructure.</p> <p>The Welsh Government will work with regional bodies and local authorities in the region and in neighbouring regions of England to promote and enhance Cardiff, Newport and the Valleys’ strategic role and ensure key investment decisions support places in the National Growth Area and the wider region.</p> <p>The Welsh Government supports Cardiff’s status as an internationally competitive city and a core city on the UK stage. Cardiff will retain and extend its role as the primary national centre for culture, sport, leisure, media, the night time economy and finance.</p> <p>The Welsh Government supports an increased strategic role for Newport as a focus for sustainable, long-term growth and investment. The Welsh Government will work with authorities within the region and in England to promote Newport’s strategic role and ensure key investment decisions in Wales and England support Newport.</p>	<p>RLDP Objectives:</p> <p>Objective 1 – Economic Growth / Employment</p> <p>Objective 6 – Land</p> <p>Objective 9 – Demography</p> <p>Objective 10 – Housing</p> <p>Objective 12 – Communities</p> <p>Objective 13 – Rural Communities</p> <p>Preferred Strategy Strategic Policies:</p> <p>S1 – Growth Strategy</p> <p>S2 – Spatial Distribution of Development – Settlement Hierarchy</p> <p>S7 – Affordable Homes</p> <p>S8 – Site Allocation Placemaking Principles</p> <p>S10 – Employment Sites Provision</p> <p>S13 – Sustainable Transport</p>	<p>Monmouthshire is not identified as a growth area in Future Wales, however, the policy supports development in the wider region which addresses the opportunities and challenges arising from the region’s geographic location and its functions as a Capital Region.</p> <p>The RLDP growth level has emerged from an understanding of the issues, challenges and needs of Monmouthshire as well as a sound, logical and robust evidence base. The Council has considered how best to progress the RLDP having regard to a number of challenges that have arisen following stakeholder consultation and engagement on the non-statutory stages. In response to the Preferred Strategy (Dec 2022), consultation Welsh Government formally responded with a ‘green’ rating and noting that <i>“Future Wales places great emphasis on the development of National Growth Areas and the need for additional affordable housing. The Preferred Strategy is in general conformity with Policies 1, 7 and 33 of Future Wales and does not undermine the role of Cardiff, Newport and the Valleys as the main focus for growth and investment in the south east region, but reflects the urgent need to increase the supply of affordable housing in Monmouthshire.”</i> In this respect the overarching strategy of the Deposit Plan has been accepted as being in conformity with Future Wales by Welsh Government.</p>
---	---	--

The Welsh Government supports co-ordinated regeneration and investment in the Valleys area to improve well-being, increase prosperity and address social inequalities. The Welsh Government will work with regional bodies, local authorities, businesses, the third sector, agencies and stakeholders to support investment, including in the manufacturing sector, and to ensure a regional approach is taken to addressing socio-economic issues in the Valleys.

The Welsh Government supports development in the wider region which addresses the opportunities and challenges arising from the region’s geographic location and its functions as a Capital Region.

Although Monmouthshire is not within the national growth area identified in Future Wales 2040: The National Plan, our evidence shows that the proposed level of growth is essential to deliver our local evidence-based issues and objectives and to ensure the RLDP is ‘sound’. It is supported by policies 3, 4, 5 and 7, which support public leadership and the use of public land to deliver on ambitious affordable housing targets, demographically balanced rural communities, the rural economy and the delivery of affordable homes.

The background evidence to the RLDP shows that the proposed level of growth is essential to deliver our local evidence-based issues and objectives and ensure the RLDP is ‘sound’ in respect of all tests of soundness. The RLDP growth strategy will assist in addressing our core issues without harming or compromising Welsh Government’s objectives for the wider South Wales region.

The RLDP seeks to build on Monmouthshire’s key strategic location that benefits from good links to Cardiff, Bristol and the Midlands. The RLDP recognises that given Monmouthshire position as the gateway to Wales combined with the wider opportunities associate with the Cardiff Capital Region City Deal, South East Wales Metro and the County’s strategic location between the Great Western Cities of Cardiff,

		<p>Newport and Bristol, the County has potential to contribute to the aims for the wider region.</p>
<p>Policy 34 – Green Belts in the South East</p> <p>The Welsh Government requires the Strategic Development Plan to identify a green belt to the north of Cardiff, Newport and the eastern part of the region to manage urban form and growth.</p> <p>The Strategic Development Plan must consider the relationship of the green belts with the green belt in the West of England. Local Development Plans and development management decisions should not permit major development in the areas shown for consideration for green belts, except in very exceptional circumstances, until the need for green belts and their boundaries has been established by an adopted Strategic Development Plan.</p>	<p>RLDP Objectives:</p> <p>Objective 3 – Green Infrastructure, Biodiversity and Landscape</p> <p>Objective 6 – Land</p> <p>RLDP Strategic Policies:</p> <p>S2 – Spatial Distribution of Development – Settlement Hierarchy</p> <p>S5 – Green Infrastructure, Landscape and Nature Conservation</p> <p>S8 – Site Allocation Placemaking Principles</p>	<p>The South East Wales Regional Strategic Diagram (page 163 of Future Wales) provides an indicative plan of the area for consideration with the detailed boundary to be defined through the preparation of the SDP. In advance of an SDP, the area shown for consideration in Future Wales should be treated as a designated Green Belt. In assessing the spatial strategy for distributing growth within the County consideration has been given to PPW12 which states that “when considering a Green Belt designation, a sufficient range of development land which is suitably located in relation to the existing urban edge should be made available, having regard to the longer term need for development land, the effects of development pressures in areas beyond the Green Belt and the need to minimise demand for travel. This may require land to be safeguarded, and boundaries of proposed Green Belts must be carefully defined to achieve this”.</p> <p>In this respect, the RLDP is considered to facilitate the identification of a green belt in southern Monmouthshire with the primary settlements situated outside the broad designation, consistent with the indicative plan and meeting the aims of Policy 34 but allowing for an appropriate level of growth in Monmouthshire to address its local challenges and</p>

