

SUBJECT: PROPOSED MCC 20, 30, 40 & 50 MPH SPEED LIMIT ORDER

MEETING: INDIVIDUAL CABINET MEMBER DECISION

DATE: 9TH MARCH 2022

DIVISION/WARDS AFFECTED: DIXTON WITH OSBASTON, DRYBRIDGE, WYESHAM, OVERMONNOW, DEVAUDEN, ST MARYS, ST KINGSMARK, LARKFIELD, ST CHRISTOPHERS, THORNWELL, SHIRENEWTON, CAERWENT, LLANOVER, LLANGYBI FAWR, PORTSKEWETT

1. PURPOSE:

- 1.1 To consider the proposed 20, 30, 40 & 50mph speed limit Orders subsequent to advertisement in accordance with the Local Authorities Traffic Orders (Procedure) (England and Wales) Regulations 1996.

2. RECOMMENDATIONS:

- 2.1 It is recommended to not hold a public inquiry, and to proceed to approve and implement the proposed Orders.

3. KEY ISSUES:

- 3.1 In May 2019 the First Minister announced that 20mph should be the default speed limit for all residential roads in Wales. A task force was then established and reported back on an implementation plan for the legal process for the project to commence in 2023.
- 3.2 The proposals form a key part of the Welsh Government's policy for Road Safety and Active Travel by aiming to create a culture for slower speeds, reducing the number and severity of road casualties and supporting alternative travel modes such as walking and cycling by making the roads less intimidating to non-vehicle users.
- 3.3 The 20mph proposals are intended to reduce travelling speeds through the identified communities, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of these communities. The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.
- 3.4 The speed limit proposals for the 30, 40 & 50mph limits are intended to lower travelling speeds through the identified communities and routes. These schemes will lower existing speed limits and encourage lower travelling speeds, therefore, contributing to improving highway safety and reducing the severity of traffic collisions.
- 3.5 A summary of consultation responses can be found in Appendix 1 together with Officer responses. None of issues or comments raised cannot be overcome or that change the Officer recommendation to proceed with making the speed limit changes.

4. EQUALITY AND FUTURE GENERATIONS EVALUATION (INCLUDES SOCIAL JUSTICE, SAFEGUARDING AND CORPORATE PARENTING):

- 4.1 The proposal aims to support the national policy for reducing speed and thereby improving road safety as well as contributing towards providing a safer environment to encourage

people to walk and cycle in line with the objectives of the Active Travel Act. The new lower speed limits will also protect the interest of groups such as those with limited mobility, additional learning needs, dementia and visual impairment.

5. OPTIONS APPRAISAL

5.1 Table One below therefore provides an options appraisal of the proposal:

Options	Benefits	Risks	Comments/Mitigation
Do Nothing	<ul style="list-style-type: none"> • Less demand on office time and resource 	<ul style="list-style-type: none"> • Communities remain at risk from identified problematic traffic speeds. • Walking and cycling is disincentivised due to real and perceived safety concerns, increasing car usage contrary to national and local policy objectives. 	The benefits outweigh the resource implications.
Delay progress until the statutory speed limit changes in 2023	<ul style="list-style-type: none"> • Less demand on office time and resource • Potentially funded by Welsh Government, but this is not yet definite 	<ul style="list-style-type: none"> • Identified issues are not addressed and solutions not implemented. • Communities feel let down having been advised the proposals will be delivered in 21/22. 	The reputational benefits of proceeding as promised, and safety benefits from the proposals, are considered to outweigh the unconfirmed financial benefit of delaying to see if future WG funding is available.
Adopt the proposals	<ul style="list-style-type: none"> • Ensure the speed limit reductions are introduced as planned. • Collect traffic data to ascertain levels of compliance. • Collect casualty data to understand the general effect of the lower speed limits • Collect usage data to understand what impact lowered speed limits have in respect of modal shift 	<ul style="list-style-type: none"> • None 	This is the preferred option.

6. REASONS:

- 6.1 The proposed speed limit orders will support Welsh Government's proposal of reducing the national urban speed limit to 20mph in 2023. And furthermore, where the 30, 40 & 50mph speed limits are proposed, this will contribute to creating a safer highway environment for all road users.

7. RESOURCE IMPLICATIONS:

- 7.1 Unlike the Welsh Government funded 20mph pilots areas in Abergavenny and Severnside, the proposals subject of this report are funded by the Council's Highways budget.
- 7.2 Further £356k Welsh Government funding has been offered for 2022/23 but Welsh Government officers have recently confirmed that this funding is to be used in preparation for the proposed Wales-wide legislative change to make 20mph the new default speed limit in existing 30mph built up ('restricted') areas.

8. CONSULTEES:

- Cabinet Member for Infrastructure and Neighbourhood Services
- Enterprise DMT
- SLT
- The Traffic Orders were publicised in accordance with the statutory process.

9. BACKGROUND PAPERS:

Appendix 1; Schedule of consultation responses (to be forwarded on completion of consultation period), Appendix 2: Notice of Intention, Appendix 3: Statement of Reasons, Appendix 4: Drawing no's 1926, 1848, 1927, 1928, 1925, 1929, 1930, 1892, 1901, 1876, 1899, Appendix 5: WFGE Impact Assessment

Name/Details	Representations	Officer's Response
1.Resident (Somewhat Support via website)	<p><u>Crick 30/40mph</u></p> <p>I welcome the proposal to reduce speed on the A48 in Crick. However the plan shows the speed change point between 40 and 50 mph limits at the western end of Crick to be to the east of the old MOD railway bridge - opposite the old McAlpine depot. Past speed monitoring at this point showed 1 in 8 cars was travelling in excess of 55mph. I would suggest the change point would be better placed to the west of the old railway bridge so that cars entering the village environs would have already slowed before doing so.</p>	<p>The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed.</p>
2.Resident (Somewhat Support via website)	<p><u>Crick 30/40mph</u></p> <p>Re Crick element of TRO</p> <ul style="list-style-type: none"> - 40mph through Crick is an improvement but it really needs to be recognised as a residential settlement and have a speed limit of 30mph applied. Crossing the A48 on foot is akin to playing a game of Crossy Road on a child's tablet in so far as one has to scuttle to the centre of the road (avoiding being sucked into the slip stream of a HGV while waiting for a gap in the traffic) and then dart across the remainder of the road when safe to do so. - the proposed 40mph limit starts after cars will have entered Crick village when travelling in an easterly direction. If you examine the map you will note that the green shading starts after cars will have passed the gardens of two residential properties. This decision seems ill conceived and nonsensical. A more sensible and practical "on the ground" approach would be to start the new limit at or just before the railway bridge, which I believe is where the Crick village sign is 	<p>The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed. Additional highway infrastructure improvements such as pedestrian islands, can be considered separately to the speed limit reduction. However, the casualty record between 2016-2020 does not show any incidents involving pedestrians crossing the A48.</p>

