**1. PURPOSE:**

- 1.1 To provide members with an overview of the current strategic risks facing the authority.

**2. RECOMMENDATIONS:**

- 2.1 That members scrutinise, on an on-going basis, the risk assessment and responsibility holders to ensure that strategic risks have been appropriately identified and risk is being appropriately managed.
- 2.2 That members use the risk assessment to inform the future work programme of the committee and brief chairs of other committees where issues are of relevance to their work.

**3. KEY ISSUES:**

- 3.1 The strategic risk assessment ensures that:
- Strategic risks are identified and monitored by the authority
  - Risk controls are appropriate and proportionate
  - Senior managers and elected members systematically review the strategic risks facing the authority.
- 3.2 Appendix 1 provides the latest strategic risk register for the council. The format has been updated to assess risk in line with the updated policy, including applying risk appetite levels, risk categories and target risk scores. The assessment is a detailed document. Any significant changes or updates made to each risk can be found in the 'key changes' column in the summary table at the start of the full register.
- 3.3 The authority continues to operate in a dynamic environment and has controls in place to assess, manage and mitigate, as far as possible, a variety of risks. The strategic risk register is a live document and is continually updated based on the latest evidence. This will include adjusting the focus, detail and risk levels of risks where necessary. Some key changes made in the last six months can be found below:
- Risk 4, related to the council's workforce, has been reworded due to a change in the nature of the risk; this risk now focuses more on the council's own workforce planning challenges rather than external labour market changes.
  - The post-mitigation risk scores for risk 9a, related to school attendance, have reduced from high (12) to medium (8) to reflect progress made in implementing mitigating action and positive movement in primary attendance data.
  - Risk 11, related to climate, has been divided into two separate risks to better reflect differing causes and mitigation required. This also allows for separate assessment of risk levels and targets.
  - The risk relating to increased demand on council services due to the increased cost-of-living, previously risk 12, has been de-escalated from the strategic risk register to directorate risk registers to be managed. This reflects the mitigations put in place for the organisation to

support and manage the demand. This recognises that pressures remain for families due to the increased cost of living, and this risk will continue to be managed on the directorate risk registers of those services still seeing more families requiring additional public service support as a result of the cost-of-living.

- The risk relating to the increased risk of legal challenge, previously risk 14, has been de-escalated from the strategic risk register. The inherent level of risk relating to legal challenge is carried and mitigated by the legal team.

3.4 Strategic risks covered by the assessment are typically risks which could significantly jeopardise the council's ability to achieve its objectives, statutory plans and/or provide operational services as planned. The risk assessment also only covers high and medium level strategic risks. Lower level or operational risks are managed within service business plans and, where necessary, are escalated to directorate risk registers to be managed at a directorate level.

3.5 Cabinet agreed an updated strategic risk management policy for the Council in June 2024. The council's strategic risk management policy and guidance and risk assessment helps ensure strategic risks are identified and assessed robustly, risk controls are put in place that are appropriate and proportionate, and risks are supported by effective mitigations to ensure, as far as possible, risk reduction/risk management. A period of transition has taken place to ensure sufficient time to embed changes and strengthen arrangements in line with the revised policy.

3.6 In line with policy commitments, the presentation of the strategic risk register has been adjusted to include risk categories and appetite levels. As part of the current reporting round, target risk scores have been introduced. These indicate the optimal risk score the council has assessed it could achieve, following successful mitigation. This needs to be set in the context of available resource and the bearing the Council's actions can have on reducing the likelihood and/or impact of the risk. It can be thought of as a realistic best case scenario. In most cases, mitigating actions result in a change to the likelihood of the risk, rather than the potential consequences, as our actions are generally aimed at reducing the chance of a negative event occurring rather than lessening its impact, although there will be exceptions depending on the risk. Some target risk scores may remain the same as post-mitigation risk scores; this indicates that risk scores are not able to be lowered further with available mitigation. Risk scores will be continuously reviewed to ensure they fairly reflect realistic ambition.

3.7 The Council has also developed a risk radar in line with the revised policy commitments. This is included as appendix 2. The radar outlines some of the potential risks that Monmouthshire may face over coming years. This report draws on national and global emerging risks identified in a range of horizon scanning reports, including most prominently the World Economic Forum (WEF) global risks report, UK Government's National Risk Register and Welsh Government's Future Trends Report. Evidence from this will help inform risk management by highlighting the key uncertainties and challenges that may affect our organisation's objectives and operations. Consideration will be given to the annual Risk Radar Report when identifying and managing strategic risks and in the Council's wider service planning.

3.8 An overview of the strategic risk register will be presented to Governance and Audit Committee on the 12<sup>th</sup> June to fulfil the committee's role of assessing the effectiveness of the authority's risk management arrangements. The full risk register will be presented to Cabinet on the 25<sup>th</sup> June. The feedback from committees will be considered in the continued update of the strategic risk register and implementation of the policy. Any key conclusions will be shared with Cabinet.

#### **4. REASONS:**

- 4.1 To provide timely, relevant information on strategic risks as part of the performance management framework for ensuring the authority is well run and able to contribute to achieving the Council's purpose.

| 3                                | Potential risk that:<br>The authority is unable to maintain key infrastructure and meet other identified pressures due to insufficient capital funding availability                                                                                        | 2025/26 – High (16)<br>2026/27 – High (16)<br>2027/28 – High (16)    | 2025/26 – High (12)<br>2026/27 – High (12)<br>2027/28 – High (12)    | High (12)         | The 2025/26 Capital Strategy was approved by Council in March 2025. The strategy sets out the longer-term context in which capital investment decisions are made.                                                                                                                                       |

| The council has an agreed Community & Corporate Plan 2022-28 that contains six well-being objectives which focus on the longer-term future of the county and aims to address complex challenges, in line with the requirements of the Well-being of Future Generations Act. The objectives include a focus on equality, climate change, economy and skills, housing, care and support and learning. The Council is facing significant budget pressures and increasing complexity in demand for its services. The contemporary policy challenges that need to be addressed, working with communities, are complex and evolving. The immediate pressures the council is facing risks impacting on the ability and resources to deliver the longer-term objectives in the plan and meeting the requirements on the Act. |            |                                                                       |                                                                                                                                                                                                                                                             |                                                                          |                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |        |                                  |            |                           |  |                                   |  |       |  |