		issues. The Council still has significant concerns, however, regarding the Green Belt designation as a permanent designation that would have long-term policy implications for future growth and prosperity in Monmouthshire.
<p>Policy 35 – Valleys Regional Park</p> <p>The Welsh Government supports the establishment of the Valleys Regional Park.</p> <p>Strategic and Local Development Plans should embed its principles into their planning frameworks. The Welsh Government will work with local authorities, the third sector and key partners to support the Valleys Regional Park and maximise opportunities for new development.</p>		Policy 35 – Valleys Regional Park is not considered to be directly related to Monmouthshire. The RLDP is therefore considered to have a neutral impact of achieving its aims.
<p>Policy 36 – South East Metro</p> <p>The Welsh Government supports the development of the South East Metro and will work with Transport for Wales, local authorities and other partners to enable its delivery and maximise associated opportunities.</p> <p>Strategic and Local Development Plans must support the South East Metro. Planning authorities should plan growth and regeneration to maximise the opportunities arising from better regional connectivity, including identifying opportunities for higher density, mixed-use and car-free development around new and improved metro stations.</p>	<p>RLDP Objectives:</p> <p>Objective 14 – Infrastructure</p> <p>Objective 15 – Accessibility</p> <p>Objective 17 – Climate and Nature Emergency</p> <p>RLDP Strategic Policies:</p> <p>S4 – Climate Change</p> <p>S6 – Infrastructure Provision</p> <p>S13 – Sustainable Transport</p>	Preferred Strategy Policy S13 – Sustainable Transport, sets out the policy framework to promote sustainable travel in the County with specific reference to developing the role of Monmouthshire’s Primary settlements in accordance with the South East Wales Regional Plan and Monmouthshire’s Local Transport Plan around which low carbon sustainable transport opportunities can be developed and linked to the South East Wales Metro. The RLDP identifies site allocations within Monmouthshire’s most sustainable locations that have opportunities and potential to connect and link with regional travel aspirations, in particular identified opportunities at Severn Tunnel Junction and the South East Wales Metro Scheme.

		<p>An updated Monmouthshire Local Transport Plan taking account of recent key evidence including the South East Wales Transport Commission Final Recommendations Plan: November 2020 and South East Metro has been prepared alongside the RLDP. The Plan supports the transport schemes identified within the updated LTP, and where appropriate, safeguards land for key transport proposals.</p>
--	--	--

Conclusion

- 3.5. As the assessment above demonstrates, the RLDP aligns with the objectives of Future Wales and establishes a policy framework that is in general conformity with Future Wales and makes a positive contribution to its policy aims. At a local and regional level, the RLDP is well-placed to implement the vision and objectives of Future Wales by ensuring that it includes policies that adhere to principles of placemaking and sustainable development.
- 3.6. Future Wales includes policy provisions for issues at a national level such as International Connectivity and Renewable and Low Carbon Energy Developments of National Significance. These are shown in yellow above, to indicate that the RLDP makes a neutral contribution to these areas. Similarly, a neutral affect is indicated for policies areas where locations are yet to be published such as Planning Mobile Action Zones and Policy 35 relating to the Valleys Regional Park which is not directly relevant to Monmouthshire. Whilst the RLDP does not directly include provisions for these issues, they are not considered to have a material impact on the ability of the RLDP to align with the over-arching vision and objectives of Future Wales.

Equality and Future Generations Evaluation

<p>Name of the Officer completing the evaluation Crag O'Connor</p> <p>Phone no: 07816175737 E-mail: craigoconnor@monmouthshire.gov.uk</p>	<p>Please give a brief description of the aims of the proposal</p> <p>To seek Place Scrutiny Committee's pre-decision scrutiny on the Deposit Replacement Local Development Plan (RLDP), prior to it being reported to Council on 24th October 2024 to seek endorsement of the Deposit Plan to commence statutory consultation/engagement with communities and key stakeholders.</p>
<p>Name of Service area</p> <p>Planning (Planning Policy)</p>	<p>Date 01/10/2024</p>

Are your proposals going to affect any people or groups of people with protected characteristics? Please explain the impact, the evidence you have used and any action you are taking below.

[Type here]

Protected Characteristics	Describe any positive impacts your proposal has on the protected characteristic	Describe any negative impacts your proposal has on the protected characteristic	What has been/will be done to mitigate any negative impacts or better contribute to positive impacts?
Age	The Deposit RLDP aims to have a positive impact on people of all ages, particularly through increasing opportunities for the younger population to both live and work within Monmouthshire to assist in ensuring a balanced demography whilst also supporting the needs of the older population socially, economically and by ensuring an appropriate housing mix to meet different needs. This would benefit younger people but not to the detriment of older age groups.	None	<p>The Deposit Plan seeks to provide a more balanced demographic profile for Monmouthshire. It progresses the evidence gathering, stakeholder engagement and Pre-Deposit work undertaken to date, and sets out the strategy, proposals and detailed policies for the future use and development of land in Monmouthshire (excluding the area within the Bannau Brycheiniog National Park (BBNP)) over the period 2018-2033. The Plan identifies how much sustainable growth is needed and where this growth will be located.</p> <p>Placemaking is embedded throughout the Plan, including detailed placemaking, design and site allocation policies, ensuring that exemplar places are created that are safe, accessible and pleasant for all.</p>

Protected Characteristics	Describe any positive impacts your proposal has on the protected characteristic	Describe any negative impacts your proposal has on the protected characteristic	What has been/will be done to mitigate any negative impacts or better contribute to positive impacts?
Sex	<p>One of the challenges facing the County is the imbalance between male and female earnings, although this situation is improving. The Deposit RLDP aims to provide economic growth and employment provision, which could indirectly impact on wage equality and therefore access to housing and quality of life.</p>	<p>The jobs in the foundation economy are disproportionately occupied by females. This sector is vital to support our communities, as are jobs in tourism. Neither sectors are generally well-paid, although they often offer flexible working conditions that can assist work-life balance. Wage levels are not within the remit of planning policy and policies to try to seek only high paid jobs could be to the detriment of this vital economic sector.</p>	<p>The Deposit Plan aims to support economic growth and prosperity. It sets out the strategy, proposals and detailed policies for the future use and development of land in Monmouthshire (excluding the area within the BBNP) over the period 2018-2033, identifying how much sustainable growth is needed and where this growth will be located. Other policy tools beyond the RLDP are available to the Council could assist with securing well-paid employment opportunities within the County.</p> <p>Placemaking is embedded throughout the Plan, including detailed placemaking, design and site allocation policies, ensuring that exemplar places are created that are safe, accessible and pleasant for all.</p>
Sexual Orientation	None.	None.	<p>Placemaking is embedded throughout the Plan, including detailed placemaking, design and site allocation policies, ensuring that exemplar places are created that are safe, accessible and pleasant for all.</p>

2. The Socio-economic Duty and Social Justice

The Socio-economic Duty requires public bodies to have due regard to the need to reduce inequalities of outcome which result from socio-economic disadvantage when taking key decisions. This duty aligns with our commitment as an authority to Social Justice.