	<p>located. This would also help slow down Caldicot bound cars in advance of the busy right turn into Crick Rd.</p> <p>So, I'm broadly supportive but don't believe the speed limit reduction goes far enough. Precedent exists elsewhere in south east Monmouthshire to justify a 30mph speed limit. Caerwent, Pwllmeyric, Tintern, Devauden, Shirenewton etc all have main roads passing through residential areas of the village and benefit from a 30mph or lower speed limit.</p> <p>As an aside, any reduced speed limit in Crick will need to be supported by highway improvements. The A48 in the between the Shirenewton and Crick Rd junctions is incredibly wide. Some form of central reservation with a pedestrian crossing(s) should be installed to allow pedestrians to cross safely, with the option of taking refuge at a mid point. This is especially important given existence of a care home for the elderly in Crick. I often see elderly residents going for a walk (either on foot at an understandably very slow pace or in a wheel chair) with a friend, relative or carer, and have witnessed them dicing with death when crossing the A48.</p>	
<p>3.Resident (Somewhat Support via website)</p>	<p><u>Crick 30/40mph</u></p> <ol style="list-style-type: none"> 1. It should be 30 mph to harmonise with the approaches of Shirenewton Road & Crick Road at their junction with the A48 through Crick. Also to harmonise with the A48 at Pwllmeyric Hill & Caerwent. Why are Crick residents any less important when it comes to road safety. What about the school children who cross the road outside Crick Nursing Home? 2. It should start in the easterly direction at least at the village sign and logically at the start of the double to single lane hatching to slow traffic safely. 3. With regard to the left spur just before 	<p>The A48 through Crick does not currently meet the criteria for a 30mph speed limit, with limited direct frontage development. However, school pick up/drop off points have now been amended so school transport now uses the dedicated bus pull in opposite the residential home. The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location</p>

	<p>Shirenewton Road which is 60 yards long and is basically a common driveway to 3 households, what is the thinking behind making this 40 mph with presumably signage? Has anybody actually visited the site? I would recommend they do.</p> <p>4. Old Shirenewton Road is a cul de sac, barely wide enough for two cars to pass, of 150 yards before it turns into a short track severing vehicle access to the last house. Again is it cost effective to put up a 30 mph sign? No responsible driver would ever drive down at this speed, it would probably be impossible to accelerate to such a speed anyway in 150 yards. Virtually all traffic down it is residents who live in it. Again has anyone visit site? I would recommend they do. In conclusion, speed reduction from 50 mph is well overdue but Crick deserves better than just knocking 10 mph off. The whole village should be 30 mph or don't the resident's lives and those of our children and those who work at the Nursing home count? Why is the A48 through Caerwent and Pwllmeyric already 30mph but not proposed for Crick?</p>	<p>suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed. Whilst the 40mph speed limit covers the old road alignment, it is not anticipated that vehicles will travel along this section of highway at that speed. The volume of vehicles and the fact that is a no through road only serving 3 properties suggests minimal vehicular usage. It should be noted that motorists have a duty to drive to the prevailing highway conditions and that speed limits are not a target speed which motorists should be striving to achieve. Old Shirenewton Road was included as a 30mph due to the frontage development along the road.</p>
<p>4.Resident (Support via website)</p>	<p><u>Crick 30/40mph</u></p> <p>I live at the corner of A48/Shirenewton Road T Junction.</p> <p>We have lived here for 30+ years with constant horns being sounded, lights being flashed and sharp breaking noises heard and seen on a daily basis.</p> <p>Not sure if proposed speed reduction limit is going to be 40 or 30mph but in my opinion it should be 30mph through Crick Village but action is really needed for road safety and safer usage for all T Junctions and side/home access routes to homes on the A48</p> <p>One of the worst areas is when traffic travelling from Caerwent towards</p>	<p>The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed.</p>

	<p>Chepstow comes off the end of the dual carriageway usually travelling 50mph but quite a lot come down at 55-60mph! :-</p> <ol style="list-style-type: none"> 1. Buses slowing down for bus stop just below Crick Garage get overtaken on hatched/no overtaking road section 2. Traffic slowing down for Shirenewton Road T Junction get overtaken on hatched/no overtaking road section 3. I personally have a 270 degree turning circle to get onto A48 when going to Chepstow, so I might only be in 1st/2nd gear for a short while where I constantly get flashing lights from behind and horn sounded as traffic comes so fast off dual carriageway and must think I am just going slowing rather than just joining to road. <p>The speed limit on the A48 through Caerwent is 30mph which has far fewer junctions and side/home access routes onto A48 than when travelling through Crick!</p>	
<p>5.Resident (Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>Traffic through Mathern has increased over the last few years with the congestion at Highbeech roundabout. It is used as a 'rat run' through to Bulwark, Thornwell and onto the Motorway. Drivers are speeding through the village at often more than 40 let alone 30!! We live on the main road through the village so this affects us greatly. It is very worrying as there are lots of people including the elderly residents, children walking for the school bus or playing, cyclists and a lot of local horse riders who enjoy walking/riding through the village, but the speed the traffic comes through is getting dangerous. It desperately needs a 20mph speed limit before someone is seriously hurt or worse.</p>	<p>Noted</p>

<p>6. Resident (Somewhat Support via website)</p>	<p><u>Crick 30/40mph</u></p> <p>The speed limit reduction should be down to 30 mph to be in keeping with the A48 at Caerwent and Pwllmeyric and should be implemented on the easterly approach where the start of the double to single lane hatching currently starts. Crossing the A48 in Crick can be a nightmare at busy times for pedestrians including the school children catching their buses. Also turning off the A48 to access our house safely can be extremely difficult with fast traffic coming from behind. In conclusion a reduction in speed limit to 40mph would be welcome but a further reduction to 30mph would be much better.</p>	<p>The A48 through Crick does not currently meet the criteria for a 30mph speed limit, with limited direct frontage development. However, the commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed.</p>
<p>7. Resident (Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>I fully support the proposed 40 and 20 mph speed limits for Mathern</p>	<p>Noted</p>
<p>8. Resident (Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>Mathern is used as a 'rat run' which has meant a higher volume of traffic passing through in recent years and with that more than half of the motorists travelling through the village already exceed the 30mph limit already.</p> <p>It is becoming increasingly dangerous for the residents. It is not safe for children to cross the road to get to their school buses or the play park.</p> <p>We have a lot of road side parking which causes issues in itself but with the current speed of the traffic it makes it even more dangerous for all pedestrians trying to cross the road and other motorists exiting side streets/junctions.</p> <p>The 20mph limit should be enforced in the village to make it safer for everybody. It is a busy village with lots of activity.</p> <p>I am also strongly in favour (whether it is rightly changed to 20mph or remains at 30mph) of more being done to force</p>	<p>The proposals to introduce a 20mph speed limit are intended to improve road safety and lessen the severity of road traffic collisions. The proposals will encourage the use of alternate modes of transport, such as walking, cycling and scooting, and contribute to overall improvements of general health and wellbeing. Reduced speed limits through this community should positively impact on community cohesion and improve opportunities for active travel. The proposals are being introduced in advance of the Welsh Government's intention to reduce the national urban speed limit from 30mph to 20mph in 2023.</p>