This provides a regular review of progress made in implementing the commitments made in the plan and facilitates targeted activity and intervention in areas requiring further development. This also includes an update on measures contained within the revised measured framework, which was approved by Cabinet in September 2024, ensuring an increased focus on outcomes.<br><br>A full review of progress made in achieving organisational objectives is completed annually in the form of a self-assessment report. This is developed based on a range of evidence from across the organisation. This assessment of progress made during 2024/25 will be presented for scrutiny in July ahead of Council in September.                                                                                            |        |                                  |            |                           |  |                                   |  |       |  |

This strategy provides the strategic framework for the Medium-Term Financial Plan (MTFP), and a set of key principles to guide medium term financial planning. These two together form the link between the council’s long-term policy objectives and its financial capacity. As part of the development of the strategy, a delivery plan has been established, which sets out clear timescales for completion; this is monitored regularly by Cabinet and Performance and Overview Scrutiny Committee.<br><br>Given significant financial pressures modelled in the MTFP, a programme of change is being implemented that will include an ongoing assessment of key service pressures, the risks and modelling assumptions that sit alongside this, with the aim to establish a clear plan and approach to address the medium-term budget shortfalls forecast. |        |                                  |            |                           |  |                                   |  |       |  |

| The local elections of May 2022 resulted in no political party having overall control of the Council. The Labour party was the largest party and formed a new cabinet without an overall majority. The lack of a majority Council has resulted in a politically unstable council, which has had a significant effect on the speed of the organisation’s decision making and the ability to implement policy change. A coalition agreement has subsequently been reached between the Labour party and the Green party, however this isn’t enough to form an overall majority. The democratic process has seen some decisions be subject to call-in which can cause uncertainty in some projects. |                |                                                                       |                                                                                                                                                                                |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                  |             |                                             |                                   |                   |

| <p>Councils across the UK are continuing to face significant financial challenges. It is widely acknowledged that local government funding has not kept pace with increased service demand and inflationary pressures. The Council has seen continuing financial headwinds which are severely impacting the service operating environment. The Inflationary drivers impacting pay, supplies and services continue to far outstrip available resources: demand led pressures continue to increase in the areas of Homelessness, Social Care, Children’s additional learning needs, and Transport; interest rates remain significantly higher than seen in previous years; the Council continues to deal with a shortage of staff resources due to ongoing labour market challenges which require the use of more costly temporary solutions; supply chain issues continue which require more costly alternative or expedited arrangements. This will be further exacerbated over the medium term by a weak growth forecast in the UK economy impacting on public sector spending, the destabilising effects on the UK economy of trade tariff imposed by the USA, and by heightened interest rates that will impact housing costs. All the aforementioned results in a growing need for supportive Council services, a reduced demand for income generating services, increased risks around debt recovery, and a continued high-cost operating environment.</p> <p>Current modelling predicts a continuously increasing budget deficit, despite a higher than expected increase in Welsh Government funding, with a projected cumulative shortfall of £34.7m by 2028/29. The Council has a legal duty to set a balanced budget and therefore any budget shortfalls will need to be met through a combination of pressures being mitigated, additional savings and income or reserve contributions. This will be particularly challenging set against the backdrop of an ambitious Corporate and Community Plan being implemented.</p> <p>A continuation of challenges seen during the pandemic has meant that an increasing number of our schools are experiencing budget deficits. At 2022/23 year end, just 5 schools were in deficit; this increased to 16 by year-end 2023/24. This is projected to increase to 24 by year-end 2024/25, almost 70% of schools.</p> |                                        |        |                                                       |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |            |        |            |            |                          |

This update also forecasts a 78.3% delivery rate of the £10,940,000 budgeted service savings required for the year. This results in a shortfall in savings of £2,376,000 that is included in the overall deficit.<br><br>The ongoing financial position of the Social Care & Health directorate remains the key risk. The level and complexity of demand for both Adult’s and Children’s care continues to trend upwards and is outstripping the progress being made in the preventative agenda and through placement and practice change. The ongoing programme of reviewing existing adults care provision remains challenging due to pressures in managing new referrals and assessments. Given the significance of the adverse Social Care & Health budget position, and the impact this has on the Council’s overall financial position, it is essential that this service maintains financial discipline and mitigates further cost wherever possible.<br><br>Despite the overall improvement in the budget deficit, there remains a significant challenge to close out the remaining deficit. It therefore remains essential that all services continue to engage in mitigation measures, including: maximising all grant income opportunities; vacancy management; bearing down on all non-essential expenditure; service reduction and efficiency. |            |        |            |            |                          |

These came following a consultation process which included over 650 people across 15 stakeholder sessions. Final proposals also take into account the final settlement received from Welsh Government, which introduced a 3.8% funding floor for all local authorities, of which Monmouthshire will benefit. Though budget proposals for 2025/26 have been agreed, many risks remain to be assessed and managed within the year. These include: high demand for council services; deliverability of budget saving proposals; pay awards; and employer’s national insurance contributions. Given the high number of remaining risks, the strengthened financial governance arrangements will continue through 2025/26 to provide assurance that robust arrangements are in place to respond to any circumstances where further budget pressures might require additional mitigation or savings to be brought forward.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |            |        |            |            |                          |