	Describe any positive impacts your proposal has in respect of people suffering socio economic disadvantage	Describe any negative impacts your proposal has in respect of people suffering socio economic disadvantage.	What has been/will be done to mitigate any negative impacts or better contribute to positive impacts?
--	---	--	--

Socio-economic Duty and Social Justice	<p>The Social Justice strategy focuses on three main areas: tackling loneliness and isolation; tackling poverty and promoting equitable economic prosperity; and giving children the best start in life. The Deposit RLDP seeks to tackle house price unaffordability, which currently prevents some of our communities accessing suitable housing within the County, by maximising affordable housing delivery on new housing allocations, reflecting the Council's commitment to deliver 50% affordable homes on new housing sites. This is likely to benefit younger people in particular, which in turn will make our ageing communities more socially sustainable. Good quality and affordable housing is important in achieving poverty reduction and equitable prosperity, and supporting the best start in life. Good spatial planning helps to build cohesive communities. The provision of affordable housing combined with policy interventions in relation to the requirement of a mix of market housing will increase opportunities for those in poverty to access</p>	<p>People in poverty or on low incomes might not be able to access digital opportunities to work from home and/or are more likely to be employed in roles that cannot work from home.</p>	<p>The Deposit Plan sets out the planning policy framework to assist in addressing these key issues. It sets out our commitment to maximising the provision of affordable homes on new housing allocations and to deliver net zero carbon new homes.</p> <p>The Deposit Plan also includes:</p> <ul style="list-style-type: none">• A housing mix policy to control the housing mix of the market housing on development sites, which will assist in creating mixed communities and support the retention of younger people who can afford an open market home were there sufficient supply of 2 and 3 bedroom homes.• Residential allocations in some of our most sustainable rural settlements to deliver 50% affordable homes.• Climate change policies to minimise the carbon footprint of new development, and therefore mitigate negative impacts associated with the proposed growth.• Nature recovery policies to protect and enhance Monmouthshire's landscapes and biodiversity to help address the climate and nature emergency.• A policy requirement for broadband infrastructure provision in new residential developments will maximise opportunities for all to access the

3. Policy making and the Welsh language.

[Type here]

<p>How does your proposal impact on the following aspects of the Council's Welsh Language Standards:</p>	<p>Describe the positive impacts of this proposal</p>	<p>Describe the negative impacts of this proposal</p>	<p>What has been/will be done to mitigate any negative impacts or better contribute to positive impacts</p>
<p>Policy Making</p> <p>Effects on the use of the Welsh language,</p> <p>Promoting Welsh language</p> <p>Treating the Welsh language no less favourably</p>	<p>The Welsh language is a material planning consideration and is included within the RLDP Objective relating to Culture, Heritage and Welsh Language to ensure there is no negative impact. Any level of growth for the County relies on in-migration, some of which, whether English or Welsh or other nationality, will choose Welsh Medium education for their children. Also in-migration to Monmouthshire comes from other areas in Wales (including rural Welsh speaking areas e.g. Pembrokeshire, Ceredigion, Gwynedd, Ynys Môn, Denbighshire). This is in the main due to the significantly increased employment opportunities offered in Cardiff, Newport and in adjacent areas of England e.g. Bristol, Gloucester etc. Monmouthshire with its border location and transport links is accessible to all of these areas. This in-migration, together with the ambition to retain and attract younger families, will expose more children to Welsh curriculum education in all schools, increasing the number of Welsh speakers in the County. The RLDP is subject to a Welsh Language Impact Assessment (WLIA) as part of the</p>	<p>Any level of growth for the County relies on in-migration, being a border County a proportion of this is likely to be from England.</p>	<p>The Deposit Plan aims to support culture and the Welsh language.</p> <p>We will continue to liaise with the Local Education Authority to understand if the proposed growth and spatial strategy necessitates additional Welsh medium school provision.</p> <p>There are already significant plans and proposals in place in terms of expanding Welsh Medium education in Monmouthshire. This is due to a number of factors:</p> <ul style="list-style-type: none"> - the increased popularity of the Welsh Language. - the opportunity for children to be become bilingual - the increased employment opportunities that this affords them in Wales.

	wider Integrated Sustainability Appraisal (ISA).		
Operational Recruitment & Training of workforce	An expansion of the provision of Welsh Medium education in the County will increase the opportunities for Welsh speakers to apply for vacancies within the Council thus increasing the Council's Welsh speaking capacity.	None of the current Planning Policy Team are fluent Welsh speakers, however, there are robust systems in place to deal with phone calls and correspondence without delaying the provision of the service.	N/A
Service delivery Use of Welsh language in service delivery Promoting use of the language	All statutory documentation on the RLDP and associated consultation along with notices, social media and general correspondence will be bilingual. A document will be in English only if it comes from an external source that is not subject to compliance with the Welsh Language (Wales) Measure 2011. Emails/letters etc will make it clear that correspondence in Welsh is welcome and will not lead to a delay in response or a lesser standard of service . When requests are made for people to be added to the RLDP consultation database we will record language choice and communicate accordingly.	None of the Planning Policy team are Welsh speakers, however, there are robust systems in place to deal with phone calls and correspondence without delaying the provision of the service.	The Welsh language is a material planning consideration and is included within the RLDP Objective relating to Culture, Heritage and Welsh Language to ensure there is no negative impact. The Deposit Plan is subject to a Welsh Language Impact Assessment (WLIA) as part of the wider Integrated Sustainability Appraisal (ISA). We will review this further if any additional assessment is required as we go through the RLDP process.

4. Does your proposal deliver any of the well-being goals below? Please explain the impact (positive and negative) you expect, together with suggestions of how to mitigate negative impacts or better contribute to the goal. There's no need to put something in every box if it is not relevant!

Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
<p>A prosperous Wales Efficient use of resources, skilled, educated people, generates wealth, provides jobs</p>	<p>Positive: The Deposit Plan identifies the level of growth over the RLDP period and spatial distribution of this growth, including proposed site allocations for residential and employment uses, together with the detailed planning policy framework. As well as housing growth, the RLDP aims to provide economic growth and employment provision in both urban and rural areas.</p> <p>Negative: Careful site selection has sought to minimise loss of best and most versatile agricultural land and mineral resource.</p>	<p>The Deposit Plan includes RLDP Objectives relating to economic growth/employment and town/local centres, which have been set in order to address the identified issues relating to creating a prosperous Wales.</p>
<p>A resilient Wales Maintain and enhance biodiversity and ecosystems that support resilience and can adapt to change (e.g. climate change)</p>	<p>Positive: The Deposit Plan incorporates RLDP Objectives including the impact of development on the natural environment in already constrained areas. It is, however, recognised that developments could improve connectivity through opportunities to create new linkages. The limited supply of brownfield land within the County is a recognised issue. The Deposit Plan recognises that we are in a climate and nature emergency by including a specific climate and nature emergency objective. It sets out a commitment to delivering net zero carbon homes. Resilience of new development to aspects of climate change can be achieved via the design and location of new developments. All developments can provide</p>	<p>The Deposit Plan includes RLDP Objectives relating to Green Infrastructure, Biodiversity and Landscape, Flood Risk, Minerals and Waste, Land and Natural Resources which have been set in order to address the identified issues relating to creating a resilient Wales.</p> <p>There are water quality issues in the River Usk and River Wye SACs. There is a legal and national policy requirement to maintain and enhance ecology.</p>