	<p>drivers to adhere to the speed limits (speed bumps/ camera) and of a pedestrian crossing being considered near the play park and village bus stop.</p>	
<p>9.Resident (Somewhat Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>We support the imposition of the 20mph speed limit but would suggest the 20mph limit should extend all the way up Chapel Lane from Mathern to Pwllmeyric. Also that the 20mph limit should extend all the way from Baileys Hay to The Buftons.</p>	<p>The commencement point of the 20 mph speed limit on Chapel Lane is correctly located where the urbanised developed residential properties commence at Mathern village it is not considered appropriate to extend the proposed 20 mph limit further to encompass the remainder of Chapel Lane environment which is rural in character, nature and setting prior to reaching Pwllmeyric. The start point of the 20 mph speed limit on Chapel Lane entering Mathern is located where there is a clear change in environment which is apparent to the motorist that they are entering an urbanised developed village environment. This also applies to the Buftons/Baileys Hay and it is not permissible to extend the proposed 20 mph speed limit further along Baileys Lane (beyond that point shown on the consultation plan) into open countryside which is rural in nature and character and is not set in an urbanised environment.</p> <p>Responsibility will always be for drivers to drive within the prevailing highway conditions at all times as stated in the Highway code and therefore to reasonably anticipate that they may encounter pedestrians, cyclists, pedestrians and other road users on any rural or urban road and to drive accordingly and this would apply also referring to Chapel Lane.</p>

<p>10. Resident (Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>I live on the main road through Mathern village & virtually every time I walk along the main road there are cars speeding through the village at speeds of 40 or 50mph & more. It's only a matter of time before someone is seriously hurt or worse. There is a children's nursery in the village as well as a children's play area next to the village hall. Add to that the elderly residents, cyclists, horse riders, dog walkers, runners & many more people going about their daily lives. Cars coming from the A48 traveling legally at 60mph fail to slow down at the 30mph sign at the entrance to the village. I would suggest that this section of road between the A48 & Mathern village be changed from 60 to 40mph as well as 20mph through the village itself.</p> <p>The traffic calming scheme introduced several years ago clearly doesn't work so I would welcome the proposal for a 20mph speed limit through the village.</p> <p>Best Regards</p>	<p>Noted</p>
<p>11. Resident (Somewhat Support e-mail and website)</p>	<p><u>Llanhennock 30mph</u></p> <p>I would like to see the 30mph TRO extended to the junction with Usk Road, a 20mph speed limit introduced between the Llanhennock village signs and a reduction of speed (40mph) along the route north of the village towards Usk.</p> <p>Footfall from the junction with Usk Road towards Llanhennock is high. The road is currently subject to a national speed limit and has no footway nor verge for pedestrians.</p> <p>A significant number of employees use the road to access the Leonard Cheshire Disability Home, walking wither from the Usk Road bus stop or Caerleon. Employees working shifts at the home are required to walk the route during both</p>	<p>The commencement point of the 30mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed. The highway from the point of the commencement of the proposed 30 mph in Llanhennock to the Usk Road is rural in nature and character with no direct urbanised frontal development and therefore, is not considered appropriate as a 30 mph speed limit area.</p> <p>The highway along the ridge to the north of Llanhennock is similarly rural in nature and</p>

	<p>daylight and night time hours.</p> <p>Regular walkers and residents are also required to walk the route.</p> <p>There are a number of residential dwellings with families, accessed along the Tredunnock Road. I would consider extending the 30mph speed limit past the Granary as shown on the attached plan.</p> <p>I would request that the speed limit through Llanhennock be reduced to 20mph between the village signs. There are a considerable number of residents, lack of footway and no safe pathway to access amenities such as the church, village hall and Wheatsheaf pub.</p> <p>It should also be noted, that currently within the village, there are 9 children under the age of 11 years of age as well as a number of older children. Whilst as a parent I take every precaution for my children to behave safely and not to approach the road unaccompanied, I have experienced a number of near misses with car drivers travelling excessively quickly through the village.</p> <p>The route north of the village along the ridge towards Usk, is a popular walking route. The road is narrow with a significant drop to the one side and few passing places for vehicles. Whilst the national speed limit does not require drivers to drive at 60mph, it does encourage higher speeds. A more reasonable limit, that would represent an improvement on road safety for all, would be 30 or 40mph along this section of road.</p> <p>I understand that Welsh Government propose to introduce a default 20mph speed limit in place of the current 30mph limit. I would assume that if this proposal were to be implemented in the near future, proposed 30mph through Llanhennock would become 20mph. If that were the case, a buffer zone reducing</p>	<p>character with very interspersed properties (some set back off the highway itself) this area is outside the village of Llanhennock and is not compliant for a 30 mph speed limit.</p> <p>There is a responsibility also on drivers as stated in the Highway Code to drive within the prevailing road conditions and to reasonably expect and to anticipate encountering other highway user including pedestrians, cyclists and to drive accordingly. Therefore drivers can reasonably expect to encounter cyclists , pedestrians and other users at any point on the highway network.</p> <p>The proposals are being introduced in advance of the Welsh Government’s intention to reduce the national urban speed limit from 30mph to 20mph in 2023. Llanhennock will be assessed and reviewed again at that time in accordance with the criteria set at that time required for a 20 mph speed limit.</p>
--	---	--

	<p>from 60mph on the Usk Road before Llanhennock village, may be required. To introduce this using the current amended TRO would seem a reasonable proposal.</p>	
<p>12. Resident (Support via website)</p>	<p><u>Devauden 20mph</u></p> <p>As residents of Devauden and in our seventies we wholeheartedly support the 20mph limit proposal (Devauden not listed in the dropdown). Although a lovely idea it seems quite pointless, the present 30mph limit might as well be a 60mph limit judging by the majority of the traffic. The new limit would be quite pointless unless it was enforced. A fixed speed camera, even at 30 mph would solve the problem instantly !</p>	<p>Noted</p>
<p>13. Resident (Somewhat Support via website)</p>	<p><u>Llanhennock 30mph</u></p> <p>I feel the order should be more extensive as pedestrians frequently use top road where there are no pavements or verges. There is also a cheshire home in village with wheelchair users frequenting top road. There should be a 30 mph limit extending from the junction of the Usk road up to the village sign. Then it should change to 20mph extending to the north end of Glen View garden. The road by Glen View is a particularly dangerous section due to the hill and bend reducing visibility for drivers and giving pedestrians and cyclists little warning of proximity to each other. Currently the national speed limit applies. Then there should be a 40 mph limit for the rest of top road until the junction at Croesllewarch. For Glen Usk road a similar situation exists for pedestrians and there should be 30Mph limit to Pencraig farm.</p>	<p>The commencement point of the 30mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed. The highway from the point of the commencement of the proposed 30 mph in Llanhennock to the Usk Road is rural in nature and character with no direct urbanised frontal development and is therefore not considered appropriate as a 30 mph speed limit area.</p>
<p>14. Resident (Somewhat</p>	<p><u>Crick 30/40mph</u></p> <p>I am pleased that the speed limit is being reduced but it is not low enough. It needs</p>	<p>The A48 though Crick does not currently meet the criteria for a 30mph speed limit, with limited direct frontage</p>