| Strengthen medium to long term strategic financial planning as part of the Medium-term financial plan, that is based on realistic evidence and planned scenarios, to guide our budget setting in line with agreed strategic objectives and responsiveness to challenges, such as the cost-of-living | Deputy CEX/Chief Officer, Resources<br><br>Ongoing       | <p>The Medium-Term Financial Strategy (MTFS) was approved by Council in July 2024. This strategy provides the strategic framework for the Medium-Term Financial Plan (MTFP), and a set of key principles to guide medium term financial planning. These two together form the link between the council’s long-term policy objectives and its financial capacity. As part of the development of the strategy, a delivery plan has been established, which sets out clear timescales for completion; this is monitored regularly by Cabinet and Performance and Overview Scrutiny Committee as part of six-monthly MTFP updates.</p> <p>The authority’s budget modelling assumptions are reviewed and updated regularly. Work continues to shape the wider programme of service change that will include an ongoing assessment of key service pressures, the risks and modelling assumptions that sit alongside this, with the aim to establish a clear plan and approach to address the medium-term budget shortfalls forecast. The next iteration of the Medium term financial plan will be considered early in 2025/26 and post the UK Government Spring budget.</p>                        |
| Continue to work closely with schools to ensure their financial plans are as robust as possible to minimise any impact, whilst continuing to improve standards for our young people                                                                                                                 | Finance Manager – Children & Young People<br><br>Ongoing | <p>The overall level of school reserves is forecast to move further into deficit by £5,240,000 by the end of the 2024/25 financial year, to a collective deficit balance of £6,144,000, with twenty-four (69%) of thirty-five schools forecast to be in a deficit balance. Those schools forecasting to end the 2024/25 financial year in deficit balance have brought forward recovery plans that are being considered by officers and Cabinet. The legacy impact of the pandemic continues within the school environment, particularly in respect of attendance, behaviours and increased additional learning needs. This has required increased staff and specialist resources to tackle the issues presenting and increased overall costs of provision.</p> <p>It is clear from these budget recovery plans that it will take schools a considerable amount of time to fully recover deficit balances, and that in addition to the £1m further investment in schools within the 2025/26 budget, the Council will need to take assessment of this financial risk within medium term financial planning. Schools will continue to be supported to strengthen their financial planning.</p> |

| Underlying the Capital Strategy is the recognition that the financial resources available to meet council priorities are constrained by the level of one-off reserves and capital receipts that the Council holds and the level of capital grant funding from Welsh Government and other funding bodies, and the extent to which the Council is able to entertain further prudential borrowing. The core capital programme has been impacted in recent years in order to enable the Band A new schools programme to be funded, which has now successfully concluded. Subsequent to a Council decision having been secured the 3-19 school in Abergavenny has progressed into contract and is in its construction phase, supported under the Welsh Government Band B programme.                                      |                |                                                                                           |                                                                                                                                                                     |                                                        |                                  |                                  |                                   |            |            |                   |
| There remain a considerable number of pressures that sit outside any potential to fund them within the Capital MTFP, and this has significant risk associated with it. These include property and highways infrastructure, DDA work, and public rights of way. In addition to this, there are various schemes/proposals (e.g. Monlife, tranche C Future schools, climate emergency response, any enhanced DFG spending etc.) that could also have a capital consequence, but in advance of quantifying those or having Member consideration of these items, they are also excluded from current capital MTFP. In the event of emergency pressures, resources will have to be diverted. Projects, such as the Cardiff Capital Region City Deal, also require significant capital investment to realise the outcomes. |                |                                                                                           |                                                                                                                                                                     |                                                        |                                  |                                  |                                   |            |            |                   |
| The timing of capital receipts always remains uncertain due to market conditions. Future investment in capital schemes is in part dependent on future success of achieving capital receipts and there are risks attached to some receipts materialising. There is a risk associated with relying on the use of capital receipts in the same year that they come into the council and the potential for this to have significant revenue pressures should receipts be delayed and temporary borrowing be required. Significant further capital receipts are now not forecast and until such time as the outcome of the Replacement Local Development Plan is known and for which the Council has put forward a number of strategic sites in its ownership.                                                           |                |                                                                                           |                                                                                                                                                                     |                                                        |                                  |                                  |                                   |            |            |                   |

| Regularly review assumptions as part of the capital MTFP taking account of any new information that is relevant and the consequential impact on the revenue MTFP | Deputy CEX/Chief Officer,<br>Resources<br><br>Ongoing | <p>The Capital MTFP was updated as part of the development of the Capital Strategy. The capital MTFP and capital strategy seek to work towards a financially sustainable core capital programme, whilst balancing the need to deliver capital investment plans in line with policy commitment and need.</p> <p>The current capital MTFP does not cover all the capital budget pressures that have been identified. This shows that there is more demand for capital spending than the Council considers it can reasonably afford. This means that capital schemes will have to be ranked or the capital available has to be divided more widely than is ideal.</p> <p>The capital programme includes yearly investment for property maintenance, highways maintenance, relevant specific capital grants and the future schools programme. This will help to deal with the most urgent backlog issues, focussing on worst condition first and related risk. However, estate rationalisation programs, closure/disposal of assets, asset transfers and other capital projects to refurbish or replace operational properties will also be used to reduce the backlog funding needed. This will not solve the specific total backlog but is a way of targeting the main issues in a reasonable way.</p> <p>The value of Capital receipts forecast after 2025/26 drops off quite considerably which is reflective of the replacement local development plan (RDLP) not proceeding as quickly as envisaged in the original delivery agreement. This will have an impact on the balance of receipts available to fund future capital investment demands in the near term.</p> <p>The Council has strengthened its scrutiny and challenge of the Capital Programme through the establishment of Capital and Asset Management working groups. The respective working groups look to ensure that projects are prudent, affordable and will deliver tangible benefits to core policy objectives over the long term.</p> |

The large number of schemes requiring slippage may point to more underlying issues in project planning, unrealistic profiling of budgets, and a lack of resourcing to manage the volume of schemes being planned. Finance teams will need to continue to work with budget holders to assess if any further amendment to project delivery plans are required given the impact that capital expenditure progress can have on the profiling of capital financing costs.</p> <p>Capital receipts are projected to be in surplus for the medium-term. Whilst the current balance is healthy, there remains a need for caution over committing any further receipts to either capital investment or increasing the level of capitalisation direction given the level of currently unbanked receipts contained within the forward projections.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