PS99 1836

Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
	<p>opportunities to minimise carbon by providing opportunities for renewable energy generation, seeking to reduce commuting, supporting the use of ultra-low emission vehicles and public transport, and the provision of quality Green Infrastructure. The Plan sets out policies to protect and enhance Monmouthshire’s special and unique spaces, heritage assets, landscapes and biodiversity.</p> <p>Negative: Additional growth would likely result in further pressure on the natural environment. New developments can nevertheless improve Green Infrastructure and ecological connectivity through opportunities to create new linkages. The Plan sets out policies to protect and enhance Monmouthshire’s special and unique spaces, heritage assets, landscapes and biodiversity.</p>	
<p>A healthier Wales People’s physical and mental wellbeing is maximized and health impacts are understood</p>	<p>Positive: The Deposit Plan identifies the level of growth over the RLDP period and spatial distribution of this growth, including proposed site allocations for residential and employment uses, together with the detailed planning policy framework. It is recognised that any developments will be encouraged to support healthier lifestyles and provide sufficient open space. The RLDP will encourage Active Travel and will reflect the Integrated Network Maps.</p> <p>The need for affordable housing, both in terms of purchase/rent and living costs, is being exacerbated</p>	<p>The Deposit Plan includes RLDP Objectives relating to Health and Well-being in order to address the identified issues relating to creating a healthier Wales.</p>

Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
	<p>by the current cost of living crisis. The RLDP seeks to maximise affordable housing through delivery of 50% affordable homes on all new site allocations and provision of net zero carbon homes.</p> <p>Negative: Additional growth has the potential to increase commuting which could affect areas with air quality problems, however, the RLDP seeks to provide for jobs within the County.</p>	
<p>A Wales of cohesive communities Communities are attractive, viable, safe and well connected</p>	<p>Positive: The Deposit Plan identifies the level of growth over the RLDP period and spatial distribution of this growth, including proposed site allocations for residential and employment uses, together with the detailed planning policy framework. It also considers the balance of housing, employment and infrastructure in both urban and rural areas.</p> <p>Negative: None</p>	<p>The Deposit Plan has been assessed against the RLDP Objectives including housing, place-making, communities, rural communities, infrastructure and accessibility in order to address the identified issues relating to creating a Wales of cohesive communities.</p> <p>Placemaking is embedded throughout the Plan, including detailed placemaking, design and site allocation policies, ensuring that exemplar places are created that are safe, accessible and pleasant for all.</p>
<p>A globally responsible Wales Taking account of impact on global well-being when considering local social, economic and environmental wellbeing</p>	<p>Positive: The Deposit Plan identifies the level of growth over the RLDP period and spatial distribution of this growth, including proposed site allocations for residential and employment uses, together with the detailed planning policy framework. It includes a specific climate and nature emergency objective. This recognises that we are in a climate emergency and has committed to strive to limit the increase in</p>	<p>The Deposit Plan includes a specific climate and nature emergency objective which has been set in order to address the identified issues relating to creating a globally responsible Wales. Climate change considerations inform the RLDP's planning policy framework including policies, proposals and land use allocations.</p>

Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
	<p>global temperatures to 1.5°C. The Deposit Plan sets out a commitment to delivering net zero carbon new homes reflecting our commitment to respond to the climate emergency. In addition, the recent pandemic has demonstrated that a significant proportion of our communities can work from home which is likely to continue over the longer term. The RLDP seeks to reduce the commuting ratio and to enable home-working, reflective of recent trends. The Plan also includes a specific policies relating to climate change and nature recovery.</p> <p>Negative: None.</p>	<p>Section 6 of the Environment Act already requires biodiversity enhancement, which will help address the emergency. This is reflected in the RLDP policy framework.</p>
<p>A Wales of vibrant culture and thriving Welsh language Culture, heritage and Welsh language are promoted and protected. People are encouraged to do sport, art and recreation</p>	<p>Positive: The Deposit Plan identifies the level of growth over the RLDP period and spatial distribution of this growth, including proposed site allocations for residential and employment uses, together with the detailed planning policy framework. The RLDP includes an objective relating to Culture, Heritage and the Welsh language.</p> <p>Negative: Any level of growth for the County relies on in-migration, being a border County a proportion of this is likely to be from England.</p>	<p>The Deposit Plan includes an objective relating to Culture, Heritage and the Welsh language which has been set in order to address the identified issues relating to creating a Wales of vibrant culture and thriving Welsh Language. We will continue to liaise with the Local Education Authority to understand if the proposed growth necessitates additional Welsh medium school provision.</p>
<p>A more equal Wales People can fulfil their potential no matter what their background or circumstances</p>	<p>Positive: The Preferred Strategy identifies the level of growth over the RLDP period and spatial distribution of this growth, including proposed site allocations for residential and employment uses, together with the detailed planning policy framework.</p>	<p>The Deposit Plan includes an objective relating to demography which has been set in order to address the identified issues relating to creating a more equal Wales. It seeks to take action to enable younger people who are currently priced-out of the</p>

[Type here]

Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
	<p>Housing and economic growth in both urban and rural areas will assist in balancing the demography across the County and in addressing the County's affordability challenges. The RLDP aims to address the higher proportion of older age groups and lower proportion of young adults compared to the Welsh average. One of the key objectives of the RLDP is to deliver much needed affordable housing, having a safe secure and suitable home gives people the best start in life.</p> <p>Negative: None.</p>	<p>County an opportunity to remain living here by striving to maximise affordable housing delivery to help tackle this. It also seeks to provide additional jobs.</p>

5. How has your proposal embedded and prioritised the sustainable governance principles in its development?

[Type here]

Sustainable Development Principle	Does your proposal demonstrate you have met this principle? If yes, describe how. If not explain why.	Are there any additional actions to be taken to mitigate any negative impacts or better contribute to positive impacts?
 <p>Balancing short term need with long term and planning for the future</p>	<p>The Deposit Plan sets out the level of growth for housing/employment and the spatial distribution of this growth across the County, including proposed site allocations for residential and employment uses, together with the detailed planning policy framework. It also sets out the RLDP vision, the role of which is to clarify the core purpose of the RLDP and provides the framework for the Plan's strategy and policies. The Vision sets the overarching context for Monmouthshire for the period up to 2033.</p>	<p>A total of 17 RLDP Objectives are included in the Deposit Plan in order to address the issues, challenges, and opportunities facing the County.</p>

