

SUBJECT: WHOLE AUTHORITY STRATEGIC RISK ASSESSMENT

MEETING: Cabinet DATE: 14th April 2021 DIVISION/WARDS AFFECTED: ALL

1. PURPOSE:

- 1.1 To provide Cabinet with an overview of the current strategic risks facing the authority.
- 1.2 To seek Cabinet approval of the whole authority strategic risk assessment.

2. **RECOMMENDATIONS**:

2.1 That Cabinet members approve the strategic risk assessment shown at appendix 2 as a realistic and evidenced appraisal of the strategic risks facing the authority over the next three years.

3. KEY ISSUES:

- 3.1 The strategic risk assessment ensures that:
 - Strategic risks are identified and monitored by the authority
 - Risk controls are appropriate and proportionate
 - Senior managers and elected members systematically review the strategic risks facing the authority
- 3.2 The strategic risk assessment is updated based on the latest evidence available in line with the Council's strategic risk management policy; a summary is provided in appendix 3. The risk assessment has continued to be updated with the council's ongoing activity during the Coronavirus pandemic. Through the pandemic, the council continues to operate in a dynamic environment. Controls are in place to manage and mitigate, as far as possible, a variety of risks to service delivery and to the well-being of our staff and residents, of which the strategic risk assessment is one important mechanism.
- 3.3 Due to its purpose, the strategic risk assessment is a detailed document; appendix 1 provides Cabinet with an overview of the strategic risks on the register. Appendix 2 provides the full strategic risk assessment. There have been a number of amendments to ensure it accurately manages the current strategic risks facing the Council, including the removal of two risks. Where a risk has been removed and there remains a level of risk, these risks will continue to be monitored and action undertaken through the relevant service plan.
- 3.4 Updates have been made, where required, to the existing risks, including to the reason why the risk has been identified, the assessed risk level, mitigating actions being undertaken and the progress on these. Some of the more significant recent changes are:
 - Updates on financial risks, in relation to the budget for 2021/22, the MTFP, funding associated with the pandemic, and the potential impact on services into the future
 - Updates on the risk to service delivery and safeguarding arrangements for vulnerable children and adults during the pandemic
 - The latest on education related risks in light of changes and risks associated with the pandemic
 - Updated assessment of risk as a result of the United Kingdom leaving the European Union
 - The latest updates on the risks and mitigations related to COVID-19, which forms part of many risks, in line with changing government guidelines, legislation, local circumstances and evidence-bases
 - Removal of the risk of declining recycling rates affecting our ability to achieve the Welsh Government target of 70% recycling rates throughout Wales. This risk still needs to be managed at a service level.
 - Removal of the risk that the authority cannot deliver its services due to potential internal/external factors resulting in service disruption due to lack of Business Continuity planning

- 3.5 The risk assessment only covers high and medium level strategic risks. Lower level, or operational risks, are not registered unless they are projected to escalate within the three years covered. These are managed and monitored through other arrangements, including through team service plans. The strategic risk assessment should continue to focus on medium term risks to service delivery.
- 3.6 The strategic risk assessment was presented to Audit Committee in March 2021 to fulfil its role in providing assurance of the adequacy of the Council's risk management framework.
- 3.7 The risk assessment is a live document; it will evolve as new information comes to light, and will continue to be subject to continuous review as part of the authority's performance management framework. The Council continues to operate in an uncertain and fast changing environment; the strategic risk register will regularly evolve and adapt to identify, assess, manage and mitigate, as far as possible, a variety of risks to council service delivery and the well-being of our staff and residents. The up-to-date register is accessible on the Council's intranet so members are able to utilise it at any point in the year to re-prioritise their work plan as appropriate.
- 3.8 In line with the Well-being of Future Generations Act, identification and mitigation of longer-term risks that impact on future generations at community level, but will have a lesser impact on the medium term delivery of council services, is an area for continued development. Through working with the Public Service Board, we are developing our understanding of future risks and opportunities, and how we respond to them in Monmouthshire. This will inform the strategic risk register as relevant.
- 3.9 Cabinet has continued to clearly set its purpose and strategic aims for the Council, which guides its work through the coronavirus pandemic as the situation continues to evolve. The current aims set in the Council's 'Winter Strategy', also referred to as the 'plan on a page', focus on further activity that is being undertaken to manage and mitigate, as far as possible, related risks.