<p>Support via website)</p>	<p>to be 30mph. I live on the main road and the house shakes when lorries/ cars speed past! Myself and my children cross the road to walk the dog and each time we take our lives in our hands. Why is it 30 mph through Pwllmeric and Caerwent and not Crick? With the nursing home and children crossing the road it is so dangerous. Just turning into our house off the main road is dangerous with the speed some people drive down the A48. I have been beeped and harassed by drivers for slowing down to turn in to the house. 30 mph would help with all of this. Please reconsider. Best wishes</p>	<p>development. However, school pick up/drop off points have now been amended so school transport now uses the dedicated bus pull in opposite the residential home. The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed.</p>
<p>15.Resident (Somewhat Support via website)</p>	<p><u>Crick 30/40mph</u> We live in the left spur before Shirenewton Road, which is a common driveway for three houses, leading straight on to the A48. Lowering the speed limit is a welcome change, but with limited vision when pulling out of the drive, we feel it should be further reduced to 30MPH. In addition to a narrow footpath along the A48 towards the care home, a further reduction is in the best interest for residence and motorists.</p>	<p>The A48 though Crick does not currently meet the criteria for a 30mph speed limit, with limited direct frontage development. However, school pick up/drop off points have now been amended so school transport now uses the dedicated bus pull in opposite the residential home. The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed.</p>
<p>16.Resident (Somewhat support via website)</p>	<p><u>Crick 30/40mph</u> I totally agree that the speed limit on the A48 through the village of Crick needs to be reduced. However, I feel it should be reduced to 30mph. At a limit of 30mph, Crick would then have the same limit as the villages either side of Crick on the A48 - Pwllmeyric and Caerwent. I do not understand why the residents and</p>	<p>The A48 though Crick does not currently meet the criteria for a 30mph speed limit, with limited direct frontage development. However, school pick up/drop off points have now been amended so school transport now uses the dedicated bus pull in opposite the residential home.</p>

businesses of Crick, including a care home, are not afforded the same level of consideration to road safety as other villages in this area.

The plans showing the proposed changes do not go far enough - the length of road that falls within the new speed limit area on the A48 needs to be extended in both directions.

The traffic, including many HGVs and tipper trucks regularly speed through the village - the reduction of 10mph will not stop this. My house, a listed building, literally vibrates due to the reckless speed these vehicles are driven at. I repeat my offer for people from the council to come and witness this for themselves.

Old Shirenewton Road does not need a 30mph speed limit - we do not need extra signage that spoils the environment, is pointless and a waste of funds in a cul de sac that leads only to a few houses - this road is an access road to private dwellings only.

This is also the case with the 'shared driveway access' that runs parallel to Shirenewton Road - this does not need a speed limit or signage - as far as I am aware it is not even an adopted highway. This short cul de sac leads to three homes only.

The occasional speed checks that have been administered along the A48 have never been carried out IN the village of Crick, rather in plain view on the dual carriage way section between the two villages. This will not and has not provided a true picture of how traffic operates through the village. It is dangerous, particularly at the junction with the A48 and Shirenewton Road. We have children in the village who need to cross the roads not least for their school bus. Clear vision is obscured for drivers by walls and the bridge.

The junction at the A48 and Crick Road is

The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed. Old Shirenewton Road was included as a 30mph due to the frontage development along the road.

	<p>also extremely dangerous - traffic does not approach the junction from Crick Road at the current 30mph limit. There is no footpath on this stretch and it is perilous for pedestrians.</p> <p>Someone needs to visit Crick and spend some time observing the traffic and speaking to the residents - PLEASE.</p>	
<p>17.Resident (Support via website)</p>	<p><u>Crick 30/40mph</u></p> <p>Volume of traffic has significantly increased over the past 5 years. Many heavy vehicles use the road outside our house, including ***** who moves topsoil and aggregates and ***** who moves hardcore. These vehicles are heavy but the speed they travel is not only ridiculous but very dangerous! Many days our house 'shakes' due to the heavy weight pounding on the road as they drive past at speed!!!! These vehicles also start their shift as early as 5.30 am and although I understand these people have business to run, they wake us every day due to the speed they travel at!</p> <p>In addition to this on a Friday and Saturday night many cars use the road like a race track, we have also had cars doing 'doughnut' circles directly outside our gate! What will happen when one of these cars actually go into our house destroying our property, because I am getting really fearful this will happen!!!!</p> <p>We have been saying for years that we need a speed camera outside our house to slow down manic drivers who have no respect for anything as most drivers use the A48 like a motorway!!!! This is totally unacceptable and something needs to be put in place before some terrible incident occurs!!</p>	<p>The commencement point of the 40mph speed limit is at the beginning of the built up environment, and therefore, is considered appropriate. The immediate highway characteristics at this location suggest to the motorist that a change is apparent, which supports the proposed reduction in travelling speed.</p> <p>The enforcement of the proposed speed limits can currently only be undertaken by Gwent Constabulary and it has been duly consulted as part of this legal consultation process.</p> <p>The provision of fixed or mobile speed camera sites is assessed by GoSafe, all requests for a fixed camera site or a mobile speed camera enforcement site should be forwarded to them who will duly assess it in accordance with its protocols.</p>

<p>18.Resident (Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>Amendment Order No2 includes a 20mph zone for Mathern, a village with one central road on which there is a children's nursery, bus stop for local schools, a village hall and a play park. As it is a straight road there are often speeding cars and a high risk of an accident with cars travelling at 30mph, let alone at the speeds they often travel through the village at. A 20mph zone would add greatly to village life, safety and wellbeing.</p>	<p>Noted</p>
<p>19.Resident (Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>Mathern often has young children walking between friends houses along the pavement and with a straight road through the village there are often speeding cars. We have a nursery, a bus stop for schools and a play park.</p>	<p>Noted</p>
<p>20.Resident (Support via website)</p>	<p><u>Mathern 20mph</u></p> <p>Traffic speed reduction is vital for safety in Mathern however suggest that the 20 mph limit should be applicable to all of Chapel Lane due to limited lighting, narrow lanes and housing</p>	<p>The commencement point of the 20 mph speed limit on Chapel Lane is correctly located where the urbanised developed residential properties commence at Mathern village it is not considered appropriate to extend the proposed 20 mph limit further to encompass the remainder of Chapel Lane environment which is rural in character, nature and setting prior to reaching Pwllmeyric. The start point of the 20 mph speed limit on Chapel Lane entering Mathern is located where there is a clear change in environment which is apparent to the motorist that they are entering an urbanised developed village environment.</p>