<p>Sustainable Development Principle</p>	<p>Does your proposal demonstrate you have met this principle? If yes, describe how. If not explain why.</p>	<p>Are there any additional actions to be taken to mitigate any negative impacts or better contribute to positive impacts?</p>
<div data-bbox="91 651 136 858" style="writing-mode: vertical-rl; transform: rotate(180deg);"> <p>Page 1842</p> </div> <div data-bbox="129 667 309 906" style="display: inline-block; vertical-align: middle;">  </div> <p data-bbox="331 667 510 906">Working together with other partners to deliver objectives</p>	<p data-bbox="544 317 1317 507">The Deposit Plan has been informed by a range of evidence. A revised Delivery Agreement which amends the project timetable for Plan preparation, will be reported to Council in October 2024 alongside the Deposit RLDP.</p>

Sustainable Development Principle	Does your proposal demonstrate you have met this principle? If yes, describe how. If not explain why.	Are there any additional actions to be taken to mitigate any negative impacts or better contribute to positive impacts?
 <p>Considering impact on all wellbeing goals together and on other bodies</p>	<p>The Deposit RLDP sets out the level of growth for housing/employment and the spatial distribution of this growth across the County, including proposed site allocations, together with the detailed planning policy framework. It seeks to address the issues/challenges/opportunities identified (in a land use context) and support delivery of the Council's vision/objectives for the future of the County and its communities. The Deposit Plan is subject to an Integrated Sustainability Appraisal (ISA) including Strategic Environmental Assessment (SEA), Well-being of Future Generations Assessment (WBFG), Health Impact Assessment (HIA), Equality Impact Assessment (EqIA), and Welsh Language Impact Assessment (WLIA)), whose findings have been used to inform the development of the RLDP strategy, policies and site allocations in order to ensure that the Plan will be promoting sustainable development.</p> <p>The Deposit Plan also sets out the Vision which will set the overarching context for Monmouthshire for the period up to 2033. MCC recognises that we are in a climate emergency and nature emergency and has committed addressing these. The RLDP will have a key role in addressing these issues.</p>	<p>The Deposit Plan is subject to an Integrated Sustainability Appraisal (ISA) including Strategic Environmental Assessment (SEA), Well-being of Future Generations Assessment (WBFG), Health Impact Assessment (HIA), Equality Impact Assessment (EqIA), and Welsh Language Impact Assessment (WLIA)), whose findings have been used to inform the development of the RLDP strategy, policies and site allocations in order to ensure that the Plan will be promoting sustainable development.</p> <p>We will continue to work closely with our neighbours, both in Wales and England, including the joint procurement of evidence as applicable.</p> <p>The RLDP will align with the new Integrated Network Maps for Active Travel, and the Deposit Plan will be accompanied by an Infrastructure Plan, Local Transport Strategy and Economy, Employment and Skills Strategy.</p> <p>The ISA is an iterative process throughout the Plan process. This will ensure the Plan is promoting sustainable development.</p>

6. Council has agreed the need to consider the impact its decisions has on the following important responsibilities: Corporate Parenting and Safeguarding. Are your proposals going to affect any of these responsibilities?

	Describe any positive impacts your proposal has	Describe any negative impacts your proposal has	What will you do/ have you done to mitigate any negative impacts or better contribute to positive impacts?
Safeguarding	None.	None.	N/A
Corporate Parenting	The RLDP will provide affordable homes, the delivery and allocation of which should be cognisant of the needs of children leaving care.	None.	N/A

Page 1846

7. What evidence and data has informed the development of your proposal?

A range of evidence and data has been used to inform the Deposit RLDP, from a wide range of sources both internal and external to the Council, including:

- Initial Report of Consultation (October 2024)
- Housing Background Paper (October 2024)
- Issues, Vision and Objectives Paper (Updated September 2024)
- Monmouthshire Local Development Plan Annual Monitoring Reports (2014- 2023)
- Integrated Sustainability Appraisal Report (AECOM, September 2024)
- HRA of the Monmouthshire Deposit RLDP (AECOM, November 2022)
- RLDP revised Delivery Agreement (October 2024)
- Candidate Site Assessment Report (October 2024)
- Candidate Sites High Level Assessment (August 2022)
- Monmouthshire RLDP Candidate Sites Register (updated July 2023)
- Local Housing Market Assessment Updated 2022-2037

External sources of data include Welsh Government, Cadw, Natural Resources Wales, Hometrack, Office for National Statistics and Stats Wales.

- *Equalities dashboard link.* [Equality data dashboard for EQIA's 2020.xlsx](#)

8. SUMMARY: As a result of completing this form, what are the main positive and negative impacts of your proposal, how have they informed/changed the development of the proposal so far and what will you be doing in future?

[Type here]

Positive -

The Deposit RLDP sets out the level of growth for housing/employment and the spatial distribution of this growth, including proposed site allocations, together with the detailed planning policy framework to address the core issues of delivering much needed affordable homes, responding to the climate and nature emergency by delivering net zero carbon new homes in exemplar places, supporting economic prosperity, and ensuring our communities are socially and economically sustainable by attracting and retaining younger people to rebalance our ageing demographic. This is a positive impact for social justice.

Negative –

People in poverty or on low incomes might not be able to access digital opportunities to work from home and/or are more likely to be employed in roles that cannot work from home.

There are no negative implications for corporate parenting or safeguarding.

9. ACTIONS: As a result of completing this form are there any further actions you will be undertaking? Please detail them below, if applicable.

What are you going to do	When are you going to do it?	Who is responsible
Recommend that Place Scrutiny Committee scrutinises the Deposit Replacement Local Development Plan, prior to it being reported to Council on 24 th October 2024 to seek endorsement of the Deposit Plan to commence statutory consultation/engagement with communities and key stakeholders. To note the content of the Revised Delivery Agreement that will be presented to Council on 24 th October for consideration as to whether to submit it to Welsh Government (WG).	Place Scutiny Committee 10 th October 2024.	Head of Placemaking Planning Policy Team
Seek Council's endorsement of the Deposit Plan to commence statutory consultation/engagement with communities and key stakeholders. To endorse the revised Delivery Agreement for submission to Welsh Government for agreement.	Council 24 th October 2024.	Head of Placemaking Planning Policy Team

Monmouthshire Select Committee Minutes

Meeting of Place Scrutiny Committee held at The Council Chamber, County Hall, Rhadyr, Usk, NP15 1GA with remote attendance on Thursday, 11th July, 2024 at 10.00 am

Councillors Present

County Councillor Jane Lucas (Chairman)

County Councillors: Louise Brown, Emma Bryn, Tomos Davies, Lisa Dymock, Jackie Strong, Laura Wright, Tudor Thomas, Peter Strong and Angela Sandles

Officers in Attendance

Hazel Ilett, Scrutiny Manager
Robert McGowan, Policy and Scrutiny Officer
Pennie Walker, Equality & Welsh Language Manager

APOLOGIES: Councillor Maria Stevens

1. Election of Chair

Councillor Lucas was elected, proposed by Councillor Dymock and seconded by Councillor Brown.

