 <p>Balancing short term need with long term and planning for the future</p>	<p>There are various proposals with differing impacts but in all instances the proposals have been assessed by officers as the most prudent for sustaining long term service provision whilst making necessary service and budget adjustments to meet the budget process in conjunction with the Council's published priorities.</p>	<p>Wherever possible the proposal seek to sustain service provision rather than ending service provision and within the Ops budget setting exercise a certain amount of income assumption is included rather than simply reduction.</p>

5. What evidence and data has informed the development of your proposal?

The proposals have been developed by officers and subjected to internal challenge and scrutiny prior to wider consultation on the proposals. The proposals are designed to have least service impact although it is recognised that the reduction in maintenance budgets delays remedial works to council assets. Increases in charges are intended to allow the services to remain competitive or better reflect service costs. In some areas the proposals seek to make best use of new technology to reduce costs with least service impact.

6. SUMMARY: As a result of completing this form, what are the main positive and negative impacts of your proposal, how have they informed/changed the development of the proposal so far and what will you be doing in future?

This section should give the key issues arising from the evaluation which will be included in the Committee report template.

There are numerous proposals but significant amongst them is a reduction in the revenue maintenance budgets for structures (highways) and property maintenance, assumptions about increased income from fees and additional trading, revenue benefits from investment in plant (recycling, welfare units) and equipment (LED lighting) and staffing cost savings where available without service impact. These have arisen from officer working groups, market analysis, service good practice, research of new technology, budget analysis and priorities. These have arisen through analysis, challenge and are now submitted for further consultation and scrutiny. Inherent within the exercise so far has been an assessment of the potential impact upon the protected characteristics and within the context of the Future Generations and Well being legislation and as far as possible preparing a set of proposals that are sustainable with least impact upon well being and equality albeit acknowledging that the council's priorities and the budget modelling inevitably place pressure upon many of the Operations service areas. This does not denigrate the importance of these services but acknowledges that the budgets must be adjusted by reduction or income to contribute to the budget modelling overall.

7. ACTIONS: As a result of completing this form are there any further actions you will be undertaking? Please detail them below, if applicable.

What are you going to do	When are you going to do it?	Who is responsible	Progress
Implementation of approved budget proposals	Wherever possible for commencement in April 2017	Various heads of service	Ongoing implementation monitoring

8. MONITORING: The impacts of this proposal will need to be monitored and reviewed. Please specify the date at which you will evaluate the impact, and where you will report the results of the review.

The impacts of this proposal will be evaluated on:	Budget approval in February 2017 and ongoing thereafter in line with budget monitoring protocols/frequencies.