<p>21. Resident (Support via website)</p>	<p><u>Crick 30/40mph</u></p> <p>This is without a doubt needed as the road is getting busier, meaning more and more cars exceeding the current 30 limit creating a dangerous environment for our children and elderly residents. The increase in road use is due to more cut through traffic due to the congestion on the A48 and will only become worse once the houses on crick road are built. Currently the 60 to 30mph is a big issue as lots of cars enter the village still doing in excess of 40! The proposed change of 40 to 20mph, I believe will make a huge difference to the entrance speed in to the village. I would like to hope this will make people think twice about their speed through the residential area regardless of how late they are running for work or nursery drop off/pick up. The reduction of 60 to 40 on the approach to the village will also make walking and cycling to the garden centre/garage safer for residents. In addition to encouraging walking and cycling it will improve access to the bus stop and therefore may also encourage people to use public transport. These changes need to happen before and not after there is a fatality on this road. Let's act now to try and prevent rather than waiting and acting in response as so often is sadly the case.</p>	<p>Noted</p>
<p>22. Resident (Objection via e-mail)</p>	<p><u>Amendment 2</u></p> <p>I wish to object to the proposed order on the ground that the statutory process has not been followed. The deposited documents do not include those required by paragraph 2 of Schedule 2 to the 1996 Regulations - namely, a copy of the proposed order and a copy of the consolidation order (as amended by previous amending orders). The consultation process needs to start again.</p>	<p>The consultation documents were made available for members of the public to view by appointment at County Hall.</p>

<p>23.Elected Member for Shirenewton (via email)</p>	<p><u>Mathern 20mph</u></p> <p>I am pleased to see that the Mathern 20mph speed limit is being progressed and fully support 20mph being introduced for Mathern. However, I would like the traffic order extended to cover up to the Buftons and Chapel Lane as shown in the map sent in October/ November last year.</p> <p>The Buftons and the properties along there near the Mill would benefit also from a lower speed limit particularly in view of how hazardous it is to get into and out of the Buftons due to it being so close to the A48 junction and I would be grateful if consideration be given to looking at the reduction.</p> <p>There were indicative maps for Abergavenny and elsewhere in the pilot areas and I did ask if we could be sent one prior to the legal process being started in the workshops we had on it.</p> <p>Chapel Lane is proposed to be 20mph only on the Mathern side of it for the small number of houses there but there are very good reasons to make it 20mph along the whole length of Chapel Lane (with streets off it the same) from Mathern to the A48 junction.</p> <p>Chapel Lane has no street lights where the small number of houses are near Mathern ,which is proposed to be 20mph, then a terminal sign, there is then a farmers field, then a 30mph sign prior to the Pwllmeyric sign with Orchid Meadow off it, then it becomes a single track one way lane and then more houses until you get to the A48.</p> <p>Chapel Lane is a rural lane used by walkers, runners, dog walkers, school children and the elderly as the main lane connection from Pwllmeyric to Mathern village for all of the village amenities or when school children come off the bus on the A48 or off the bus at Mathern and walk home down the lane in Pwllmeyric or up the lane from Mathern. It can be particularly hazardous at night time when walking along it.</p>	<p>The commencement point of the 20 mph speed limit on Chapel Lane is correctly located where the urbanised developed residential properties commence at Mathern village and it is not appropriate to extend the proposed 20 mph limit further to encompass the remainder of Chapel Lane environment which is rural in character and nature and setting prior to reaching Pwllmeyric. The start point of the 20 mph speed limit on Chapel Lane entering Mathern is located where there is a clear change in environment apparent to the motorist that they are entering an urbanised developed village environment. This also applies to the Buftons/Baileys Hay and it is not permissible to extend the proposed 20 mph speed limit further along Baileys Lane (beyond that point shown on the consultation plan) into open countryside which is rural in nature and character and is not set in an urbanised environment.</p> <p>There is also a responsibility for drivers to drive within the prevailing highway conditions at all times as stated in the Highway code and therefore to reasonably anticipate that they may encounter pedestrians, cyclists, pedestrians and other road users on any rural or urban road and to drive accordingly and this would apply also referring to Chapel Lane.</p> <p>There is No vehicular Entry permitted southbound along Chapel Lane in Pwllmeyric from a point from its junction with Chapel Close to its junction with Orchid Meadow therefore pedestrians and cyclists and other vulnerable road users in the remainder of Chapel lane south of its junction with Chapel Close will</p>
--	--	---

	<p>Unlike Mathern there are no pavements along its entire length except at the very edge junction of the A48 which is the A48 path.</p> <p>It is assumed that the terminal sign on Chapel Lane would become 30mph but this is not clear as the small field gap has no street lights so it would be sensible to clarify that this is also 20mph as opposed to anything higher as it is assumed that it is 30mph currently as opposed to a national speed limit as there are no terminal signs from the current 30mph at Mathern and it is assumed that the one for Pwllmeyric is a 30mph repeater sign? However the field gap would not become 20mph in 2023 due to the lack of street lights and so it would be sensible to have Chapel Lane as 20mph along its entire length. I believe that there is local support for that proposal.</p> <p>I would be very grateful if the traffic order being made for Mathern could be extended to take full account of making it safer for pedestrians and encourage Active Travel by reducing the speed limit to 20mph not only on the Mathern side of Chapel Lane, but for the whole as opposed to just part of Chapel Lane which is used as a main walking route between Pwllmeyric and Mathern and also extended as indicated, at the start of this email.</p>	<p>not encounter vehicular traffic coming off the A48 via Pwllmeyric which will increase their level of safety in using Chapel lane south of its junction with Orchid Meadow.</p> <p>It is understood that, Primary and secondary school children up to and including 16 years of age living in Mathern including the Mathern end of Chapel Lane are bussed to and from school from Mathern village and would not have to walk along the rural section of Chapel Lane which is outside the proposed 20 mph speed limit for Mathern. School children living in Pwllmeyric are bussed to and from School from Pwllmeyric also.</p>
<p>24.Resident (Objection via e-mail)</p>	<p><u>Amendment No2</u></p> <p>Dear Sirs</p> <p>I write to record my objection to your proposals to impose 20mph speed limits, and other speed reductions, in a number of locations throughout the County.</p> <p>1. You state that "the proposal is intended to reduce travelling speeds ... which will ... encourage the use of alternative travel modes such as walking, cycling and scooting". You have provided no evidence to support your assertion. Please do so. Moreover, scooting, in particular, is badly regulated, with scooter users riding often their equipment on footpaths creating a danger to pedestrians and, I submit, should be discouraged until proper regulations are available and they are enforced.</p>	<p>1. The proposal to reduce speed limits are intended to encourage alternative travel modes by contributing to making the roads a safer environment for all users. It is recognised that pedestrians and cyclist do feel safer whilst travelling through a reduced speed limit, which in turn should encourage the use of these methods of transportation, whilst also meeting the Welsh Governments Active Travel agenda. The reference to scooting is in relation to push scooters</p>