2. Appointment of Vice-Chair

Councillor Dymock was appointed, proposed by Councillor Brown, seconded by Councillor Davies.

3. Declarations of Interest

Councillor Brown declared a non-prejudicial interest as previously volunteering in Chepstow with Night Shelter Churches Together.

4. Public Open Forum

A member of the public spoke about the first petition presented today, on restoring a night shelter in Monmouth.

A letter from a member of the public was read out by Scrutiny Manager Hazel Ilett, regarding Goldwire Lane in Monmouth. Following a discussion by members, it was agreed that a response would be sought on the matter from officers and the Cabinet Member – ACTION

5. Petitions received - to recommend actions to Cabinet

- **6a Restore night shelter in Monmouth.**
- **6b Change of use of empty retail and commercial property in Monmouth Town Centre.**
- **6c Introduce an 'Engagement Ring' system and triage process.**

Following a discussion, the committee agreed that Petition 6a should be referred to Council for a full debate. Petitions 6b and 6c require a detailed written response from the Cabinet Member and relevant officers within 6 weeks to the committee and Lead Petitioner. – **ACTION**

6. Strategic Equality Plan 23/24 Monitoring Report - To scrutinise the Council's progress

Cabinet Member Angela Sandles and Pennie Walker introduced the report and answered the members' questions:

Key points made by Members:

- Asking whether the Council plans to continue supporting Mind's rural mental health project, with the funding stream having ended on 31st May. – **ACTION: officers to come back with plans for next year**
- A member stated that Welsh speakers in the authority continue to lose out in terms of being able to converse in their first language when dealing with the Council, and that Monmouthshire is lagging behind other authorities in this regard.
- Particularly in the scenario of a resident calling with a complicated issue, he argued that the Council needs to make more progress in having an in-house capability in Welsh, specifically through better recruitment.
- Regarding work opportunities for disabled people, asking whether this included flexible working and part-time options.
- Suggesting using the actual protected characteristics from the Equality Act in the report instead of generic terms such as gender and race, and including the socio-economic duty as well.
- Asking how many debt organisations have been supported by the Council to overcome inequalities in access to economic prosperity and deal with child poverty.
- Stressing the importance of not developing a hierarchy of protected characteristics and considering them all equally.
- Welcoming the new Equalities and Welsh language manager and thanking her for the work that she is doing for the disabled.
- Proposing that the position of members of armed forces families and veterans be included in future equalities work, specifically in integrated impact assessments.
- Asking, as a Disability Confident Employer, what we are doing to reach Level 3.
- Enquiring about the future plans for the Building Stronger Families initiative.
- Asking what potential barriers are foreseen in achieving the plans and objectives, and how the plan can be adapted in challenging circumstances e.g. a future pandemic.

- Noting the importance of those affected having a mechanism to see how this plan will support them, asking how we will receive feedback from individuals on the plan's implementation and monitor its progress.
- Expressing the importance of fostering good relations between those who share a protected characteristic, and agreeing that there should be no hierarchy between protected characteristics.
- Noting that encouraging disabled people into work is very important but in order to do that carers need to be supported as well but support services have been cut, so it is very difficult for them.
- Expressing concern that Monmouthshire has an ageing population yet there is a drive towards digital services – we shouldn't leave people behind, and therefore there needs to be a way for people to interact with the Council without needing digital services to do so. Those with sensory impairments also need to be considered.

Chair's Summary:

Thank you to the Cabinet Member and Pennie Walker for the report and attending today. We have covered a number of points, namely protected characteristics, the move towards employment opportunities for disabled people, building stronger families, monitoring and feeding back what has been learned, including Armed forces status, there being no hierarchy amongst protected characteristics, support for carers, support for Mind and continued funding, digital services, and increasing the authority's Welsh language capability when communicating with residents.

7. Place Scrutiny Committee Forward Work Programme and Action List

The committee agreed to change the default time of meetings from 10am to 2pm –
ACTION

8. Council and Cabinet Work Planner

9. To confirm the minutes of the previous meeting

A member asked about the more condensed version of the minutes that are being produced. The Scrutiny Manager reiterated that with full transcripts and recordings available separately, the minutes primarily serve to convey that the meeting took place, capture any recommendations or actions to be taken forward, and record what was discussed – with an onus on capturing the challenge from members, as requested by auditors.

The minutes were confirmed, proposed by Councillor Dymock and seconded by Councillor Strong.

10. Next Meeting

24th July 2024 at 4.30pm.

The meeting ended at 11.18 am.

Monmouthshire Select Committee Minutes

Meeting of Place Scrutiny Committee held at Council Chamber, County Hall, The Rhadyr USK on Wednesday, 24th July, 2024 at 4.30 pm

Councillors Present

County Councillor Jane Lucas (Chairman)
County Councillor Lisa Dymock (Vice Chairman)

County Councillors: Louise Brown, Lisa Dymock, Jackie Strong, Laura Wright, Tudor Thomas, John Crook, Paul Griffiths, Simon Howarth, Richard John, Phil Murphy and Frances Taylor, substituting for Maria Stevens, Richard John, substituting for Tomos Davies and Simon Howarth, substituting for Emma Bryn

A number of public speakers were in attendance including Lynne Garnett from Travelling Ahead

Also in attendance County Councillors: Paul Griffiths, Cabinet Member for a Sustainable Economy, Phil Murphy and Frances Taylor

APOLOGIES: County Councillors Emma Bryn, Maria Stevens and Tomos Davies

Officers in Attendance

Hazel Ilett, Scrutiny Manager
Robert McGowan, Policy and Scrutiny Officer
Frances O'Brien, Chief Officer, Communities and Place
Mark Davies, Highway Development Manager
Rachel Lewis, Planning Policy Manager
Huw Owen, Principal Environment Health Officer (Public Health)
Kate Stinchcombe, Biodiversity & Ecology Officer
Philip Thomas, Development Services Manager
Daniel Hulmes, Biodiversity and Ecology Officer
Ben Thorpe, Development Surveyor

1. Declarations of Interest

Councillor Crook declared a non-prejudicial interest in the Langley Close site, Magor.

2. Public Open Forum

A number of public speakers delivered remarks to the committee. The majority of speakers expressed concerns about the suitability of Bradbury Farm for Gypsy and Traveller accommodations, citing issues such as noise pollution, land contamination, concentration of sites and lack of amenities.