This information as well as technical input from MCC's Landlord Services team, will continue to be used to inform prioritisation of planned capital maintenance spend. Independent condition assessments of key highways infrastructure are completed as required depending on condition. These inform prioritisation of available capital budget.</p> <p>A review of the pressures and associated risks is being undertaken to inform the capital budget process. A previous review in 20/21 had concluded that further feasibility studies and technical assessments needed to be undertaken on specific infrastructure assets, funded from existing highways infrastructure capital budgets. The results of these studies and assessments will inform the capital MTFP and pressures that will need to be accommodated and funded therein in future financial years. The Capital Working Groups and Asset Management Working Groups will contribute to decisions on the capital spend and MTFP.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

Positions within Social Care, Operations and Facilities, for example, have seen reductions in applicants, and this is impacting on service provision. Solutions for the national recruitment issues do not sit solely with local authorities.<br><br>The People Strategy was approved by Cabinet in June 2024 and contains a specific objective, and actions, aimed at improving recruitment and retention. An e-recruitment system is being implemented to support the development of recruitment as a genuine talent acquisition process. This will benefit recruiting managers who want speed, simplicity and agility. The HR team are also utilising different social media channels to reach applicants.<br><br>A new work experience and apprentices’ policy has been developed and will seek to increase the number of apprentice positions, creating a new pipeline of talent. People Leaders Workshops are supporting the sharing of information with service areas and promote networking and sharing ideas.<br><br>HR staff sit on various local government groups and are collaborating with partner organisations to identify commonalities and information sharing. This is being fed into Welsh Government to inform their decision-making and to influence their response to the issue. |                                  |                                                |            |                                   |                   |

| There have been a number of high-profile cases across both public and private organisations where cyber-attacks and data breaches have compromised service delivery and financial loss. These attacks occur due to insecure infrastructure or staff who are not cyber literate and may inadvertently introduce attacks through their personal actions. Cyber security can also be compromised through a lack of structured governance arrangements, risk assessments and planning. |            |        |                                       |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |            |        |            |            |                   |

| <p>The number of contacts into the ‘front-door’ of children’s services has increased in recent years and remains high. The council is supporting 190 children who are looked after (March 2025). The number has stabilised in recent years, although it remains higher than the average number of children who are looked after across Wales. The number of unaccompanied asylum-seeking children (UASC) being looked after by the local authority is currently 14.</p> <p>The 2024/25 budget for Children’s Services is forecast to overspend by £2.5 million at February 2025. This is mainly as a result of increased demand for very high-cost placements for children who are looked after. The workforce position within children’s services also remains challenging, with reliance on agency workers and short-term grant funded posts, which can affect continuity of social work relationships for children.</p> <p>There is an insufficiency of placements for children who are looked after at a local, regional and national level, particularly those with complex needs or disabilities. Because of this, there is a risk that we may need to place children in unregistered provision in emergency situations. There is considerable instability within the placement provider market, against the backdrop of the Welsh Government’s policy commitment to eliminate profit from the care of looked after children. This creates an on-going risk for the council that is difficult to fully mitigate at present.</p> |            |        |                                            |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |            |        |            |            |                   |

The number has stabilised in recent years, although it remains higher than the average number of children who are looked after across Wales. In recent years, the number of contacts into the ‘front-door’ of children’s services has increased and remains high. The focus is on keeping children safe, which can mean there has been less time for strength-based engagement with parents and children. An analysis of referral activity is helping us to consider the best way of intervening.<br><br>There is a coherent approach to early help and prevention to support families. This allows families to receive support at the right level of intensity to enable parents to provide their children with the safety, nurture and care they need. Services are in place to support the rehabilitation of children following periods of being looked after e.g. Families Re-connect; to provide medium-term holistic support to families making sustainable change e.g. Achieving Change Together Team; and to provide a therapeutic response to parents and carers in supporting children with trauma presentations e.g. MyST.<br><br>Family support has been further strengthened to provide intensive community supervision and support to children. The focus remains on practice development and working with families to support strengths, manage risks and achieve good outcomes, reducing the need for children to be looked. An additional focus is to increase resilience within Child Protection services to work with increased levels of risk and vulnerability within the community. |            |        |            |            |                   |

This is aligned with Welsh Government’s ambition to eliminate profit from children’s care. One supported accommodation property has opened in Caldicot for up to 5 young people (16+), and one children’s home in Monmouth is currently under development, with a target of June 2025 to complete refurbishment. A further two properties, one children’s home and one 16+ supported accommodation, are also planned to be developed, with completion targets of December 2025 and January 2026, respectively. Two therapeutic children’s homes continue to operate, with expansion opportunities being explored.<br><br>Children’s services continue to search for appropriate properties for one further children’s residential home, particularly in the North of the county, however this has proven challenging due to factors such as cost, registration requirements and community facilities. The service area continues to review the demand of placements against the work undertaken by the service in line with their Reduction of Children Looked After Strategy and Placement Commissioning Strategy. Children Services continue to plan for each child and a “horizon” list is kept to identify children who may need, at some point, to be accommodated. Predicting demand, however, remains a challenging and dynamic process, complicated by uncertainty within the care market nationwide.                                                                                                     |            |        |            |            |                   |

There is an insufficiency of in-house carers in Monmouthshire, particularly carers who are able to provide more specialist care or look after sibling groups. Over recent years progress in increasing the number of in-house foster carers has stalled despite considerable effort and attention. This creates an over-reliance on private and independent providers, where the right placement for a child cannot be assured. In March 2025 a decision                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |            |        |            |            |                   |

| The longer-term impact of the pandemic, together with the aging demographic has increased the complexity of referrals into Adult Services. As a result, services are under considerable pressure, particularly given the added challenges of the Council’s financial situation and the pressures within partner agencies, particularly health. There are waiting lists in place for social care assessments and some people are having to wait for services they need, including for reablement, care at home and mental capacity act assessments. There has also been an increase in the number of residential care placements due to the complexity of people’s needs.                                    |            |                                                                                                                                                              |                                                                                                                                                               |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |            |                                  |            |                            |                   |                                   |  |       |  |
| The availability of workforce in some key posts remains a risk - specifically mental health practitioners, direct carers and therapies. There is insufficient capacity within the current core workforce structure to meet the demand pressures, particularly at times of peak demand associated with hospital discharge (for example). The current financial context for both health and social care places restrictions on the ways in which services can respond to need. In 2024/25 the Adult Services budget is forecasting an overspend of just over £2 million at February 2025, with pressures due to increases in external residential care home placements and increased demand for care at home. |            |                                                                                                                                                              |                                                                                                                                                               |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |            |                                  |            |                            |                   |                                   |  |       |  |