4 EQUALITY AND FUTURE GENERATIONS EVALUATION (INCLUDES SOCIAL JUSTICE, SAFEGUARDING AND CORPORATE PARENTING):

- 4.1 The purpose of the whole authority strategic risk assessment is to identify and assess risks robustly, and to ensure risk controls are put in place that are appropriate and proportionate. Any specific mitigating actions that have policy implications would need to be subject to a separate decision and a full impact assessment completed at that time.
- 4.2 The risk assessment specifically references risks around safeguarding and corporate parenting, and how they are being mitigated. It also includes activity to mitigate risks relevant to Social Justice and Future Generations.

5 OPTIONS APPRAISAL

5.1 The strategic risk assessment is updated based on the latest evidence available in line with the Council's strategic risk management policy. Risks that are identified as needing to be managed through the strategic risk register are included. The Council continues to operate in an uncertain and fast changing environment; the strategic risk register will regularly evolve and adapt to identify, assess, manage and mitigate, as far as possible, a variety of risks to council service delivery and the well-being of our staff and residents. The structure of the risk register has been developed based on information specified in the policy as needing to be included.

6 EVALUATION CRITERIA

- 6.1 The strategic risk management policy sets the criteria that needs to be considered when identifying and mitigating strategic risks. Actions in the risk register set timescales and responsibility holders for delivery. The risk assessment is subject to continuous review, as part of the authority's performance management framework. An up-to-date risk register is accessible to members on the Council's intranet The Hub.
- 6.2 The risk management policy and guidance defines at least annual reporting of the risk assessment to Audit Committee and Cabinet. The risk assessment is also available for members and select committees to use at any point in the year to inform their work plan as appropriate.

7 REASONS:

- 7.1 To ensure that strategic risks are identified and assessed robustly by the authority and that risk controls are put in place that are appropriate and proportionate, and supported by effective operational activity to ensure risk reduction/risk management.
- 7.2 An articulate and documented strategic risk management approach is implemented to support the council to:
 - preserve and protect the Council's assets, reputation and staff
 - promote corporate governance and aid good management in controlling and managing risks
 - support successful delivery of strategic aims and well-being objectives
 - improve business performance and better anticipate calculated risks where these are likely in delivering improvements
 - avoid unnecessary liabilities, costs and failures

8 **RESOURCE IMPLICATIONS:**

8.1 Resource implications are associated with some risks, and in implementing actions to manage them. There are no additional resource implications as a result of implementing the strategic risk management process.

9 CONSULTEES:

9.1 Input and evidence has been sought throughout the process and has been used to inform the development of the risk assessment.

10 BACKGROUND PAPERS:

Appendix 2: Monmouthshire County Council Whole Authority Strategic Risk Assessment – March 2021

Ref & Status	1	Risk	Potential	Potential Risk that:						
			The auth	e authority does not remain relevant and viable for future generations due to not having a sustainable delivery model						
Risk Owner and cabinet Member responsible				Paul Matthews & Cllr Peter Fox	Select Committee	All	Strategic objectiv			
Reason why Ide	ntified									

The introduction of the Well-being of Future Generations Act requires us to plan on a decadal and generational basis and our current models do not extend to this timeframe.

The Corporate plan sets out a clear purpose and aims for an ambitious five-year programme, with many areas focused on the longer-term future of the county and which addresses many complex challenges. The council's key delivery strategies to enable this have been revised. We have lessened our focus on some of the priorities in the Corporate Plan to re-direct capacity towards our Coronavirus emergency response effort. To provide clarity and ensure accountability through this time, Cabinet have continued to set a revised purpose and set of strategic aims.

The Coronavirus pandemic is likely to impact on economic, social, environmental and cultural well-being of the County. There is a need to continue to understand the impact and adapt/develop plans accordingly.

Since the start of 2020, the Council has faced significant and unprecedented challenges from flooding, and the COVID-19 pandemic and resulting lockdown restrictions. Each of these draws significantly on the Council's resources, both in terms of capacity and finances, and places an unprecedented strain on the Council. The long-term financial costs of dealing with the pandemic will place a financial strain on public finances for many years, which is likely to result in significant pressures on public finances in the medium to long-term

Reason why Ide	Reason why Identified								

After several years of taking significant resource out of the budget, the means of achieving further savings is increasingly more challenging. The Council is due to receive a 3.9% increase in its core funding from Welsh Government in 2021/22, marginally above of the 3.8% average for Wales. This goes some way to giving some additional flexibility to respond to the pressure on Council finances, however the Council's funding remains the lowest per head of population of any council in Wales. Pressures on the budget remain and continue to increase in terms of demographic growth, demand on services and pay and pension increases. Specific areas with pressures include additional learning needs, social care generally and children's services specifically, passenger transport, waste, car parking and Monlife activities.