The historical significance of the area and potential ecological impacts, including the presence of protected species, were highlighted as reasons against the development of certain sites.

The lack of safe access and egress, especially for large vehicles, and the absence of nearby amenities were mentioned as challenges for the proposed Bradbury Farm.

There were criticisms of the consultation process, with some feeling that it did not adequately consider community feedback or engage effectively with the Gypsy and Traveller community.

Suggestions were made for exploring alternative solutions, such as collaborating with neighbouring authorities, enhancing existing sites with Welsh Government funding, and reconsidering the selection process for new sites.

There were also representations in support of Bradbury Farm, and expressing solidarity with the Gypsy, Roma and Traveller community.

In addition, there were a number of statements about the unsuitability of Langley Close. These statements aligned with the reports' recommendation that Langley Close should be removed from the site identification process.

3. Proposals for Gypsy and Travellers

Local Ward Members Lisa Dymock, Phil Murphy and Frances Taylor addressed the committee.

Councillor Dymock:

Councillor Dymock expressed concerns about the suitability of proposed sites for Gypsy and Traveller accommodations, highlighting issues such as noise pollution, land contamination, and lack of amenities. She raised concerns about the concentration of three of these sites being located all within one mile and concerns around the dual site proposal and the many challenges that creates. She emphasised the historical significance of the area and potential ecological impacts, including the presence of protected species, as reasons against the development of certain sites. She mentioned the lack of safe access and egress, especially for large vehicles, and the absence of nearby amenities as challenges for the proposed sites.

Councillor Dymock criticised the consultation process, arguing that it did not adequately consider community feedback or engage effectively with the Gypsy and Traveller community, and expressed disappointment at the timing and the way information was presented to the public.

She suggested exploring alternative solutions, such as collaborating with neighbouring authorities, enhancing existing sites with Welsh Government funding, and reconsidering the selection process for new sites. The reliability and transparency of the RAG ratings and the rationale for accepting or rejecting certain sites was questioned, and she emphasised the need for a transparent and inclusive process that takes all stakeholders along the journey. Councillor Dymock proposed that the committee recommend Option 4.

Councillor Taylor:

Councillor Taylor supported the report's recommendation to remove Langley Close from the Gypsy and Traveller site identification process due to its unsuitability based on noise, land contamination, and other additional material planning considerations.

Councillor Taylor stated that she considers Langley Close to be completely unsuitable and could not agree with the comment in the report that it was 'less suitable.' Councillor

Taylor asked that the term be replaced with 'unsuitable' to reflect the material findings, evidence from public consultation and site investigation surveys which she stated indicate that the site is entirely unsuitable.

Councillor Taylor highlighted that the noise assessment shows there is a 'high' risk of noise adversely impacting the northern part of the site, whilst the rest of the site would be subject to a 'medium' risk of noise adversely impacting the site. She stated, however, that it is important to note that this guidance is intended primarily to deal with dwellings which are constructed from bricks and mortar. Mobile homes provide significantly lower levels of sound attenuation between the exterior and interior.

The location of the developable area, referred to as NEC B, (subject to mitigation measures) would have an impact on the layout and size of the proposal which would further constrain the developable area and present design issues. This is likely to be further compounded by the likely presence of 'made ground', as identified by the land contamination survey.

She asked that the committee support Langley close's removal and agree that the site is not simply 'less suitable' but 'unsuitable'. She advised that it was important to note that the independent noise and contamination findings would likely preclude the site from attracting Welsh Government funding for site development.

Councillor Murphy:

Councillor Murphy expressed concerns about the suitability of proposed sites for Gypsy and Traveller accommodations, highlighting the impact on the Crick community and the unsuitability of the sites due to various factors such as noise, land contamination, and lack of amenities. He mentioned that Crick already has two sites, and adding another would disproportionately affect the community. He also noted the potential impact on property values and the community's quality of life.

Councillor Murphy also pointed out the lack of safe access and egress, especially for large vehicles, and the absence of nearby amenities as challenges for the proposed sites. He suggested that the Council should identify a more suitable site, therefore recommending option four.

Presentation of the report:

Cabinet Member Paul Griffiths introduced the report. He highlighted the Council's legal duty to provide land for Gypsy, Roma, and Traveller residents and mentioned the ongoing efforts since 2018 to identify suitable sites. He emphasised the thoroughness of the search for suitable locations, with an assessment process of over 1500 sites, and noted that the assessed need for pitches has decreased from 13 to 7, due to planning consents gained elsewhere.

Councillor Griffiths recommended Bradbury Farm as the most suitable site among those considered, citing the potential for noise mitigation and integration with a strategic residential development, and stressed the importance of master planning –in the context of the Replacement Local Development Plan (RLDP) and strategic sites – to achieve both separation and accessibility for Traveller families, suggesting that this can

be effectively managed within the larger strategic site development. Bradbury Farm, therefore, would not be developed in isolation.

He noted that a future planning application would provide an opportunity to assess the detailed plans for noise mitigation, landscaping, and layout, ensuring the site's suitability.

Councillor Griffiths answered the members' questions with Frances O'Brien and Ian Bakewell.

Key points raised by Members:

- Clarifying whether flooding was a concern in relation to the Bradbury Farm site – officers confirmed that the site is not identified within the flood zone.
- Suggestion that that Bradbury Farm is a bit of a misnomer and might be contributing to confusion around the site location.
- Recognising the need to look not just at the 7 pitches, but the whole of the RLDP and the strategic plan.
- Noting that caution is needed regarding landscaping and noise mitigations.
- Observing that, by analogy, when the Elder Wood estate was first proposed it didn't look like a viable site but through Planning and development it was brought up to standard.
- Regarding infrastructure, recognising that NHS dentists and GPs need to be in place, as they are already oversubscribed in Severnside.
- Given the progress of the site at Llancayo, members asked if there are other existing private sites that could similarly be given consent, and therefore reduce the overall pitch need.
- Expressing disappointment that evidence regarding Langley Close and Oak Grove Farm local ward members hadn't been consulted on the report.
- Several members proposed Oak Grove Farm and Langley Close be withdrawn from the process completely, by being designated as 'unsuitable' rather than 'less suitable', to ensure that they cannot later be reinstated as candidates.
- Asking if the RLDP was fully explained during the consultation and what the evidence is for that. Display boards at the consultation drop-ins reflected this.
- Seeking confirmation that if the site goes in the Deposit Plan but is then found to be more unsuitable, it will be removed from consideration.
- Expressing concern about the lack of a footpath on a narrow, derestricted road.
- Asking why the RAG rating for Bradbury Farm's proximity to existing schools is Green, when Archbishop Rowan Williams school is oversubscribed, noting that although money has been made available through Section 106 funding to increase capacity, that money has not yet been allocated.
- Expressing concern about the use of a greenfield site, asking if there are post-industrial sites that could be considered, and whether they have been adequately explored.
- Doubting that Bradbury Farm will deliver on the Gypsy, Roma and Traveller community's wish to be detached from the settled population.
- Expressing concern about putting forward a site for further consideration for the RLDP if later it doesn't qualify for a Wales Government capital grant, and the resultant risk to taxpayers.