The perceptions of working in social care tend to be negative; recruitment is focussed on counteracting these negative perceptions and demonstrate the opportunities, career progression, work life balance and job satisfaction that people experience who work within the sector. Generally, the workforce in Adults social care remains stable, however attraction and recruitment of people into the social care sector, particularly in some roles, continues to be a challenge. Workforce planning remains a priority within the service to ensure that scarce resources are utilised in the best way possible.                            |            |                                  |            |                            |                   |                                   |  |       |  |

These include Gwent Adult Service Partnership, and at a local level the Integrated Services Partnership Board. At a local and regional level, grant money received via the Regional Partnership Board is used to best effect to meet population needs and respond to demand pressure in particular within hospital discharge; supporting people with frailty to remain well at home, and ensuring the development of effective early help and preventative services via the Integrated Wellbeing Network. Establishing targeted early help and ensuring there are good pathways between social care and community based wellbeing support is central to trying to mitigate demand pressures over time. |            |                                  |            |                            |                   |                                   |  |       |  |

While this is good progress the aim is to improve this further. In line with the aims of the commissioning strategy the focus is on further increasing the availability of in-house home care to support reablement as opposed to providing long term care, and to increase the number of people accessing the opportunities that reablement provides. Over time this should help to mitigate demand pressures.                                                                                                                                                                                                                                                                                                                          |            |                                  |            |                            |                   |                                   |  |       |  |

| Monitor requests for services to ensure demand is being met and delays are minimised | Chief Officer, Social Care & Health<br><br>Ongoing                             | On-going pressure across the social care and health system, together with workforce shortages in some areas, has meant that there are continued challenges in being able to respond to people's care and support needs as timely as we would want. All referrals are triaged at point of referral to ensure that those in most need are prioritised for assessment and intervention. Case reviews are being undertaken, applying the principles of the Social Services and Well-being Act to ensure a strengths-based approach looking at individual, family and community based support where appropriate.<br><br>Access to care and support is not always timely; however, overall there is increased capacity across home care which has assisted in supporting 96% of demand in the last year. Action is being undertaken to ensure that home care runs, both in-house and provider services, are coordinated as efficiently as possible. The commissioning strategy is being implemented to strengthen locality based provision of home care and increase capacity into rural areas.                                                                                                                                                                                                                                                                                                                        |

| Ensure the long-term sustainability of social care providers                         | Chief Officer, Social Care & Health & Head of Public Protection<br><br>Ongoing | It is vital that social care providers are able to provide care and support and as such the council has a role in ensuring their financial sustainability through fair fee negotiations and supporting with recruitment and training. The Council has built positive relationships with local providers and intervenes and provide support where difficulties emerge. There is effective contract monitoring in place, based on partnership approaches.<br><br>The position in Monmouthshire, whilst challenging, has seen very few providers withdraw their services and most have managed to weather the difficulties around recruitment and retention with the social care sector. Positively home care services have increased and there has been a reduction in the number of people waiting and the average length of wait time.<br><br>The increasing numbers of residential placements and costs of residential care has had a big impact the budget in Adult Social Care. The main pressure on the budget during 2024/25 was down to provider fees. At the beginning of the year the cost of the care that commissioned was calculated at a higher rate than was able to be accommodated within the budget set. Through extensive fair fee negotiations with provider agencies this was reduced; however, not to the extent that this delivered within the financial envelope agreed within the budget. |

| The pandemic caused widespread disruption to learning, with a significant effect on both teachers and learners. Longer-term effects of the pandemic on pupil well-being and attendance have emerged. There is a risk that our schooling system struggles to adjust to the new patterns of need amongst our children and young people in the post-pandemic period. Meeting the needs of vulnerable learners remains a priority and the gap in attainment between those not eligible and those eligible for Free School Meals (eFSM) remains a concern. There is variation in eFSM learner progress and outcomes across schools. Leadership, management, capacity and performance has been identified as in need of improvement in some schools. |    |                                                                                                                    |                                                                                                                                                                                                                                    |                                                                                   |                                  |                             |                                   |       |
| Attendance levels have been particularly affected. Though attendance at a primary level has returned to pre-pandemic levels, attendance in our secondary schools remains below levels seen before the pandemic and an area for concern. Attendance of those eligible for free schools meals remains below pre-pandemic levels and below those of their peers not eligible for free school meals. The low attendance of those eFSM has been identified by Estyn as an area for concern in one of our secondary schools. We need to increase attendance for those eFSM to ensure no pupil is left behind.                                                                                                                                        |    |                                                                                                                    |                                                                                                                                                                                                                                    |                                                                                   |                                  |                             |                                   |       |
| Ensuring pupils return to school, and understanding the barriers to prevent them doing so, will be key to ensuring our learners are achieving their potential.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |                                                                                                                    |                                                                                                                                                                                                                                    |                                                                                   |                                  |                             |                                   |       |

| Permanent Exclusion (PEx) and Fixed Term exclusions (FTE) have both increased over the past year. Local authorities across Wales and England have experienced similar trends post covid. The reasons for this are complex and not easily resolved. As of the end of the 2023/24 academic year there were 22 upheld PEx. The number and rate of PEx and FTE is higher than the South East Wales consortia overall rate. Of concern is that the data shows clear rises in the issue of FTE for reasons linked to violent or aggressive behaviour, this can be verbal or physical against another student or an adult. |            |        |                                         |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |            |        |            |            |                   |

| Increased levels of exclusions increase the pressure on the Pupil Referral Service (PRS) which currently does not have the capacity to accept any new learners unless they have been permanently excluded. This means that even where a graduated response has been applied within a school, and where behaviours and risk assessments indicate the learner may merit a PRS intervention, there is limited capacity to access this.                                                                                                                                                                                 |            |        |                                         |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |            |        |            |            |                   |