The Council finalised its draft accounts for 19/20 with useable capital receipts of only £3.2m, a Council Fund balance of £8.5m and useable earmarked reserves of £6.4m (of which there is planned use that will reduce earmarked reserves to £5.4m at the end of 2020/21). Budget assumptions modelled in October 2020 indicated a gap of £5.3 million in 2021/22, culminating in a need to deliver a mixture of cost efficiencies and savings totalling £22.5m in aggregate by the end of the 4-year MTFP period. The modelling assumptions around the medium term financial plan are to be reviewed further to enable a range of scenarios to be considered, given the uncertainties with indicative funding levels over the medium term from UK and Welsh Government.

Along with the rest of the organisation, schools were facing a challenging financial settlement. 17 schools had started 2020/21 financial year in deficit. The situation has improved significantly as a result of additional and late grant awards from Welsh Government. Schools will now need to look to focus on restoring delivery of education to pupils and the investment that comes with this, with an equal focus on putting themselves back on a sustainable financial footing.

Over the past year, the Council has faced significant and unprecedented challenges, notably the flood response and recovery in February 2020, and the COVID-19 pandemic and lockdown restrictions implemented since March 2020, with uncertainty continuing. These have accentuated the financial challenge facing the council and financial forecasts are being prepared on assumptions that are uncertain. However, the Council has benefitted from late grant awards and full funding of its COVID pressures and income losses from the COVID Hardship Fund, such that the Council is, at the very least, in a slightly improved position to face the challenges and funding uncertainties over the medium term.

/e	All						

Underlying the Capital Strategy is the recognition that the financial resources available to meet Council priorities are constrained by a significant reduction in financial resources. The core capital programme has been constrained in recent years in order to enable the Band A new schools programme to be funded, which have successfully concluded. Officers are working through options in relation to a future Welsh Government Band B programme.

There remain a considerable number of pressures that sit outside any potential to fund them within the Capital MTFP, and this has significant risk associated with it. These include property and highways infrastructure, DDA work, and Public rights of way. In addition to this, there are various schemes/proposals (e.g. Monlife, tranche C Future schools, climate emergency response, any enhanced DFG spending etc.) that could also have a capital consequence, but in advance of quantifying those or having Member consideration of these items, they are also excluded from current capital MTFP. In the event of emergency pressures, resources will have to be diverted. Projects, such as the CCR City Deal, require significant capital investment to realise the outcomes.

There can be significant slippage in gaining capital receipts. Future investment in capital schemes, is in part dependent on future success of achieving capital receipts and there are risks attached to some receipts materialising. There is a risk associated with relying on the need to utilise capital receipts in the same year that they come into the Council and the potential for this to have significant revenue pressures should receipts be delayed and temporary borrowing be required. The Council finalised its draft accounts for 19/20 with useable capital receipts of only £3.2m, a Council Fund balance of £8.5m and useable earmarked reserves of £6.4m (of which there is planned use that will reduce earmarked reserves to £5.4m at the end of 2020/21).

The recent severe flooding has had a significant impact on aspects of the Council's highways, bridge and footpath infrastructure. It is unclear as to the level of additional funding Welsh Government will make available to the recovery effort and future necessary investment in flood defences. The Covid-19 pandemic is likely to have a future impact on the availability of capital resources as both Welsh Government and the Council redirects funding to support the financial sustainability of the Council.

Ref & Status	5	Risk	Potential	otential Risk that:						
			Reduced	duced staff well-being due to a range of factors will impact on the delivery of council services						
Risk Owner and	d cabinet M	ember responsibl	е	Tracey Harry & Cllr Phil Murphy	Select Committee	Strong Communities	Strategic objective	All		
Reason why Identified										

Our people are central to the success of our council and the county. Reductions to the council budget over recent years has seen staff numbers fall, which has inevitably intensified workloads in some areas. The council's response to the pandemic, alongside emergencies such as widespread flooding, risks putting unprecedented pressure on staff, and there is a risk of burnout. Similarly, the impact on staff wellbeing must be carefully considered, as staff face increased workloads, altered home lives, and the ongoing pressures associated with the pandemic.