<p>2. You state that "the proposals will contribute to creating a safer, more welcoming highway environment for all highway users". Again, you have offered no evidence to support your contention. I submit that travelling at such low speeds is likely to engender frustration amongst motorists resulting in the potential for rash, ill-considered manoeuvres which will jeopardise road safety.</p> <p>3. You state that the proposals will ... lessen the severity of road collisions". Once more, you fail to support your contention with evidence. Please state how many collisions have been recorded at each site, and with what severity? I submit that this is just a blanket proposal made without consideration for need. That is a misuse of public money at a time when financial prudence is required, and many households face hardship and a cost of living crisis</p> <p>4. You state that the proposals will "have a positive impact on the health and wellbeing of the community". Yet again, the bland statement is made without any attempt at justification. Please provide a detailed explanation for your claim.</p> <p>5. You state that the proposals follow "representations received from the local community". By whom in each local community? Is this simply a case of a handful of zealots taking it upon themselves to speak for their communities without real support? What detailed consultations have been carried out amongst the affected communities to ensure that the purported support exists?</p> <p>6. Driving at 20mph implies driving in lower gears than would be the case under existing speed limits. As a general rule, the lower the gear the greater the fuel consumption and consequently the greater pollutants emitted by the vehicle. How does that square with the Council's environmental policies and its aspiration to see reduced carbon emissions? How does it relate to the stated purpose of the proposals being to create "a safer, more welcoming highway environment"?</p> <p>In summary, your proposals are ill-conceived and not fully thought through, and certainly put forward without any attempt at serious justification. They represent a waste of public money at a time when the Council is operating under significant financial constraints. They are yet another example of the anti-motorist bias that regrettably pervades the public bureaucracy.</p>	<p>and not the motorised versions.</p> <p>2. The lower speed limits will reduce travelling speeds and contribute to creating a safer environment for all users. Whilst it is acknowledged some motorists may disregard Highway Law, the Police as the enforcement authority can take action.</p> <p>3. It is acknowledged that lower speeds result in fewer vehicular collisions and reduced severity of injuries. "The Welsh 20mph Task Force Group Final Report" published by Welsh Government in July 2020 substantiates these findings.</p> <p>4. Increased levels of walking/cycling will positively contribute to the overall health and wellbeing of the respective communities.</p> <p>5. Representations were received from a mixture of Local Elected Members, Community Councils and members of the public.</p> <p>6. There is relatively little evidence for the effect of 20mph speed limits on air quality. However, a 2017 study which modelled the impacts of a 20mph default speed limit for restricted roads across Wales concluded there would be an overall improvement in air quality. The researchers also calculated gains of 54 lives saved and a decrease of 647 years of life lost due to reduced PM2.5 and Nitrogen Dioxide emissions.</p> <p>Whilst it is appreciated that lower travelling speeds through communities will not</p>
---	---

	For the reasons set out above, and other considerations, I object to the proposals	be welcomed by all, the overarching benefits appear to outweigh the negatives. Indeed in 2023 Welsh Government has committed to reducing the national urban speed limit from 30mph to 20mph.
25.Elected Member for Shirenewton (via email)	<u>Shirenewton 20mph</u> I fully support the introduction of a reduced speed limit of 20mph in Shirenewton and Mynyddbach villages, thank you for the opportunity to respond.	Noted.
26.Resident (Support)	<u>Monmouth 20mph</u> Supports a 20 mph speed limit in the Drybridge Street area of Monmouth.	Noted.
27.Resident (Support via e-mail)	<u>Monmouth 20mph</u> 20mph has to be introduced from lights to Bridges asap! Old people live in this st and a lot of children and young moms walk past.	Noted.

NOTICE OF INTENTION TO MAKE A PERMANENT ORDER

**MONMOUTHSHIRE COUNTY COUNCIL
MONMOUTHSHIRE COUNTY COUNCIL TRAFFIC REGULATION, SPEED LIMITS AND PARKING
REGULATIONS CONSOLIDATION ORDER 2019
(AMENDMENT ORDER NO 2) 2022**

**PROPOSED PROVISION AND AMENDMENTS TO TRAFFIC
ORDERS AT VARIOUS LOCATIONS WITHIN DIXTON WITH OSBASTON, DRYBRIDGE, WYESHAM,
OVERMONNOW, DEVAUDEN, ST MARYS, ST KINGSMARK, LARKFIELD, ST CHRISTOPHERS,
THORNWELL, SHIRENEWTON, CAERWENT, LLANOVER, LLANGYBI FAWR, PORTSKEWETT IN
MONMOUTHSHIRE COUNTY COUNCIL**

NOTICE IS HEREBY GIVEN that Monmouthshire County Council of County Hall, The Rhadyr, Usk, NP15 1GA ("the Council") propose to make a Road Traffic Regulation Order as follows:

EFFECT OF THE ORDER: to introduce 20, 30, 40 & 50mph speed limits within the localities identified on the plans, which are available to view at County Hall, Usk or online via <http://www.monmouthshire.gov.uk/public-consultation-traffic>

Further details of the proposed Order, comprising plans and a statement of reasons for proposing to make the Order may be examined via pre-arranged appointment at County Hall, Usk NP15 1GA (appointments can be arranged by e-mailing traffic@monmouthshire.gov.uk) or online via <http://www.monmouthshire.gov.uk/public-consultation-traffic> or the via the below QR code

Any objections in respect of this proposal should be made in writing, stating the grounds on which the objection is being made and should be sent to Traffic Section, Monmouthshire County Council, County Hall, Usk NP15 1GA not later than the 23rd of February 2022 or via scanning the QR code below and selecting "How to comment on a proposed TRO", where the public consultation response form can be accessed.

Date: 2nd February 2022

Appendix 3:

MONMOUTHSHIRE COUNTY COUNCIL

Monmouthshire County Council Traffic Regulation, Speed Limits and Parking Regulations Consolidation Order 2019 (Amendment Order No 2) 2022

Proposed provision and amendments to traffic orders at various locations within Dixton with Osbaston, Drybridge, Wyesham, Overmonnow, Devauden, St Marys, St Kingsmark, Larkfield, St Christophers, Thornwell, Shirenewton, Caerwent, Llanover, Llangybi Fawr, Portskewett in Monmouthshire County Council

Statement of General Effect

The effect of the Order will be to implement 20, 30, 40 and 50mph speed limits through the residential enclaves identified. The proposal is intended to reduce travelling speeds and contribute to providing a safer highway environment for all users.