This team have experience in responding to behaviours of concern/ challenge, an enhanced understanding of social emotional and mental health needs and additional learning needs (ALN) in a way that is trauma informed and Adverse Childhood Experiences (ACE) aware. This supportive team has enabled learners to maintain their current placement by reducing the risk of PEx by stabilising behaviours and thus reducing risk, they have supported learners to integrate into other schools via managed moves to prevent PEx and supported in year transfers of learners with prior FTE.                                                                                            |            |        |            |            |                   |

This funding enabled several learners at risk of PEx to avoid this outcome, including learners in their final year of school, who were able to complete their exams in school. Further multi agency work has also been undertaken to consider how to reduce FTE and PEx linked to aggression and violence amongst both pupils and towards staff. Focused efforts are underway to improve representation at multi agency meetings in schools and with focused consideration of learners who have been excluded for these reasons in the intervening periods between each meeting.                                                                                                 |            |        |            |            |                   |

Trauma Informed approaches form part of a universal, whole-school, preventative approach supporting school communities to become trauma informed and mentally healthy places for all. Being Adverse Childhood Experiences (ACEs) aware and trauma-informed is recognised by the Welsh Government in guidance and reflects the evidence base that it is important to build relational practice to improve positive outcomes for all learners.<br><br>Trauma Informed Schools (TIS) and relational practice approaches are being developed and embedded. A multi-agency TIS Steering Group, including colleagues from health and social care, has been established to achieve this, led by the Educational Psychology Service (EPS), and a tiered training programme has been developed. |            |        |            |            |                   |

| The current Local Development Plan ran until 31st December 2021; it will remain the principal development plan for decision-making purposes until the adoption of the Replacement Local Development Plan (RLDP). This does not change the urgent need for the council to make timely progress on its RLDP and to adopt it as soon as realistically possible to address key issues and challenges, including rebalancing our demography and responding to the climate emergency, and to meet the future needs of the county. Factors contributing to the delays include challenge from Welsh Government, which resulted in the need for a new Preferred Strategy, high phosphate levels in the rivers Usk and Wye which resulted in restrictions on developments, and delays in agreeing appropriate Gypsy, Roma and Traveller sites.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |            |                                                                                                                     |                                          |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                  |        |                                         |                                   |                   |          |
| The Council is now proceeding with a new Preferred Strategy that responds to the Welsh Government objection and unresolved water quality constraint in the upper River Wye catchment. A revised Delivery Agreement has therefore been prepared which sets out an amended timetable for Plan preparation. The revised timetable shows that the adoption of the RLDP is anticipated in Summer 2025. This unavoidable delay will impact on the Council’s ability to address the identified issues and objectives until the RLDP is adopted and puts pressure on the deliverability of the housing and employment figures over the Plan period, with more reliance on delivery towards the end of the Plan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |            |                                                                                                                     |                                          |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                  |        |                                         |                                   |                   |          |
| There are a range of issues and challenges the RLDP will need to address:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |            |                                                                                                                     |                                          |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                  |        |                                         |                                   |                   |          |
| <ul style="list-style-type: none"><li>• The delivery of affordable housing continues to be a concern. There are a significant number of households on the Councils waiting list, and there are limited remaining opportunities within the current LDP to deliver affordable homes because most strategic sites have been delivered and the remaining few cannot currently proceed due to phosphates.</li><li>• There is a recognised lack of suitable employment land in the northern part of the County (Abergavenny and Monmouth in particular). Delays to the RLDP mean that new allocations to attract investors or retain growing businesses will not be available. There may be some scope for employment sites to come forward adjacent to settlement boundaries outside of the current LDP allocations but in parts of the county these are affected by phosphate restrictions.</li><li>• The RLDP will identify areas with potential for renewable energy. A delay to the RLDP will have limited impact in this regard because renewable energy schemes such as solar farms can come forward for consideration via the existing LDP and under national planning policy.</li><li>• There is a need to ensure the RLDP’s growth ambition is matched by infrastructure delivery, much of which is delivered by other bodies. This alignment is required to ensure sustainable development to support future economic, social, environmental and cultural well-being.</li></ul> |            |                                                                                                                     |                                          |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                  |        |                                         |                                   |                   |          |

This has formed the basis of the Deposit Plan, which was endorsed by Council for a detailed public consultation in October 2024. The Deposit Plan sets the ambition for development within the county. This plan also addresses a number of key issues and align with the priorities of the organisation; it has allocated 50% affordable housing on each new development and is introducing enabling policies which will allow for further affordable housing developments to come forward. This includes facilitating more single person accommodation in the county which is currently extremely limited and is a factor contributing to homelessness. All homes developed under this plan will also be net zero carbon.<br><br>Council will consider the results of the consultation in Summer 2025, following which the RLDP will be subject to public examination. |                                  |        |                                         |                                   |                   |          |

| Tackling climate change and moving to a low carbon economy is one of the biggest challenges facing our society. Rising temperatures and more extreme weather events bring increased risks to our communities and are causing long-term and potentially irreversible damage to our planet’s eco-systems, with significant local impacts such as flooding and loss of species. If we are to stand a chance of slowing the rise in the Earth’s temperature, we need to act now. In 2019, councillors were unanimous in declaring a climate emergency. The council will strive to reduce its own emissions and work with communities and local businesses to help them reduce their emissions. This will require engagement, community involvement and commitments from third parties. |                |                                                                                                                              |                                                                                                                                                                                                                                                |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                |                                  |            |                             |                   |                                   |  |          |  |
| Despite a nation-wide climate emergency declaration and a common recognition of the importance of reducing carbon emissions, the resources provided to tackle this issue have consistently not met the scale of the challenge. A significant investment in public funding would be required if net zero 2030 is to be met.                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                |                                                                                                                              |                                                                                                                                                                                                                                                |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                |                                  |            |                             |                   |                                   |  |          |  |