Some services have identified challenges with recruitment in certain sectors, which is being managed locally. Staff turnover increased slightly during 2019/20, from 8.73% to 9.43%. The data on turnover is updated quarterly and as of December 2020, the council's turnover rate was 1.62% for 2020/21. Sickness levels were an average of 11.32 days per FTE employee for 2019/20. Early indications of sickness level figures for 2020/21 suggest this has reduced, with a figure up to February 2021 of 7.83 days per FTE employee. Furthermore, the People strategy has identified that tools and guidance to manage and prevent sickness are not always used effectively.

There is potential for a detrimental impact on staff well-being from a range of factors linked to the coronavirus pandemic and delivering the Council's response, and this will need continuous monitoring to determine implications and to ensure staff are supported.

	The robust delivery of the Council's corporate parenting responsibility and services related to vulnerable children as a result of an increase in demand and complexity in cases							
Risk Owner and cabinet Member responsible Julie Boothroyd & Cllr Penny Jones S			Select Committee	Children & Young people	Strategic objective	The best possible start in life		

Reason why Identified

The number of looked after children has increased significantly in recent years, from 173 at the end of 2018/19, to 219 at the end of March 2020. In December 2020, 218 children were looked after. Whilst the number of looked after children has stabilised, this remains a significantly higher number of children supported than in recent years. The number of children on the child protection register decreased in 2020. Significant demands on Children Services remains.

The 2020/21 net budget for Children Services is £14.3m, over half of which relates to looked after children, in particular, placements for looked after children. Despite an increase in budget for 2020/21 Children's Services are still forecasting a £1.434M overspend, with demand on Looked After Children services still high. With the increased demand comes added pressures on other services such as legal and transport provision, contact and staffing, and extended reliance on agency staffing as a consequence.

A number of potential risks have been identified due to the Coronavirus pandemic, which are being managed and monitored as far as possible: -

- Operational changes in the way that services are delivered as a result of COVID-19, with a reduction in 'direct' (physical) contact
- Possible increase in referrals because of the impact of the pandemic on vulnerable families
- A possible increase in court based casework when lockdown ends
- Increase in some spend areas to support certain areas of risk
- Reduced capacity and absence of staff due to the impact of COVID-19 impacting on delivery of services.
- Possible disruption to Foster placements and/or carer recruitment
- There is a national shortage of specialist fostering and residential placements for children with complex needs.

						Strong Communities					
Reason why Ide	Reason why Identified										

The Withdrawal Agreement Bill was enacted on 31st January 2020 taking the United Kingdom out of the European Union. Following this, the UK was in a transition period until 31 December 2020, during which time, the future UK-EU relationship was negotiated. The UK and European Union agreed a deal that will define the future relationship, which came into effect on 31 December 2020. The deal contains new rules for how the UK and EU will live, work and trade together, which will need to be adapted to by residents and businesses. Some decisions are still to be made, including specific import and export requirements, animal health requirements, all of which are being negotiated and led at a Welsh Government and UK Government level. The situation continues to evolve and impacts are likely to take some time to be realised.

The areas where there are potential remaining risks for the council include:

Disruption to the Council's supply chain (in particular Food Supply)

Threat to EU funded projects/lack of clarity over future funding streams;

Financial implications on budgets due to increased costs in relation to supply chain directly attributed to Brexit and continued austerity measures

Potential rise in social conflict and hostility - social cohesion

Medication / medical needs could be disrupted

Impact on construction projects, including the-schools projects, due to availability of skilled trade and supplies

Impact on the agricultural sector and wider rural economy which could have further consequences upon the Animal Welfare and Public Protection service

Supporting businesses with the transition process and regulatory changes

The risk will continue to be monitored through the first quarter of 2021/22 to determine if there are any impacts on the council, and its services, and the County, as a result of leaving the EU. At this time, a review will take place to determine if the risk level can be adjusted further.