Statement of Reasons

DRAWING	ROADS	DETAILS
1926	20, 30 & 40mph Speed Limits, Various Roads, Devauden village	The Welsh Government are to introduce a national default 20mph speed limit for residential restricted roads in Wales by August 2023. In advance of this initiative, and following representations received from the local community MCC propose to introduce a community wide 20mph speed limit. The Welsh Assembly Government's Circular 24/2009 provides national guidance for Setting local speed limits in Wales. MCC has considered paragraph 5.6 to 5.11 of the Welsh Assembly Government's Circular 24/2009 in particular 5.7 and 5.10. A decision has been made to depart from this guidance for the following reasons; The proposal is intended to reduce travelling speeds through the community, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community . The proposals will contribute to creating a safer, more welcoming highway

		environment for all highway users and lessen the severity of road collisions.
1848	20mph Speed Limit, Various Roads, Larkfield, St Christophers & Thornwell, Chepstow	<p>The Welsh Government are to introduce a national default 20mph speed limit for residential restricted roads in Wales by August 2023. In advance of this initiative, and following an experimental 20mph speed limit introduced in 2019/20, it is proposed to now make a permanent 20mph to replace the experimental order.</p> <p>The proposal is intended to reduce travelling speeds through the community, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community . The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.</p>
1927	20mph Speed Limit, Various Roads, Larkfield, St Kingsmark, St Marys, Chepstow	<p>The Welsh Government are to introduce a national default 20mph speed limit for residential restricted roads in Wales by August 2023. In advance of this initiative, and following representations received from the local community MCC propose to introduce a community wide 20mph speed limit. The Welsh Assembly Government's Circular 24/2009 provides national guidance for Setting local speed limits in Wales. MCC has considered paragraph 5.6 to 5.11 of the Welsh Assembly Government's Circular 24/2009 in particular 5.7 and 5.10. A decision has been made to depart from this guidance for the following reasons; The proposal is intended to reduce travelling speeds through the community, which in turn will encourage the use of alternative</p>

		<p>travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community . The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.</p>
1928	<p>20 & 40mph Speed Limits, Various Roads, Mathern Village</p>	<p>The Welsh Government are to introduce a national default 20mph speed limit for residential restricted roads in Wales by August 2023. In advance of this initiative, and following representations received from the local community MCC propose to introduce a community wide 20mph speed limit. The Welsh Assembly Government’s Circular 24/2009 provides national guidance for Setting local speed limits in Wales. MCC has considered paragraph 5.6 to 5.11 of the Welsh Assembly Government’s Circular 24/2009 in particular 5.7 and 5.10. A decision has been made to depart from this guidance for the following reasons; The proposal is intended to reduce travelling speeds through the community, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community . The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.</p>
1925	<p>20mph Speed Limit, Various Roads Drybridge, Dixton with Osbaston, Wyesham and Overmonnow, Monmouth</p>	<p>The Welsh Government are to introduce a national default 20mph speed limit for residential restricted roads in Wales by August 2023. In advance of this initiative, and following representations received from the local community MCC propose to</p>

		<p>introduce a community wide 20mph speed limit. The Welsh Assembly Government's Circular 24/2009 provides national guidance for Setting local speed limits in Wales. MCC has considered paragraph 5.6 to 5.11 of the Welsh Assembly Government's Circular 24/2009 in particular 5.7 and 5.10. A decision has been made to depart from this guidance for the following reasons; The proposal is intended to reduce travelling speeds through the community, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community . The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.</p>
<p>1929</p>	<p>20, 30 & 40mph Speed Limits, Various Road, Shirenewton, Mynydd Bach, Shirenewton</p>	<p>The Welsh Government are to introduce a national default 20mph speed limit for residential restricted roads in Wales by August 2023. In advance of this initiative, and following representations received from the local community MCC propose to introduce a community wide 20mph speed limit. The Welsh Assembly Government's Circular 24/2009 provides national guidance for Setting local speed limits in Wales. MCC has considered paragraph 5.6 to 5.11 of the Welsh Assembly Government's Circular 24/2009 in particular 5.7 and 5.10. A decision has been made to depart from this guidance for the following reasons; The proposal is intended to reduce travelling speeds through the community, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community . The</p>

		proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.
1930	30mph Speed Limit, A466, Buckholt, Dixton with Osbaston	The proposal is intended to reduce the current speed limit from 40mph to 30mph to encourage lower travelling speeds through the community, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community . The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions. The proposed 30mph speed limit encompasses a bend with a sharp deviation where there is an history of vehicles leaving the carriageway causing damage to adjacent residential properties.
1892	30mph Speed Limit, C24.14 Access road into The Bryn, Llanover	The proposal is intended to reduce travelling speeds into community, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the

		health and wellbeing of the community. The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.
1901	30mph Speed Limit, Llanhennock village, Llangybi Fawr	The proposal is intended to reduce travelling speeds through the village, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community. The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.
1876	30 & 40mph Speed Limits, Various Roads, Crick, Caerwent	The proposal is intended to reduce travelling speeds through the village, which in turn will encourage the use of alternative travel modes, such as walking, cycling and scooting. It will also have a positive impact on the health and wellbeing of the community. The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions
1899	50mph Speed Limit, A48, at Shirenewton, Portskewett, Caerwent	The proposal is intended to reduce travelling speeds along the A48 from the current national speed limit to 50mph. The proposals will contribute to creating a safer, more welcoming highway environment for all highway users and lessen the severity of road collisions.

Equality and Future Generations Evaluation

<p>Name of the Officer completing the evaluation</p> <p>Paul Keeble Phone no: 01633 644773 E-mail: paulkeeble@monmouthshire.gov.uk</p>	<p>Please give a brief description of the aims of the proposal</p> <p>To consider the proposed reduction in speed limits to 20,30, 40 & 50mph through the residential and rural routes identified.</p>
<p>Name of Service area</p> <p>Placemaking, Regeneration, Highways and Flooding</p>	<p>Date 18th February 2022</p>

1. **Are your proposals going to affect any people or groups of people with protected characteristics?** Please explain the impact, the evidence you have used and any action you are taking below.

Protected Characteristics	Describe any positive impacts your proposal has on the protected characteristic	Describe any negative impacts your proposal has on the protected characteristic	What has been/will be done to mitigate any negative impacts or better contribute to positive impacts?
Age	This proposal will reduce the travelling speeds of all vehicles through the settlements and along the routes identified. Which in turn will contribute to making the streets safer and reduce the severity of collisions. All highways users should feel safer negotiating the highway, due to the reduction in travelling speeds. Particularly those vulnerable members of society, such as older, younger and people with disabilities.	None	N/A

Protected Characteristics	Describe any positive impacts your proposal has on the protected characteristic	Describe any negative impacts your proposal has on the protected characteristic	What has been/will be done to mitigate any negative impacts or better contribute to positive impacts?
Disability	This proposals will reduce the travelling speeds of all vehicles through the settlements and along the routes identified. Which in turn will contribute to making the streets safer and reduce the severity of collisions. All highways users should feel safer negotiating the highway, due to the reduction in travelling speeds. Particularly those vulnerable members of society, such as older, younger and people with disabilities.	None	N/A
Gender reassignment	None	None	N/A
Marriage or civil partnership	None	None	N/A
Pregnancy or maternity	None	None	N/A
Race		None	N/A

Sex	None	None	N/A
Sexual Orientation	None	None	N/A

The Socio-economic Duty and Social Justice

The Socio-economic Duty requires public bodies to have due regard to the need to reduce inequalities of outcome which result from socio-economic disadvantage when taking key decisions This duty aligns with our commitment as an authority to Social Justice.