- Clarity was sought regarding the RAG rating, as Bradbury Farm has more red and yellow than sites that are recommended for removal from consideration.
- Arguing that duty of care means finding the most suitable site, and that Council will be failing the Gypsy, Roma and Traveller community if sites are forced through that aren't suitable.
- Given that the need has been reduced from 13 pitches a year ago to 7, asking how confident the Council can be that there aren't other existing sites that are suitable for expansion to further reduce the number from 7.
- Several members expressed their confidence in the process as laid out by the Cabinet Member, agreeing that it isn't possible to find a 'perfect' site, and arguing that Bradbury Farm satisfies the Council's duty and responsibility to provide suitable sites for the Gypsy, Roma and Traveller community.
- Asking if any consideration has been given to employment sites, rather than just residential sites. The Cabinet Member advised that all Council land of all uses had been considered.
- Several members expressed concern that there has been limited feedback from the Gypsy, Roma and Traveller community. It was recognised by officers this is important and is an ongoing consideration. The Council will continue to use Travelling Ahead as a critical friend and aims to set up pitch waiting list which will provide further information about the preferences of households.
- Asking if it was made clear in the consultation that there would be residential accommodation next to Bradbury Farm, and if that consultation response could be clarified.
- Asking if everyone was aware that an active travel route would be put through the sites, from the new houses to the Gypsy, Roma and Traveller site.

4. Next Meeting: 3rd September 2024 (Special) and 10th October 2024.

5. Exclusion of the Press and Public

The meeting went into closed session, in order to discuss authorised and unauthorised sites in which confidential information might be disclosed. Part 4 of Schedule 12A of the Local Government Act 1972 (paragraphs 12 to 18) can enable the exclusion of the press and public for the discussion of exempt information, providing that an officer has made an assessment that the public interest in maintaining the exemption outweighs the public interest in disclosing the information. The Chair asked the report author to make an assessment of the public interest and to advise the committee on the basis for the exemption.

The officer advised that the relevant paragraphs for exemption under Local Government Act, Schedule 12A, Part 4 were paragraphs 12 - information relating to a particular individual, 13 – information which is likely to reveal the identity of an individual and 14 – information relating to the financial or business affairs of any particular person (including the authority holding that information). The Chair asked the committee if they accepted the basis for the exemption and a vote took place with all members in agreement. A short break took place whilst the press and public were asked to leave the meeting.

Chair's Summary and formal outcome of the scrutiny:

Thanks were given to the Cabinet Member and officers. Each member present expressed their deep appreciation especially to the members of the public for their contributions and time.

Five Members recommended that the Cabinet proceed with Option 4. The reasons given were that members felt that sites were unsuitable, there would be a concentration of sites in a small hamlet and that there is a need for more exploration of private sites and greater detail required on the revenue costs. The members who recommended Option 4 felt that Langley Close as a potential site should be removed.

Four Members recommended that Option 1 be taken forward, the reasons being that they felt the explanation had been extensive, their questions had been answered and that there was a need to meet the legal responsibilities in terms of Gypsy and Romany Travellers. Two of the Members who recommended Option 4 also felt that Langley Close should be removed.

The committee's formal recommendation to Cabinet was therefore Option 4: to withdraw all three sites for development as Gypsy, Roma and Traveller sites.

6. Next Meeting

3rd September 2024 (Special) and 10th October 2024.

The meeting ended at 8.01 pm.

Monmouthshire Select Committee Minutes

Meeting of Place Scrutiny Committee held at Council Chamber, County Hall, The Rhadyr USK on Tuesday, 3rd September, 2024 at 2.00 pm

Councillors Present

County Councillor Jane Lucas (Chairman)
County Councillors: Louise Brown, Emma Bryn, Tomos Davies, Phil Murphy substituting for Lisa Dymock, Jackie Strong, Laura Wright, Tudor Thomas and John Crook substituting for Maria Stevens

Officers in Attendance

Robert McGowan, Policy and Scrutiny Officer
Amy Longford, Development Management Area Team Manager
Ian Bakewell, Housing & Regeneration Manager
Victoria Cornock, Heritage Officer

APOLOGIES: County Councillors Maria Stevens and Lisa Dymock

1. Declarations of Interest

None.

2. Public Open Forum

None.

3. Buildings at Risk

Amy Longford delivered a presentation, and answered the members' questions:

Key points from Members:

- Clarifying compulsory purchase in relation to a Repairs Notice, and any other options
- Asking whether access for high-sided vehicles can be restricted to limit further damage to Abergavenny Bookshop, especially noting its proximity to the Town Hall
- Clarifying the difference between grave and extreme risks, expressing concern about wealthy landowners being subsidised by public funds, and asking whether that can be listed as a 'risk' in the Integrated Impact Assessment
- Asking how long a Section 215 notice takes and whether they are usually appealed, and how long that takes
- Clarifying who makes the final decision in cases, how long it takes to get listed building consent, and the status of Piercefield and the associated challenges
- Enquiring whether costs can be recovered by putting a charge on the ownership of a property, what form prosecution takes in the case of a 215 notice, and asking what the options are for the purchase of buildings that could be community assets e.g. derelict pubs
- Asking who would be liable if a member of the public were injured by falling masonry, e.g. in the case of Abergavenny Bookshop, and whether that has been discussed with the owner
- Asking what can be done about buildings outside the top 10 that are nonetheless important, such as Court Farm House at Rogiet and Rogiet Hotel (especially given the latter's visibility to those using Severn Tunnel Junction and its potential economic benefit)

- Clarifying whether a Repairs Notice and compulsory purchase can be used on non-historic buildings, or what the other options are
- Asking if a compulsory purchase happened now, where the funding would come from, and whether any of the top 10 are close to being dealt with and coming off the list – and if they do, how quickly they will be replaced on it
- Asking how the health and safety of pedestrians in Monmouth is addressed, and if the owners are happy with all that they need to do to make the buildings safe – or if that is down to the authority
- Requesting that the committee receives regular updates about progress and which other buildings are being added to the top 10

Chair's Summary:

Thank you to the officers for the report. The committee agreed the recommendation and looks forward to receiving further updates on the team's progress.

4. Next Meeting: 10th October 2024 at 2.00pm

The meeting ended at **2.50 pm**