Ref & Status	14	Risk	Potential Risk that:	Potential Risk that:								
	The spread of Coronavirus (COVID-19), and the emergence of variants of concern, will impact on staff and residents health and cause delays or reductions in the Council's service delivery											
Risk Owner and cabinet Member responsible Strategic Leadership Team & Cabinet Select Committee Adult Select Strategic objective All												
Reason why Id	Reason why Identified											
COVID-19 is a r	new strain of	^f coronavirus first	identified in Wuhan C	ity, China in December 2019. P	ublic Health Wales is working cl	osely with the Welsh Governme	ent, and the other UK public he	alth agencies, to	carefully monitor the situation and			
implement the	e planned res	ponse, with meas	sures in place to prote	ct the health of the public. In Ja	nuary 2021, the UK COVID-19 a	lert level was upgraded to level	5 (the highest level), 'epidemi	c is in general circ	culation; transmission is high or rising			
exponentially a	and there is a	a material risk of I	nealthcare services be	ing overwhelmed'. In February	2021, the UK COVID-19 alert lev	vel was lowered to level 4 'a CO'	VID-19 epidemic is in general c	irculation; transn	nission is high or rising exponentially' and			
Welsh Governr	ment are mo	nitoring the situa	tion carefully to deter	mine if lockdown measures car	be reviewed.							
Welsh Government are monitoring the situation carefully to determine if lockdown measures can be reviewed. The pandemic has posed a significant and unprecedented challenge to our way of life and how the Council continues to provide a range of vital services. The need to preserve life and stop the spread of the virus, while continuing to support communities, has meant that a lot of our usual work has been re-purposed or paused. The impact of the pandemic could lead to an increase in staff absence due to illness or self-isolation. This could result in a lack of capacity to respond to other major incidents, should they occur, and also cause a shortage in capacity to respond to agreed priority services. The delivery of social care services is essential and achieved through a dedicated service model, which could be impacted by the reduction in staff numbers. The Test, Trace and Protect protocol continues to operate, and presents a potential risk if large numbers of staff are required to self-isolate. Its impact will continue to be monitored. A developing concern is the occurrence of COVID-19 mutations and the impact these will have on vaccination efficacy and case rates. Evidence suggests that the mutations seen so far have resulted in changes to the virus that can increase the ease and rapidity of spread in the community, and impact on the effectiveness of vaccine.

The strategy has been developed in consideration of the impact, changes and learning as a result of the pandemic, and sets out a new direction for strategy and the council's service areas, in particular the Community Support Network (which forms part of the Community and Partnership Development Team's activities). The strategy also demonstrates the continued commitment to work in partnership, at national, regional and local community level, to implement the policy interventions, approaches, support and methods to improve outcomes for people and communities. Whilst the Aim of the Strategy will remain the same, rather than a broad programme of work, this third phase of the Strategy will provide policy coherence for a number of targeted individual action plans. These have been produced following consideration of the rapidly changing situation as a consequence of the pandemic, and will continue to help promote equitable prosperity in Monmouthshire. The action plans include Tackling Poverty and Inequality, Food Development and Homeless Transition.

In additional funding for home	<ul> <li>Development and Homeless Transition.</li> <li>During the pandemic, the level of demand for homelessness accommodation increased as Welsh Government mandated all councils to ensure nobody sleeps rough or is at risk of sleeping rough. Welsh Government released the Phase 2 Planning Guidance for Homelessness and Housing Related Support, which sets out their future homeless policy intentions. The core of the policy is rapid rehousing and to provide long-term accommodation with support if needed. The necessity to provide temporary accommodation continues to increase, and many applicants need specialist accommodation and housing support, which largely is not available in Monmouthshire. Furthermore, arising issues with placements is not uncommon and the risk of placement breakdown is relatively high.</li> <li>Unfortunately, not all support needs can currently be met through the existing Housing Support Grant Programme, which is scheduled for re-commission in April 2023.</li> <li>The Council's Phase 2 Homeless Transition Plan, as part of the wider Social Justice strategy, seeks to address the identified issues listed above, and help to transform homeless services in Monmouthshire. A request for Phase 2 Homeless grant funding was made to Welsh Government in June 2020 to help facilitate a number of the proposals, which are all now operational. Whilst this funding is welcomed, its availability was only until 31st March 2021. An uplift by Welsh Government to the Housing Support Grant allocation has enabled the Council to maintain the Phase 2 Grant funded projects to continue beyond 1st April 2021. The Housing Support Grant uplift will also facilitate additional homeless support provision in the Council's Budget Pressure's Mandate process for 2021/22 will also facilitate additional homeless support provision in the Council's Budget Pressure's Mandate process for 2021/22 will also facilitate additional funding for homelessness. The Homeless Transition Plan provides details of the proposed activities f</li></ul>			