	Describe any positive impacts your proposal has in respect of people suffering socio economic disadvantage	Describe any negative impacts your proposal has in respect of people suffering socio economic disadvantage.	What has been/will be done to mitigate any negative impacts or better contribute to positive impacts?
Socio-economic Duty and Social Justice	None	None	N/A

Policy making and the Welsh language.

How does your proposal impact on the following aspects of the Council's Welsh Language Standards:	Describe the positive impacts of this proposal	Describe the negative impacts of this proposal	What has been/will be done to mitigate any negative impacts or better contribute to positive impacts
<p>Policy Making</p> <p>Effects on the use of the Welsh language, Promoting Welsh language Treating the Welsh language no less favourably</p>	<p>All new highway signs and carriageway markings will be bi-lingual with Welsh appearing in front of English as per current guidance</p>	<p>N/A</p>	<p>N/A</p>
<p>Operational</p> <p>Recruitment & Training of workforce</p>	<p>None</p>	<p>None</p>	<p>N/A</p>
<p>Service delivery</p> <p>Use of Welsh language in service delivery Promoting use of the language</p>	<p>None</p>	<p>None</p>	<p>None</p>

4. Does your proposal deliver any of the well-being goals below? Please explain the impact (positive and negative) you expect, together with suggestions of how to mitigate negative impacts or better contribute to the goal. There's no need to put something in every box if it is not relevant!

Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
A prosperous Wales Efficient use of resources, skilled, educated people, generates wealth, provides jobs	Neutral	N/A
A resilient Wales Maintain and enhance biodiversity and ecosystems that support resilience and can adapt to change (e.g. climate change)	Positive: lower travelling speeds should contribute to enhancing biodiversity by reducing dependency on motorised vehicles and encourage more sustainable modes of transport such as walking, cycling and scooting.	N/A
A healthier Wales People's physical and mental wellbeing is maximized and health impacts are understood	Positive: lower travelling speeds will contribute to making the streets safer and more attractive for alternate transport modes such as cycling, walking and scooting.	N/A
A Wales of cohesive communities Communities are attractive, viable, safe and well connected	Positive: lower travelling speeds will contribute to making the streets safer and encourage community cohesion.	N/A
A globally responsible Wales Taking account of impact on global well-being when considering local social, economic and environmental wellbeing	Positive: lower travelling speeds should contribute to enhancing general wellbeing by reducing dependency on motorised vehicles and encourage more sustainable modes of transport such as walking, cycling and scooting.	N/A
A Wales of vibrant culture and thriving Welsh language Culture, heritage and Welsh language are promoted and protected. People are encouraged to do sport, art and recreation	Neutral	N/A

Well Being Goal	Does the proposal contribute to this goal? Describe the positive and negative impacts.	What actions have been/will be taken to mitigate any negative impacts or better contribute to positive impacts?
A more equal Wales People can fulfil their potential no matter what their background or circumstances	Positive: lower travelling speeds should contribute to encouraging more sustainable modes of transport such as walking, cycling and scooting and thereby less reliance on motorised transport.	N/A

3. How has your proposal embedded and prioritised the sustainable governance principles in its development?

Sustainable Development Principle	Does your proposal demonstrate you have met this principle? If yes, describe how. If not explain why.	Are there any additional actions to be taken to mitigate any negative impacts or better contribute to positive impacts?
 Long Term Balancing short term need with long term and planning for the future	Welsh Government intend to reduce the national urban speed limit to 20mph in 2023. The 20mph elements of this proposal will support WG's future national roll out of 20mph.	N/A
 Collaboration Working together with other partners to deliver objectives	Collaboration with partners in Gwent Police/GoSafe and Welsh Government has taken place in developing this proposal. Ongoing partnership working will be necessary to understand compliance levels.	N/A
 Involvement Involving those with an interest and seeking their views	Statutory consultation has been undertaken with all necessary stakeholders including the general public.	N/A

Sustainable Development Principle	Does your proposal demonstrate you have met this principle? If yes, describe how. If not explain why.	Are there any additional actions to be taken to mitigate any negative impacts or better contribute to positive impacts?
 <p>Prevention</p> <p>Putting resources into preventing problems occurring or getting worse</p>	N/A	None
 <p>Integration</p> <p>Considering impact on all wellbeing goals together and on other bodies</p>	The proposal should have a positive impact on wellbeing, safer streets should encourage the use of alternative travel modes such as walking, cycling and scooting and less reliance on motorised vehicles.	None

4. Council has agreed the need to consider the impact its decisions has on the following important responsibilities: Social Justice, Corporate Parenting and Safeguarding. Are your proposals going to affect any of these responsibilities?

	Describe any positive impacts your proposal has	Describe any negative impacts your proposal has	What will you do/ have you done to mitigate any negative impacts or better contribute to positive impacts?
Social Justice	N/A	N/A	N/A
Safeguarding	N/A	N/A	N/A
Corporate Parenting	N/A	N/A	N/A

5. What evidence and data has informed the development of your proposal?

- The 20mph proposals are intended to evaluate and understand what will be necessary when Welsh Government introduce a Country wide reduction in the national urban speed limit in 2023
- Traffic data will be collected following implementation to ascertain levels of compliance.

6. SUMMARY: As a result of completing this form, what are the main positive and negative impacts of your proposal, how have they informed/changed the development of the proposal so far and what will you be doing in future?

Positive impacts: The proposed reduction in speed limits will have an overall positive impact on the communities. Lower travelling speeds will encourage the use of alternative travel modes and lessen the severity of road traffic collisions. The proposals will contribute to making the

roads safer for all users. Ongoing monitoring will inform Welsh Governments proposal to reduce the national urban speed limit to 20mph in 2023.

7. ACTIONS: As a result of completing this form are there any further actions you will be undertaking? Please detail them below, if applicable.

What are you going to do	When are you going to do it?	Who is responsible
Implement to speed limit proposals as advertised	Following the making and publication of the traffic regulation orders	Traffic Team (Graham Kinsella, Phaedra Cleary, Gareth Freeman)

8. VERSION CONTROL: The Equality and Future Generations Evaluation should be used at the earliest stage, such as informally within your service, and then further developed throughout the decision making process. It is important to keep a record of this process to demonstrate how you have considered and built in equality and future generations considerations wherever possible.