This strategy is underpinned by four action plans to better reflect the breadth of work that is taking place: Internal decarbonisation, Biodiversity and Nature Recovery, Rivers and Oceans and Community climate change. Progress in implementing the strategy is regularly monitored by the Climate and Nature Emergency Steering Group.<br><br>Work is underway as part of this strategy to better understand the scale of the challenge we face in striving to collectively become net zero. A costed decarbonisation plan and survey for our built estate has been commissioned to ensure a sound understanding of the funding needed to implement change. Without significant increases in public funding, it is unlikely we will meet the collective target of net zero by 2030.<br><br>Support is being provide to communities to reduce their carbon emissions through circular economy projects such as Benthgyl library of things and reuse shops. Grant funding has been obtained to employ two officers to help expand this offering. The Monmouthshire Local Nature Partnership (LNP) continues to share best practice and resources. This partnership developed the Monmouthshire Nature Recovery Action Plan (NRAP); the public consultation of this action plan was launched in September. The action plan provides practical and achievable actions to help reverse the decline in biodiversity and ecosystem resilience in the county. |                |                                  |            |                             |                   |                                   |  |          |  |

|  |  | The council is a member of the Wye Nutrient Management Board Technical Advice Group which is identifying and analysing options for delivering improvements in water quality. The council also has continued involvement in the Wye Catchment Partnership to protect water quality, water quantity and biodiversity. An Usk Catchment Partnership Core Group has been established and has agreed its priorities for the draft Integrated Catchment Plan. |

| Tackling climate change and moving to a low carbon economy is one of the biggest challenges facing our society. Rising temperatures and more extreme weather events bring increased risks to our communities and are causing long-term and potentially irreversible damage to our planet’s eco-systems, with significant local impacts such as flooding and loss of species. If we are to stand a chance of slowing the rise in the Earth’s temperature, we need to act now. In 2019, councillors were unanimous in declaring a climate emergency. The council will strive to reduce its own emissions and work with communities and local businesses to help them reduce their emissions. This will require engagement, community involvement and commitments from third parties. |                |                                                                                                      |                                                                                                                                                                                                                                                                                                    |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |            |                                  |            |                                                   |                                   |       |
| When considering climate change, it is important to consider both how Monmouthshire is contributing to climate change, but also how resilient the county is to the likely impacts of climate change. Extreme weather, such as flooding and record high temperatures, can impact significantly on infrastructure, homes and businesses, along with disruption to community life and public services, particularly critical public services people rely on such as care services.                                                                                                                                                                                                                                                                                                    |                |                                                                                                      |                                                                                                                                                                                                                                                                                                    |            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |            |                                  |            |                                                   |                                   |       |

In 2021, some services updated these Climate Change Risk Assessments to allow service areas to better understand their necessary adaptation requirements. Discussion are also taking place with Welsh Government to better understand their expectations around climate adaptation. The council is also part of broader assessments of climate risk being carried out by the Cardiff Capital Region as part of their Carbon Disclosure Project commitments.<br><br>The Replacement Local Development Plan has a key role to play in making sure our communities are sustainable and resilient to the impacts of climate change. Changes to national planning policy on flooding are still awaited, but officers intend to take a precautionary approach, avoiding all built development on greenfield sites at known flood risk. Welsh Government has produced The National Strategy for Flood and Coastal Erosion Risk Management in Wales, and in response, Monmouthshire is currently developing an updated Flood Risk Management Strategy.<br><br>Much of the work to coordinate emergency responses is organised through the Gwent Local Resilience Forum (LRF). The council continues to work with partners on the LRF to make sure that we are prepared for severe weather events.<br><br>As part the reworking of the Climate Emergency Strategy, climate adaptation, which includes preparing and adapting for the impact of climate change, has been embedded across each of the 4 action plans. Some of the actions within this include developing the management of green infrastructure to improve climate resilience; increasing urban tree canopy, including new street trees and in car parks to provide a cooling effect; and continuing to promote and support council services with business continuity and emergency response strategies. |            |                                  |            |                                                   |                                   |       |

| <p>The Council is currently experiencing significant challenges and risks in relation to homelessness. Initially due to the pandemic, Welsh Government required Councils to avoid people sleeping rough, then made the subsequent decision to transition homeless services with the aim of homelessness becoming rare, brief and unrepeatd, together with an improvement in the quality of homeless accommodation. Welsh Government homeless policy changes, initially through the Phase 2 Planning Guidance for Homelessness and Housing Support and then subsequently more recently Rapid Rehousing Guidance, whilst positive, have created challenges largely relating to lack of accommodation and support needs. Although homeless presentations have remained broadly consistent, the impact of Welsh Government policy has seen a significant increase in demand for homeless accommodation. This in turn has impacted significantly on the Housing Options Team operationally in respect of the need to identify alternative accommodation, which largely has relied on B&amp;B accommodation, re-housing households, housing management and placement break downs. This has also created placement and staffing challenges.</p> <p>There are challenges regarding the availability of temporary, supported and permanent accommodation, the type, quality and location of accommodation and the range of housing support available necessary to meet current and emerging homeless need. Further challenges are also being experienced in respect of acquiring existing accommodation and repurposing properties due to the buoyant market in Monmouthshire and constraints relating to funding eligibility and planning. There are also delays in the construction of new homes due to delays in implementing the RLDP.</p> <p>The Renting Homes Act, which came into force from 1 December 2022, has made significant changes to the way all landlords in Wales rent their properties. There is a risk this could impact on the private rented sector in the County and reduce the availability of rental properties, further decreasing housing availability and increasing accommodation challenges in the County, although the current anecdotal evidence suggests the impact has not been too disruptive to date.</p> <p>Whilst the Council has made positive progress with homeless delivery evidenced by reductions in homeless presentations and the need to provide homeless accommodation due to a more positive performance in respect of homeless prevention, identification of additional homeless accommodation and move-on to social housing, risks remain.</p> <p>Monmouthshire welcomed large numbers of refugees from Ukraine. Local residents have opened their homes and all these refugees will need alternative accommodation when these temporary arrangements come to an end. In addition, many of those who have come through the Welsh Government Super Sponsor Scheme have found jobs and settled locally. All local authorities also need to find accommodation for Afghans arriving in the UK under the Afghan Resettlement Programme. A shortage of suitable and affordable accommodation, along with the challenges associated with our rurality, will affect our ability to provide suitable long-term accommodation.</p> <p>The widening of asylum dispersal from 2022 could place further pressure on the housing market as the council plays its part in assisting the Home Office to find short term accommodation for asylum seekers in line with UK Government policy and our aspirations for Monmouthshire to become an accredited county of sanctuary.</p> |            |                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                             |                                                                               |                                                                                                                                                                                                                                                                 |                                  |                                    |            |                                   |                   |