### Risks removed from the Whole Authority Strategic Risk Register

Risk	Mitigating Action Update	Reason for removal
Potential Risk that: The authority cannot deliver its services due to potential internal/external factors resulting in service disruption due to lack of Business Continuity planning	Emergency Planning has developed a list of priority services, and these are reviewed every two years. The pandemic has prompted a review of Priority 1 services, which has highlighted the need for a tiered BCM planning process. This process will provide guidance to departments on the stringency needed for their BCM planning arrangements, based on the priority level of their services.	Discussions amongst Emergency Plan business continuity arrangements at categorising of services at P2 and P3 I Work is underway to ensure those se and this will be monitored at an oper
	There has been considerable focus on the Business Continuity strategies and alternative methods of service delivery since the beginning of the Covid-19 pandemic. Work has been undertaken to update business continuity plans, and strategies and dynamic changes to service delivery have been implemented as a matter of urgency.	Planning team.
Potential Risk that: Declining recycling rates will prevent achievement of the Welsh Government target of 70% recycling rates throughout Wales.	A number of changes to the HWRC services are underway, necessary to meet the future statutory recycling targets, and to deliver waste services efficiently and effectively moving forward. These include the continuation of the booking system at all sites, full closure of Usk HWRC, introduction of revised opening hours of 08:00 to 16:00, and an additional day closure at Five Lanes and Llanfoist.	Data will continue to be reviewed to and to determine if any learning can be figures going forward. The first quarter compared to 65.6% in the same period have continued above last year's recy
	In addition to this, amendments to the green waste collection service have been implemented, including changes to the container for garden waste, frequency of collection, and an increase in the annual charge for customers. This will contribute to achieving national statutory recycling targets, minimise budget pressures and provide sustainable garden waste services going forward.	Recycling rates will continue to be mo to be managed at a service level.
	There have been considerable changes in behaviour since the start of the pandemic, which has resulted in increased recycling rates.	

anning colleagues have identified the need to review at an operational level, specifically around the re-23 levels.

services identified as P1 have robust BCM plans in place, perational level, with the support of the Emergency

to establish the impact of the pandemic on recycling rates, an be taken from recent months to improve recycling arter of 2020/21 saw recycling rate increase to 71.1%, eriod in 2019. Furthermore, early figures suggest that rates ecycling rates for quarters two and three.

monitored closely by the service. The risk will continued

# Appendix 3: Strategic Risk Management Policy – Summary

This sets out the Council's policy and approach to strategic risk management. A copy of the full policy and guidance is available to staff and members on the council's intranet the Hub (Finance & Performance Management section – risk assessment)

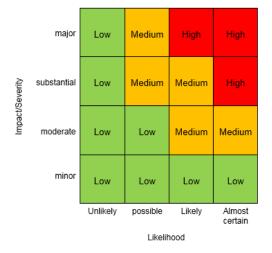

Risk Management is the process of identifying risks, evaluating their potential consequences and determining the most effective methods of controlling them or responding to them. Strategic risks are those which affect the Council as a whole. Typically these will be key risks which could significantly jeopardise the Council's ability to achieve its objectives, statutory plans and/or provide operational services as planned.

The Council is committed to the effective management of risk. As a large public sector organisation, it is exposed to a wide range of risks and threats in delivering key services to communities. Within the Council the purpose of risk management is to:

- preserve and protect the Council's assets, reputation and staff
- promote corporate governance and aid good management in controlling and managing risks
- support successful delivery of strategic aims, objectives and outcomes
- improve business performance and better anticipate calculated risks where these are likely in delivering improvements
- avoid unnecessary liabilities, costs and failures

The Council seeks to ensure that risk management is effective from strategic to individual services and employees. Therefore, all employees and councillors are responsible for ensuring there are good levels of internal control and risk management throughout the Council in order that the Council's specified outcomes are achieved.

The Council uses a 'traffic light' system of Red/Amber/Green associated with High/Medium/Low to categorise risk levels. This is determined using the risk matrix below

High risk	The risk is <b>highly likely</b> to occur and the impact will be major. Management action/control evaluation and improvement is required coupled with continued pro-active monitoring
Medium risk	The risk is <b>unlikely</b> to result in a major issue, however, if it did the impact would be <b>significant or serious</b> . This risk is relatively less significant than a High risk however it needs to be closely monitored within timely management action/controls to ensure it does not escalate.
Low risk	The risk is <b>very unlikely</b> to occur and the impact will be <b>minor or moderate</b> at worst. Risk will be managed by seeking control improvements where practical and / or monitoring and reviewing at regular intervals
