7. What evidence and data has informed the development of your proposal?

The Chief Medical Officer for Wales Annual Report 2016-17 – Gambling with our health’ <http://gov.wales/topics/health/professionals/cmo/reports/?lang=en>

Some of the key points that this report has raised is as follows;

The most important benefit of the gambling industry is the tax revenues, which are considerable in the UK: in 2017 this amounted to £2.7 billion. This income is used by the UK government to help fund its programme for government. However, the economic benefits of gambling need to be balanced against the social and health harms to people who gamble, their family, friends and wider society. While most people who participate in gambling activities do so without any significant problems, for others gambling is problematic; causing damage to their health and to wider society.

The availability of gambling products and platforms to diverse groups, and the developments in the infrastructure of game design, make gambling an immediate and rapidly evolving public health issue. The public health approach aims to improve quality of life for all and to achieve health equity. This focus on equity is necessary as people living in areas of deprivation are more likely to experience gambling-related harm.

The harms caused by gambling for the individual include anxiety, stress, depression, and alcohol and substance misuse. These factors are likely to have a wider impact on family and friends. Further family problems can include ‘money troubles’ and family breakdown, as well as neglect and violence towards any partner or children. There are higher rates of separation and divorce among problem gamblers compared to the general population. Further impacts of gambling include the inability to function at work, and financial problems which can lead to homelessness. The harms from gambling to wider society include fraud, theft, loss of productivity in the workforce, and the cost of treating this addiction. Gambling harm not only affects the individual, but the family and wider society.

Since this report Joint work published by a team led by Prof Robert Rogers, Bangor University, with colleagues from **Public Health Wales**, Heather Wardle Research Ltd and Swansea University highlights the widespread harms that gambling can cause, not only for those who gamble, but also for families, friends and communities. Gambling is increasingly being recognised as a public health priority.

The work consists of two reports published in January 2019:

1. [Gambling as a public health issue in Wales](#) and 2. [Framing a public health approach to gambling harms in Wales: Challenges and opportunities](#)