The council is working with partner agencies such as the Department for Work and Pensions (DWP) and Shared Benefit Service to support more people at risk of homelessness, granting awards to households to help tackle arrears/debt and households experiencing homelessness to enable them to remain in their current accommodation or access alternatives.</p> <p>The Housing Support service has been remodelled to include dedicated substance misuse support, temporary accommodation support and re-settlement support. This also includes dedicated support for young people with higher need through the recent expansion of the Housing First scheme with Pobl and the introduction of MoYo – dedicated housing floating support for young people. These initiatives have contributed to the increase in the percentage of homeless applications who are successfully prevented from becoming homeless to 71%. There is collaboration across council services to prevent care leavers from becoming homeless. A Corporate Parenting Panel is regularly held with a range of teams from across the organisation that coordinate and provide support to care leavers. Further opportunity has arisen to refresh the current Housing Support Grant programme to increase effectiveness. There is a need to reduce the number of projects to improve contract monitoring and re-specify and re-package requirements to increase resilience, flexibility and increase the focus on quality. This is a priority to start in 2025.</p>                                                                                                                                                                           |

Council will consider findings of this consultation in Summer 2025. The delivery of the RLDP will be key to increasing the availability of housing in the county; the plan has allocated 50% affordable housing on each site and is introducing enabling policies which will allow for further affordable housing developments to come forward. This includes facilitating more single person accommodation in the county which is currently extremely limited and is a factor contributing to homelessness</p> <p>The availability of both temporary and settled homes for homeless households is being increased through a range of means including partnerships with private landlords through Monmouthshire Lettings and more homes through new build developments and acquisitions. The Council has also started to acquire accommodation for temporary accommodation. We have worked with housing association partners to make additional general needs social housing available for homeless households; for 24/25 63% of general need social housing had been allocated to homeless households. There is a need to determine how much scope there is to allocate further social housing to homeless applicants without being overly detrimental to other housing need groups. The increased support for those at risk of homelessness, combined with the increase in availability of both temporary and settled accommodation, have contributed to the reduced use of bed and breakfast (B&amp;B) accommodation.</p> <p>As part of the focus to reduce the use of unsuitable and costly B &amp; B, a key initiative has been to repurpose Severn View, a former residential home, to temporary homeless accommodation with dedicated support. This will help mitigate against the need to use B &amp; B.</p> <p>The general homeless position is enabling a review of Monmouthshire Lettings during the summer of 2025, with a view to reducing the stock whilst also reconfiguring the portfolio in terms of quality, location and type.</p> |

Appendix 2 – Risk Radar

In line with Strategic Risk Management Policy, the Council has developed a risk radar. The radar outlines some of the potential risks that Monmouthshire may face over coming years. This draws on national and global emerging risks identified in a range of horizon scanning reports, including most prominently the World Economic Forum (WEF) global risks report, UK Government’s National Risk Register and Welsh Government’s Future Trends Report. Evidence from this will help inform risk management by highlighting the key uncertainties and challenges that may affect our organisation's objectives and operations. Consideration will be given to the annual Risk Radar Report when identifying and managing strategic risks and in the Council’s wider service planning.

A range of evidence is collated in inform the radar. An overview of risks identified on the radar can be seen below. Risks have been categorised by a main factor and timescale, some will impact across multiple factor categories and varying timescales.

### Appendix 3: Strategic Risk Management Policy – Summary

This sets out the Council's policy and approach to strategic risk management. A copy of the full policy and guidance is available to staff and members on the council's intranet the Hub (Finance & Performance Management section – risk assessment)

Risk Management is the process of identifying risks, evaluating their potential consequences and determining the most effective methods of controlling them or responding to them. Strategic risks are those which affect the Council as a whole. Typically these will be key risks which could significantly jeopardise the Council's ability to achieve its objectives, statutory plans and/or provide operational services as planned.

The Council is committed to the effective management of risk. As a large public sector organisation, it is exposed to a wide range of risks and threats in delivering key services to communities. Within the Council the purpose of risk management is to:

- preserve and protect the Council's assets, reputation and staff
- promote corporate governance and aid good management in controlling and managing risks
- support successful delivery of strategic aims, objectives and outcomes
- improve business performance and better anticipate calculated risks where these are likely in delivering improvements
- avoid unnecessary liabilities, costs and failures

The Council seeks to ensure that risk management is effective from strategic to individual services and employees. Therefore, all employees and councillors are responsible for ensuring there are good levels of internal control and risk management throughout the Council in order that the Council's specified outcomes are achieved.

The Council uses a 'traffic light' system of Red/Amber/Green associated with High/Medium/Low to categorise risk levels. This is determined using the risk matrix below.

|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>High risk</b>   | The risk is <b>highly likely</b> to occur and the impact will be major. Management action/control evaluation and improvement is required coupled with continued pro-active monitoring                                                                                                                      |
| <b>Medium risk</b> | The risk is <b>unlikely</b> to result in a major issue, however, if it did the impact would be <b>significant or serious</b> . This risk is relatively less significant than a High risk however it needs to be closely monitored within timely management action/controls to ensure it does not escalate. |
| <b>Low risk</b>    | The risk is <b>very unlikely</b> to occur and the impact will be <b>minor or moderate</b> at worst. Risk will be managed by seeking control improvements where practical and / or monitoring and reviewing at regular intervals                                                                            |

Risks are also given a score. Scores of 1-4 are low risks, scores of 6-9 are medium risks and scores 12-16 are high risk. Providing a score as well as a risk level allows the variations within risk levels to be more clearly stated.
